*Process Discovery Best Practices Using IBM Blueworks Live* Joshua King, Nachiappan Chidambaram, Peter Lee, Philipp Schume, David Teran, IBM Redbooks. 2014-10-29 Business processes and decisions are the backbone of every company, from the small to the Fortune 50; it is how the business runs. It is these processes and decisions that can create competitive advantage, help a company react more quickly to changing trends, or drag them down because the processes do not serve the business and allow agility. The first step in building business agility is to understand how the business works today; What are my processes? What are the decisions we are making and how do we make them? Understanding these processes and decisions can allow a company to improve, streamline, and increase efficiency. Capturing business processes can be a daunting task. Adding to that burden is learning the tool of choice for capturing those processes. This book helps the audience ramp up more quickly to a fully functional process analyst by explaining all of the features of IBM Blueworks Live™ and how best to use them. This IBM® Redpaper™ was written with a non-technical audience in mind. It is intended to help business users, subject matter experts, business analysts, and business managers get started with discovering, documenting, and analyzing the processes and decisions that are key to their company's business operations.

**Deliver Modern UI for IBM BPM with the Coach Framework and Other Approaches** Rackley Boren, Eric Ducos, Ge Gao, Thalia Hooker, Matthew Oatts, Paul Pacholski, Dennis Parrott, Claudio Tagliabue, IBM Redbooks.2017-05-08 IBM® Coach Framework is a key component of the IBM Business Process Manager (BPM) platform that enables custom user interfaces to be easily embedded within business process solutions. Developer tools enable process authors to rapidly create a compelling user experience (UI) that can be delivered to desktop and mobile devices. IBM Process Portal, used by business operations to access, execute, and manage tasks, is entirely coach-based and can easily be configured and styled. A corporate look and feel can be defined using a graphical theme editor and applied consistently across all process applications. The process federation capability enables business users to access and execute all their tasks using a single UI without being aware of the implementation or origin. Using Coach Framework, you can embed coach-based UI in other web applications, develop BPM UI using alternative UI technology, and create mobile applications for off-line working. This IBM Redbooks® publication explains how to fully benefit from the power of the Coach Framework. It focuses on the capabilities that Coach

Framework delivers with IBM BPM version 8.5.7. The content of this document, though, is also pertinent to future versions of the application.
