Organization Excellence: Productivity and Improvement (A Simple Approach) David Kong.2014-07-13 Throughout my years of productivity and IT consultancy with implementation, I have encountered numerous challenges faced by organization to implement an efficient and effective system that works for them. When such challenges are not handled properly, it resulted in implementations which are not optimized to the organization business requirement. I would like to provide some useful information, which can help organizations to implement productivity and improvement activities into their daily operations. There are many factors that can affect productivity of an organization. As it is not possible for me to cover every tool which can help to improve productivity, I have decided to concentrate on some of the key ones here. I will be touching on plant layouts, proper quality frameworks and management system for the discussion in this book. An organization with an optimized system in place, can contribute to good output performance. It increases the efficiency and effectiveness of an organization. Internal controls should be installed to ensure that products at every stage of the process are being checked for conformance. Enforcement of the compliance to the procedures and internal controls that were implemented should also be available to ensure that the defined goals and objectives are met. A good organization should stress on training for staff. Such training should be structured in a way that it is geared towards equipping staff with the relevant skill sets and knowledge to perform their job. Job skill matrix table could be put up to develop staff further and also serve as a tool for resource planning. I cannot stress enough the importance of how a good proper strategic planning and implementation can contribute greatly to the success of an organization performance. Due to this, I have also included Business Continuity Planning as one of the criteria for organization excellence. With the occurrence of natural disaster, haze, pandemic flu episode and any unexpected happening, it warrants some form of planning to prepare the organization to systematically react in the event such occurrence is to happen. As a value added service, I have included a few Excel templates for some of the tools cover in this book in the website: <http://pqj.dscloud.biz>. You will need to be a registered user in order to gain access to them. They are listed as follows: - Fish Bone Diagram using Excel - Moving Average using Excel - Correlation using Excel - Covariance using Excel - Percentile using Excel - Pareto Chart using Excel - Solver using Excel - Goal Seek using Excel

Towards Sustainable Innovation Sven Pastoors,Ulrich Scholz,Joachim H. Becker,Rob Van Dun.2017-03-13 With sustainability having gained a lot of momentum over the last years and companies implementing strategies to create corporate sustainability, there are lots of opportunities for innovation. Thus, the two concepts of sustainability and innovation should not be considered separately – they are closely interlinked with one another. The main goal of sustainable innovation is to develop new products and technologies that have a positive impact on the company's triple-bottom-line. To meet this aim, they have to be ecologically and economically beneficial as well as socially balanced. In order to help companies to improve their sustainable innovation process practically, this book is structured into five possible phases of a sustainable innovation process: Awareness of a sustainability problem, Identification & Definition of the problem, Ideation & Evaluation of the solutions, Testing & Enrichment of the solutions, Implementation of the solutions & Green Marketing.

New Multinational Enterprises from Korea and Taiwan Roger van Hoesel.2013-01-11 This volume represents the first substantive study of emerging multinationals (MNEs) from Asian economies, drawing on the unique

experiences of South Korea and Taiwan. Combining an econometric investigation with detailed case studies of leading Korean and Taiwanese electronics companies, it aims to demystify the nature and theoretical implications of these dynamic economic regions. The author argues that many of these 'new multinationals do not possess the characteristics typically ascribed to MNEs, such as technological leadership, strong marketing positions or advanced managerial capabilities. This is highlighted by documentation of recent developments in outward investment from Korea and Taiwan at both micro and macro level. The implications of the recent Asian crisis for the internationalization of Korean and Taiwanese firms are also explored.

LCA of an ecolabeled notebook : consideration of social and environmental impacts along the entire life cycle Andreas Citroth,Juliane Franze.2011 This study investigates social and environmental impacts caused by an ecolabeled notebook along its entire life cycle. In order to analyse the diverse effects of the laptop, a social life cycle assessment and an environmental life cycle assessment were performed in parallel. Both assessments together provide a holistic overview of positive and negative impacts in regard to social and environmental sustainability. This book contains the complete final report written by GreenDeltaTC on behalf of the Belgian Federal Public Planning Service Sustainable Development. It comprises the methodological background, the social inventory, process modifications with regard to the environmental inventory, and detailed results of the impact assessment phase. Further, a newly developed social impact assessment method is presented and applied. In addition, recommendations on company and policy level were derived.

Corporate Responsibility Coalitions David Grayson,Nelson Jane.2017-09-08 The significance of business-led corporate responsibility coalitions is indisputable. The WBCSD has 200 member companies with combined annual revenues of US\$7 trillion ; the UN Global Compact has almost 8,000 corporate members, over two-thirds of them from developing countries. It is estimated that there are more than 110 national and international generalist business-led CR coalitions. But there is now urgent need for informed and balanced analysis of their achievements, their progress and their potential. Why did these coalitions start and grow? What have been their impacts? Where are they heading now? Where should they be going? What is the future? In a period of austerity, the business and public sector must decide whether funding these coalitions is a priority. To meet current crises, there will have to be a great deal more business involvement; but efforts of individual corporations will not be sufficient. There is also a need for far more collective action among companies and more collaborative action between different sectors of society. Business-led CR coalitions with their decades of convening experience could play an important role in this process - if they are fit for purpose going forward. Authors David Grayson and Jane Nelson have been actively involved in such coalitions for decades. In Corporate Responsibility Coalitions they first explore the past, present and future of these coalitions: the emergence of new models of collective corporate action over the past four decades; the current state of play, and the increasing number, diversity and complexity in terms of how they not only network with each other but also engage in a much broader universe of institutions that are promoting responsible business practices. In addition, the book provides in-depth profiles of the most strategic, effective and long-standing coalitions, including: Business for Social Responsibility; Business in the Community; CSR Europe; Instituto Ethos; International Business Leaders Forum; the UN Global Compact; and the WBCSD. This book will be required reading for key supporters and potential partners of such coalitions in companies, governments, international development agencies, foundations, non-governmental organizations, academic institutions and think-tanks. It also aims to inspire a future generation of leaders to be more aware of the role of business as a partner in driving more inclusive, green and responsible growth, and to help them develop new types of leadership skills so that they can be effective in finding multi-stakeholder solutions to complex and systemic challenges.
