**Travels in the Interior of North America** Maximilian Wied (Prinz von).1843

**US Marine Corps Pacific Theater of Operations 1941-43** Gordon L. Rottman.2013-02-20 The outbreak of World War II set in motion a massive expansion of the United States Marine Corps, leading to a 24-fold increase in size by August 1945. This book is the first of several volumes to examine the Corps's meteoric wartime expansion and the evolution of its units. It covers the immediate pre-war period, the rush to deploy defense forces in the war's early months, and the Marines' first combat operations on Guadalcanal, New Georgia, and Bougainville. It focuses on the 1st, 2d, and 3d Marine Divisions (MarDivs) and the provisional 1st, 2d, and 3d Marine Brigades (MarBdes).

**Bazooka vs Panzer** Steven J. Zaloga.2016-11-17 World War II saw tanks assume a dominant role in warfare, capable of tearing through the enemy lines if left unchecked. To combat the threat posed by these armoured behemoths the United States developed the M1 Anti-Tank Rocket Launcher, better known as the Bazooka. First employed in combat during 1942, the weapon required a great deal of skill and courage to use effectively. By late 1944 it was a mainstay of the US infantry's anti-tank capabilities, alongside towed weapons, anti-tank grenades and other longer-established measures. Focusing on the savage close-quarters fighting between Germany's armoured divisions and the US infantry during the Battle of the Bulge, Steven Zaloga's absorbing study compares and assesses the strengths and limitations of the cutting-edge technology used by both sides. Featuring specially commissioned full-colour artwork and explosive battle reports, this volume casts new light on the evolving nature of infantry-versus-tank combat in the closing months of World War II.

**Myths and Legends of the North American Indians** Lewis Spence.2014-03-30 This Is A New Release Of The Original 1914 Edition.

**Kharkov 1942** Robert Forczyk.2013-04-20 After failing to finish off the German Army in the 1941/42 Winter Counteroffensive Stalin directed the Red Army to conduct a powerful blow in one sector of the Eastern Front in order to disrupt German plans. The sector chosen was Kharkov. Under Marshal Semyon Timoshenko, the Stavka's remaining reserves were assembled and prepared to conduct a breakthrough attack intended to encircle the German Sixth Army near Kharkov. However, Stalin was unaware that the Germans were planning their own riposte at Kharkov, known as Operation Fredericus. When Timoshenko began his offensive in May 1942, he did not realize the limitations of his own forces or the agility of the Germans to recover from setbacks, all of which contributed to one of the Red Army's greatest defeats of World War II. This volume will pay particular attention to intelligence and logistics issues, as well as how this campaign served as a prelude to the battle of Stalingrad. It will also focus on the nascent development of the Red Army's tank corps and 'deep battle' tactics, as well as the revival of the German Panzertruppen after Barbarossa.

**Early US Armor** Steven J. Zaloga.2018-02-22 The first American armoured cars began to emerge around the turn of the century, seeing their first military use in 1916 during the Punitive Expedition against Pancho Villa. When the United States entered World War I, the American Expeditionary Forces used some armoured cars in France, and American armoured cars were used by the French Army. The inter-war years saw considerable innovation and experimentation in armoured car design. Of the 1930s scout car designs, the M3A1 scout car was good enough to be produced in very large numbers in World War II, and was widely exported to many other armies via Lend-Lease. It also served as the basis for the late M2 and M3 armoured half-tracks. In this study, using detailed full colour plates and rigorous analysis, US armour expert Steven J. Zaloga chronicles the development of the US armoured car in the years leading up to World War II.

**World War II Infantry Anti-Tank Tactics** Gordon L. Rottman.2013-08-20 The battlefield interaction between infantry and tanks was central to combat on most fronts in World War II. The first 'Blitzkrieg' campaigns saw the tank achieve a new dominance. New infantry tactics and weapons - some of them desperately dangerous - had to be adopted, while the armies raced to develop more powerful anti-tank guns and new light weapons. By 1945, a new generation of revolutionary shoulder-fired AT weapons was in widespread use. This book explains in detail the shifting patterns of anti-tank combat, illustrated with photographs, diagrams and colour plates showing how weapons were actually employed on the battlefield.

**The Answer Book** Mary Elting.1959 Questions and answers on a wide range of subjects.

**World War II US Cavalry Units** Gordon L. Rottman.2009-10-27 Osprey's elite series title for all cavalry units that participated in World War II (1939-1945). At the time of Pearl Harbor, the United States Army still had ten cavalry regiments that were mounted on horses. One, the 26th (Filipino Scouts) fought on horseback in the Philippines, while the rest were dismounted and fought as infantry. Despite this, the cavalry units maintained their own unique organization, traditions, and identity as they saw action in the Pacific and China-Burma-India theatre. This book covers all of the US cavalry units to see action during World War II, most of which survive to this day. It includes the little-covered Texan National Guard regiments, who took part in the vicious street fighting in Manila in 1945, and who fought beside ex-Merrill's Marauders as a deep penetration unit. It also contains detailed color-plates showing the unique uniforms of the US Army's last mounted cavalry as well as tropical combat dress worn by the dismounted units.

**Parade Medal Bars of the Third Reich** Thomas M. Yanacek.2008 Presented for the first time in detail, this examination of German medal bars covers a subject long overlooked in reference books. Illustrating over one-hundred German medal bars in full colour, both obverse and reverse views are shown, as well as close up images that highlight some of the finer details. Medal bars of the military, police, political, and civil organisations are covered. Examples of original award documents are shown, as well as period photographs of medal bars in wear. Information is also presented on maker markings, medal identification, the material used to make the medal, finishes, and measurements.

**Waterloo Relics** Gilles Bernard,Gérard Lachaux.2015 Waterloo, morne plaine ... (Waterloo, sad plain). These three words still echo in French people's minds. Beyond Victor Hugo's writings, they remember that it was a defeat rather than a battle and also, depending on where your opinions lie, the final act of a fantastic epic or that of a terrible despot. June 1815, the 18th a day which will give Wellington and Blucher immortal glory and sealed the fate of Europe for decades. Authentic proof of the battle has had to be found at its source. Two centuries afterwards, the only valid proof, in our opinion, was those objects which had really been at Waterloo. Strangely enough, with all the books and publications on the subject, nobody ever seemed to have taken an interest in this aspect. And yet their emotional capital still remains intact, from the very famous hat belonging to Napoleon to the uniform button of an obscure infantry fusilier.

**Edward S. Curtis** Barry Pritzker,Edward S. Curtis.1993 A collection of the author's photographs of North American Indians.

**US 10th Mountain Division in World War II** Gordon L. Rottman.2012-10-20 The 10th was the only US mountain division to be raised in World War II, and still has a high profile, being involved in operations from Iraq to Somalia and from Haiti to Afghanistan. It did not arrive in Europe until winter 1944/45, but then fought hard in the harsh mountainous terrain of Northern Italy. The division was special in a number of ways. Its personnel were selected for physical fitness and experience in winter sports, mountaineering, and hunting, unlike the rest of the infantry. It was highly trained in mountain and winter warfare, including the use of skis and snowshoes, while its organization, field clothing, and some personal equipment also differed from that of the usual infantry division. The division made extensive use of pack-mules, and its reconnaissance unit was horse-mounted, conducting the last horse-mounted charge in US history in April 1945. Featuring full-color artwork and rare photographs, this is the gripping story of the US Army's only mountain division in action during the closing months of World War II.

**World War One** Stephen Bull.2000 This new addition to Brassey's History of Uniforms series covers the German Army at war from 1914-1918 and is the partner volume to the title World War One: British Army. The author analyses the uniforms, equipment, and weapons used by the German army on the Western Front. Many classic German items of equipment were created in this period and those innovations in equipment assisted their successes on the battlefield. Lavishly illustrated and includes not only details of service dress and regimental distinctions but also information on the Pickelhaube, steel helmet, personal equipment, and weapons.

World War II Tactical Camouflage Techniques Gordon L. Rottman.2013-02-20 This book explains and illustrates the actual materials and techniques adopted (both successfully and unsuccessfully) by tactical units - i.e. the concealment of personnel, weapons, equipment, field positions, and movement by infantry riflemen and weapons crews, artillerymen, and vehicle crews. It covers all areas and seasons in the European and Mediterranean theaters of operations, for the US, British, German, and Soviet armies. It includes camouflage of the person, personal equipment, and weapons; natural materials and "expedient" techniques; issued camouflage materials such as nets, ponchos, etc; the principles of camouflaging equipment and vehicles, of positioning and terrain integration, the effects of light and shadow, and the use of decoy and dummy positions. Featuring meticulous full-color artwork and specially selected period photographs, this absorbing study casts new light on the camouflaging techniques developed by the major armies of World War II on a host of European battlefields.

**Kunststoff-Figuren und Zubehör** Andreas Pietruschka.2007

Waffen SS at War A. J. Barker.1998 This book does not attempt to analyse the rights and wrongs of the arguments or to glorify the Waffen-SS. It is a record of the formation's campaigns, training and equipment, illuminated by first-hand accounts and a superb collection of photographs.

**Medieval European Coinage: Volume 12, Northern Italy** William R. Day, Jr,Michael Matzke,Andrea Saccocci.2020-02-20 This volume of Medieval European Coinage is the first comprehensive survey of the coinage of north Italy c.950-1500, bringing the latest research to an international audience. It provides an authoritative and up-to-date account of the coinages of Piedmont, Liguria, Lombardy and the greater Veneto, which have never been studied together in such detail on a broad regional basis. The volume reveals for the first time the wider trends that shaped the coinages of the region and offers new syntheses of the monetary history of the individual cities. It includes detailed appendices, such as a list of coin hoards, indices and a glossary, as well as a fully illustrated catalogue of the north Italian coins, including those of Genoa, Milan and Venice, in the unrivalled collection of the Fitzwilliam Museum, largely formed by Professor Philip Grierson (1910-2006).

Ki-27 'Nate' Aces Nicholas Millman.2013-08-20 Introduced into service early in 1938 during a time of extensive re-organisation of Army air units, the Ki-27, known as the 97 Sen by its pilots, achieved its first successes during the so-called 'China Incident' against the mainly biplane types operated by the Chinese. On 10 April 1938 Ki-27 pilots of the 2nd Daitai (later to become the 64th Sentai) claimed 24 Chinese biplane fighters shot down for the loss of only two of their own. Almost within a year of its combat debut against the Chinese the 97 Sen was to be tested in fighting against the Russians during the Nomonhan Incident of 1939. Initially the 97 Sen proved superior to the Soviet I-16 monoplanes, but the latter were hastily modified to better engage the Japanese fighter and the Russian pilots rapidly adapted to exploit their own strengths and the enemy weaknesses. A handful of Japanese Army Air Force (JAAF) aces emerged from this showdown to be lauded by the Japanese press and ever associated with the iconic 97 Sen - Shimada the 'Red-Legged Hawk', Shihonara the 'Richtofen of the Orient' and Yoshiyama, the 'warrior of the Holombile Plateau'. These were the glory days for the JAAF and many of the successful 97 Sen pilots went on to become the outstanding leaders and veteran aces of the Pacific War. By December, 1941 the JAAF had just started to replace the 97 Sen with the more modern Hayabusa, but the fixed undercarriage fighter still equipped 17 of the 19 Army fighter Sentai and took the brunt of the offensive against the British and Americans in Southeast Asia and the Philippines, as well as the Homeland Defence capability at the time of the Doolittle Raid. Initially facing more modern Allied types of fighter, the 97 Sen was more than able to hold its own by exploiting its outstanding aerobatic qualities. But the writing was on the wall for an unarmoured, fixed undercarriage aircraft with two rifle-calibre machine guns as the Allies consolidated and began their fightback. In China, Chennault had already assessed the 97 Sen's strengths and weaknesses, describing it as a fighter that 'climbs like a sky rocket and manoeuvres like a squirrel'. Prior to the outbreak of the Pacific War he had sent a complete dossier on the type to the USA where it was studiously ignored. The pace of re-equipment with new types and the resurgence of Allied airpower required JAAF units to continue with the 97 Sen as main equipment, especially on the quieter fronts and in Home Defence. By 1943 it was considered seriously obsolete but was still being encountered in combat by Allied pilots, especially in the air defence role. The Ki-27 also found an important secondary role as an armed fighter trainer, equipping an important number of training units and flying schools. The Mansyu Ki-79, a purpose built trainer produced in both single and two-seater versions, was based on the Ki-27. It also served expediently in the suicide attack role and in at least one epic air defence combat. In February 1945, over Chiba, experienced ace WO Masatoshi Masuzawa, flying one of the open cockpit trainers, downed a US Navt Hellcat. Masuzawa had scored his first victory in a 97 Sen over Nomonhan in 1939, and in three months of fighting there had claimed 12 enemy aircraft shot down. He epitomised the veteran JAAF flyers who had first taken the 97 Sen to war and survived to see the atom bombs dropped on their homeland.

**Panzer 38(t) Vs BT-7** Steven J. Zaloga.2017-03-14 An illustrated account of two important World War II tanks, the German Panzer 38(t) and the Soviet BT-7, depicting their struggle for mastery on World War II's Eastern Front.

World War One Soldiers Laurent Mirouze.2013 Never before have actual battle uniforms, individual equipment and weapons of the infantrymen of the great war been illustrated in such authentic detail. Original surviving items, painstakingly assembled from rare private and public collections, are illustrated in full color on live models, just as they were worn in the battlefield. Each of these 31 soldiers: British, Belgian, French, German, Russian, Austrian, Italian, American, is photographed from both front and back, with key diagrams, and accompanied by a detailed commentary.

**Geronimo!** Bill Rentz.2007-02 This fully illustrated volume explores the uniforms, insignia, and equipment of American Airborne, Glider, Troop Carrier, and Airborne Engineers in World War II. Included are over 500 detailed, up-close images of individual items, and multi-side views of full combat rig, and over 100 World War II era color and black and white photos, most unpublished, showing the uniforms and equipment as worn by the troops. Covered in this extensive book are: dress uniforms; jump jackets and pants; headgear; boots; jump wings, unit patches and other insignia; Marine Corps airborne; Troop Carrier and Airborne Engineers; equipment, including parachutes, weapons, communications, and many rare and unusual items exclusive to airborne troops; and a comparative section with both British and German airborne gear. Geronimo! is a detailed look at the clothing and equipment of America's Finest, and is an important reference work for the airborne collector, reenactor, historian and veteran.

**World War II Winter and Mountain Warfare Tactics** Stephen Bull.2013-04-20 The twentieth century saw an unprecedented emphasis on fighting in all terrains, seasons and weather conditions. Such conditions made even basic survival difficult as subzero temperatures caused weapons to jam, engines to seize up and soldiers to suffer frostbite, snow blindness and hypothermia. The conditions often favoured small groups of mobile, lightly armed soldiers, rather than the armoured forces or air power that dominated other combat environments. Some European armies developed small numbers of specialist alpine troops before and during World War I, but these proved to be insufficient as nearly all the major combatants of World War II found themselves fighting for extended periods in extremely hostile cold-weather and/or alpine environments. Drawing upon manuals, memoirs and unit histories and illustrated with period tactical diagrams and specially commissioned full-colour artwork, this study sheds new light on the winter-warfare tactics and techniques of the US, British, German, Soviet and Finnish armies of World War II.

We Wage War by Night Howard J. Sandall.2011 622 Sqdn. was just one of many Bomber Squadrons whose airmen carried out nightly missions, putting their lives on the line for King and Country during WWII. This account is relayed through the memoirs, diaries and letters of the men and

women who fought and died throughout this dark period. These young men came from all parts of the Commonwealth to unite under the banner of freedom and democracy. By war's end, they had forged themselves into one of the most formidable fighting forces in the history of air warfare. US Marine Corps 1941-45 Gordon L. Rottman.2012-09-20 While the US Marine Corps was one of the smallest of American armed services in World War II, its contribution to the final victory cannot be overstated. The US Marine Corps may have only comprised 5 percent of America's armed forces, but it suffered 10 percent of all World War II combat casualties. Above all, the amphibious nature of the war in the Pacific imposed on the Marine Corps greater tasks than any it had ever before been called upon to perform. This title details the organization, weapons and equipment of the US Marines of World War II.

**Panzer Grenadier vs US Armored Infantryman** Steven J. Zaloga.2017-01-26 During World War II, the two pre-eminent mechanized infantry forces of the conflict, the German Panzer Grenadier arm and the US Army's armored infantrymen, clashed in France and Belgium after the Normandy landings. These engagements went on to profoundly influence the use of mechanized infantry in the post-war world. Drawing upon a variety of sources, this book focuses on three key encounters between July and December 1944 including during Operation Cobra and the Battle of the Bulge, and examines the origins, equipment, doctrine and combat record of both forces. With specially commissioned full-colour artwork and maps, this study sheds light on the evolving nature of mechanized warfare at the height of World War II.

**Vietnam Infantry Tactics** Gordon L. Rottman.2013-05-20 This book reveals the evolving US, Viet Cong and NVA tactics at battalion level and below throughout the Vietnam War. Beginning with a description of the terrain, climate and the unique nature of operations in this theatre of war, the author, a Vietnam veteran himself, goes on to explain how unit organisation was broken down by combatant forces and the impact this had on the kind of tactics they employed. In particular, the author highlights how units were organised in reality on the battlefield as opposed to their theoretical tables of organisation. US tactics included the standard US tactical doctrine as prescribed by several field manuals and in which leaders and troops were rigorously trained. But it also reveals how many American units developed innovative small unit tactics specifically tailored to the terrain and enemy practices. In contrast, this book also reveals the tactics employed by Viet Cong and NVA units including their own Offensive Operations, Reconnaissance, Movement Formations and Security, and Ambushes.

**USAF F-4 Phantom II MiG Killers 1972-73** Peter E. Davies.2012-11-20 The F-4 Phantom II was the USAF workhorse fighter-bomber for the Linebacker campaign, which eventually saw US forces withdraw from Vietnam 'with honour' in 1973. This book covers the F-4 attacks on numerous targets in North Vietnamese cities such as Hanoi and Haiphong, as well as its engagements with Vietnamese MiG-19s and MiG-21s hell-bent on defending the north from 'Yankee air pirates'. The USAF's only ace crew, which scored their five kills during 1972, is also covered in a book containing many detailed photographs, a large proportion of which haven't been published before.

**Warsaw Pact Badges** Richard Hollingdale.2011-10-15 As the chief rival to NATO from 1955 - 1991, the Warsaw Pact was, and has since remained, a popular subject for military students and historians alike. On the collecting market the vast range of awards, badges and insignia produced during the Cold War has helped to make the national armies of the Warsaw Pact a popular choice with many military specialists. Surprisingly, even though a great deal has been written about the armor, weapons, uniforms and equipment, no comprehensive reference source on the subject of badges has been printed in the English language.

**German Tanks in Normandy 1944** Steven J. Zaloga.2021-08-19 A new study of the German Panzer forces that stood between the Allies' D-Day beachhead and victory in World War II - how they compared, how they were organized, and how they fought. The German tank forces in Normandy in June-August 1944 had the advantage of fighting on the defensive side, as well as comprising of some of the most powerful and advanced tanks used by any side in the war. Yet success in tank warfare depends on many things beyond technological superiority. This book describes the types of tanks, tank destroyers and assault guns used by the Panzer units in Normandy, how they fought on the Normandy battlefield, and why they were overwhelmed by the advancing Allies. It discusses the organization and equipment of the units, providing thumbnail sketches of basic organization and doctrine as well as statistical data on the types and categories of AFVs in German service.

Rome and the Barbarians Umberto Roberto, Kunst- und Ausstellungshalle der Bundesrepublik Deutschland, École française de Rome.2008 Examining the controversial relationship between Roman civilisation and the barbarian populations between the 1st and the 6th centuries AD, this book presents wide-ranging dossiers illustrating and commenting on authentic archaeological treasures.

*The Anti-Tank Rifle* Steven J. Zaloga.2018-01-25 The emergence of the tank in World War I led to the development of the first infantry weapons to defend against tanks. Anti-tank rifles became commonplace in the inter-war years and in the early campaigns of World War II in Poland and the Battle of France, which saw renewed use in the form of the British .55in Boys anti-tank rifle - also used by the US Marine Corps in the Pacific. The French campaign made it clear that the day of the anti-tank rifle was ending due to the increasing thickness of tank armour. Nevertheless, anti-tank rifles continued to be used by the Soviets on the Eastern Front with two rifles, the 14.5mm PTRS and PTRD, and were still in widespread use in 1945. They served again with Korean and Chinese forces in the Korean War, and some have even appeared in Ukraine in 2014-15. Fully illustrated and drawing upon a range of sources, this is the absorbing story of the anti-tank rifle, the infantryman's anti-armour weapon during the world wars.

**Waffen SS** Christopher Ailsby.1999 *Waffen SS: An Unpublished Record* is a pictorial record of Hitler's Praetorian Guard before and during World War II. Containing over 400 photographs, most taken from private albums of former Waffen SS soldiers which have never before been published, it includes all the battles and campaigns Waffen SS units fought in during World War II, such as in Poland, France, and on the Eastern Front. *Waffen SS: An Unpublished Record* includes a chapter on the war crimes and atrocities of Waffen SS formations as part of this unique insight into the most notorious military formation in history.

**The Classic Military Jeep Illustrated** Lizzie Ware, Pat Ware.1997

Victory 1945 Gordon L. Rottman.2015-11-20 Even when Western Allied troops gained a foothold in Normandy, World War II in Europe was far from over. The route to Germany's interior and the Nazis final surrender was long, arduous and blood-stained. The Wehrmacht's stubborn resistance and the shocking losses suffered by US, British, Canadian and 'Free European' troops meant that the Allies had to adapt and refine small-unit tactics, battle-drills, and their use of weapons and munitions. The troops who finally met up with the Red Army in Germany were a very different fighting force to the one that struggled up the beaches of northern France. This book offers a comprehensive guide to the late-war Allied troops, exploring their uniforms, equipment, organization and tactics. Detailed description and accurate colour pictures illustrate the means by which the Allied troops on the ground evolved to the point of winning the war on the Western Front.
