Advice for Future Corpses (and Those Who Love Them) Sallie Tisdale. 2019-06-18 A NEW YORK TIMES BOOK CRITICS' TOP 10 BOOK OF THE YEAR "In its loving, fierce specificity, this book on how to die is also a blessedly saccharine-free guide for how to live" (The New York Times). Former NEA fellow and Pushcart Prize-winning writer Sallie Tisdale offers a lyrical, thought-provoking, yet practical perspective on death and dying in *Advice for Future Corpses (and Those Who Love Them)*. Informed by her many years working as a nurse, with more than a decade in palliative care, Tisdale provides a frank, direct, and compassionate meditation on the inevitable. From the sublime (the faint sound of Mozart as you take your last breath) to the ridiculous (lessons on how to close the sagging jaw of a corpse), Tisdale leads us through the peaks and troughs of death with a calm, wise, and humorous hand. *Advice for Future Corpses* is more than a how-to manual or a spiritual bible: it is a graceful compilation of honest and intimate anecdotes based on the deaths Tisdale has witnessed in her work and life, as well as stories from cultures, traditions, and literature around the world. Tisdale explores all the heartbreaking, beautiful, terrifying, confusing, absurd, and even joyful experiences that accompany the work of dying, including: A Good Death: What does it mean to die "a good death"? Can there be more than one kind of good death? What can I do to make my death, or the deaths of my loved ones, good? Communication: What to say and not to say, what to ask, and

when, from the dying, loved ones, doctors, and more. Last Months, Weeks, Days, and Hours: What you might expect, physically and emotionally, including the limitations, freedoms, pain, and joy of this unique time. Bodies: What happens to a body after death? What options are available to me after my death, and how do I choose—and make sure my wishes are followed? Grief: “Grief is the story that must be told over and over...Grief is the breath after the last one.” Beautifully written and compulsively readable, *Advice for Future Corpses* offers the resources and reassurance that we all need for planning the ends of our lives, and is essential reading for future corpses everywhere. “Sallie Tisdale’s elegantly understated new book pretends to be a user’s guide when in fact it’s a profound meditation” (David Shields, bestselling author of *Reality Hunger*).

Oxford Textbook of Palliative Nursing Betty Rolling Ferrell, Judith A. Paice. 2019-02-15 The Oxford Textbook of Palliative Nursing remains the most comprehensive treatise on the art and science of palliative care nursing available. Dr. Betty Rolling Ferrell and Dr. Judith A. Paice have invited 162 nursing experts to contribute 76 chapters addressing the physical, psychological, social, and spiritual needs pertinent to the successful palliative care team. Organized within 7 Sections, this new edition covers the gamut of principles of care: from the time of initial diagnosis of a serious illness to the end of a patient's life and beyond. This fifth edition features several new chapters, including chapters on advance care planning, organ donation, self-care, global palliative care, and the ethos of palliative nursing. Each chapter is rich with tables and figures, case examples for improved learning, and a strong evidence-based practice to support the highest quality of care. The book offers a valuable and practical resource for students and clinicians across all settings of care. The content is relevant for specialty hospice agencies and palliative care programs, as well as generalist knowledge for schools of nursing, oncology, critical care, and pediatric. Developed with

the intention of emphasizing the need to extend palliative care beyond the specialty to be integrated in all settings and by all clinicians caring for the seriously ill, this new edition will continue to serve as the cornerstone of palliative care education.

Psychologie und Palliative Care Martin Fegg, Jan Gramm, Martina Pestinger. 2012-08-16 Die psychologische Behandlung und Begleitung von Patienten und deren Angehörigen ist essenzieller Bestandteil von Palliative Care, um eine möglichst hohe Lebensqualität zu erhalten sowie um psychosozialen Belastungen und Gefühlen wie Hoffnungslosigkeit und depressiven Reaktionen entgegenzuwirken. Daher werden Psychologen immer stärker in die stationäre und ambulante Palliativversorgung einbezogen. Das Werk bietet einen fundierten Überblick über die Aufgabenfelder, Interventionsmethoden und psychologischen Kernkonzepte. Themen sind u. a. Kinder, alte Menschen und Angehörige in der Palliativversorgung, Kommunikation mit Patienten, Lebensqualität, Krankheits- und Trauerverarbeitung. Weiterhin werden verschiedene psychotherapeutische Ansätze sowie Interventionen bei Kernsymptomen beleuchtet. Ein Blick auf die Versorgungsstrukturen und praxisnahe Fallbeispiele runden das Werk ab.

A Question of Choice Pamela McGrath. 2018-10-26 First published in 1997, this book contributes to our understanding of the way our society responds to issues of death and dying. The trans-disciplinary research which informs this discussion is situated in the disciplines of bioethics and palliative care. Postmodern notions of discourse and power are used to explore the organizational approach of one hospice (Karuna Hospice Service) to working with the dying. In modern, Western technological societies, biomedicine is the dominant discourse which underpins our care of the terminally ill. Bioethics has recently emerged as a discipline concerned with resolving the many ethical dilemmas arising from such a physiological, technologized approach to death. Rather than

add to such studies, this research looks into the direction of alternative ways of responding to the dying in our community. KHS was chosen for this research as it presented the possibility of a holistic and spiritual alternative to the positivist, reductionist hegemony of scientific medicine. The research focus is on establishing and describing this difference, and exploring how such an organization could maintain resistance to mainstream medicine. The research findings are shared with the intent of using the material and insights gained to explore important issues presently arising in bioethics and palliative care, for example the recent critique of Principlism in bioethics and the methodological difficulties restricting research into spirituality for palliative care.

EBOOK: Death's Dominion: Ethics at the End of Life Simon Woods.2006-12-16 I enjoyed reading this book very much. It is very readable and well argued using real life cases and thought experiments as well ... The book provides the reader with a short history of and an overview of the most important issues in modern palliative care. Various theoretical discussions are clearly set out, such as: the relationship between the hospice movement and modern palliative care, between palliative care and health care in general, between palliative sedation and euthanasia, and the question whether euthanasia can be part of palliative care. The author starts with exploring the existing debates and then develops his own arguments in a balanced and well-structured way. Medicine, Health Care and Philosophy The text of this book is accessible, the philosophical and ethical arguments are clearly articulated, and relevant ethical principles are integrated into the critique of the issues, making this a very useful book for nurses working in palliative as well as in general care. Nursing Ethics It is crucially important for any student or researcher who is seriously considering ethical and policy matters at the end of life to embrace and tackle intellectually the issues that Woods raises in this

book. I would happily recommend it. Journal of Medical Ethics What constitutes a good death? Is it possible to arrange a good death? Is killing compatible with caring? This book looks at death and the issues and ethical dilemmas faced at the end of life. It addresses the central issues in the field such as: Withholding and withdrawing treatment Euthanasia and assisted suicide Terminal sedation The role of autonomy Palliative care Drawing on a philosophical framework, the author explores end-of-life issues in order to reflect on the nature of the good death and how this may be achieved. The book considers whether it is permissible or desirable to influence the quality of dying: offering palliative sedation as a possible alternative to terminal sedation, the argument is extended to examine why some forms of assisted dying can be shown to be compatible with the ideas of palliative care. Consideration is also given to future developments such as life extension techniques and the ethical questions that that these techniques might raise. As such, the book follows in the ongoing philosophical tradition to critique and analyse current thought on the topic of death, encouraging self-reflection in the reader and offering suggestions for practice in end-of-life care. Death's Dominion is key reading for students and professionals involved in care of the dying, as well as those with an interest in the philosophical issues surrounding end-of-life care.

Oxford Textbook of Palliative Medicine Nathan I. Cherny, Marie Fallon, Stein Kaasa, Russell K. Portenoy, David Currow. 2015 Emphasising the multi-disciplinary nature of palliative care the fourth edition of this text also looks at the individual professional roles that contribute to the best-quality palliative care.

Conn's Current Therapy 2018 E-Book Rick D. Kellerman, Edward T. Bope. 2017-11-10 Designed for busy primary care specialists and other first-line care providers, Conn's Current Therapy 2018, by Drs. Edward T. Bope and Rick D. Kellerman, delivers up-to-date treatment information in a concise

yet in-depth format. Recognized leaders in the field provide their personal approaches and evidence-based clinical management options for the conditions you're most likely to see in your everyday practice. Follows a consistent, templated format throughout, with diagnosis, therapy, drug protocols, and treatment pearls presented in easy-to-use boxes and tables for fast reference. Focuses on the most current diagnosis and treatment protocols for common complaints, acute diseases, and chronic illnesses - more than 300 topics, all carefully reviewed and updated. Key Concepts in Palliative Care Moyra A Baldwin, Jan Woodhouse. 2010-11-15 Taking account of the British government's End of Life Care Strategy, contributors set out the key issues affecting practice across a range of health and social care contexts. The book covers topics ranging from dying and death to symptom management and spiritual care, backed up with practical examples. Each entry comprises: a snapshot definition of the topic, key points, a discussion of the main debates, links to practice through thought-provoking case histories, and suggestions for further reading.

Principles and Practice of Geriatric Psychiatry Marc E. Agronin, Gabe J. Maletta. 2006 Written by noted authorities in geriatric psychiatry, this volume is a clinically oriented guide to the diagnostic workup and treatment of psychiatric and neuropsychiatric disorders in elderly patients. The book describes in detail the neurologic and neuropsychiatric patient assessment and the use of all treatment modalities, both psychotherapeutic and pharmacologic, in elderly patients. Chapters discuss the treatment of disorders in all clinical settings—inpatient, outpatient, emergency, primary care, assisted living, and long-term care. Algorithms for workup and treatment are included, as well as case studies and personal accounts by patients and care providers. Appendices provide drug information and additional resources.

Oxford Handbook of Palliative Care Max Watson, Caroline Lucas, Andrew Hoy, Jo Wells. 2009-03-26 This practical guide briefly covers the historical and epidemiological background of palliative care and the growth of palliative medicine as a specialty, before dealing with major physical, psychological, spiritual, and symptom management issues from diagnosis to bereavement care.

A Field Manual for Palliative Care in Humanitarian Crises Elisha Waldman, Marcia Glass. 2019-11-11 As humanitarian aid organizations have evolved, there is a growing recognition that incorporating palliative care into aid efforts is an essential part of providing the best care possible. *A Field Manual for Palliative Care in Humanitarian Crises* represents the first-ever effort at educating and providing guidance for clinicians not formally trained in palliative care in how to incorporate its principles into their work in crisis situations. Written by a team of international experts, this pocket-sized manual identifies the needs of people affected by natural hazards, political or ethnic conflict, epidemics of life-threatening infections, and other humanitarian crises. Later chapters explore topics including pain management, skin conditions, non-communicable diseases, palliative care emergencies, the law

and ethics of end of life care, and more. Concise and highly accessible, this manual is an ideal educational tool pre-deployment or during fieldwork for clinicians involved in planning and providing humanitarian aid, local care providers, and medical trainees.

Public Health Nursing Marcia Stanhope, PhD, RN, FAAN, Jeanette Lancaster, PhD, RN, FAAN. 2015-10-07 Prepare for a successful career as a community/public health nurse! *Public Health Nursing: Population-Centered Health Care in the Community*, 9th Edition provides up-to-date information on issues that impact public health nursing, such as infectious diseases, natural and man-made disasters, and health care policies affecting individuals, families, and communities. Real-life scenarios show examples of health promotion and public health interventions. New to this edition is an emphasis on QSEN skills and an explanation of the influence of the Affordable Care Act on public health. Written by well-known nursing educators Marcia Stanhope and Jeanette Lancaster, this comprehensive, bestselling text is ideal for students in both BSN and Advanced Practice Nursing programs. Evidence-Based Practice and Cutting Edge boxes illustrate the use and application of the latest research findings in public/community health nursing. Healthy People 2020 boxes highlight goals and objectives for promoting the nation's health and wellness over the next decade. Levels of Prevention boxes identify specific nursing interventions at the primary, secondary, and tertiary levels. Practice Application scenarios help you apply chapter content to the practice setting by analyzing case situations and answering critical thinking questions. Linking Content to Practice boxes provide examples of the nurse's role in caring for individuals, families, and populations in community health settings. Unique! Separate chapters on healthy cities, the Minnesota Intervention Wheel, and nursing centers describe different approaches to community health initiatives. *Community/Public Health Nursing Online* consists of 14 modules that bring

community health situations to life, each including a reading assignment, case scenarios with learning activities, an assessment quiz, and critical thinking questions. Sold separately. NEW! Coverage of health care reform discusses the impact of The Patient Protection and Affordable Care Act of 2010 (ACA) on public health nursing. NEW! Focus on Quality and Safety Education for Nurses boxes give examples of how quality and safety goals, knowledge, competencies and skills, and attitudes can be applied to nursing practice in the community.

Handbook of Perinatal and Neonatal Palliative Care Rana Limbo, PhD, RN, CPLC, FAAN, Charlotte Wool, PhD, RN, Brian S. Carter, MD, FAAP. 2019-11-11 The first resource of its kind, this authoritative handbook holistically addresses the multidimensional aspects of perinatal and neonatal palliative care. Written by an interprofessional team of renowned specialists, it is both a text and an evidencebased reference for all members of the palliative care team. This book helps individual team members forge interdisciplinary approaches to care, assess current programs, improve the quality of care, and tailor new models of care. Encompassing the perspectives of numerous multidisciplinary healthcare providers, the book underscores the unique aspects of perinatal and neonatal palliative care, with a focus on improving quality of life, as well as comfort at the end of life. It describes healthcare for neonates and pregnant mothers, care and support of the family, planning and decision-making, and effective support for grief and bereavement, addressing all palliative and neonatal care settings. Other chapters focus on the prenatal period after diagnosis of the expected baby's life-threatening condition. These include such topics as care of the mother, delivering devastating news, and advance care planning. Each chapter contains photos, figures, and/or tables and case studies with clinical implications and critical thinking questions. Also included is an extensive listing of relevant palliative care organizations. Paintings and poetry provide an artistic

backdrop to the authors' inspiring words. Key Features: Addresses a growing need for specific provider resources in neonatal palliative care Covers the clinical and emotional aspects of palliative care for babies and their families Abundant resources for effective and compassionate family-centered care Case studies with critical thinking questions Accompanying video clips of healthcare and family interactions Supplemental image bank included

Effective Management of Long-Term Care Facilities Douglas A. Singh.2014-10-30 Effective Management of Long-Term Care Facilities, Third Edition examines the complex operations of the long-term care facility and offers critical skills to current and future long-term care administrators for delivering quality, cost-effective services. Comprehensive, yet concise, the Third Edition explores the necessary skills and tools for creating a person-centered environment. Topics covered include: how to adapt an existing nursing facility, the growing culture change movement, and the laws, regulations, and financing of the long-term care industry, as well as its organization and delivery. Finally, this book offers extensive coverage of the essential skills necessary to manage it all.

Palliative Care Nursing Marianne Matzo, PhD, APRN-CNP, FPCN, FAAN, Deborah Witt Sherman, PhD, APRN, ANP-BC, ACHPN, FAAN.2018-06-28 "This 5th edition is an important achievement; it is a symbol of commitment to the field of palliative nursing, where we have been and where we are going." - Betty Rolling Ferrell, PhD, MA, FAAN, FPCN, CHPN From the Foreword The aging population has only grown since the first edition of this comprehensive and seminal publication nearly 20 years ago. Based on the need to humanize rather than medicalize the illness experience

for patients, this text delves into palliative care beyond the specific diseases affecting the patient. Instead, content focuses on the whole person and family. Palliative patients struggle with chronic, debilitating, and painful conditions, and grapple with the fact that life as they knew it has already passed away. Families and friends reciprocally suffer, not knowing how to help and therefore become the secondary victims of the disease. This is not the challenge of a lone nurse, or a single physician, therapist, or social worker. Rather, palliative and hospice care requires the expertise and unique roles of an interprofessional team to help the patient and family strengthen their resilience, continue to find meaning and purpose in life, and cure what can be cured. Palliative Care Nursing, Fifth Edition, delivers advanced empirical, aesthetic, ethical and personal knowledge. This new edition brings an increased focus on outcomes, benchmarking progress, and goals of care. It expounds upon the importance of the cross-disciplinary collaboration introduced in the previous edition. Every chapter in Sections I, II, and III includes content written by a non-nursing member of the interprofessional team. Based on best-evidence and clinical practice guidelines, this text presents comprehensive, targeted interventions responsive to the needs of palliative and hospice patients and family. Each chapter contains compassionate, timely, appropriate, and cost-effective care for diverse populations across the illness trajectory. Key Features The expanded new edition offers current, comprehensive, one-stop source of highly-relevant clinical information on palliative care Life-span approach: age-appropriate nursing considerations (e.g. geriatric, pediatric and family) Includes disease-specific and symptom-specific nursing management chapters Promotes a holistic and interdisciplinary approach to palliative care Offers important legal, ethical and cultural considerations related to death and dying Case Studies with Case Study Conclusion in each clinical chapter New to The Fifth Edition: An expanded chapter on Palliative Care incorporates most up to

date scope and standards, information on Basic and Advanced HPNA certification, self-reflection and self-care for nurses. A chapter on Interprofessional Collaboration Instructor Resources: Power points and Test bank

The Ethics of Palliative Care Henk ten Have, David Clark. 2002 This volume provides a picture of palliative care ethics in the European context. It should interest those involved in the delivery and management of palliative care services, as well as students and researchers.

Social Aspects of Care Betty R. Ferrell, Nessa Coyle. 2015-12-02 'Social Aspects of Care' provides an overview of financial and mental stress illness places, not just on the patient, but on the family as well. This volume contains information on how to support families in palliative care, cultural considerations important in end-of-life care, sexuality and the impact of illness, planning for the actual death, and bereavement.

The Nature of Suffering and the Goals of Medicine Eric J. Cassell. 2004-03-25 This is a revised and expanded edition of a classic in palliative medicine, originally published in 1991. With three added chapters and a new preface summarizing our progress in the area of pain management, this is a must-have for those in palliative medicine and hospice care. The obligation of physicians to relieve human suffering stretches back into antiquity. But what exactly, is suffering? One patient with metastatic cancer of the stomach, from which he knew he would shortly die, said he was not suffering. Another, someone who had been operated on for a minor problem--in little pain and not seemingly distressed--said that even coming into the hospital had been a source of pain and not suffering. With such varied responses to the problem of suffering, inevitable questions arise. Is it the doctor's responsibility to treat the disease or the patient? And what is the relationship between suffering and the goals of medicine? According to Dr. Eric Cassell, these are crucial questions, but unfortunately,

have remained only queries void of adequate solutions. It is time for the sick person, Cassell believes, to be not merely an important concern for physicians but the central focus of medicine. With this in mind, Cassell argues for an understanding of what changes should be made in order to successfully treat the sick while alleviating suffering, and how to actually go about making these changes with the methods and training techniques firmly rooted in the doctor's relationship with the patient. Dr. Cassell offers an incisive critique of the approach of modern medicine. Drawing on a number of evocative patient narratives, he writes that the goal of medicine must be to treat an individual's suffering, and not just the disease. In addition, Cassell's thoughtful and incisive argument will appeal to psychologists and psychiatrists interested in the nature of pain and suffering.

Ethics in Palliative Care Robert C. Macauley.2018 A comprehensive analysis of ethical topics in palliative care, combining clinical experience and philosophical rigor. A broad array of topics are explored from historical, legal, clinical, and ethical perspectives, offering both the seasoned clinician and interested lay reader a thorough examination of the complex ethical issues facing patients suffering from life-threatening illness

Hospice and Palliative Medicine and Supportive Care Flashcards Sriram

Yennurajalingam,Eduardo Bruera.2018 Hospice and Palliative Medicine and Supportive Care Flashcards is a comprehensive, evidence-based book of flashcards for clinicians caring for patients who require hospice and palliative care and supportive care. Written in a clinical scenario/vignette, question and answer format by experts with first-hand experience in the field, the flashcards are highly readable and serve as a source of fast answers to clinical questions in the field. A total of 300 flashcards are organized into chapters by symptom/disease and provide readers with up-to-date

information that follow the core curriculum of American Board of Hospice and Palliative Medicine for ease of use and rapid review for exams. This book will equip care professionals with key concepts related to the assessment and management of palliative care, making it an ideal point-of-care quick reference material for physicians, nurse practitioners, fellows, residents, and students.

Textbook of Palliative Care Communication Elaine Wittenberg, Betty R. Ferrell, Joy Goldsmith, Thomas Smith, Sandra L. Ragan, George Handzo. 2015-11-20 'The Textbook of Palliative Care Communication' is the authoritative text on communication in palliative care. Uniquely developed by an interdisciplinary editorial team to address an array of providers including physicians, nurses, social workers, and chaplains, it unites clinicians and academic researchers interested in the study of communication.

Narrative Medicine in Hospice Care Tara Flanagan. 2019-12-31 Narrative medicine, an interdisciplinary field that brings together the studies of literature and medicine, offers both a way of understanding patient identity and a method for developing a clinician's responsiveness to patients. While recognizing the value of narrative medicine in clinical encounters, including the ethical aspects of patient discourse, Tara Flanagan examines the limits of narrative practices for patients with cognitive and verbal deficits. In *Narrative Medicine in Hospice Care: Identity, Practice, and Ethics through the Lens of Paul Ricoeur*, Flanagan contends that the models of selfhood and care found in the work of Ricoeur can offer a framework for clinicians and caregivers regardless of the verbal and cognitive capabilities of a patient at the end of life. In particular, Ricoeur's concept of patient identity connects with the narrative method of life review in hospice and offers an opportunity to address the religious and spiritual dimensions of the patient experience.

Palliative and Serious Illness Patient Management for Physician Assistants Nadya Dimitrov, Kathy

Kemle.2021-09-09 From its beginning with Eugene Stead, MD at Duke University, the Mission of the Physician Assistant profession has been to create, increase or expand health care access in areas and populations with the greatest need.¹ Dr. Henry Silver's Child Health Associate Program at the University of Colorado is a good example as is Dr. Hu Myer's Alderson Broaddus Program which serves isolated rural communities in West Virginia.² Dr. Richard Smith's MEDEX Program at the University of Washington was also designed specifically to serve rural and medical underserved communities of the Pacific Northwest.³--

The Philosophy of Palliative Care Fiona Randall, R S Downie.2006-02-23 The idea of a philosophy of palliative care emerged with Cicely Saunders' vision for 'a good death', and was developed further with the WHO definition of palliative care. It is now being applied not only to cancer patients, but to all patients in end of life situations. As this 'palliative care approach' advances, it is important to pause and comment on its effectiveness. It is a philosophy of patient care, and is therefore open to critique and evaluation. Using the Oxford Textbook of Palliative Medicine, 3rd edition as their basic reference, Randall and Downie present their argument that the palliative care approach has become too busy and over-professionalised, and that it therefore has significant weaknesses. They examine the framework of the specialty - quality of life, autonomy, dignity, patient-centredness, and the priority assigned to relatives in the remit of care - and the moral problems associated with implementing such a philosophy. The resource implications of various health care policies are also discussed in relation to the WHO definition. Whilst the authors defend the achievements of palliative care and those who work in the profession, they present suggestions for an alternative philosophy. Their philosophy prompts many ethical and philosophical questions about the future of palliative care.

End of life choices Fiona Randall, Robin Downie. 2009-10-08 A book for nurses, doctors and all who provide end of life care, this essential volume guides readers through the ethical complexities of such care, including current policy initiatives, and encourages debate and discussion on their controversial aspects. Divided into two parts, it introduces and explains clinical decision-making processes about which there is broad consensus, in line with guidance documents issued by WHO, BMA, GMC, and similar bodies. The changing political and social context where 'patient choice' has become a central idea, and the broadened scope of patients' best interests, have added to the complexity of decision-making in end of life care. The authors discuss issues widely encountered by GPs, nurses, and hospital clinicians. These include patient choice, consent, life-prolonging treatment, and symptom relief including sedation. Part two explores the more controversial current end of life care initiatives, such as advance care planning, preferred place of care and death, euthanasia and assisted suicide, extended ideas of 'best interests', and the view that there are therapeutic duties to the relatives of patients. Throughout their discussion the authors draw attention to loose ends and contradictions in some of the proposals. Examining the current policy of consumerist choice, they reject its place in the health service, proposing a realistic, fair, humane and widely adoptable system of end of life care. As knowledge of ethical theories is required in training courses, and the vocabulary of ethical theory is widespread in current discussions a substantial appendix on ethical theories and terms is available online. Written by the same authors as *The Philosophy of Palliative Care: Critique and Reconstruction*, which won the Medical Journalists' Association Specialists Book Award 2007, this new book for non-specialists is essential reading for all health care professionals involved in providing end of life care.

Textbook of Palliative Care Communication Elaine Wittenberg, Betty Ferrell, Joy Goldsmith, Thomas

Smith, Myra Glajchen, George Handzo, Sandra L. Ragan. 2015-10-23 *The Textbook of Palliative Care Communication* is the authoritative text on communication in palliative care, providing a compilation of international and interdisciplinary perspectives. The volume was uniquely developed by an interdisciplinary editorial team to address an array of providers including physicians, nurses, social workers, and chaplains, and unites clinicians with academic researchers interested in the study of communication. By featuring practical conversation and curriculum tools stemming from research, this text integrates scholarship and inquiry into translatable content that others can use to improve their practice, teach skills to others, and engage in patient-centered communication. The volume begins by defining communication, explicating debatable issues in research, and highlighting specific approaches to studying communication in a palliative care context. Chapters focus on health literacy and cultural communication, patient and family communication, barriers and approaches to discussing palliative care with specific patient populations, discussing pain, life support, advance care planning, and quality of life topics such as sexuality, spirituality, hope, and grief. Team communication in various care settings is outlined and current research and education for healthcare professionals are summarized. Unique to this volume are chapters on conducting communication research, both qualitatively and quantitatively, to promote further research in palliative care.

Hospice and Palliative Care Walter B. Forman. 2003 *Hospice and Palliative Care: Concepts and Practice, Second Edition* offers theoretical perspectives and practical information about this growing field. Contributing authors from a variety of backgrounds working in end-of-life care present a historical overview of hospice and explain how the interdisciplinary team functions in the hospice setting. They then discuss challenges to the team including symptom management, death education,

ethical issues, and support groups. The future of hospice is addressed in the final part of the book. The contributors are experts in community medical care, geriatric care, nursing care, pain management, research, counseling, and hospice management.

Hospice Ethics Timothy W. Kirk, Bruce Jennings. 2014 This book is the first comprehensive collection devoted to analyzing distinctive ethical issues arising in the delivery of hospice care and designed to promote best ethical practices for hospice care professionals and organizations.

Palliative Care in Nephrology Alvin H. Moss MD, FACP, FAAHPM, Dale E. Lupu MPH, PhD, Nancy C. Armistead MPA, Louis Diamond. 2020-07-14 Palliative care has become increasingly important across the spectrum of healthcare, and with it, the need for education and training of a broad range of medical practitioners not previously associated with this field of care. As part of the Integrating Palliative Care series, this volume on palliative care in nephrology guides readers through the core palliative knowledge and skills needed to deliver high value, high quality care for seriously ill patients with chronic and end-stage kidney disease. Chapters are written by a team of international leaders in kidney palliative care and are organized into sections exploring unmet supportive care needs, palliative care capacity, patient-centered care, enhanced support at the end of life, and more. Chapter topics are based on the Coalition for Supportive Care of Kidney Patients Pathways Project change package of 14 evidence-based best practices to improve the delivery of palliative care to patients with kidney disease. An overview of the future of palliative care nephrology with attention to needed policy changes rounds out the text. Palliative Care in Nephrology is an ideal resource for nephrologists, nurses, nurse practitioners, physician assistants, social workers, primary care clinicians, and other practitioners who wish to learn more about integrating individualized, patient-

centered palliative care into treatment of their patients with kidney disease.

Palliative Care and Catholic Health Care Peter J. Cataldo, Dan O'Brien. 2019-03-05 This book offers a comprehensive overview of the compatibility of palliative care with the vision of human dignity in the Catholic moral and theological traditions. The unique value of this book is that it presents expert analysis of the major domains of palliative care and how they are compatible with, and enhanced by, the holistic vision of the human person in Catholic health care. This volume will serve as a critically important ethical and theological resource on palliative care, including care at the end of life, for bioethicists, theologians, palliative care specialists, other health care professionals, Catholic health care sponsors, health care administrators and executives, clergy, and students. Patients receiving palliative care and their families will also find this book to be a clarifying and reassuring resource.

The books is fully illustrated with colour photographs and illustrations throughout, and including extensive case studies to demonstrate the practical applications of the most recent research in this area. New content

covering pressure ulcers, incontinence associated dermatitis, venous leg ulcers and palliative wound care. Uniquely it uses a lifespan perspective addressing the care of wounds in all patients from birth to old age. All chapters have been fully updated to reflect the current evidence base. Nursing theory is used throughout instead of a traditional medical approach, making the material more applicable to nursing practice. Links current nursing theory to practice using extensive case studies. High quality full colour photographs and illustrations throughout.

Palliative and Serious Illness Patient Management for Physician Assistants Nadya Dimitrov, Kathy Kemle. 2021-08-26 The first resource of its kind, Palliative and Serious Illness Patient Management for Physician Assistants provides a fundamental framework for physician assistants and physician associates to incorporate palliative care medicine, including end-of-life care, into their practice. The book focuses on pharmacologic and integrative medical therapeutic modalities, as well as the evaluation and treatment of special populations, which reflects the reality of a physician assistant's day-to-day job. It uses a patient-centered approach to address the comprehensive management of serious illness patients, as well as their designated families, significant others, caregivers, and health care providers. Chapters are organized into six sections that cover the essential aspects of care, symptom management, and transitioning care at the end-of-life. This book is ideal for physician assistant trainers (didactic or clinical), students, and practicing clinicians who seek to enhance their communication and medical skills in the treatment of all seriously illness patient populations in any specialty, and in the management of their symptoms at any stage of their disease or condition.

Palliative Care Ethics Fiona Randall, Robert Silcock Downie. 1999 Palliative Care Ethics should interest all those who care for the terminally ill: especially doctors, nurses, social workers, and the clergy. The well-illustrated central theme applies to every area of health care: that technical

expertise must be controlled by humane non-technical judgement.--BOOK JACKET.
