The Triumph of the Baroque Reale Palazzina di caccia di Stupinigi, Montreal Museum of Fine Arts, National Gallery of Art (U.S.).1999 The baroque style of architecture rose up from the Mannerism of the turn of the seventeenth century, and evolved into the lighter rococo around 1750. At its height, the baroque encompassed all the arts, and the style was freighted with the message of the Counter-Reformation. This catalogue explores every facet of baroque architecture in Europe. An international team of scholars examines such subjects as the political and religious use of architecture, the birth of the baroque in Rome,

landscape, fantasies, and the education of the architect. The second part of the book, a catalogue of works exhibited, illustrates the types of baroque construction: villas and chateaux, military architecture, royal palaces, and gardens.--BOOK JACKET.Title Summary field provided by Blackwell North America, Inc. Probiotics in Aquaculture Brian Austin,S.M.

Sharifuzzaman.2022-07-04 This book has been developed to provide a detailed discussion of probiotics, which have been evaluated for use predominantly in fish and shellfish aquaculture. This book highlights strengths and weaknesses in knowledge and discusses gaps that need to be addressed. There has been a great deal of research concerning the use of probiotics in aquaculture. To date, a wide range of Gram-positive and Gram-negative bacteria and some eukaryotes, i.e. yeasts and unicellular algae, has been reported to be beneficial to aquatic hosts. Following oral uptake, benefit includes improved growth performance and protection against many bacteria and some parasitic diseases. This book will be suitable for scientists, veterinarians, professionals, and senior students involved in aquaculture.

Education in Africa A. Babs Fafunwa,J. U. Aisiku.2022-09-01 First published in 1982, Education in Africa offers a comprehensive treatment of the development of education in Africa. Until now only scattered documents on educational growth in individual countries have been available; works devoted to Africa as a whole have tended towards the general and have, by and large, been written by outside observers. This book is a collection of illuminating syntheses of major trends in educational development in Africa, by renowned African educationists, and is the first attempt to supply the need for a comprehensive book on African education written from an African viewpoint. All but one of the chapters were written specially for the book by leading African educators each of whom has had a distinguished career and wide experience in education in his or her own country; they

represent eleven nations in all. The volume is designed for African students, teachers and administrators and will also be welcomed by educational planners and by scholars working in the fields of comparative education and the history of education. It will be of special interest to departments, institutions and faculties of education in all the universities and colleges of education in Africa, and to educators and students worldwide who are concerned with comparative African education.

A Dissertation On The Mysteries Of The Cabiri George-Stanley Faber.2023-07-18 A groundbreaking exploration of the mysteries of the Cabiri, a group of deities worshipped in ancient Samothrace and other parts of the ancient world. Faber's detailed examination of the sources and symbolism of the Cabiri provides a fascinating insight into the religious beliefs and practices of the ancient world. A must-read for anyone interested in the history of religion. This work has been selected by scholars as being culturally important, and is part of the knowledge base of civilization as we know it. This work is in the public domain in the United States of America, and possibly other nations. The Comprehensive Cancer Center Mahmoud Aljurf,Navneet S. Majhail,Mickey B.C. Koh,Mohamed A. Kharfan-Dabaja,Nelson J. Chao.2021-10-28 This open access book provides a valuable resource for hospitals, institutions, and health authorities worldwide in their plans to set up and develop comprehensive cancer care centers. The development and implementation of a comprehensive cancer program allows for a systematic approach to evidence-based strategies of prevention, early detection, diagnosis, treatment, and palliation. Comprehensive cancer programs also provide a nexus for the running of clinical trials and implementation of novel cancer therapies with the overall aim of optimizing comprehensive and holistic care of cancer patients and providing them with the best opportunity to improve quality of life and overall survival. This book's self-contained chapter format aims to reinforce the critical importance of comprehensive cancer care centers while providing a practical guide for the essential components needed to achieve them, such as operational considerations, guidelines for best clinical inpatient and outpatient care, and research and quality

management structures. Intended to be wide-ranging and applicable at a global level for both high and low income countries, this book is also instructive for regions with limited resources. The Comprehensive Cancer Center: Development, Integration, and Implementation is an essential resource for oncology physicians including hematologists, medical oncologists, radiation oncologists, surgical oncologists, and oncology nurses as well as hospitals, health departments, university authorities, governments and legislators.

Aaron's Code Pamela McCorduck.1991 Aaron's Code tells the story of the first profound connection between art and computer technology. Here is the work of Harold Cohen - the renowned abstract painter who, at the height of a celebrated career in the late 1960's, abandoned the international scene of museums and galleries and sequestered himself with the most powerful computers he could get his hands on. What emerged from his long years of solitary struggle is an elaborate computer program that makes drawings autonomously, without human intervention - an electronic apprentice and alter ego called Aaron.

Archa Verbi Internationale Gesellschaft fur Theologische Mediavistik.2007-04-16 Archa Verbi accepts articles and text editions which fall within the scope of the Society's objectives and thematic purpose. The Archa Verbi. Subsidia book series publishes monographs and conference proceedings originating from the wider area of the study of medieval theology.

Manuscripts submitted to Archa Verbi undergo a double-blind peer review. Two senior scholars selected by the scriptores evaluate the quality of the research and make recommendations concerning the study's suitability for publication. On the basis of the peer reviews the scriptores, together with the coetus editionis, render a decision concerning the publication of the

manuscript. Authors will be notified of the decision and - where applicable - of the evaluator's recommendations and criticisms. If a manuscript is rejected, we strongly encourage resubmission of the article after careful revision, since each resubmission will be examined independent of the original review process. The review section of the yearbook discusses new books from the field of medieval theology and from those associated fields of study relevant to medieval theology. These associated disciplines are, in particular, Church History, History of Exegesis, History of Theology, History of Philosophy, History of Canon Law, and Art History, that are considered relevant insofar as they advance the study and knowledge of medieval theology.

Passenger Rail Franchising Great Britain. Parliament. House of Commons. Transport Committee. 2006 It is thirteen years since the Railways Act 1993 started the process of privatising British Rail, replacing it with one company owning and managing the infrastructure, an open-access system for freight services and a series of twenty-five passenger franchises let to private companies for a specified period of time. This period has seen almost continuous change, and there is now a new 'triumvirate' framework with the Department for Transport, the Office of Rail Regulation and Network Rail in place, with the third generation of franchises in the process of being let and the number being reduced to nineteen. The Committee's report examines the current franchising system, focusing on the coherence of its objectives, the effectiveness of the process for awarding franchises and the management of franchise agreements, and whether more competition and vertical integration is needed. Findings include that the current system represents a policy muddle which lacks a coherent framework for the development of good services and delivery of value for money for passengers and taxpayers. The only way the Government can increase capacity and improve services for the long-term is to drop the dogmatic pursuit of competition in its decision-making as to what the

private and public sectors can and should do in future. The Government's forthcoming long-term strategy for the railways will need to address these issues, and to set out a structure and a strategy capable of securing quality passenger rail services to meet demand over the next half a century.

Pedro Nunes (1502-1578) John R. C. Martyn.1996 Pedro Nunes played a major part in the discovery of the world by Portuguese mariners. In this book, his mathematical and scientific achievements are described, together with evidence on his life and friends arising from a collection of his Greek and Latin

poems, and from religious notes he composed during his later years. An English version of his long-lost Portuguese algebra is included, as well as poems and letters by his friends translated into English for the first time. These discoveries came from a manuscript recently found in the municipal library of Evora, the perfectly preserved Renaissance city that in Nunes' day was the home of King John III.
