**From the Big Bang to Planet X** Terence Dickinson.1993 What exactly is the Big Bang theory? What came before it? What is a black hole? How do we know the universe is expanding? These are only five of 50 questions leading North American astronomer Terence Dickinson answers here from the many asked during his lectures and interviews. In his bestselling, down-to-earth style, Dickinson unravels the mysteries of the cosmos.

**Encyclopedia of Whales, Dolphins and Porpoises** Erich Hoyt.2023-09 In this updated edition, award-winning author and whale researcher Erich Hoyt takes readers into the field for an intimate encounter with 93 species of cetaceans that make their homes in the world's oceans, rivers and lakes. Drawing on decades of firsthand experience and a comprehensive familiarity with the current revolution in cetacean studies, Hoyt provides unique insights into the life histories of whales. This new edition features descriptions of three new whale and dolphin species, along with the latest discoveries about cetacean biology and behavior, from the physical differences and adaptations among the baleen and toothed whales to their highly intelligent hunting and feeding methods. Uncovered in fascinating detail are the courtship and mating practices, family relationships and the lifelong bonds among some family members. The symphonic composer of the whale world is the humpback whale, whose complex 30-minute songs reverberate across the liquid universe of the

ocean. Current research reveals that blue, fin, bowhead and other whales also sing, mostly in tones below human hearing. Using sound for navigation, some whales hunt in deep, high pressure waters while others negotiate migrations across entire ocean basins. Thoroughly updated to reflect the latest findings, this book is perfect for anyone curious about the cetacean world. Budding whale students will gain insights on how to research whales, dolphins and porpoises as well as how to save at-risk species and their increasingly damaged habitat. Encyclopedia of Whales, Dolphins and Porpoises includes: detailed profiles of 93 current species of cetaceans (3 more than in the previous edition) the story of the newly discovered Sato's beaked whale, a small black whale from the North Pacific related to the Baird's beaked whale fascinating sidebars that bring to life cetacean society and culture an enlightening discussion of the differences between dolphins and porpoises new information on the history and impact of whaling illustrations of each species by renowned artist Uko Gorter, including the three new species named in the past five years color photographs by world-famous marine photographer Brandon Cole, among others.

**NightWatch** Terence Dickinson, Ken Hewitt-White. 2023-09-07 As NightWatch, Terence Dickinson's classic stargazing guide, neared its 40th anniversary, Dickinson worked with a small group of trusted colleagues to give this groundbreaking reference an overhaul that will take it deep into the 21st century. Longtime astronomy writer and sky observer Ken Hewitt-White led the editorial team. A central aspect to this new edition is the subtle improvements to the unique seasonal star charts that present a 360-degree simulation of the night sky on one page and identify the stars and constellations on the facing page. Yet it is Dickinson's clear, jargon-free language that will continue to inspire hundreds of thousands of people around the world to take up recreational astronomy.

Much has happened in this popular hobby since the revised Fourth Edition of NightWatch was published in 2006. In response, the text has been substantially revised and updated throughout all 13 chapters. Moreover, the book has been completely redesigned and most of its many photographs have been replaced. A noted feature is the variety of superb astrophotos of star clusters, nebulae, galaxies and other celestial phenomena taken by accomplished amateur astronomers.
