The Routledge Handbook of Emotions in the Ancient Near East Karen Sonik,Ulrike Steinert.2022-08-30 This in-depth exploration of emotions in the ancient Near East illuminates the rich and complex worlds of feelings encompassed within the literary and material remains of this remarkable region, home to many of the world's earliest cities and empires, and lays critical foundations for future study. Thirty-four chapters by leading international scholars, including philologists, art historians, and archaeologists, examine the ways in which emotions were conceived, experienced, and expressed by the peoples of the ancient Near East, with particular attention to Mesopotamia, Anatolia, and the kingdom of Ugarit, from the Late Uruk through to the Neo-Babylonian Period (ca. 3300–539 BCE). The volume is divided into two parts: the first addressing theoretical and methodological issues through thematic analyses and the second encompassing corpus-based approaches to specific emotions. Part I addresses emotions and history, defining the terms, materialization and material remains, kings and the state, and engaging the gods. Part II explores happiness and joy; fear, terror, and awe; sadness, grief, and depression; contempt, disgust, and shame; anger and hate; envy and jealousy; love, affection, and admiration; and pity, empathy, and compassion. Numerous sub-themes threading through the volume explore such topics as emotional expression and suppression in relation to social status, gender, the body, and particular social and spatial conditions or material contexts. The Routledge Handbook of Emotions in the Ancient Near East is an invaluable and accessible resource for Near Eastern studies and adjacent fields, including Classical, Biblical, and medieval studies, and a must-read for scholars, students, and others interested in the history and cross-cultural study of emotions.

Everyday Conceptions of Emotion J.A. Russell,José-Miguel Fernández-Dols,Anthony S.R. Manstead,Jane C. Wellenkamp.1995-05-31 In Everyday Conceptions of Emotion, prominent anthropologists, linguists and psychologists come together for the first time to discuss how emotions are conceptualised by people of different cultures and ages, speaking different languages. Anger, fear, jealousy and emotion itself are concepts that are bound up with the English language, embedded in a way of thinking, acting and speaking. At the same time, the metaphors underlying such concepts are often similar across languages, and children of different cultures follow common developmental pathways. The book thus discusses the interplay of social and cultural factors that humans share in their development of an understanding of the affective side of their lives. For researchers interested in emotion, development of concepts and language, cultural and linguistic influences on psychological processes.

*Earth Emotions* Glenn A. Albrecht.2019-05-15 As climate change and development pressures overwhelm the environment, our emotional relationships with Earth are also in crisis. Pessimism and distress are overwhelming people the world over. In this maelstrom of emotion, solastalgia, the homesickness you have when you are still at home, has become, writes Glenn A. Albrecht, one of the defining emotions of the twenty-first century. Earth Emotions examines our positive and negative Earth emotions. It explains the author's concept of solastalgia and other well-known eco-emotions such as biophilia and topophilia. Albrecht introduces us to the many new words needed to describe the full range of our emotional responses to the emergent state of the world. We need this creation of a hopeful vocabulary of positive emotions, argues Albrecht, so that we can extract ourselves out of environmental desolation and reignite our millennia-old biophilia—love of life—for our home planet. To do so, he proposes a dramatic change from the current human-dominated Anthropocene era to one that will be founded, materially, ethically, politically, and spiritually on the revolution in thinking being delivered by contemporary symbiotic science. Albrecht names this period the Symbiocene. With the current and coming generations, Generation Symbiocene, Albrecht sees reason for optimism. The battle between the forces of destruction and the forces of creation will be won by Generation Symbiocene, and Earth Emotions presents an ethical and emotional odyssey for that victory.

Emotions, Media and Politics Karin Wahl-Jorgensen. 2019-01-15 Emotions have long been neglected in media research, although their role is a vital ingredient in shaping our shared stories and the ways we engage with them. But emotions, as they circulate through the media, can also be divisive and exclusionary. Karin Wahl-Jorgensen makes the case for researching the role of emotions in mediated politics. Drawing on a series of studies, she explores the complex relationship between emotions, politics and media. The book includes analyses of how Facebook structures emotional reactions; the anger of Donald Trump; the use of personal storytelling in feminist Twitter hashtags; the role of emotionality in award-winning journalism; and the communities created by political fandoms. Essential reading for scholars and students, this important volume opens up new ways of thinking about and researching emotions, media and politics.

**Components of emotional meaning** Johnny J. R. Fontaine, Klaus R. Scherer, Cristina Soriano. 2013-08-01 Publications on emotion (and the affective sciences in general) have exploded in the last decade. Numerous research teams and individual scholars from many different disciplines have published research papers or books about many different aspects of emotions and their role in behaviour and society. However, One aspect of emotional research that has been somewhat neglected, is the way in which emotional terms translate into other languages. When using terms like anger, sadness, fear, disgust, and joy for so-called basic emotions, as well as terms like shame, guilt, pride, regret and contempt for more complex emotions, it is naturally assumed that the emotion terms used for research in the native language of the researchers and translated into English are completely equivalent in meaning. However, this is not generally the case. In many cases there is no direct one to one relationship between an English term and a term in an alternative language. In fact, there can be significant differences in the way that these seemingly similar emotional terms can be applied across various languages, with important implications for how we review and appraise this work. This book presents an extensive cross-cultural and cross-linguistic review of the meaning of emotion words, adopting a novel methodological approach. Based on the Component Process Model, the authors developed a new instrument to assess the meaning of emotion terms. This instrument, the GRID questionnaire, consists of a grid of 24 emotion terms spanning the emotion domain and 142 emotion features that operationalize five emotion components (Appraisals, Bodily reactions, Expressions, Action tendencies, and Feelings). For the operationalization of these five emotion components, very different emotion models from the Western and the cultural-comparative emotion literature were taken into account. 'Components of Emotional Meaning' includes contributions from psychological, cultural-comparative, and linguistic perspectives demonstrating how this new instrument can be used to empirically study very different research questions on the meaning of emotion terms. The implications of the results for major theoretical debates on emotion are also discussed. For all researchers in the affective sciences, this book is an important new reference work.

iNTELLYJELLY May'19 Issue. Dr. Sonil Sumit Mishra, Afrin Shaikh. 2019-05-01 iNTELLYJELLY- A name inspired by (no points for guessing) the word 'intelligent'. Among many, the suffix 'Jelly' was agreed upon unanimously by us, as a word that brought in memories of fun, fun, and more fun! An amalgamation of these two words was our way of expressing our intention— to make intelligent reading fun! One of the intentions of this magazine is to be that companion for children that offers a series of situations and stories and encourages them to shape their own ideas. The purpose is also to be a source of conversation which is beautifully woven into the lives of children and helps them develop to be limitless. While brainstorming ideas on how this magazine will play a major role in a child's life, we ideated with numerous scenarios. We imagined a rough train ride where an 8-year-old child is seated in a corner, happily flipping through these pages. We also pictured a beautiful bedtime routine where a 5-year-old and his parents take the opportunity to flip through a few stories and discuss things about the world, something that we rarely do otherwise. We further imagined a 12-year-old child engrossed in taking notes from this to build a science project. When visualising all this, we also imagined gadgets lying far away and not being asked or sought for. We didn't just see a child being nurtured; we saw the child's potential being discovered and an exciting future being created. For kids aged 4 to 12 years, iNTELLYJELLY offers a holistic approach to empower them through a kind of education that instils in them a sense of purpose and a willingness to create something worthwhile. Some of the key areas that iNTELLYJELLY talks about each month are: Values Leadership qualities Emotional quotient Teamwork Logical thinking Knowledge Science Geography Global literature UNESCO's proven methodology plays a major role in inspiring and moulding iNTELLYJELLY's content. As a result, you will find the magazine offering a vibrant and colourful array of comics, stories, activities and a lot more for young readers. With immense pride, we share that iNTELLYJELLY has grown at a great pace and has earned national and international acclamation within the first two years of its inception. This clearly demonstrates our readers' faith in us. Among many, the credit for this progress and ongoing momentum goes to the prestigious schools that have welcomed and introduced iNTELLYJELLY in the lives of their students. It has also been a privilege to partner with Reliance Jio in creating awareness among children. iNTELLYJELLY has also been appreciated by a few eminent personalities like Sir Richard Branson (The Virgin group, UK), Mr. Amitabh Bachchan (Actor), Ms. Nandita Das (Actor and Social Activist) and many more. 'Being limitless' runs through our veins, and hence, we are committed to creating a deeply inset habit of reading among kids, globally.

How do you feel today? Is your heart fluttering in anticipation? Your stomach tight with nerves? Are you falling in love? Feeling a bit miffed? Do you have the heebie-jeebies? Are you antsy with iktsuarpok or filled with nakhes? Recent research suggests there are only six basic emotions. But if that makes you feel uneasy, suspicious, and maybe even a little bereft, THE BOOK OF HUMAN EMOTIONS is for you. In this unique book, you'll get to travel across the world and through time, learning how different cultures have articulated the human experience and picking up some fascinating new knowledge about yourself along the way. Whether you're in search of the perfect word to sum up that cozy feeling you get from being inside on a cold winter's night, surrounded by friends and good food (what the Dutch call gezelligheid), or wondering how nostalgia evolved from a fatal illness to enjoyable self-indulgence, Tiffany Watt Smith draws on history, anthropology, science, art, literature, music, and popular culture to find the answers. In reading THE BOOK OF HUMAN EMOTIONS, you'll discover feelings you never knew you had (like basorexia, the sudden urge to kiss someone) and gain unexpected insights into why you feel the way you do.
