A Feminist Post-transsexual Autoethnography Julie Elizabeth Peters.2018-08-14 Gender as a social class along with its concomitant heteronormative gender coercion seem to be intransigent across time and cultures. But across these cultures we also see a degree of nonconforming behaviour which very often carries significant multi-dimensions of stigma and risk; because the exception proves the rule, an understanding of gender nonconformity sheds light on the normative operation of gender in society. A Feminist Post-transsexual Autoethnography attempts to demythologise trans and gender diversity by conducting an in-depth critical analysis of the life choices of the autoethnographic subject (the author), who was so uncomfortable with their culturally allocated masculinity that they chose to live an apparently normal female life. The research is post-transsexual in that the subject forgoes passing in their affirmed gender to ensure the integrity of the data. A Feminist Post-transsexual Autoethnography may primarily appeal to students and researchers interested in the Sociology of Gender and Sociology of Trans and Gender Diversity, as well as the broader areas of embodiment and power differentials based on gender, class, nationality, location, temporality, sexuality and gender (non)conformity. This insightful volume may also be of interest to those within the fields Health Promotion and Education, Human Rights, Social Justice and Equity or the Social and Cultural Anthropology of Gender.

Mother-Texts Julie Kelso,Marie Porter.2010-07-12 Every day, human beings tell and are told stories, sometimes in obvious ways, sometimes not. Most of our communication with each other, direct or indirect, involves narrative production and reception. Narrative is constitutive of human being. However, whose narratives are heard? Feminists argue that the relations between language, knowledge, gender and power, particularly the question as to whether man-made and controlled language is a material fit to receive and convey woman's stories, are critical issues, because historically, patriarchy has worked to silence women's dialogue. Male knowledge, unsurprisingly, created and continues to create unrepresentative maternal narratives which lead to unreal expectations of mothers and motherwork. It is, therefore, disconcertingly significant for mothers that neither mothers nor their motherwork have been considered worthy of historical record; nor are historical records usually written from a mother's perspective. Hence, the narrative research in this book, which gives recognition to motherhood, mothers and/or the work they do, is valuable. It adds to the rapidly accumulating maternal research—research that is now available for the historical record. Mothers are speaking up, developing a canon of literature/research narrated in maternal language and claiming maternal knowledge and power.

The Sociology of Zygmunt Bauman Michael Hviid Jacobsen,Poul Poder.2016-03-03 Zygmunt Bauman is one of the most inspirational and controversial thinkers on the scene of contemporary sociology. For several decades he has provided compelling analyses and diagnoses of a vast variety of aspects of modern and liquid modern living. This book considers the theoretical significance of his contribution to sociology, but also discusses and adopts a critical stance towards his work. The Sociology of Zygmunt Bauman introduces and critically appraises some of the most significant as well as some of the lesser known of Bauman's contributions to contemporary sociology. An international team of scholars delineates and discusses how Bauman's treatment of these themes challenges conventional wisdom in sociology, thereby revising and revitalizing sociological theory. As a special feature, the book concludes with Bauman's intriguing reflections and contemplations on his own life and intellectual trajectory, published here for the first time in English. In this postscript aptly entitled 'Pro Domo Sua' ('About Myself'), he describes the pushes and pulls that throughout the years have shaped his thinking.

Indigenous Statistics Maggie Walter,Chris Andersen.2016-09-17 In the first book ever published on Indigenous quantitative methodologies, Maggie Walter and Chris Andersen open up a major new approach to research across the disciplines and applied fields. While qualitative methods have been rigorously critiqued and reformulated, the population statistics relied on by virtually all research on Indigenous peoples continue to be taken for granted as straightforward, transparent numbers. This book dismantles that persistent positivism with a forceful critique, then fills the void with a new paradigm for Indigenous quantitative methods, using concrete examples of research projects from First World Indigenous peoples in the United States, Australia, and Canada. Concise and accessible, it is an ideal supplementary text as well as a core component of the methodological toolkit for anyone conducting Indigenous research or using Indigenous population statistics.

Humanist Realism for Sociologists Terry Leahy.2017-01-20 Recent critiques treat humanism as a mistaken value framework. Indeed, the concept of human nature is in fact essential for sociology, but is often being denied at the same time as it appears without acknowledgement. While classic authors can show us how to connect an ethics with a concept of human nature, current humanists must tackle the sociobiological view of human nature and interrogate humanism in the light of the ecological crisis. Humanist Realism for Sociologists both explains and explores some of the main arguments surrounding humanism put forward by classic social theorists such as Aristotle, Marx and Weber, as well as more contemporary authors, such as Braidotti, Oakley, Weedon, Firestone, Connell, Flyvbjerg, Foucault and Bourdieu. A must-have tool for understanding how value perspectives cannot be eliminated from the social sciences, this book is essential for undergraduates, postgraduates and postdoctoral researchers interested in the fields of sociology, anthropology, women's studies, social work, human geography, political philosophy and ecology.

A Theory for Indigenous Australian Health and Human Service Work Lorraine Muller.2020-07-25 Winner of the 2015 Educational Publishing Awards Australia - Scholarly Resource Most people of European background are not aware that they see the world through the lens of the Western tradition, but for Indigenous people, it can seem like a foreign language. Indigenous ways of thinking and working are grounded in many thousands of years of oral tradition, and continue among Australian Aboriginal and Torres Strait Island people today. Lorraine Muller shows that understanding traditional holistic approaches to social and emotional wellbeing is essential for practitioners working with Indigenous clients across the human services. She explores core principles of traditional Indigenous knowledge in Australia, including relatedness, Country, circular learning, stories, and spirituality. She then shows how these principles represent a theory for Indigenous practice. A Theory for Indigenous Australian Health and Human Service Work offers a deep insight into Indigenous Australian ways of working with people, in the context of a decolonisation framework. It is an invaluable resource for both Indigenous and non-Indigenous practitioners and researchers in health, social work, community work, education and related fields. 'In today's global environment, where Indigenous Peoples continue to fight for self-determination, Muller's work is an exemplary model of Indigenous self-determination. It is bound to be a foundational model of Indigenous practice in field of health and well-being.' - Michael Hart, Canada Research Chair in Indigenous Knowledges and Social Work, University of Manitoba 'Lorraine Muller's work covers some centrally important issues for those that work with Aboriginal and Torres Strait Islander people, and who want to understand indigenous knowledge frameworks.' - Dr Mark Wenitong, Apunipima Cape York Health Council

System Leadership for Sustainability Christopher G. Beehner.2019-11-18 This book is the first to explore the application of system leadership to promote sustainable solutions for contemporary and future environmental and social problems. The combination of synthesized research summaries and case studies of individuals and organizations contribute considerably to the field by expanding system leadership concepts from theory to practical application. System leadership has been identified as a method by which complex societal problems can be addressed, but it has as yet not been applied to sustainability. The first chapters introduce the background and fundamentals of system leadership and its relevance to sustainability. The chapters that propose methods of developing system leadership, examples of system leaders, and practical application of system leadership in industry, academic, government, nonprofit, and NGO settings. Each chapter includes a chapter case, interview, and/or reflection questions in order to stimulate critical thinking and provide instructional tools for academic use and practical application. The book is particularly relevant to researchers and students internationally in the fields of social development and sustainability. It is also relevant to public, private, and nonprofit/NGO management practitioners who are curious about the leadership styles and skills necessary to develop a sustainable future.

Researching Education .2019-02-18 This book is aimed at researchers in education who are looking for the take up of bold visions in educational research through visual, digital and spatial knowing. Drawing from research conducted by experienced researchers and graduate students in Australia, through visual methods the book presents work that is at the forefront of working with innovative qualitative research methodologies theoretically and practically. The book shows the possibilities, problems and researcher responses to working with image through complex theoretical territory such as Actor network theory, Deleuzian theory, feminist and poststructuralist methods, positioning theory and narrative theory. All chapters have in common, a response to issues that broadly can be defined as the issues of education that prove to be deep seated and troubling and show a concern for critically orientated scholarship. The book moves across the stages of education from early childhood, middle years, secondary schooling to higher education. A provocative and lively introduction frames the field of visual methods for education researchers. With visuality in mind, issues such as researcher and participant identity, what is contributed or lost when we democratise the research process and ethical issues of working globally are discussed. By getting underneath the cover story of educational research, the contribution is an accessible and concise account of educational research that confronts current issues of curriculum and pedagogy and is useful for those new to qualitative research and visual methods.

Leisure, Sport and Tourism, Politics, Policy and Planning, 4th Edition A J Veal.2017-05-05 The gap between theory and practice in the leisure, sport and tourism studies areas seems to have widened as scholars have become more specialized. Nevertheless, it is imperative that students be as familiar as possible with a wide range of social and political theory, and also be able to reconcile that knowledge with their own current and future roles as practicing professionals. As well as extensive updating of sources, this new edition examines such topics as libertarianism, theocracy, anti-establishment politics, and the concept of generations. A new chapter presents discussions of a number of 'issues and challenges' facing the leisure, sport and tourism sector. Introducing the subject for undergraduate and postgraduate students of leisure, sport and tourism, this book is also a useful addition to the shelf of any policy maker or practitioner within the industries.

Islamic Revivalism Jan A. Ali.2012-06-01 Contemporary Islamic revivalism is a multi-dimensional and multi-faceted phenomenon. This book explores this phenomenon through an ethnographic study of the world's largest Islamic revivalist movement, the Tabligh Jama'at ('Convey [message of Islam]' Group). The basic contention of the book is that contemporary Islamic revivalism is a defensive reaction to the crisis of modernity, yet it is neither anti-modernity nor does it seek modernity's destruction. Rather, it highlights that Muslims are in a crisis. They face the threat of losing their faith and identity in modernity, because according to the revivalist Muslims, the "true" Islamic practice no longer constitutes the foundation of everyday Muslim living. To preclude this from reaching a point of no return, Islamic revivalist movements like the Tabligh Jama'at are engaged in encouraging Muslims to return to the "true" teachings of Islam, and restoring the Islamic glory that once was the envy of the world. This volume highlights the veritable 'sectarian' intensity with which Tablighis undertake this restorative work.

The Oxford Handbook of Indigenous Sociology Maggie Walter,Tahu Kukutai,Angela Gonzales.2023 Indigenous sociology makes visible what is meaningful in the Indigenous social world. This core premise is demonstrated here via the use of the concept of the Indigenous Lifeworld in reference to the dispossessed Indigenous Peoples from Anglo-colonized first world nations. Indigenous lifeworld is built around dual intersubjectivities: within peoplehood, inclusive of traditional and ongoing culture, belief systems, practices, identity, and ways of understanding the world; and within colonized realities as marginalized peoples whose

everyday life is framed through their historical and ongoing relationship with the colonizer nation state. The Oxford Handbook of Indigenous Sociology is, in part, a response to the limited space allowed for Indigenous Peoples within the discipline of sociology. The very small existing sociological literature locates the Indigenous within the non-Indigenous gaze and the Eurocentric structures of the discipline reflect a continuing reluctance to actively recognize Indigenous realities within the key social forces literature of class, gender, and race at the discipline's center. But the ambition of this volume, its editors, and its contributors is larger than a challenge to this status quo. They do not speak back to sociology, but rather, claim their own sociological space. The starting point is to situate Indigenous sociology as sociology by Indigenous sociologists. The authors in The Oxford Handbook of Indigenous Sociology, all leading and emerging Indigenous scholars, provide an authoritative, state of the art survey of Indigenous sociological thinking. The contributions in this Handbook demonstrate that the Indigenous sociological voice is a not a version of the existing sub-fields but a new sociological paradigm that uses a distinctively Indigenous methodological approach.

Social Justice Theory and Practice for Social Work Lynelle Watts, David Hodgson. 2019-01-01 This book offers a much-needed critical overview of the concept of social justice and its application in professional social work practice. The book also contributes to social work pedagogy by offering a comprehensive set of learning outcomes that can be used to design curriculum, teaching and learning, and further research into social justice praxis. This book provides a range of philosophical and critical perspectives to support and inform social work professional knowledge and skills. In its tight knitting together of theory and practice this book links philosophical and moral principles with an understanding of how to engage with social justice in a way that is relevant to social work.

Knowledge, Creativity and Failure Chris Hay. 2016-09-17 This book offers a new framework for the analysis of teaching and learning in the creative arts. It provides teachers with a vocabulary to describe what they teach and how they do this within the creative arts. Teaching and learning in this field, with its focus on the personal characteristics of the student and its insistence on intangible qualities like talent and creativity, has long resisted traditional models of pedagogy. In the brave new world of high-stakes assessment and examination-driven outcomes across the education system, this resistance has proven to be a severe weakness and driven creative arts teachers further into the margins. Instead of accepting this relegation teachers of creative arts must set out to capture the distinctiveness of their pedagogy. This book will allow teachers to transcend the opaque metaphors that proliferate in the creative arts, and instead to argue for the robustness and rigour of their practice.

Measuring Immorality Gail Reekie. 1998-10-13 Why do conservative politicians and scholars in Britain, Australia and the United States continue to view rising rates of out-of-wedlock births and teenage pregnancies as a threat to civilised society? This book examines the process by which social science transforms a biological event - a birth - into a social and moral problem. Drawing on Foucault's 'archaeology of knowledge', Reekie stresses the role of statistics and other social-scientific discourses in the emergence of the illegitimacy 'problem' in the early nineteenth century and its continuing cultural significance. The book illustrates the continuity in concerns about illegitimacy, including pressure on the welfare system, fears of racial and intellectual denigration, the detrimental nature of fatherless families, and the association of rising illegitimacy with the supposed selfishness of excessively independent women.

Knowledge-building Karl Maton, Susan Hood, Suellen Shay. 2015-10-08 Education and knowledge have never been more important to society, yet research is segmented by approach, methodology or topic. Legitimation Code Theory or 'LCT' extends and integrates insights from Pierre Bourdieu and Basil Bernstein to offer a framework for research and practice that overcomes segmentalism. This book shows how LCT can be used to build knowledge about education and society. Comprising original papers by an international and multidisciplinary group of scholars, Knowledge-building offers the first primer in this fast-growing approach. Through case studies of major research projects, Part I provides practical insights into how LCT can be used to build knowledge by: - enabling dialogue between theory and data in qualitative research - bringing together quantitative and qualitative methodologies in mixed-methods research - relating theory and practice in praxis - conducting interdisciplinary studies with systemic functional linguistics Part II offers a series of studies of pressing issues facing knowledge-building in education and beyond, encompassing: - diverse subject areas, including physics, English, cultural studies, music, and design - educational sites: schooling, vocational education, and higher education - practices of research, curriculum, pedagogy and assessment - both education and informal learning contexts, such as museums and masonic lodges Carefully sequenced and interrelated, these chapters form a coherent collection that gives a unique insight into one of the most thought-provoking and innovative ways of building knowledge about knowledge-building in education and society to have emerged this century. This book is essential reading for all serious students and scholars of education, sociology and linguistics.

Kierkegaard's Theological Sociology Paul Tyson. 2019-03-29 Kierkegaard developed a distinctive type of sociology in the 1840s—a theological sociology. Looking at society through the lens of analysis categories such as worship, sin, and faith, Kierkegaard developed a profoundly insightful way of understanding how, for example, the modern mass media works. He gets right inside the urban world of Golden Age Denmark, and its religion, and analyses “the present age” of consumption, comfort, competition, distraction, and image-construction with astonishing depth. To Kierkegaard worship centers all individuals and all societies; hence his sociology is doxological. This book argues that we also live in the present age Kierkegaard described, and our way of life can be understood much better through Kierkegaard’s lens than through the methodologically materialist categories of classical sociology. As social theory itself has moved beyond classical sociology, the social sciences are increasingly open to post-methodologically-atheist approaches to understanding what it

means to be human beings living in social contexts. The time is right to recover the theological resources of Christian faith in understanding the social world we live in. The time has come to pick up where Kierkegaard left off, and to start working towards a prophetic doxological sociology for our times.

Challenging Global Inequality Alastair Greig, David Hulme, Mark Turner. 2007-01-16 This major introductory text written by 3 leading names in the field provides an accessible overview of the challenges faced in overcoming global poverty and inequality in the 21st century. Through an in-depth assessment of development theory and practice, the authors set out to advance two key arguments: the first being the importance of historically contextualizing contemporary developmental problems in order to assess policy proposals; and the second that inequality matters, and how this notion has continually remained a central feature of development debates from colonial times to present day. Ideal for undergraduate students taking development modules as part of political science and international relations degrees, this engaging text proves to be essential reading when exploring the impacts of development on today's international political economy. With each chapter covering inequalities from all different angles, the authors clearly outline the impact of models such as globalization and neoliberalism, as well as offering alternative views on the challenges posed by the UN's Millennium Development Goals. The Cambridge Handbook of Social Sciences in Australia Ian McAllister, Steve Dowrick, Riaz Hassan. 2003-08-07 First published in 2003, The Cambridge Handbook of Social Sciences in Australia is a high-quality reference on significant research in Australian social sciences. The book is divided into three main sections, covering the central areas of the social sciences-economics, political science and sociology. Each section examines the significant research in the field, placing it within the context of broader debates about the nature of the social sciences and the ways in which institutional changes have shaped how they are defined, taught and researched.

Fashioning Japanese Subcultures Yuniya Kawamura. 2013-08-15 Western fashion has been widely appreciated and consumed in Tokyo for decades, but since the mid-1990s Japanese youth have been playing a crucial role in forming their own unique fashion communities and producing creative styles which have had a major impact on fashion globally. Geographically and stylistically defined, subcultures such as Lolita in Harajuku, Gyaruru and Gyaruru-o in Shibuya, Age-jo in Shinjuku, and Mori Girl in Kouenji, reflect the affiliation and identities of their members, and have often blurred the boundary between professionals and amateurs for models, photographers, merchandisers and designers. Based on insightful ethnographic fieldwork in Tokyo, Fashioning Japanese Subcultures is the first theoretical and analytical study on Japan's contemporary youth subcultures and their stylistic expressions. It is essential reading for students, scholars and anyone interested in fashion, sociology and subcultures.

Sustainable Family Farming and Yeoman Ideals Rena R. Henderson. 2021-12-30 Within the frame of family farming, this book offers a longitudinal study of the Castra district in North-West Tasmania from first European settlement to the end of the twentieth century. It draws upon historical sources for yeomanry characteristics from Britain, Canada, the USA, New Zealand and Australian mainland colonies to show how these characteristics were persistently supportive of family farming. Surveying farming communities over several generations, this book explores a range of topics including colonial surveying practices, settler families' motivation, attributes and demographics, the role of Methodism, the ways children were inculcated into yeoman farming enterprises, the role of women as companionate wives and the political participation of farmers in the public sphere. The book also offers a new perspective of three commonly held myths of settlement failure: the settlement of retired Anglo-Indian military and civil officers in the 1870s, the settlement of soldiers on small farms after the Great War and the claims that the ideal of yeoman family farming was anachronistic to capitalist commodity production. The book draws from a wide selection of previously underused primary source materials, including oral histories from current and past residents, to provide a comprehensive overview of an important aspect of rural Australian history. The book is a valuable contribution to Australian historiography, and will be a useful resource for students and scholars of rural history, social history, environmental history, colonialism and sustainable agriculture.
