Carthage R. F. Docter,Ridha Boussoffara,Pieter ter Keurs.2015-05-12 Carthage is mainly known as the city that was utterly destroyed by the Romans in 146 BC. This book tells the story about this fascinating city, which for centuries was the center of a far-flung trade network in the Mediterranean. Carthage was founded by Phoenician migrants, who settled in the north of what is now Tunisia, probably in the ninth century BC. The city's strategic location was key to its success. From here, the Carthaginians could dominate both seafaring trade and the overland trade with the African interior. Carthage, Fact and Myth presents the most recent views of Carthaginian society, its commerce and politics, and the way its society was organized. Chapters, written by leading experts, describe the founding of Carthage, its merchant and war fleets, and the devastating wars with Rome. These include the campaigns of the famous Carthaginian commander Hannibal who crossed the Alps with his army and elephants to pose a grave threat to Rome, but he was ultimately unable to prevail. Tunisian experts describe Roman Carthage - the city as it was rebuilt by the Emperor Augustus - and discuss the later Christian period. Finally, the reader encounters a wealth of information about European images of Carthage, from 16th-century prints to the Alix series of comics.

On the Road Again William Wyckoff.2011-10-17 In On the Road Again, William Wyckoff explores Montana’s changing physical and cultural landscape by pairing photographs taken by state highway

engineers in the 1920s and 1930s with photographs taken at the same sites today. The older photographs, preserved in the archives of the Montana Historical Society, were intended to document the expenditure of federal highway funds. Because it is nearly impossible to photograph a road without also photographing the landscape through which that road passes, these images contain a wealth of information about the state's environment during the early decades of the twentieth century. To highlight landscape changes -- and continuities -- over more than eighty years, Wyckoff chose fifty-eight documented locations and traveled to each to photograph the exact same view. The pairs of old and new photos and accompanying interpretive essays presented here tell a vivid story of physical, cultural, and economic change. Wyckoff has grouped his selections to cover a fairly even mix of views from the eastern and western parts of the state, including a wide assortment of land use settings and rural and urban landscapes. The photo pairs are organized in thirteen "visual themes," such as forested areas, open spaces, and sacred spaces, which parallel landscape change across the entire American West. A close, thoughtful look at these photographs reveals how crops, fences, trees, and houses shape the everyday landscape, both in the first quarter of the twentieth century and in the present. The photographs offer an intimate view into Montana, into how Montana has changed in the past eighty years and how it may continue to change in the twenty-first century. This is a book that will captivate readers who have, or hope to have, a tie to the Montana countryside, whether as resident or visitor. Regional and agricultural historians, geographers and geologists, and rural and urban planners will all find it fascinating.

Propaganda Jacques Ellul.2021-07-27 This seminal study and critique of propaganda from one of the greatest French philosophers of the 20th century is as relevant today as when it was first published in 1962. Taking not only a psychological approach, but a sociological approach as well, Ellul's book outlines the taxonomy for propaganda, and ultimately, it's destructive nature towards democracy. Drawing from his own experiences fighting for the French resistance against the Vichy regime, Ellul offers a unique insight into the propaganda machine.

The Vitamin A Story B. Koletzko.2012-09-04 This book shows how vitamin A deficiency – before the vitamin was known to scientists – affected millions of people throughout history. It is a story of sailors and soldiers, penniless mothers, orphaned infants, and young children left susceptible to blindness and fatal infections. We also glimpse the fortunate ones who, with ample vitamin A-rich food, escaped this elusive stalker. Why were people going blind and dying? To unravel this puzzle, scientists around the world competed over the course of a century. Their persistent efforts led to the identification of vitamin A and its essential role in health. As a primary focus of today's international public health efforts, vitamin A has saved hundreds of thousands of lives. But, we discover, they could save many more were it not for obstacles erected by political and ideological zealots who lack a historical perspective of the problem. Although exhaustively researched and documented, this book is written for intellectually curious lay readers as well as for specialists. Public health professionals, nutritionists, and historians of science and medicine have much to learn from this book about the cultural and scientific origins of their disciplines. Likewise, readers interested in military and cultural history will learn about the interaction of health, society, science, and politics. The author's presentation of vitamin A deficiency is likely to become a classic case study of health

disparities in the past as well as the present.

Truth, Lies, and O-Rings Allan J. McDonald.2012-03-11 On a cold January morning in 1986, NASA launched the Space Shuttle Challenger, despite warnings against doing so by many individuals, including Allan McDonald. The fiery destruction of Challenger on live television moments after launch remains an indelible image in the nation's collective memory. In Truth, Lies, and O-Rings, McDonald, a skilled engineer and executive, relives the tragedy from where he stood at Launch Control Center. As he fought to draw attention to the real reasons behind the disaster, he was the

only one targeted for retribution by both NASA and his employer, Morton Thiokol, Inc., makers of the shuttle's solid rocket boosters. In this whistle-blowing yet rigorous and fair-minded book, McDonald, with the assistance of internationally distinguished aerospace historian James R. Hansen, addresses all of the factors that led to the accident, some of which were never included in NASA's Failure Team report submitted to the Presidential Commission. *Truth, Lies, and O-Rings* is the first look at the Challenger tragedy and its aftermath from someone who was on the inside, recognized the potential disaster, and tried to prevent it. It also addresses the early warnings of very severe debris issues from the first two post-Challenger flights, which ultimately resulted in the loss of Columbia some fifteen years later.

He played for 7 years on one of the best teams ever to take the field, the Cincinnati Reds—the Big Red Machine. He played in 4 National League Championship Series and 3 World Series. He was in the game that the Major League Baseball Network considered the best game of the last 50 years—game 6 of the 1975 World Series. But Darrel had a nagging frustration that eroded his belief in his significance. Disappointments, setbacks and opposition attacked his dream. He was a utility player among superstars. Most men are utility players. They face the same battles that Darrel faced. They get frustrated and lose enthusiasm for work and life itself. But, when a man discovers his God given significance, he enjoys life more and does better in it. Then, whatever his game, he is in the Big Leagues.
