Mind and Media Patricia M. Greenfield.2014-11-20 Patricia M. Greenfield was one of the first psychologists to present new research on how various media can be used to promote social growth and thinking skills. In this now classic, she argues that each medium can make a contribution to development, that each has strengths and weaknesses, and that the ideal childhood environment includes a multimedia approach to learning. In the Introduction to the Classic Edition, Greenfield shows how the original edition set themes that have extended into contemporary research on media and child development, and includes an explanation of how the new media landscape has changed her own research and thinking.

Modeling Irony Inés Lozano-Palacio,Francisco José Ruiz de Mendoza Ibáñez.2022-02-15 This book adopts a broad cognitive-pragmatic perspective on irony which sees ironic meaning as the result of complex inferential activity arising from conflicting conceptual scenarios. This view of irony is the basis for an analytically productive integrative account capable of bridging gaps among disciplines and of recontextualizing and solving some controversies. Among the topics covered in its pages, readers will find an overview of previous linguistic and non-linguistic approaches. They will also find definitional and taxonomic criteria, an exhaustive exploration of the elements of the ironic act, and a study of their complex forms of interaction. The book also explores the relationship between irony, banter and sarcasm, and it studies how irony interacts with other figurative uses of language. Finally, the book spells out the conditions for "felicitous" irony and re-interprets traditional ironic types (e.g., Socratic, rhetoric, satiric, etc.), in the light of the unified approach it proposes.

Just for Fun Linus Torvalds,David Diamond.2002-06-04 Once upon a time Linus Torvalds was a skinny unknown, just another nerdy Helsinki techie who had been fooling around with computers since childhood. Then he wrote a groundbreaking operating system and distributed it via the Internet -- for free. Today Torvalds is an international folk hero. And his creation LINUX is used by over 12 million people as well as by companies such as IBM. Now, in a narrative that zips along with the speed of e-mail, Torvalds gives a history of his renegade software while candidly revealing the quirky mind of a genius. The result is an engrossing portrayal of a man with a revolutionary vision,

who challenges our values and may change our world.

Mappings in Thought and Language Gilles Fauconnier.1997-06-13 Meaning in everyday thought and language is constructed at lightning speed. We are not conscious of the staggering complexity of the cognitive operations that drive our simplest behavior. This 1997 book examines a central component of meaning construction: the mappings that link mental spaces. A deep result of the research is that the same principles operate at the highest levels of scientific, artistic, and literary thought, and at the lower levels of elementary understanding and sentence meaning. Some key cognitive operations are analogical mappings, conceptual integration and blending, discourse management, induction and recursion. The analyses are based on a rich array of attested data in ordinary language, humor, action and design, science, and narratives. Phenomena that receive attention include counterfactuals; time, tense, and mood; opacity; metaphor; fictive motion; grammatical constructions; quantification over cognitive domains.

Facing Forward Sajitha Bashir,Marlaine Lockheed,Elizabeth Ninan,Jee-Peng Tan.2018-09-17 While everybody recognizes the development challenges facing Sub-Saharan Africa, few have put together coherent plans that offer real hope for any feasible and general improvement. Facing Forward combines an evidence-based plan that not only recognizes the deep problems but provides specific prescriptions for dealing with the problems. In the simplest version, focus on the skills of the people and do it in a rational and achievable manner. †“ Eric Hanushek, Paul and Jean Hanna Senior Fellow, Hoover Institute, Stanford University This book offers a clear perspective on how to improve learning in basic education in Sub- Saharan Africa, based on extremely rigorous and exhaustive analysis of a large volume of data. The authors shine a light on the low levels of learning and on the contributory factors. They have not hesitated to raise difficult issues, such as the need to implement a consistent policy on the language of instruction, which is essential to ensuring the foundations of learning for all children. Using the framework of “From Science to Service Delivery,†? the book urges policy makers to look at the entire chain from policy design, informed by knowledge adapted to the local context, to implementation. Facing Forward: Schooling for Learning in Africa is a unique addition to the literature that is relevant for African policy makers and stakeholders. †“ Professor Hassana Alidou, Ambassador of the Republic of Niger to the United States and Canada As the continent gears itself up to provide universal basic education to all its children by 2030, it has to squarely address the challenge of how to improve learning. Facing Forward helps countries to benchmark themselves against each other and to identify concrete lines of action. It forces policy makers to think “where do I go from here?†? “what do I do differently?†? and to examine the hierarchy of interventions that can boost learning. It rightly urges Ministries of Education to build capacity through learning by doing and continuous adaptation of new knowledge to the local context. Facing Forward will unleash frank conversations about the profound reforms that are required in education policy and service delivery to ensure learning for every child on the continent. †“ Dr. Fred Matiang’I, Cabinet Secretary for the Interior and Coordination of National Government, Government of Kenya (former Cabinet Secretary for Education) Facing Forward couldn’t have come at a more opportune time as countries in the region, including Mauritius, focus more on learning outcomes rather than simply on inputs and processes in education systems. The book underscores the important point that African countries need not exclusively model themselves on high-performing education systems in the world. Much can as well be learnt from other countries at the same level of development, or lower, by virtue of the challenges they have faced and successfully overcome. This presents opportunities for greater peer-sharing and networking with these countries. Indeed a number of key focus areas are highlighted in the book that demonstrate good practices worthy of being emulated. These cover domains as diverse as enabling factors leading to improved student progression, strengthened teacher capacity, increased budgetary allocation with a focus on quality, as well as improved technical capacity of implementing agencies in the region. †“ Hon. (Mrs.) Leela Devi Dookun-Luchoomun, Minister of Education and Human Resources, Tertiary Education and Scientific Research, Republic of Mauritius

Injection Molding Handbook D.V. Rosato,Marlene G. Rosato.2012-12-06 This third edition has

been written to thoroughly update the coverage of injection molding in the World of Plastics. There have been changes, including extensive additions, to over 50% of the content of the second edition. Many examples are provided of processing different plastics and relating the results to critical factors, which range from product design to meeting performance requirements to reducing costs to zero-defect targets. Changes have not been made that concern what is basic to injection molding. However, more basic information has been added concerning present and future developments, resulting in the book being more useful for a long time to come. Detailed explanations and interpretation of individual subjects (more than 1500) are provided, using a total of 914 figures and 209 tables. Throughout the book there is extensive information on problems and solutions as well as extensive cross referencing on its many different subjects. This book represents the ENCYCLOPEDIA on IM, as is evident from its extensive and detailed text that follows from its lengthy Table of CONTENTS and INDEX with over 5200 entries. The worldwide industry encompasses many hundreds of useful plastic-related computer programs. This book lists these programs (ranging from operational training to product design to molding to marketing) and explains them briefly, but no program or series of programs can provide the details obtained and the extent of information contained in this single sourcebook.

Analyzing Social Media Networks with NodeXL Derek Hansen, Ben Shneiderman, Marc A. Smith. 2010-09-14 Analyzing Social Media Networks with NodeXL offers backgrounds in information studies, computer science, and sociology. This book is divided into three parts: analyzing social media, NodeXL tutorial, and social-media network analysis case studies. Part I provides background in the history and concepts of social media and social networks. Also included here is social network analysis, which flows from measuring, to mapping, and modeling collections of connections. The next part focuses on the detailed operation of the free and open-source NodeXL extension of Microsoft Excel, which is used in all exercises throughout this book. In the final part, each chapter presents one form of social media, such as e-mail, Twitter, Facebook, Flickr, and Youtube. In addition, there are descriptions of each system, the nature of networks when people interact, and types of analysis for identifying people, documents, groups, and events. Walks you through NodeXL, while explaining the theory and development behind each step, providing takeaways that can apply to any SNA. Demonstrates how visual analytics research can be applied to SNA tools for the mass market. Includes case studies from researchers who use NodeXL on popular networks like email, Facebook, Twitter, and wikis. The Way We Think Gilles Fauconnier, Mark Turner. 2008-08-06 In its first two decades, much of cognitive science focused on such mental functions as memory, learning, symbolic thought, and language acquisition -- the functions in which the human mind most closely resembles a computer. But humans are more than computers, and the cutting-edge research in cognitive science is increasingly focused on the more mysterious, creative aspects of the mind. *The Way We Think* is a landmark synthesis that exemplifies this new direction. The theory of conceptual blending is already widely known in laboratories throughout the world; this book is its definitive statement. Gilles Fauconnier and Mark Turner argue that all learning and all thinking consist of blends of metaphors based on simple bodily experiences. These blends are then themselves blended together into an increasingly rich structure that makes up our mental functioning in modern society. A child's entire development consists of learning and navigating these blends. *The Way We Think* shows how this blending operates; how it is affected by (and gives rise to) language, identity, and concept of category; and the rules by which we use blends to understand ideas that are new to us. The result is a bold, exciting, and accessible new view of how the mind works.

Multiple Criteria Decision Making Kyoto 1975 M. Zeleny. 2012-12-06 This collection of articles aspires to be a permanent record of ideas which are likely to become important determinants in the future of management sciences. These papers were initially presented at the first session on Multiple Criteria Decision Making (MCDM) organized under the auspices of The Institute of Management Sciences (TIMS). All works were prepared by leading spokesmen for three generations of OR/MS change agents. Special mention must be made of the dynamic role which Professor Martin K. Starr played in organizing the program of the TIMS XXII International Meeting. In May, 1973, Professor Starr, who was President of TIMS and Program Chairman of the Kyoto conference, requested me to chair the MCDM session. Throughout the long period of formative inter change, Dr. Starr demonstrated his full and continuing support of both the event and the MCDM field. On July 25, 1975, surrounded by the rocky gardens of the Kyoto International Conference Hall (KICH), located on the shore of Takaraga Ike, we engaged in a day-long discussion of MCDM. Our talk together in Kyoto was a professional experience of the highest intensity for participants, speakers and audience alike.

Journalism Online Mike Ward. 2013-08-06 Journalism Online tackles the pressing question of how to apply fundamental journalism skills to the online medium. It provides an essential guide to the Internet as a research and publishing tool. In particular, it examines how to forge key journalism skills with the distinctive qualities of the World Wide Web to provide compelling web content. Trainee and practicing online journalists will learn: - core journalism skills of identifying, collecting, selecting and presenting news and information; - multimedia skills such as audio recording and editing; - online research methods including use of search tools, newsgroups and listservs; - story construction and writing for the Web; - an introduction to HTML; - web site design for the effective use of content. Journalism Online takes the best of the 'new' and 'old' media to provide an essential primer for this emerging discipline. Leading web designers such as Jakob Nielsen rub shoulders with established journalists like Harold Evans in the search for clear guidance in this rapidly developing field. It also provides a useful insight for non-news organisations into how to prepare and present effective web content and avoid the deepest pitfall of the online world - being ignored.

Journalism and New Media John V. Pavlik. 2001-06-27 Ubiquitous news, global information access, instantaneous reporting, interactivity, multimedia content, extreme customization: Journalism is undergoing the most fundamental transformation since the rise of the penny press in the nineteenth century. Here is a report from the front lines on the impact and implications for journalists and the public alike. John Pavlik, executive director of the Center for New Media at Columbia University's Graduate School of Journalism, argues that the new media can revitalize news gathering and reengage an increasingly distrustful and alienated citizenry. The book is a valuable reference on everything from organizing a new age newsroom to job hunting in the new media.

The Pianist Wladyslaw Szpilman. 2000-09-02 The memoir that inspired Roman Polanski's Oscar-winning film, which won the Cannes Film Festival's most prestigious prize—the Palme d'Or. Named one of the Best Books of 1999 by the Los Angeles Times On September 23, 1939, Wladyslaw Szpilman played Chopin's Nocturne in C-sharp minor live on the radio as shells exploded outside—so loudly that he couldn't hear his piano. It was the last live music broadcast from Warsaw: That day, a German bomb hit the station, and Polish Radio went off the air. Though he lost his entire family, Szpilman survived in hiding. In the end, his life was saved by a German officer who heard him play the same Chopin Nocturne on a piano found among the rubble. Written immediately after the war and suppressed for decades, *The Pianist* is a stunning testament to human endurance and the redemptive power of fellow feeling.

Copyfraud and Other Abuses of Intellectual Property Law Jason Mazzone. 2011-10-05 Intellectual property law in the United States does not work well and it needs to be reformed—but not for the reasons given by most critics. The issue is not that intellectual property rights are too easily obtained, too broad in scope, and too long in duration. Rather, the primary problem is overreaching by publishers, producers, artists, and others who abuse intellectual property law by claiming stronger rights than the law actually gives them. From copyfraud—like phony copyright notices attached to the U.S. Constitution—to lawsuits designed to prevent people from poking fun at Barbie, from controversies over digital sampling in hip-hop to Major League Baseball's ubiquitous restriction on sharing any accounts and descriptions of this game, overreaching claims of intellectual property rights are everywhere. Overreaching interferes with legitimate uses and reproduction of a wide variety of works, imposes enormous social and economic costs, and ultimately undermines creative endeavors. As this book reveals, the solution is not to change the scope or content of intellectual property rights, but to create mechanisms to prevent people asserting rights beyond those they legitimately possess. While there are many other books on intellectual property, this is the first to examine overreaching as a distinct problem and to show how to solve it. Jason Mazzone makes a series of timely proposals by which government, organizations, and ordinary people can stand up to creators and content providers when they seek to grab more than the law gives them.

Togo Mizrahi and the Making of Egyptian Cinema Prof. Deborah A. Starr. 2020-09-22 A free open access ebook is available upon publication. Learn more at www.luminosoa.org. In this book,

Deborah A. Starr recuperates the work of Togo Mizrahi, a pioneer of Egyptian cinema. Mizrahi, an Egyptian Jew with Italian nationality, established himself as a prolific director of popular comedies and musicals in the 1930s and 1940s. As a studio owner and producer, Mizrahi promoted the idea that developing a local cinema industry was a project of national importance. Togo Mizrahi and the Making of Egyptian Cinema integrates film analysis with film history to tease out the cultural and political implications of Mizrahi's work. His movies, Starr argues, subvert dominant notions of race, gender, and nationality through their playful—and queer—use of masquerade and mistaken identity. Taken together, Mizrahi's films offer a hopeful vision of a pluralist Egypt. By reevaluating Mizrahi's contributions to Egyptian culture, Starr challenges readers to reconsider the debates over who is Egyptian and what constitutes national cinema.

The Elements of User Experience Jesse James Garrett.2010-12-16 From the moment it was published almost ten years ago, Elements of User Experience became a vital reference for web and interaction designers the world over, and has come to define the core principles of the practice. Now, in this updated, expanded, and full-color new edition, Jesse James Garrett has refined his thinking about the Web, going beyond the desktop to include information that also applies to the sudden proliferation of mobile devices and applications. Successful interaction design requires more than just creating clean code and sharp graphics. You must also fulfill your strategic objectives while meeting the needs of your users. Even the best content and the most sophisticated technology won't help you balance those goals without a cohesive, consistent user experience to support it. With so many issues involved—usability, brand identity, information architecture, interaction design—creating the

user experience can be overwhelmingly complex. This new edition of *The Elements of User Experience* cuts through that complexity with clear explanations and vivid illustrations that focus on ideas rather than tools or techniques. Garrett gives readers the big picture of user experience development, from strategy and requirements to information architecture and visual design.

Basic Education Beyond the Millennium Development Goals in Ghana Peter Darvas,David Balwanz.2013-12-11 Inequity is the central challenge facing basic education in Ghana and undercuts the potential contribution of basic education to Ghana’s national development goals. Persistent disparities in education service delivery and inequitable allocation of resources in Ghana lead to highly inequitable educational outcomes. These inequities negatively affect system quality, efficiency and accountability and ultimately undermine broader national development. Wide-spread inequity in education service delivery significantly depresses system learning outcomes. This report describes a “missing middle” in terms of learning outcomes: While a small number of children perform well, the majority of pupils (more than 60%) pass through primary school without becoming proficient in numeracy and literacy. Specifically, children from Ghana’s northern regions and deprived districts, poor and rural households and ethnic and linguistic minorities – students who require the most support to meet learning outcomes – receive, on average, disproportionately fewer resources from the government than their peers. Systemic inequities create this missing middle and drag down system performance. Following a decade of rapid change, as of 2013, more children are attending basic and senior high schools than at any time in the history of Ghana. In the past decade, Ghana has realized great growth, progress and change. Population growth, urbanization and significant GDP growth have changed the economic, political and social landscape of Ghana. In the past decade, incidence of extreme poverty has been cut in half. Introduction of Free, Compulsory, Universal Basic Education (FCUBE) and kindergarten has supported a near doubling of basic education enrollment in the past 15 years. Delivering basic education and ensuring equity has become more challenging. Compared to a decade ago, more stakeholders are involved in allocating and managing core education inputs and accountability systems remain unclear and weak. Addressing the deeply embedded inequities (e.g. allocation of trained teachers, support to deprived districts and populations) is further complicated by a complex and fragmented policy, management and financing environment. The persistence of inequity reflects the persistence of conflicting sector interests and poses genuine policy dilemmas. However, recent experience shows that accelerating progress toward equity and quality basic education for all is possible. Several recent initiatives in Ghana point to the possibility of improving equitable resource allocation, strengthening social protection and providing additional support to improve learning outcomes. For example, children with below-average learning outcomes in poorly resourced environments are likely to show measurable gains when provided additional support (e.g. instructional support, learning resources, management support, demand-side incentives).

National EHealth Strategy Toolkit World Health Organization.2012 Worldwide the application of information and communication technologies to support national health-care services is rapidly expanding and increasingly important. The National eHealth Strategy Toolkit is an expert practical guide that provides governments their ministries and stakeholders with a solid foundation and method for the development and implementation of a national eHealth vision action plan and monitoring fram.

Before Writing Gunther Kress.2005-08-19 Gunther Kress argues for a radical reappraisal of the phenomenon of literacy, and hence for a profound shift in educational practice. Through close attention to the variety of objects which children constantly produce (drawings, cuttings-out,

'writings' and collages), Kress suggests a set of principles which reveal the underlying coherence of children's actions; actions which allow us to connect them with attempts to make meaning before they acquire language and writing. This book provides fundamental challenges to commonly held assumptions about both language and literacy, thought and action. It places these challenges within the context of speculation about the abilities and dispositions essential for children as young adults, and calls for the radical decentring of language in educational theory and practice.

Leveraging Mobile Media Valerie Feldmann.2006-03-30 Mobile communications and next generation wireless networks emerge as new distribution channels for the media. This development offers exciting new opportunities for media companies: the mobile communication system creates new usage contexts for media content and services; the social use of mobile communications suggests that identity representation in social networks, impulsive access to trusted media brands, and micro-coordination emerge as new sources of value creation in the media industries. In the light of this background, this book takes two different viewpoints on the development of mobile media: from a competitive strategy point of view it analyzes the extension of cross-media strategies and the emergence of cross-network strategies; from a public policy point of view it develops demands and requirements for an innovation policy that fosters innovation in mobile media markets.

If your public library has a subscription to OverDrive then you can borrow free Kindle books from your library just like how you'd check out a paper book. Use the Library Search page to find out which libraries near you offer OverDrive. It's easy to search Wikibooks by topic, and there are separate sections for recipes and childrens' textbooks. You can download any page as a PDF using a link provided in the left-hand menu, but unfortunately there's no support for other formats. There's also Collection Creator - a handy tool that lets you collate several pages, organize them, and export them together (again, in PDF format). It's a nice feature that enables you to customize your reading material, but it's a bit of a hassle, and is really designed for readers who want printouts. The easiest way to read Wikibooks is simply to open them in your web browser. "Buy" them like any other Google Book, except that you are buying them for no money. Note: Amazon often has the same promotions running for free eBooks, so if you prefer Kindle, search Amazon and check. If they're on sale in both the Amazon and Google Play bookstores, you could also download them both. DigiLibraries.com gathers up free Kindle books from independent authors and publishers. You can download these free Kindle books directly from their website. Want help designing a photo book? Shutterfly can create a book celebrating your children, family vacation, holiday, sports team, wedding albums and more. Once you've found a book you're interested in, click Read Online and the book will open within your web browser. You also have the

option to Launch Reading Mode if you're not fond of the website interface. Reading Mode looks like an open book, however, all the free books on the Read Print site are divided by chapter so you'll have to go back and open it every time you start a new chapter. Although this program is free, you'll need to be an Amazon Prime member to take advantage of it. If you're not a member you can sign up for a free trial of Amazon Prime or wait until they offer free subscriptions, which they do from time to time for special groups of people like moms or students. You can browse the library by category (of which there are hundreds), by most popular (which means total download count), by latest (which means date of upload), or by random (which is a great way to find new material to read). Browsing books at eReaderIQ is a breeze because you can look through categories and sort the results by newest, rating, and minimum length. You can even set it to show only new books that have been added since you last visited.
