**Science, Pseudo-Science and Society** Marsha Hanen, Margaret Osler, Robert Weyant. 2006-01-01 This volume collects the papers presented at a conference on "Science, Pseudo-science and Society," sponsored by the Calgary Institute for the Humanities and held at the University of Calgary, May 10-12, 1979. More than many such collections, this one preserves some trace of the intellectual excitement which surrounded this gathering of scholars. A primary inspiration for the symposium on "Science, Pseudoscience, and Society" was a growing awareness of the crucial role the study of pseudo-science plays in the areas of contemporary scholarship which are concerned with the nature of science and its relationship to broader social issues. This volume is organized around three major questions concerning the relationships among science, pseudo-science, and society. The papers in the first section address the question of whether it is possible to draw a sharp demarcation between science and pseudo-science and what the criteria of that demarcation might be. The papers in the second section, recognizing the historical importance of various of the pseudo-sciences, consider their impact—positive or negative—on the development of the sciences themselves. The papers in the third section deal with the question of the relationship between the sciences and pseudo-sciences, on the one hand, and social factors on the other.

**International Corporate Governance After Sarbanes-Oxley** Paul Ali, Greg N. Gregoriou. 2011-07-28 The Sarbanes-Oxley Act has been one of the most significant developments in corporate and securities regulation since the New Deal. This collection of important articles would be a valuable resource for anyone seeking to understand Sarbanes-Oxley's far-reaching effects on corporate governance in the United States and elsewhere. —Jesse Fried, coauthor of *Pay Without Performance: The Unfulfilled Promise of Executive Compensation* and Professor of Law at the University of California, Berkeley The editors have assembled the latest cutting-edge research on international corporate governance by respected academics in this field. In this handbook, the editors deal with all aspects of the significant legislative changes to corporate governance regulation. It introduces the reader to the new rules that will certainly improve the reliability and the accuracy of disclosures made by corporations. The book comes at the right moment with the recent scandals such as Enron, which will educate all readers especially shareholders of corporate stock. —Komlan Sedzro, Professor of Finance, University of Quebec at Montreal Today, corporate governance is a topic at the center of public policy debate

in most industrialized countries. The range of concerns; the variety of approaches; and their tendency to converge in some areas or diverge in others (not always in the right directions) are emphatically demonstrated by these essays. There is material here of enormous interest for scholars of comparative law and economic regulation. And significantly, the presentation of essays from legal, financial, and regulatory viewpoints demonstrates the growing practical as well as theoretical utility of interdisciplinary work in this area. Professors Ali and Gregoriou are to be warmly congratulated for their skill and initiative in assembling an important publication, as well as for their own contributions to interdisciplinary scholarship. —R. P. Austin, BA, LL.M (Sydney), DPhil (Oxon), Supreme Court of New South Wales This very international collection emphasizes the economic line of descent, while including legal and socio-legal contributions. It fills a very important gap in our empirical knowledge of corporate governance. It is accessible and comprehensive and will greatly assist readers from all relevant disciplines, who are trying to discern the shape of corporate governance as a mature field. —Dimitry Kingsford Smith, Professor of Law, University of New South Wales

*One Welfare in Practice* Tanya Stephens. 2021-10-25 Animal welfare has long been recognised as central to the role of the veterinary professional, but this is increasingly aligned with the welfare of humans and the broader environment in which we co-exist. This is the first book dedicated to the role of the veterinarian in One Welfare, a concept that recognises the interconnections between animal welfare, human wellbeing, and the environment. The book demonstrates, through a wide range of international case studies, why professional ethics and the use of good evidence is integral to this role. Contributors bring a rich variety of writings, each with their own perception of the role of the veterinarian in improving animal welfare and human wellbeing. *One Welfare in Practice: The Role of the Veterinarian* emphasises the importance of interdisciplinary collaboration and solutions: it is essential that veterinary practitioners recognise when other professionals or disciplines need to be consulted to benefit both animals and humans. With its multiple, fascinating approaches to One Welfare, this book will inform and inspire the veterinarian to find areas where collaborative action reaps the greatest rewards. This unique book shows how veterinarians can and are contributing to improving animal and human welfare, offering practical advice as to how the profession can further engage in One Welfare in a range of settings.

*Echinoderms* Michel Jangoux. 2020-08-18 This book is an outcome of the European colloquium on Echinoderms held at Brussels in 1979. **Community Adaptation and Vulnerability in Arctic Regions** Grete K. Hovelsrud, Barry Smit. 2010-09-08 The 'Year' That Changed How We View the North This book is about a new theoretical approach that transformed the field of Arctic social studies and about a program called International Polar Year 2007–2008 (IPY) that altered the position of social research within the broader polar science. The concept for IPY was developed in 2003–2005; its vision was for researchers from many nations to work together to gain cross-disciplinary insight into planetary processes, to explore and increase our understanding of the polar regions, the Arctic and Antarctica, and of their roles in the global system. IPY 2007–2008, the fourth program of its kind, followed in the footsteps of its predecessors, the first IPY in 1882–1883, the second IPY in 1932–1933, and the third IPY (later renamed to 'International Geophysical Year' or IGY) in 1957–1958. All earlier IPY/IGY have been primarily geophysical initiatives, with their focus on meteorology, atmospheric and geomagnetic observations, and with additional emphasis on glaciology and sea ice circulation. As such, they excluded socio-economic disciplines and polar indigenous people, often deliberately, except for limited ethnographic and natural history collection work conducted by some expeditions of the first IPY. That once dominant vision biased heavily towards geophysics, oceanography, and ice-sheets, left little if any place for people, that is, the social sciences and the humanities, in what has been commonly viewed as the 'hard-core' polar research.

**Disorders of Hemoglobin** Martin H. Steinberg, Bernard G. Forget, Douglas R. Higgs, David J. Weatherall. 2009-08-17 This book is a completely revised new edition of the definitive reference on disorders of hemoglobin. Authored by world-renowned experts, the book focuses on basic science aspects and clinical features of hemoglobinopathies, covering diagnosis, treatment, and future applications of current research. While the second edition continues to address the important molecular, cellular, and genetic components, coverage of clinical issues has been significantly expanded, and there is more practical emphasis on diagnosis and management throughout. The book opens with a review of the scientific underpinnings. Pathophysiology of common hemoglobin disorders is discussed next in an entirely new section devoted to vascular biology, the erythrocyte membrane, nitric oxide biology, and hemolysis. Four sections deal with  $\alpha$  and  $\beta$  thalassemia, sickle cell disease, and related conditions, followed by special topics. The second edition concludes with current and developing approaches to treatment, incorporating new agents for iron chelation, methods to induce fetal hemoglobin production, novel treatment approaches, stem cell transplantation, and progress in gene therapy.

The Unified Neutral Theory of Biodiversity and Biogeography (MPB-32) Stephen P. Hubbell. 2011-06-27 Despite its supreme importance and the threat of its global crash, biodiversity remains poorly understood both empirically and theoretically. This ambitious book presents a new, general neutral theory to explain the origin, maintenance, and loss of biodiversity in a biogeographic context. Until now biogeography (the study of the geographic distribution of species) and biodiversity (the study of species richness and relative species abundance) have had largely disjunct intellectual histories. In this book, Stephen Hubbell develops a formal mathematical theory that unifies these two fields. When a speciation process is incorporated into Robert H. MacArthur and Edward O. Wilson's now classical theory of island biogeography, the generalized theory predicts the existence of a universal, dimensionless biodiversity number. In the theory, this fundamental biodiversity number, together with the migration or dispersal rate, completely determines the steady-state distribution of species richness and relative species abundance on local to large geographic spatial scales and short-term to evolutionary time scales. Although neutral, Hubbell's theory is nevertheless able to generate many nonobvious, testable, and remarkably accurate quantitative predictions about biodiversity and biogeography. In many ways Hubbell's theory is the ecological analog to the neutral theory of genetic drift in genetics. The unified neutral theory of biogeography and biodiversity should stimulate research in new theoretical and empirical directions by ecologists, evolutionary biologists, and biogeographers.

**Ban Wang Hai** J. P. Pautreau, Patricia Mornais, Tasana Doy-Asa. 2003 Excavations at the Ban Wang Hai archaeological site at Muang district, Lamphun province, northern Thailand, revealed numerous graves of adults, infants and newborns, dating back more than 2000 years. Many graves were accompanied by items such as iron tools, bronze ornaments, glass beads, and clay pots, providing fascinating new insights into a little-known period of prehistory in this part of Southeast Asia. The rarity of such finds within this region, and the quality of their condition, mark this site as one of great archaeological interest. The Ban Wang Hai site was studied between 1996 and 1998 as the second part of a cooperative undertaking between the Fine Arts Department of Thailand and the French government represented by the Guimet Museum in Paris, the National Center of Scientific Research, and the Ministry of Foreign Affairs. The first part of the Thai-French Prehistoric Research Project, from 1985-1995, studied the Paleolithic culture at the Ob Luang archaeological site at Hot district, Chiang Mai province. The project was undertaken by a team led by French archaeologists Jean-Pautreau and Patricia Mornais, in association with Tasana Doy-Asa of the Division of Archaeology, Fine Arts Department, Thailand.--BOOK JACKET.

**Music-Dance** Patrizia Veroli, Gianfranco Vinay. 2019-12-12 Music-Dance explores the identity of choreomusical work, its complex authorship and its modes of reception as well as the cognitive processes involved in the reception of dance performance. Scholars of dance and music analyse the ways in which a musical score changes its prescriptive status when it becomes part of a choreographic project, the encounter between sound and motion on stage, and the intersection of listening and seeing. As well as being of interest to musicologists and choreologists considering issues such as notation, multimedia and the analysis of performance, this volume will appeal to scholars interested in applied research in the fields of cognition and neuroscience. The line-up of authors comprises representative figures of today's choreomusicology, dance historians, scholars of twentieth-century composition and specialists in cognitive science and performance studies. Among the topics covered are multimedia and the analysis of performance; the notational practice of choreographers and the parallel attempts of composers to find a graphic representation for musical gestures; and the experience of dance as a paradigm for a multimodal perception, which is investigated in terms of how the association of sound and movement triggers emotions and specific forms of cognition.

*The Surgery-First Orthognathic Approach* Jong-Woo Choi, Jang Yeol Lee. 2021-01-20 This book is a comprehensive guide to the surgery-first orthognathic approach for patients with malocclusion and skeletal disharmony, which has been successfully applied by the authors in their practices over the past 15 years. The approach breaks with the time-tested principles of traditional orthognathic surgery in that corrective bone surgery is performed first, without the removal of dental compensations, followed by orthodontic finishing. All aspects are covered with the aid of numerous illustrations, the aim being to provide surgeons with a systematic educational tool that will enable them to introduce the approach into their own practice. In addition, the book addresses one of the hot issues in orthodontics, occlusal plane-altering orthognathic surgery, in which surgical modification of the occlusal plane is employed to treat various types of dentofacial deformity and improve facial proportions. This promises to become a very powerful tool in modern orthognathic surgery.
