Evaluating Art George Dickie.2010-05-18 A theory about how to judge a work of art--as opposed to a theory that explains why a particular work is defined as art.

Web-Based Learning Harold F. O'Neil,Ray S. Perez.2013-09-05 Web-Based Learning: Theory, Research, and Practice explores the state of the art in the research and use of technology in education and training from a learning perspective. This edited book is divided into three major sections: *Policy, Practice, and Implementation Issues -- an overview of policy issues, as well as tools and designs to facilitate implementation of Web-based learning; *Theory and Research Issues -- a look at theoretical foundations of current and future Web-based learning; the section also includes empirical studies of Web-based learning; and *Summary and Conclusions -- highlights key issues in each chapter and outlines a research and development agenda. Within this framework the book addresses several important issues, including: the primacy of learning as a focus for technology; the need to integrate technology with high standards and content expectations; the paucity of and need to support the development of technology-based curriculum and tools; the need to integrate assessment in technology and improve assessment through the use of technology; and the need for theory-driven research and evaluation studies to increase our knowledge and efficacy. Web-Based Learning is designed for professionals and graduate students in the educational technology, human performance, assessment and evaluation, vocational/technical, and educational psychology communities.

Preparing for Life in a Digital Age Julian Fraillon,John

Ainley, Wolfram Schulz (onderwijs.), Tim Friedman, Eveline Gebhardt. 2014 Report of the International Computer and Information Literacy Study (ICILS), that studied the extent to which young people have developed computer and information literacy (CIL) to support their capacity to participate in the digital age. The study focused on: variations in CIL within and across countries; aspects of schools, education systems and teaching associated with student achievement in CIL; the extent to which students' access to, familiarity with, and self-reported proficiency in using computers is associated with student achievement in CIL; and aspects of students' personal and social backgrounds associated with CIL. Automating in STEP 7 Basic with SIMATIC S7-1200 Hans Berger. 2011-06-07 The SIMATIC S7-1200 micro PLC offers a modular design concept with similar functionality as the well-known S7-300 series. Being the follow-up generation of the SIMATIC S7-200 the controller can be used in a versatile manner for small machines and small automation systems. Simple motion control functionalities are both an integral part of the micro PLC and an integrated PROFINET interface for programming, HMI link and CPU-CPU communication. With the Totally Integrated Automation (TIA) access, the engineering software Step 7 Basic offers a newly developed user interface, which is matched to intuitive operation. The functionality comprises all interests concerning automation: From configuring the controllers via programming in the graphics-oriented languages LAD (ladder diagram) and FBD (function block diagram) to program testing. The book presents the new hardware components of the automation system S7-1200, as well as its configuration and parameterization. A profound introduction into STEP 7 Basic illustrates the basics of programming and trouble shooting. Beginners learn the basics of automation with SIMATIC S7-1200 and advanced users of S7-200 and S7-300 receive the knowledge required to work with the new PLC.

The Crusades Nikolas Jaspert.2006-09-27 This German-to-English translation of a highly successful book is a clear, approachable, student-friendly introduction to the history of the Crusades. With a long chronological span, from the eleventh to the late fifteenth century, and with a wide geographical coverage of the whole of Europe and some of the Middle East, The Crusades is clear, concise and more wide-ranging than most single-volume works. Taking recent scholarship into account, and using boxes, case studies, marginal directions and chronologies, the book is well laid out and easy to follow, providing a comprehensive overview of the crusade movement for students at all university levels.

Humans Are Underrated Geoff Colvin.2016-10-11 It's easy to imagine a nightmare scenario in which computers simply take over most of the tasks that people now get paid to do. The unavoidable question—will millions of people lose out, unable to best the machine?—is increasingly dominating business, education, economics, and policy. The bestselling author of Talent Is Overrated explains how the skills and economy values are changing in historic ways and offers a guide to what's next for all workers. Mastering technical skills that have historically been in demand no longer differentiates us as it used to. Instead, our greatest advantage lies in our deepest, most essentially human abilities—empathy, creativity, social sensitivity, storytelling, humor, relationship building, and expressing ourselves with greater power than logic can ever achieve. These high-value skills create tremendous competitive advantage—more devoted customers, stronger cultures, breakthrough ideas, and more effective teams. And while many of us regard these abilities as innate traits, it turns out they can all be developed. As Colvin shows, they're already being developed in a range of farsighted organizations, including the Cleveland Clinic, the U.S. Army, and Stanford Business School.

Citizens of Europe? M. Bruter.2005-08-11 This book shows

empirically for the first time how a mass European identity has emerged across the EU member states between 1970 and the present day. Beyond this novel approach, it also offers a whole new theory of political identities, based on two 'civic' and 'cultural' components. Michael Bruter shows how multiple identities reinforce - rather than exclude - each other, and studies in depth the unsuspected impact of the media and political institutions on the emergence of new political identities.

Mimus Lilli Thal.2005 A gripping medieval adventure story, bristling with sparkling wit and highly acclaimed in Germany for its 'almost unbearable suspense'. Shortlisted for the prestigious German Youth Literature Prize.

De Septem Secundeis Johannes Trithemius.2016-04-21

Johannes Trithemius is best known for his steganographia, but his less notorious works are no less interesting. Here, in *de septem secundeis*, we have a fusion of history and occultism, regarding celestial and angelic categorizations, used to predict the future as well as correspond past events to the different characteristics of the secondary causes- the seven angels with their seven planets. Trithemius, in his age, thus delivered this knowledge to then-emperor Maximilian of the Holy Roman Empire, and this same system can be expanded infinitely into the past or future.

Media and Internet Management Bernd W. Wirtz.2011-07-14 The media and communication sector has developed into a key economic sector in the modern information society. This book deals with media management of electronic and print-based media. Against the background of industry convergence the author presents the general trends, value chains, business models and competitive strategies through an integrated management approach. In addition, recent developments of internet media are discussed.

King of the Middle March (The Arthur Trilogy, Book 3)

Kevin Crossley-Holland.2010-02-01 Kevin Crossley-Holland's award-winning Arthur trilogy comes to its triumphant and moving

close -- now in paperback! Arthur de Caldicot waits eagerly in Venice for the start of the Fourth Crusade. But it's now, when Arthur's future should be clearest, that he feels the most doubt. Jealousies and greed threaten the Crusade, leading him to question its true mission. Back in England, his engagement to Winnie remains uncertain, as his search for his birth mother is stymied by his vicious father. And his seeing stone shows him the last days of King Arthur's court -- a great dream destroyed, but also a glorious legend rising from the ruins. Likewise in this book, Arthur becomes a man worthy of his kingly name.

The Book of the Lion Michael Cadnum. 2001-10-01 A National Book Award nominee! Returning to the same era of his *In a Dark Wood*, Cadnum's majestic novel--part mystery, part history--chronicles the pageantry and brutality of the Crusades under King Richard. Edmund, a young apprentice, is awaiting punishment as a counterfeiter when a knight intervenes on his behalf--and compels Edmund to join Richard Lionheart's forces in the Holy Land. There, amidst the savagery of the twelfth-century Crusades, Edmund learns both courage and compassion, and discovers that cruelty is sometimes considered the will of Heaven. Set in medieval England and the war-torn shores of the Middle East, Cadnum's tale weaves together a rich tapestry of storms at sea, the brutality of hand-to-hand combat, and one of the classic horse and lance battles in recorded history--the Battle of Arsuf.

Secondary Analysis of Survey Data K. Jill Kiecolt, Laura E. Nathan. 1985 This volume presents strategies for locating survey data and provides a comprehensive guide to US social science data archives, describing several major data files. Although the data sets are American, the techniques are widely applicable.

Europe in Question Sara Binzer Hobolt. 2009 *Europe in Question* explains how voters decide in European Union referendums. Direct democracy plays an increasingly important role in the process of European integration, but how do citizens actually decide in these referendums? This question is addressed in this

comprehensive, up-to-date study of the use of direct democratic institutions in Europe. The book presents a comparative study of campaign dynamics, elite strategies and voting behaviour in European referendums from 1972 and 2008. The author also addresses the question of whether citizens are sufficiently competent to decide on complex matters of European integration and concludes that voters are far more competent than they are often given credit for.

From Generation to Generation Shmuel N. Eisenstadt. 2017-07-12
The republication of *From Generation to Generation*-almost half a century after its first appearance in 1956-constitutes a good occasion for a look at the way in which problems of youth and generations developed in contemporary societies. In this brilliant, pioneering effort, different approaches in the social sciences to the analysis of these issues receive close scrutiny. Eisenstadt reexamines these issues by including in this edition several new chapters on this theme.

Transnational American Memories Udo J. Hebel. 2009
The volume gathers twenty original essays by experts of American memory studies from the United States and Europe. It extends discussions of U.S. American cultures of memory, commemorative identity construction, and the politics of remembrance into the topical field of transnational and comparative American studies. In the contexts of the theoretical turns since the 1990s, including prominently the pictorial and the spatial turns, and in the wake of multicultural and international conceptions of American history, the contributions to the collection explore the cultural productivity and political implications of both officially endorsed memories and practices of oppositional remembrance. Reading sites of memory situated in or related to the United States as crossroads of transnational and intercultural remembering and commemoration manifests their possibly controversial function as platforms and agents in the processes of cultural exchange and political negotiation across the spatial, temporal, and ideological

trajectories that inform American Studies as Atlantic Studies, Hemispheric Studies, Pacific Studies. The interdisciplinary range of issues and materials engaged includes literary texts, personal accounts, and cultural performances from colonial times through the immediate present, the significance of war monuments and ethnic memorials in Europe, Asia, and the U.S., films about 9/11, public sculptures and the fine arts, American world's fairs as transnational sites of memory.

Militarism Karl Paul August Friedrich Liebknecht. 2023-07-18 Written by Karl Liebknecht, a German revolutionary socialist and anti-war activist, this book argues against the glorification of war and the military, and advocates for peace and the rights of workers. It includes a detailed analysis of the role of the military

in capitalist societies, and argues that soldiers should not be used as tools of suppression against the working class. This work has been selected by scholars as being culturally important, and is part of the knowledge base of civilization as we know it. MCS.D. Howard Hawhee.1999 Concise, clearly delineated coverage is given of the key concepts necessary to pass the MCSE Microsoft Visual Basic 6 exam. The CD-ROM provides readers with a testing simulation that is similar to the actual testing scenario.

The Secrets of Nostradamus David Ovason.2002-08-06 His name has become a synonym for clairvoyance: Nostradamus, astrologer to the king of France, the most famous seer in Western history. But the real meaning of his prophecies has gone undetected, hidden in a secret alchemical code. Known as the Green Language, it was understood by only a handful of medieval occult scholars, and has been lost for centuries -- until now. David Ovason spent 40 years working on the Green Language, enabling him to finally crack the secret code of Nostradamus. In this book, he reveals with line-by-line analysis the hidden writings of the great astrologer, showing that his dates and details are more exact than any previous scholars have realized. As a master of the arcane astrological traditions practiced by Nostradamus, Ovason provides the most accurate and insightful account ever written of this mysterious figure's writings, predictions, and life.

The Seeing Stone Kevin Crossley-Holland.2013-06-20 Medieval life meets Arthurian magic in a novel that transcends boundaries of time and age, appealing to children of 9+ and older readers alike. The winner of the Guardian Children's Fiction Prize and the Smarties Prize bronze award in 2001, this timeless novel is stunningly reissued for a new generation. The year is 1199, the place the Welsh Marches. Young Arthur de Caldicot is given a magical shining stone in which his legendary namesake is revealed. In 100 short chapters that brilliantly evoke life in a medieval manor, stories of the boy King Arthur begin to echo - and anticipate - the secrets and mysteries that emerge in his own life . . . As bright and as vivid as the pictures in a Book of Hours. Deep scholarship, high imagination, and great gifts of storytelling have gone into this; I was spellbound. - Philip Pullman, *The Guardian*

Igraine the Brave Cornelia Funke.2011-10-01 The New York Times–bestselling author of *Inkheart* and *Dragon Rider* delivers an “inventive re-imagining of the knight-in-shining-armor story” (*Publishers Weekly*, starred review). Igraine dreams of becoming a famous knight just like her great grandfather, but the truth is, life at the family castle is rather boring. Until the nephew of the baroness-next-door shows up. He’s got a dastardly plan to capture the castle and claim as his own the wonderful singing spell books that belong to Igraine’s magician parents. To make matters worse, at the very moment of the siege, her mom and dad botch a spell, turning themselves into pigs! Aided by a Gentle Giant and a Sorrowful Knight, it’s up to Igraine to be brave and save the day—and the books! “Illustrated with pen-and-ink sketches of Igraine in action, plus many tiny tomes sporting stubby limbs and animated faces, this engaging read, or read-aloud, is ‘joust’ the ticket for all young fans of non-gender-specific knightly valor.” —*Kirkus Reviews*

Inventing Europe G. Delanty.1995-04-19 A critical analysis of the idea of Europe and the limits and possibilities of a European identity in the broader perspective of history. This book argues that the crucial issue is the articulation of a new identity that is based on post-national citizenship rather than ambivalent notions of unity.

Blended Learning and Online Tutoring Janet MacDonald.2017-03-02 Blended learning provides the flexibility to accommodate the varied requirements of pedagogies, disciplines and levels of course, together with the needs of a wide variety of learners. However, anyone concerned with the integration of online tutoring to support students appropriately may need to reassess current practice. This book adopts a pragmatic and common-sense approach to blended learning by situating the use of online media within a well-grounded teaching and learning strategy. It provides practical ideas for the successful implementation of blended strategies, including good practice in both asynchronous and synchronous tutoring, appropriate assessment design for developing successful blended

learners, and innovative approaches to professional development for distance tutors. It is illustrated with a wide variety of examples and comments from students and practitioners in both distance and campus-based environments in 13 different countries. Since the first edition was published in 2006, there has been great interest in Web 2.0 technologies and their potential for use in an educational environment. This second edition has therefore incorporated many new examples of good practice, making use of a combination of tried and tested tools as well as blogs and wikis for supporting students. There has also been a recent rise in the use of activity-based learning and interest in its potential for supporting students in distance and online environments. The new edition incorporates many new exemplars of learning activity design in Part Three, to illustrate approaches to the development of critical, independent learners.

Havana Blue Leonardo Padura.2007-06-01 A scorching novel from a star of Cuban fiction. The third in the Havana Quartet series.

Tallulah! Joel Lobenthal.2009-10-13 Outrageous, outspoken, and uninhibited, Tallulah Bankhead was an actress known as much for her vices -- cocaine, alcohol, hysterical tirades, and scandalous affairs with both men and women -- as she was for her winning performances on stage. In 1917, a fifteen-year-old Bankhead boldly left her established Alabama political family and fled to New York City to sate her relentless need for attention and become a star. Five years later, she crossed the Atlantic, immediately taking her place as a fixture in British society and the most popular actress in London's West End. By the time she returned to America in the 1930s, she was infamous for throwing marathon parties, bedding her favorite costars, and neglecting to keep her escapades a secret from the press. At times, her notoriety distracted her audience from her formidable talent and achievements on stage and dampened the critical re-sponse to her work. As Bankhead herself put it, they like me to 'Tallulah,' you know -- dance and sing and romp and fluff my hair and play reckless parts. Still, her reputation as a wild, witty, over-the-top leading lady persisted until the end of her life at the age of sixty-six. From her friendships with such entertainment luminaries as Tennessee Williams, Estelle Winwood, Billie Holiday, Noël Coward, and Marlene Dietrich, to the intimate details of her family relationships and her string of doomed romances, Joel Lobenthal has captured the private essence of the most public star during theater's golden age. Larger-than-life as she was, friends saw through Bankhead's veneer of humor and high times to the heart of a woman who often felt second-best in her father's eyes, who longed for the children she was unable to bear, and who forced herself into the spotlight to hide her deep-seated insecurities. Drawn from scores of exclusive interviews, as well as previously untapped information from Scotland Yard and the FBI,

this is the essential biography of Tallulah Bankhead. Having spent twenty-five years researching Bankhead's life, Joel Lobenthal tells her unadulterated story, as told to him by her closest friends, enemies, lovers, and employees. Several have broken decadelong silences; many have given Lobenthal their final interviews. The result is the story of a woman more complex, more shocking, and yet more nuanced than her notorious legend suggests.

European Integration as an Elite Process Max

Haller.2008-05-05 Max Haller's impressive book presents an analysis of the process of European integration which keeps the relation between elites and citizens at the forefront. It is shown on the basis of new empirical data (surveys, interviews, analyses of documents and biographies) that European integration has been led since the beginning by the elites and that today there exists a considerable split between elites and citizens; this split is becoming more profound in the course of time. The book covers the following themes: - the structure, interests and behaviour of the different elites (political, economic, bureaucratic) - the expectations and perceptions of the populations concerning the integration process and the elites - the strategies of the elites to win the consent of the people, in view of widespread scepticism - proposals for reform of the EU, especially with regard to a strengthening of democratic elements which could reduce the split between elites and citizens. A timely and original read, this book will be a useful addition to the library of any political sociologist, political scientist or scholar of European integration.

Public Opinion and Internationalized Governance Oskar

Niedermayer, Richard Sinnott.1998 New agencies of international government are among the most innovative and experimental aspects of late 20th-century politics. This study examines the European Union, its structure, powers, operations and legitimacy, and its relationship to the United Nations and NATO.

The Birth of Europe Jacques Le Goff.2009-02-04 In this groundbreaking new study, Jacques Le Goff, arguably the leading

medievalist of his generation, presents his view of the primacy of the Middle Ages in the development of European history. [A] superb and necessary book. This provocative assessment from a lifetime of scholarship might help us to place ourselves, not just territorially, but in that other precious element of history: time. The Guardian A book that never fails to be informative, readable and provocative. Le Goff... has been the bravest and best of champions for medieval history. This book... is in every sense an inspiration. BBC History Magazine Praised by prominent figures in Europe and history including: Rt Hon Christopher Patten, CH, Former Member of the European Commission, and Neil Kinnock, Vice-President, European Commission.

Knowledge Spaces Dietrich Albert, Josef Lukas. 1999-08-01

Based on the formal concept of knowledge structures originally proposed by Jean-Claude Falmagne and Jean-Paul Doignon, this book contains descriptions of methodological developments and experimental investigations as well as applications for various knowledge domains. The authors address three main topics: * theoretical issues and extensions of Doignon & Falmagne's theory of knowledge structures; * empirical validations of specific problem types and knowledge domains, such as sentence comprehension, problem solving in chess, inductive reasoning, elementary mathematical reasoning, and others; and * application of knowledge structures in various contexts, including knowledge assessment, intelligent tutoring systems, and motor learning. Unlike most other approaches in the literature in cognitive psychology, this book provides both a rigorous mathematical formulation of knowledge-related psychological concepts and its empirical validation by experimental data.

Experiments in Ethics Kwame Anthony Appiah. 2010-03-30 In the past few decades, scientists of human nature—including experimental and cognitive psychologists, neuroscientists, evolutionary theorists, and behavioral economists—have explored the way we arrive at moral judgments. They have called into

question commonplaces about character and offered troubling explanations for various moral intuitions. Research like this may help explain what, in fact, we do and feel. But can it tell us what we ought to do or feel? In *Experiments in Ethics*, the philosopher Kwame Anthony Appiah explores how the new empirical moral psychology relates to the age-old project of philosophical ethics. Some moral theorists hold that the realm of morality must be autonomous of the sciences; others maintain that science undermines the authority of moral reasons. Appiah elaborates a vision of naturalism that resists both temptations. He traces an intellectual genealogy of the burgeoning discipline of experimental philosophy, provides a balanced, lucid account of the work being done in this controversial and increasingly influential field, and offers a fresh way of thinking about ethics in the classical tradition. Appiah urges that the relation between empirical research and morality, now so often antagonistic, should be seen in terms of dialogue, not contest. And he shows how experimental philosophy, far from being something new, is actually as old as philosophy itself. Beyond illuminating debates about the connection between psychology and ethics, intuition and theory, his book helps us to rethink the very nature of the philosophical enterprise.

Bigarrures Estienne Tabourot.1884

December Heat Luiz Alfredo Garcia-Roza.2004-03 When a retired policeman spends an alcohol-filled evening with his girlfriend, a prostitute, he wakes up the next morning to find her murdered. Inspector Espinosa is convinced there's more to it than meets the eye, and when other bodies turn up, he finds himself not only racing after a killer but falling in love.

A Thorn in the Side of European Elites Florian

Hartleb.2015-01-23 The European project has recently reached a critical point, where a discussion on the fundamental objectives of the European Union has entered public debate. There are considerable concerns about a new Euroscepticism arising in

response to recent developments, especially the Eurozone crisis, and a general feeling of malaise towards the European project from both national elites and ordinary citizens of Member States. This paper looks at how Euroscepticism can be defined, the reasons behind its development in Western and Eastern Europe and the EPPÖs perspective on this phenomenon.Ê

At the Crossing Places (The Arthur Trilogy #2) Kevin Crossley-Holland.2010-01-01 The second thrilling novel in Kevin Crossley-Holland's bestselling Arthur trilogyArthur de Caldicot has achieved his dream: He now serves as squire to Lord Stephen of Holt Castle. But this new world opens up fresh visions as well as old concerns. Arthur longs to escape the shadow of his unfeeling father and meet his birth mother. To marry the beautiful Winnie, but maintain his ties with his friend Gatty. And to become a Crusader, with all the questions of might and right involved. Just as he so brilliantly did in THE SEEING STONE, Kevin Crossley-Holland weaves Arthurian legend with everyday medieval life in the unforgettable story of one hero's coming of age.
