The Zapatista Movement and Mexico's Democratic Transition María de la Luz Inclán.2018 Transitions from authoritarian to democratic governments can provide ripe scenarios for the emergence of new, insurgent political actors and causes. During peaceful transitions, such movements may become influential political players and gain representation for previously neglected interests and sectors of the population. But for this to happen, insurgent social movements need opportunities for mobilization, success, and survival. This book looks at Mexico's Zapatista movement, and why the movement was able to mobilize sympathy and support for the indigenous agenda inside and outside of the country, yet failed to achieve their goals vis-à-vis the Mexican state. *Contabilidad financiera avanzada (14a. ed.)*. Integrating Gender Equality into Business and Management Education Patricia M. Flynn, Kathryn Haynes, Maureen A. Kilgour.2017-09-08 This volume addresses the need to integrate gender equality into business and management education and provides examples of leading initiatives illustrating how this can occur from various disciplinary and global perspectives. Gender inequality has a long history in business schools and the workplace, and traditions are hard to change. Some disciplines remain resolutely gendered, affecting both women and men; and case materials on women leaders and managers are still rare. The chapters provide conceptual and research rationales as to why responsible management education must address the issue of gender equality. They also identify materials and resources to assist faculty in integrating gender issues and awareness into various disciplines and fields. These include specific case studies and innovations that assess or address the role of gender in various educational environments. The book is designed to help faculty integrate the topic of gender equality into their own teaching and research and gain support for the legitimacy of gender equality as an essential management education topic. This is the first book in a series on gender equality as a challenge for business and management education, published with the Principles of Responsible Management Education (PRME) Working Group on Gender Equality.

The Foundations of Morality Joel J. Kupperman.2020-07-20 Originally published in 1983, this book maintains that the content and character of morality can be understood if it is regarded as a useful societal tool, whose central purposes include the prevention of harm and promotion of security for members of society. At the foundation is the general superiority of policies and attitudes that have good consequences. The book argues that ethics is 'cognitive' and explores the kinds of ethical knowledge and the ways in which ethical claims can be challenged and justified.

Managing for Development Results Roberto García López, Mauricio García Moreno.2010-01-01 Results-based management (RBM) is a public management strategy that involves decision making based on reliable information regarding the effects of governmental actions on society. It has been adopted in various developed countries as a way of improving efficiency and effectiveness in public policy. In Latin American and Caribbean (LAC) countries, governments and public managers show increasing interest in this management strategy. Given the relative novelty of RBM in the region, however, there is scant literature on the subject. This book is intended to fill this gap in two ways. First, it seeks to describe some of the basic RBM concepts and adapt them according to regional characteristics. Second, it presents an assessment, based on studies carried out in 25 countries, of the challenges facing LAC countries and their capacity to implement results-based public management.

Controlling Corruption Robert Williams, Alan Doig. 2000 After three volumes presenting the desolate scenario of corruption around the world, volume 4 (of the four-volume reference) focuses on anti-corruption strategies, including a wide variety of approaches that illustrate the scale and difficulty of the task and offer no simple answers. Twenty-nine articles discuss general issues, control via codes of conduct and legal and formal means, anti-corruption measures in civil service and government agencies, prevention and sanctions, people and reform, and whistleblowing. The articles (reproduced in facsimile) are from journals such as *Comparative Politics*, *Crime, Law, and Social Change*, *Corruption Reform*, and *European Journal of Development Research*. Editors Williams (politics, U. of Durham, UK) and Doig (public services management, Liverpool John Moores U., UK) made the selections. The volume is not indexed, except by name. c. Book News Inc.

Vanishing Frontiers Andrew Selee. 2018-06-05 There may be no story today with a wider gap between fact and fiction than the relationship between the United States and Mexico. Wall or no wall, deeply intertwined social, economic, business, cultural, and personal relationships mean the US-Mexico border is more like a seam than a barrier, weaving together two economies and cultures. Mexico faces huge crime and corruption problems, but its remarkable transformation over the past two decades has made it a more educated, prosperous, and innovative nation than most Americans realize. Through portraits of business leaders, migrants, chefs, movie directors, police officers, and media and sports executives, Andrew Selee looks at this emerging Mexico, showing how it increasingly influences our daily lives in the United States in surprising ways--the jobs we do, the goods we consume, and even the new technology and entertainment we enjoy. From the Mexican entrepreneur in Missouri who saved the US nail industry, to the city leaders who were visionary enough to build a bridge over the border fence so the people of San Diego and Tijuana could share a single international airport, to the connections between innovators in Mexico's emerging tech hub in Guadalajara and those in Silicon Valley, Mexicans and Americans together have been creating productive connections that now blur the boundaries that once separated us from each other.

However, this book provides guidance in the moral or ethical aspects of decision-making that perpetuate many of the latent failures in safety-critical systems. The book provides a concise introduction to the ethical foundations and follows up with case studies from aviation, healthcare, and environmental and occupational health.

The Europeanization of National Foreign Policies towards Latin America Lorena Ruano. 2013-05-07 Who shapes the European Union's policy towards Latin America? How has this EU policy modified individual member states' relations with the region? This book provides a comparative account of seven member states' bilateral links with Latin America since 1945, in the context of their EU membership and based on the concept of 'Europeanization'. It illustrates how and why the main architects of this EU policy have been Spain and Germany. In contrast, Poland, Sweden and Ireland, which had little previous interaction with Latin America, have developed their current relations with that region virtually as a result of their EU membership. The United Kingdom and France lie in the middle: they have been influential in certain policy-areas and key periods in history, while they have adapted to what is done at the EU level in others. Practitioners, established academic experts as well emerging scholars in the field bring to bear a novel combination of pioneering research and cutting edge conceptual analysis on this important but neglected area of the EU's foreign relations.

Sovereign Debt Diplomacies Pierre Penet, Juan Flores Zendejas. 2021 This is an open access title available under the terms of a CC BY-NC-ND 4.0 International licence. It is free to read at Oxford Scholarship Online and offered as a free PDF download from OUP and selected open access locations. Sovereign Debt Diplomacies aims to revisit the meaning of sovereign debt in relation to colonial history and postcolonial developments. It offers three main contributions. The first contribution is historical. The volume historicises a research field that has so far focused primarily on the post-1980 years. A focus on colonial debt from the 19th century building of colonial empires to the decolonisation era in the 1960s-70s fills an important gap in recent debt historiographies. Economic historians have engaged with colonialism only reluctantly or en passant, giving credence to the idea that colonialism is not a development that deserves to be treated on its own. This has led to suboptimal developments in recent scholarship. The second contribution adds a 'law and society' dimension to studies of debt. The analytical payoff of the exercise is to capture the current developments and functional limits of debt contracting and adjudication in relation to the long-term political and sociological dynamics of sovereignty. Finally, Sovereign Debt Diplomacies imports insights from, and contributes to the body of research currently developed in the Humanities under the label 'colonial and postcolonial studies'. The emphasis on 'history from below' and focus on 'subaltern agency' usefully complement the traditional elite-perspective on financial imperialism favoured by the British school of empire history.
