**The Accountant's Guide to Peer and Quality Review** R. K. McCabe.1993-07-28 Inferior quality service threatens the accounting profession's existence. To reduce instances of substandard service,

the profession requires firms to have a system of quality control, to annually inspect that system, and to undergo a comprehensive triennial external review. This book shows firms how to develop a quality control system, prepare for the review, and earn an unqualified report. In addition, it tackles the problem of substandard service head-on. The author examines the roots of review, substandard service, and discusses the undiscussable. Next he reviews the pluses and minuses of the practice-monitoring programs and the importance of selecting the firm's reviewer. Quality control's nine functional areas are explained in depth and the ten steps to a successful review are also described in detail. He describes what happens on a review and offers practical advice about the problems to avoid. The concluding chapter offers over twenty recommendations that would return the accounting business back to the accounting profession. This book is for every firm, every practicing CPA, and the profession's leaders as well as those interested in improving the integrity of the financial reporting system. It also is important for students planning to enter public accounting.

**Accounting, Text and Cases** Robert Newton Anthony, James S. Reece. 1983 ACCOUNTING: Text and Cases, 10/E is a 28 chapter book. Chapters 1-14 cover financial accounting, while Chapters 15-21 cover management accounting, and Chapters 22-28 focus on broader issues of control and corporate strategy. The approximately 120 cases that largely make up the end-of-chapter material are a combination of classic Harvard style cases, as well as extended problems. New to this edition is the inclusion of 2-3 problems per chapter. These problems, while not as involved as the case material, allow the students to exercise the concepts demonstrated in each chapter. The goal of the problem material is to provide a transition to the case material, which is a response to customer requests.
