**American Dinosaur Abroad** Ilja Nieuwland.2019-04-30 In early July 1899, an excavation team of paleontologists sponsored by Andrew Carnegie discovered the fossil remains in Wyoming of what was then the longest and largest dinosaur on record. Named after its benefactor, the *Diplodocus carnegii*—or Dippy, as it's known today—was shipped to Pittsburgh and later mounted and unveiled at the Carnegie Museum of Natural History in 1907. Carnegie's pursuit of dinosaurs in the American West and the ensuing dinomania of the late nineteenth century coincided with his broader political ambitions to establish a lasting world peace and avoid further international conflict. An ardent philanthropist and patriot, Carnegie gifted his first plaster cast of Dippy to the British Museum at the behest of King Edward VII in 1902, an impulsive diplomatic gesture that would result in the donation of at least seven reproductions to museums across Europe and Latin America over the next decade, in England, Germany, France, Austria, Italy, Russia, Argentina, and Spain. In this largely untold history, Ilja Nieuwland explores the influence of Andrew Carnegie's prized skeleton on

European culture through the dissemination, reception, and agency of his plaster casts, revealing much about the social, political, cultural, and scientific context of the early twentieth century.

It is about a young girl, who is nervous in anticipation of her trip to the Natural History Museum to visit the dinosaurs. Unable to sleep the night before, Millie winds herself up to believe that she will be gobbled up by dinosaurs during her visit. She worries and worries all the way to the museum. On arrival her mischievous little sister Sophia zooms up the steps of the museum, as Millie fearfully contemplates the size of the dinosaurs based on the huge size of the museum. This character theme will resonate throughout the story. Millie cautiously enters the museum to find Dippy the Diplodocus looming overhead. She assumes, wrongly of course, that Dippy must have enormous teeth. While contemplating this, her worst fears are potentially brought to life by the noise and chaos which follows her sister Sophia everywhere. Sophia can be seen in the background zooming back and forth. Disaster follows as Sophia crashes straight into the Dippy exhibit, bones and dust fly everywhere. Next, Mummy arrives to calm the storm of fears with interesting facts and assurances about Dippy the herbivore and the dinosaur's ultimate extinction. Once calmed Millie is encouraged by Mummy to visit the other dinosaurs. The book concludes with a challenge to readers Are you brave enough to visit the Natural History Museum?

The Second Jurassic Dinosaur Rush Paul D. Brinkman.2010-07-15 The so-called “Bone Wars” of the 1880s, which pitted Edward Drinker Cope against Othniel Charles Marsh in a frenzy of fossil collection and discovery, may have marked the introduction of dinosaurs to the American public, but the second Jurassic dinosaur rush, which took place around the turn of the twentieth century, brought the prehistoric beasts back to life. These later expeditions—which involved new competitors

hailing from leading natural history museums in New York, Chicago, and Pittsburgh—yielded specimens that would be reconstructed into the colossal skeletons that thrill visitors today in museum halls across the country. Reconsidering the fossil speculation, the museum displays, and the media frenzy that ushered dinosaurs into the American public consciousness, Paul Brinkman takes us back to the birth of dinomania, the modern obsession with all things Jurassic. Featuring engaging and colorful personalities and motivations both altruistic and ignoble, *The Second Jurassic Dinosaur Rush* shows that these later expeditions were just as foundational—if not more so—to the establishment of paleontology and the budding collections of museums than the more famous Cope and Marsh treks. With adventure, intrigue, and rivalry, this is science at its most swashbuckling. *The Dinosaur Atlas* Don Lessem.2003 An up-close look at the habitats of a variety of dinosaurs.
