Imagining the Kibbutz Ranen Omer-Sherman. 2015-06-19 In *Imagining the Kibbutz*, Ranen Omer-Sherman explores the literary and cinematic representations of the socialist experiment that became history's most successfully sustained communal enterprise. Inspired in part by the kibbutz movement's recent commemoration of its centennial, this study responds to a significant gap in scholarship. Numerous sociological and economic studies have appeared, but no book-length study has ever addressed the tremendous range of critically imaginative portrayals of the kibbutz. This diachronic study addresses novels, short fiction, memoirs, and cinematic portrayals of the kibbutz by both kibbutz "insiders" (including those born and raised there, as well as those who joined the kibbutz as immigrants or migrants from the city) and "outsiders." For these artists, the kibbutz is a crucial microcosm for understanding Israeli values and identity. The central drama explored in their works is the monumental tension between the individual and the collective, between individual aspiration and ideological rigor, between self-sacrifice and self-fulfillment. Portraying kibbutz life honestly demands retaining at least two oppositional things in mind at once—the absolute necessity of euphoric dreaming and the mellowing inevitability of disillusionment. As such, these artists' imaginative witnessing of the fraught relation between the collective and the citizen-soldier is the story of Israel itself.

Lonely Planet's Global Beer Tour Lonely Planet Food.2017-05-01 Explore the vibrant world of craft beer with Lonely Planet Global Beer Tour. We've selected some of the finest tap rooms, bars and breweries that thirsty travellers can visit in 30 countries around the world. Discover how to find them, which beers to sample, and learn about local places of interest with our recommended itineraries. Each country is introduced by a beer expert and includes regional beverages that shouldn't be missed. There's a world of great beer to taste - go and discover it! So why go beer touring, especially when it's easy and cheap to find interesting craft beers in your local shop? Firstly, craft beer doesn't travel too well and is affected by changes in temperature and long distances. And secondly, due to the explosion in small-scale breweries, many great beers aren't distributed outside their city or region. Beer often tastes better the closer it is to home, especially if that's straight from a tap in the actual brewery. The craft beer revolution has seen waves of breweries open up to the public, not just in the United States, the UK and Australia, where the trend is well established, but all over the world. Visit European beer capitals like Belgium, Italy and Germany, and sample local favourites in Canada, Australia and New Zealand. In Asia, explore hotspots in Japan, Vietnam and China, then venture to South America, Africa and the Middle East. Each brewery is accompanied by a selection of sightseeing ideas and activities, from local museums and galleries, to great hikes or bike rides. The book also features fun sections on beer trails, hangover cures and the world's wildest beers. There's also practical advice like how to ask for a beer in the local language and the ideal snacks to accompany your drink. Mapping Israel, Mapping Palestine Jess Bier.2017-06-30 Digital practices in social and political landscapes: Why two researchers can look at the same feature and see different things. Maps are widely believed to be objective, and data-rich computer-made maps are iconic examples of digital knowledge. It is often claimed that digital maps, and rational boundaries, can solve political conflict. But in Mapping Israel, Mapping Palestine, Jess Bier challenges the view that digital maps are universal and value-free. She examines the ways that maps are made in Palestine and Israel to show how social and political landscapes shape the practice of science and technology. How can two scientific cartographers look at the same geographic feature and see fundamentally different things? In part, Bier argues, because knowledge about the Israeli military occupation is shaped by the occupation itself. Ongoing injustices—including checkpoints, roadblocks, and summary arrests—mean that Palestinian and Israeli cartographers have different experiences of the landscape. Palestinian forms of empirical knowledge, including maps, continue to be discounted. Bier examines three representative cases of population, governance, and urban maps. She analyzes Israeli population maps from 1967 to 1995, when Palestinian areas were left blank; Palestinian state maps of the late 1990s and early 2000s, which were influenced by Israeli raids on Palestinian offices and the legacy of British colonial maps; and urban maps after the Second Intifada, which show how segregated observers produce dramatically different maps of the same area. The geographic production of knowledge, including what and who are considered scientifically legitimate, can change across space and time. Bier argues that greater attention to these changes, and to related issues of power, will open up more heterogeneous ways of engaging with the world.
