Competing Knowledges - Wissen im Widerstreit Anna Margaretha Horatschek.2020-06-22 Whatever societies accept as 'knowledge' is embedded in epistemological, institutional, political, and economic power relations. How is knowledge produced under such circumstances? What is the difference between general knowledge and the sciences? Can there be science without universal truth claims? Questions like these are discussed in eleven essays from the perspective of Sociology, Law, Cultural Studies, and the Humanities.

Autonomous Driving Markus Maurer,J. Christian Gerdes,Barbara Lenz,Hermann Winner.2016-05-21 This book takes a look at fully automated, autonomous vehicles and discusses many open questions: How can autonomous vehicles be integrated into the current transportation system with diverse users and human drivers? Where do automated vehicles fall under current legal frameworks? What risks are associated with automation and how will society respond to these risks? How will the marketplace react to automated vehicles and what changes may be necessary for companies? Experts from Germany and the United States define key societal, engineering, and mobility issues related to the automation of vehicles. They discuss the decisions programmers of automated vehicles must make to enable vehicles to perceive their environment, interact with other road users, and choose actions that may have ethical consequences. The authors further identify expectations and concerns that will form the basis for individual and societal acceptance of autonomous driving. While the safety benefits of such vehicles are tremendous, the authors demonstrate that these benefits will only be achieved if vehicles have an appropriate safety concept at the heart of their design. Realizing the potential of automated vehicles to reorganize traffic and transform mobility of people and goods requires similar care in the design of vehicles and networks. By covering all of these topics, the book aims to provide a current, comprehensive, and scientifically sound treatment of the emerging field of "autonomous driving."

The Global Sexual Revolution Gabriele Kuby.2019-10-24 This is the standard work on The Global Sexual Revolution. First published in 2012, it is translated into 15 languages and updated for this edition. The new ideology of gender denies the binary structure of human existence as man and woman and overthrows moral limitations of sexuality. This destroys marriage and family as the foundation of culture.

Governing the Climate-Energy Nexus Fariborz Zelli,Karin Bäckstrand,Naghmeh Nasiritousi,Jakob Skovgaard,Oscar Widerberg.2020-07-16 Analysing the interactions between institutions in the climate change and energy nexus, including the consequences for their legitimacy and effectiveness. Prominent researchers from political science and international relations compare three policy domains: renewable energy, fossil fuel subsidy reform, and carbon pricing. This title is also available as Open Access on Cambridge Core.

Fundamentals of Investment Appraisal Martina Röhrich.2014-09-09 How to make sound investment decisions: Fundamentals of Investment Appraisal, 2nd edition, is based on long-term experience with students and is written in an easily understood style. A case study has been constructed to illustrate all methods discussed. The goal of the book is to pace a sure way through the variety of methods in investment appraisal.

Mathematical basics are specifically explained in detail. The book shows clearly why there are different methods in investment appraisal and on where to focus in a given situation. As all methods are introduced by the same case study, it is easy to compare and evaluate the results. The statements in the text are further consolidated by abstracts and evaluations of each of the methods. Exercises with extensive solutions will lead to the confidence which is necessary for an ease of handling the investment appraisal techniques and for a good preparation for students' exams. German and international students at universities and other institutions of higher education will find this book an excellent systematic preparation for their exams.

Proofs and Refutations Imre Lakatos.2015-10-08 Imre Lakatos's Proofs and Refutations is an enduring classic, which has never lost its relevance. Taking the form of a dialogue between a teacher and some students, the book considers various solutions to mathematical problems and, in the process, raises important questions about the nature of mathematical discovery and methodology. Lakatos shows that mathematics grows through a process of improvement by attempts at proofs and critiques of these attempts, and his work continues to inspire mathematicians and philosophers aspiring to develop a philosophy of mathematics that accounts for both the static and the dynamic complexity of mathematical practice. With a specially commissioned Preface written by Paolo Mancosu, this book has been revived for a new generation of readers.

Who Owns Culture? Susan Scafidi.2005 It is not uncommon for white suburban youths to perform rap music, for New York fashion designers to ransack the world's closets for inspiration, or for Euro-American authors to adopt the voice of a geisha or shaman. But who really owns these art forms? Is it the community in which they were originally generated, or the culture that has absorbed them? While claims of authenticity or quality may prompt some consumers to seek cultural products at their source, the communities of origin are generally unable to exclude copyists through legal action. Like other works of unincorporated group authorship, cultural products lack protection under our system of intellectual property law. But is this legal vacuum an injustice, the lifeblood of American culture, a historical oversight, a result of administrative incapacity, or all of the above? Who Owns Culture? offers the first comprehensive analysis of cultural authorship and appropriation within American law. From indigenous art to Linux, Susan Scafidi takes the reader on a tour of the no-man's-land between law and culture, pausing to ask: What prompts us to offer legal protection to works of literature, but not folklore? What does it mean for a creation to belong to a community, especially a diffuse or fractured one? And is our national culture the product of Yankee ingenuity or cultural kleptomania? Providing new insights to communal authorship, cultural appropriation, intellectual property law, and the formation of American culture, this innovative and accessible guide greatly enriches future legal understanding of cultural production.

Collection Care/Sammlungspflege Gabriela Krist.2015-05-21 Prevention is an attempt to look into the future and have a positive influence on it - therefore it is one of the most important aspects in the area of collection care, the central, current field of applied research in conservation and restoration. With sustainability damage and loss are avoided, dangers averted and research conducted. Collection care is only successful, if the theory is appropriately implemented in museum practice.

Upheaval Navid Kermani.2017-05-09 By foot, in buses, prison vans and trains, a steady stream of refugees traveled from the Greek island of Lesbos into Europe. In the autumn of 2015, award-winning writer Navid Kermani decided to accompany them on the Balkan route. In this perceptive account from the front line of the refugee crisis, Kermani shows how a seemingly distant world in which war and conflict rage has suddenly collided with our own. Kermani describes the situation on the Turkish west coast where thousands of refugees live in the most desperate conditions, waiting to take the perilous journey across the Mediterranean. Then, on Lesbos, he observes the culture shock amongst those who have survived the ordeal by sea. He speaks to aid workers and politicians, but most importantly of all to the refugees themselves, asking those who have come from Syria, Iraq, Afghanistan and elsewhere what has driven them to risk everything and embark on the long and treacherous journey to Europe. With great sensitivity Kermani reveals, often through small details, the cultural and political upheaval that has caused people to uproot their lives, and at the same time shining a light on Europe's inadequate and at times openly hostile response to the refugees. Interspersed with powerful images by the acclaimed photographer Moises Saman, Upheaval is a much-needed human account of a crisis we cannot ignore.

Higher Education and Graduate Employment in Europe Harald Schomburg,Ulrich Teichler.2007-01-29 This book explores a noteworthy variety among economically advanced countries in the competences fostered by higher education, and the emphasis placed either on laying a broad basis of knowledge or direct preparation for professional tasks. In some countries, universities are closely involved in ensuring a rapid transition from student to employee; in others, students typically face a long period after graduation for the search of a suitable career.

Ecopolitics Verena Andermatt Conley.2006-07-13 Ecopolitics is a study of environmental awareness - or non-awareness - in contemporary French theory. Arguing that it is now impossible not to think in an ecological way, Verena Andermatt Conley traces the roots of today's concern for the environment back to the intellectual climate of the late 50s and 60s. The author considers key texts by influential figures such as Michael Serres, Paul Virilio, Gilles Deleuze and Felix Guattari, Michel de Certeau, Hélène Cixous and Luce Irigaray. Ecopolitics rehabilitates some ecological components of French intellectual thought of the past thirty years, and reassesses French poststructural thinkers who explicitly deal with ecology in their work.

Homo Sociologicus Ralf Dahrendorf.2022-02-09 First published in English as part of the Essays in the Theory of Society, this volume reissues the stand-alone Homo Sociologicus for which the author wrote a new introduction when it was originally published in 1973. The controversial book deals with the history, significance and limits of the category of social role and discusses the dilemma posed by homo sociologicus. The author shows that for society and sociology, socialization invariably means depersonalization, the yielding up of man's absolute individuality and liberty to the constraint and generality of social roles. This volume includes the essay, Sociology and Human Nature, written as a postscript to Homo Sociologicus.

Argumentation in Science Education Sibel Erduran,María Pilar Jiménez-Aleixandre.2007-12-06 Educational researchers are bound to see this as a timely work. It brings together the work of leading experts in argumentation in science education. It presents research combining theoretical and empirical perspectives relevant for secondary science classrooms. Since the 1990s, argumentation studies have increased at a rapid pace, from stray papers to a wealth of research exploring ever more sophisticated issues. It is this fact that makes this volume so crucial.

European Company Law Andrea Vicari.2021-03-08 The book provides students of European company law courses, scholars and practitioners with an overview. Although company law remains mainly regulated at the level of national laws, it has become important to obtain a systematic view of the main directives in the field of company law, the EU Court of Justice's jurisprudence, the European Model Company Act and the state of implementation of these directives in the member states of the Union. The book therefore contains, in addition to the illustration of the law laid down by EU legislative bodies and the related soft laws, detailed references to the most important domestic legislations and case laws, in order to make them known and usable as much as possible. Moreover, the book allows identifying the most relevant current legislative trends and the main historical reasons for divergences.

Logic Donald Kalish,Richard Montague,Gary Mar.1980-04 Logic: Techniques of Formal Reasoning, 2/e is an introductory volume that teaches students to recognize and construct correct deductions. It takes students through all logical steps--from premise to conclusion--and presents appropriate symbols and terms, while giving examples to clarify principles. Logic, 2/e uses models to establish the invalidity of arguments, and includes exercise sets throughout, ranging from easy to challenging. Solutions are provided to selected exercises, and historical remarks discuss major contributions to the theories covered.

Culture and Explosion Juri Lotman.2009 Demonstrates, with copious examples, how culture influences the way that humans experience 'reality'. This work is suitable for students and researchers in semiotics, cultural/literary studies and Russian studies worldwide, as well as anyone with an interest in understanding contemporary intellectual life.

Traditions in German-Speaking Mathematics Education Research Hans Niels Jahnke,Lisa Hefendehl-Hebeker.2019-02-13 This open access book shares revealing insights into the development of mathematics education research in Germany from 1976 (ICME 3 in Karlsruhe) to 2016 (ICME 13 in Hamburg). How did mathematics education research evolve in the course of these four decades? Which ideas and people were most influential, and how did German research interact with the international community? These questions are answered by scholars from a range of fields and in ten thematic sections: (1) a short survey of the development of educational research on mathematics in German speaking countries (2) subject-matter didactics, (3) design science and design research, (4) modelling, (5) mathematics and Bildung 1810 to 1850, (6) Allgemeinbildung, Mathematical Literacy, and Competence Orientation (7) theory traditions, (8) classroom studies, (9) educational research and (10) large-scale studies. During the time span presented here, profound changes took place in German-speaking mathematics education research. Besides the traditional fields of activity like subject-matter didactics or design science, completely new areas also emerged, which are characterized by various empirical approaches and a closer connection to psychology, sociology, epistemology and general education research. Each chapter presents a respective area of mathematics education in Germany and analyzes its relevance for the development of the research community, not only with regard to research findings and methods but also in terms of interaction with the educational system. One of the central aspects in all chapters concerns the constant efforts to find common ground between mathematics and education. In addition, readers can benefit from this analysis by comparing the development shown here with the mathematical education research situation in their own country.

Global perspectives on higher education and lifelong learners Maria Slowey,Hans Schuetze.2012-06-14 The global expansion of participation rates in higher education continue more or less unabated. However, while the concept of lifelong learning has figured prominently in national and international educational policy discourse for more than three decades, its implications for the field of higher education has remained relatively underdeveloped. This book focuses on a particular dimension of the lifelong learning: higher education for those who have not progressed directly from school to higher education. Some will embark on undergraduate programmes as mature students, part-time and/or distance students; others wish to return to higher education after having completed (or not completed) a previous academic programme, while increasing numbers participate in postgraduate and continuing studies for a complex mix of professional and personal reasons. Adopting a comparative and international longitudinal perspective which goes beyond a snapshot view by building on the cases of a core group of ten OECD countries, this timely book investigates the ways in which important new developments impacting on higher education crystallise around the lifelong learning agenda: new technology and open source resources; the changing role of the state and market in higher education; the blurring of public and private boundaries; issues of equity and access in a time of global economic turmoil; the increased emphasis on research and international league tables; the changing nature of the education; and, the complex interaction of international, national and regional expectations which governments and other stakeholders have of universities and other public and private institutions of higher education. While focusing on the situation in Canada, USA, Japan, Australia, New Zealand and a wide variety of European countries, the book also assesses the issues from the perspective of developing countries. Launched by the Irish Minister of Education, this timely book is a must read. Find out more here:

Making it tangible. Learning outcomes in science education Sascha Bernholt, Knut Neumann, Peter Nentwig. 2012 One of the central features in current educational reforms is a focus on learning outcomes. Many countries have established or revised standards to describe what teachers are supposed to teach and students are expected to learn. More recently, the emphasis has shifted to considerations of how standards can be operationalized in order to make the outcomes of educational efforts more tangible. This book is the result of a symposium held in Kiel, that was arranged by two science education groups, one at the IPN (Leibniz-Institute for Science and Mathematics Education at the University of Kiel) in Germany and the other at the University of York, UK. The seminar brought together renowned experts from 12 countries with different notions of the nature and quality of learning outcomes. The aim was to clarify central conceptions and approaches for a better understanding among the international science education community. The book is divided into five parts. In Part A, the organizers set the scene, describing the rationale for arranging the symposium. Part B provides a broad overview about different approaches, challenges, and pitfalls on the road to the clarification of meaningful and fruitful learning outcomes. The set of papers in Part C provides deep insights into different, although comparable approaches which aim to frame, to assess, and to promote learning and learning outcomes in science education. Smaller projects are presented as well as broad, coordinated national programs. The papers in Part D outline the individual historical development from different national perspectives, reflecting the deficits and problems that led to current reforms. Finally, a summary of the organizers analyses the conclusions from different vantage points.

Didactical Phenomenology of Mathematical Structures Hans Freudenthal. 2006-04-11 The launch of a new book series is always a challenging event not only for the Editorial Board and the Publisher, but also, and more particularly, for the first author. Both the Editorial Board and the Publisher are delighted that the first author in this series is well able to meet the challenge. Professor Freudenthal needs no introduction to anyone in the Mathematics Education field and it is particularly fitting that his book should be the first in this new series because it was in 1968 that he, and Reidel, produced the first issue of the journal *Educational Studies in Mathematics*. Breaking fresh ground is therefore nothing new to Professor Freudenthal and this book illustrates well his pleasure at such a task. To be strictly correct the 'ground' which he has broken here is not new, but as with Mathematics as an Educational Task and Weeding and Sowing, it is rather the novelty of the manner in which he has carried out his analysis which provides us with so many fresh perspectives. It is our intention that this new book series should provide those who work in the emerging discipline of mathematics education with an essential resource, and at a time of considerable concern about the whole mathematics curriculum this book represents just such a resource. Kritisch denken - treffend argumentieren Paul Walter, Petra Wenzl. 2015-08-07 Das Übungsbuch richtet sich an Studierende aller Fachrichtungen, die ihr kritisch analytisches Denken und ihre argumentative Kompetenz stärken möchten, um sich mit grundlegenden Anforderungen im Studium auseinanderzusetzen. Weiterhin wendet sich das Buch an Lehrkräfte, die ihre Schülerinnen und Schülern aus der gymnasialen Oberstufe in wissenschaftliches Denken einführen und auf Herausforderungen des Studiums vorbereiten. Die Schulung kritisch analytischen Denkens kann dazu beitragen, sich über strittige Sachverhalte im Alltag und vor allem in wissenschaftlichen Kontexten zu verständigen. Hierzu zählt auch, über Werte und moralische Fragen vernunftgeleitet, also sachlich angemessen und fair debattieren zu lernen.

Wittgenstein and Hegel Jakub Mácha, Alexander Berg. 2019-06-17 This book brings together for the first time two philosophers from different traditions and different centuries. While Wittgenstein was a focal point of 20th century analytic philosophy, it was Hegel's philosophy that brought the essential discourses of the 19th century together and developed into the continental tradition in 20th century. This now-outdated conflict took for granted Hegel's and Wittgenstein's opposing positions and is being replaced by a continuous progression and differentiation of several authors, schools, and philosophical traditions. The development is already evident in the tendency to identify a progression from a 'Kantian' to a 'Hegelian phase' of analytical philosophy as well as in the extension of right and left Hegelian approaches by modern and postmodern concepts. Assessing the difference between Wittgenstein and Hegel can outline intersections of contemporary thinking.

Cognitive and Instructional Processes in History and the Social Sciences Mario Carretero, James F. Voss. 2012-12-06 This volume is a direct result of an international conference that brought together a number of scholars from Europe and the United States to discuss their ideas and research about cognitive and instructional processes in history and the social sciences. As such, it fills a major gap in the study of how people learn and reason in the context of particular subject matter domains and how instruction can be improved in order to facilitate better learning and reasoning. Previous cognitive work on subject matter learning has been focused primarily upon mathematics and physics; the present effort provides the first such venture examining the history and social science domains from a cognitive perspective. The different sections of the book cover topics related to comprehension, learning, and instruction of history and the social sciences, including: *the development of some social sciences concepts, *the teaching of social sciences -- problems and questions arising from this cognitive perspective of learning, *the comprehension and learning from historical texts, *how people and students understand historical causality and provide explanations of historical events, and *the deduction processes involved in reasoning about social sciences contents. This volume will be useful for primary and secondary school teachers and for cognitive and instructional researchers interested in problem solving and reasoning, text comprehension, domain-specific knowledge acquisition and concept development.

Literary Culture in the Holy Roman Empire, 1555-1720 James A. Parente, Richard E. Schade, George C. Schoolfield. 1991 These essays discuss approaches to early modern literature in central Europe, focusing on four pivotal areas: connections between humanism and the new scientific thought; the relationship of late sixteenth- and early seventeenth-century literature to ancient and Renaissance European traditions; the social and political context of early modern writing; and the poets' self-consciousness about their work. As a whole, the volume argues that early modern writing in central Europe should not be viewed solely as literature but as the textual product of specific social, political, educational, religious, and economic circumstances. The contributors are Judith P. Aikin, Barbara Becker-Cantarino, Thomas W. Best, Dieter Breuer, Barton W. Browning, Gerald Gillespie, Anthony Grafton, Gerhart Hoffmeister, Uwe-K. Ketelsen, Joseph Leighton, Ulrich Mache, Michael M. Metzger, James A. Parente, Jr., Richard Erich Schade, George C. Schoolfield, Peter Skrine, and Ferdinand van Ingen.

A Theory of Legal Argumentation Robert Alexy, Ruth Adler, Neil MacCormick. 2009-12-10 What is to be understood by 'rational legal argument'? To what extent can legal reasoning be rational? Is the demand for rationality in legal affairs justified? And what are the criteria of rationality in legal reasoning? The answer to these questions is not only of interest to legal theorists and philosophers of law. They are pressing issues for practicing lawyers, and a matter of concern for every citizen active in the public arena. Not only the standing of academic law as a scientific discipline, but also the legitimacy of judicial decisions depends on the possibility of rational legal argumentation. A theory of legal reasoning which tries to answer these questions pre-supposes a theory of general practical reasoning. This theory is the subject matter of the first two parts of the book. The result is a theory of general practical discourse which rests on insights of both Anglo-Saxon and German philosophy. It forms the basis of the theory of rational legal discourse, which is developed in the third part of this book.

Strategic Retail Management and Brand Management Doris Berger-Grabner. 2021-10-25 The retail industry and associated business models have gone through a significant phase of disruption. The rapid emergence of new technologies, digital business models and the evolution of social media platforms as a new sales channel continue to influence the sector. Key contextual or external trends will affect and shape the retail landscape in the years to come. Therefore, it seems important to prepare for this situation and be ready with a head start in terms of knowledge. This textbook provides its readers basic knowledge about the national and international retail sector and gives important insights into trends and developments. It deals with key trends, in particular new patterns of personal consumption, evolving geopolitical dynamics, technological advancements and structural industry shifts. Moreover, it explains why it is so important that retailers use these trends, adapt their retail strategies and tactics, create strong brands and come up with innovative, new ways of doing business. Today we are living in a challenging time for retail. This textbook tries to give insights and explanations to better understand these challenges and provide managerial

implications.

Kritisches Denken und Argumentieren Otto Kruse.2017-10-23 Kritisches Denken wird heutzutage von Studierenden häufig eingefordert, ohne dass ihnen erklärt wird, was genau darunter zu verstehen ist. Otto Kruse zeigt auf verständliche Art und Weise, was kritisches Denken bedeutet und wie man seine eigenen Meinungen prüft, begründet und kommuniziert. Dabei setzt das Buch an den konkreten Aufgaben und Fragen an, die sich im Studium beim Argumentieren, Schreiben und Lernen ergeben. Die LeserInnen werden verstehen lernen, wie ihr eigener Verstand funktioniert und wie sie ihn gezielt weiterentwickeln können. Kritisches Denken heißt nicht einfach, andere zu kritisieren, sondern Verantwortung für die Qualität des eigenen Denkens zu übernehmen - und genau das lernen Studierende mit diesem Buch!

The Global Trump Paul J.J. Welfens.2019-08-31 This book is able to explain and analyze what has eluded both scholars and thought leaders in business and the media - how and why populism has grabbed center stage. Highly recommendable. -David B. Audretsch, Indiana University Bloomington, USA Welfens provides valuable insight into US politics and describes the strategic options for Europe going forward. -Barry Eichengreen, University of California, Berkeley, USA With great skill Welfens traces the implications of US populism for the global economic system. - Jeffrey D. Sachs, Columbia University, USA This critique of Trump's fiscal and international trade policies and their weak intellectual basis deserves the attention of US and European readers alike -Richard H. Tilly, University of Münster, Germany What lies behind the Trump victory of 2016 and the US' new raft of economic policies? Is a populist presidency in the United States likely to be a temporary phenomenon or a structural long-term challenge? In an era of declining multilateralism, what can the US still stand to learn from Europe, where several countries have effective lifetime economic welfare equal to that of the US - and what can the EU learn from the US in return? Furthermore, what international economic dynamics can be expected from the Sino-US trade conflict and can globalization be maintained? In this timely volume, Paul Welfens provides a rare, clear-sighted and scholarly analysis of the global problems created by Trump's protectionism and economic policy. He leverages his understanding of these problems to make concrete policy suggestions that could help prevent the world economy from falling back into a variant of the Great Powers regime of the late nineteenth century.

Key Concepts in Geography Nicholas Clifford, Sarah Holloway, Stephen P Rice, Gill Valentine.2008-12-12 This book clearly outlines key concepts that all geographers should readily be able to explain. It does so in a highly accessible way. It is likely to be a text that my students will return to throughout their degree. - Dr Karen Parkhill, Bangor University The editors have done a fantastic job. This second edition is really accessible to the student and provides the key literature in the key geographical terms of scale, space, time, place and landscape. - Dr Elias Symeonakis, Manchester Metropolitan University An excellent introductory text for accessible overviews of key concepts across human and physical geography. - Professor Patrick Devine-Wright, Exeter University Including ten new chapters on nature, globalization, development and risk, and a new section on practicing geography, this is a completely revised and updated edition of the best-selling, standard student resource. Key Concepts in Geography explains the key terms - space, time, place, scale, landscape - that define the language of geography. It is unique in the reference literature as it provides in one volume concepts from both human geography and physical geography. Four introductory chapters on different intellectual traditions in geography situate and introduce the entries on the key concepts. Each entry then comprises a short definition, a summary of the principal arguments, a substantive 5,000-word discussion, the use of real-life examples, and annotated notes for further reading. Written in an accessible way by established figures in the discipline, the definitions provide thorough explanations of all the core concepts that undergraduates of geography must understand to complete their degree.

These are some of our favorite free e-reader apps: Kindle Ereader App: This app lets you read Kindle books on all your devices, whether you use Android, iOS, Windows, Mac, BlackBerry, etc. A big advantage of the Kindle reading app is that you can download it on several different devices and it will sync up with one another, saving the page you're on across all your devices. eBook Writing: This category includes topics like cookbooks, diet books, self-help, spirituality, and fiction. Likewise, if you are looking for a basic overview of a resume from complete book, you may get it here in one touch. The blog at FreeBooksHub.com highlights newly available free Kindle books along with the book cover, comments, and description. Having these details right on the blog is what really sets FreeBooksHub.com apart and make it a great place to visit for free Kindle books. Talking Book Services. The Mississippi Library Commission serves as a free public library service for eligible Mississippi residents who are unable to read ... Because this site is dedicated to free books, there's none of the hassle you get with filtering out paid-for content on Amazon or Google Play Books. We also love the fact that all the site's genres are presented on the homepage, so you don't have to waste time trawling through menus. Unlike the bigger stores, Free-Ebooks.net also lets you sort results by publication date, popularity, or rating, helping you avoid the weaker titles that will inevitably find their way onto open publishing platforms (though a book has to be really quite poor to receive less than four stars). offers an array of book printing services, library book, pdf and such as book cover design, text formatting and design, ISBN assignment, and more. Want to listen to books instead? LibriVox is home to thousands of free audiobooks, including classics and out-of-print books. The eReader Cafe has listings every day for free Kindle books and a few bargain books. Daily email subscriptions and social media profiles are also available if you don't want to check their site every day. If you want to stick to PDFs only, then you'll want to check out PDFBooksWorld. While the collection is small at only a few thousand titles, they're all free and guaranteed to be PDF-optimized. Most of them are literary classics, like The Great Gatsby, A Tale of Two Cities, Crime and Punishment, etc.
