## La Croissance Question

### **Democracy, Revolution and Geopolitics in Latin America**

Luis Fernando Angosto-Ferrandez. 2013-11-12 Hugo Chávez won re-election in the 2012 Venezuelan presidential election, despite a closer margin between candidates than in previous elections. The results were puzzling for those who believed that Chávez's government had long ago reached its limits, while Chávez's supporters were struck by the growth of the opposition vote. Thus understanding the Venezuelan election of 2012 has proved to be challenging, with various recent studies focused upon it. Luis F. Angosto Ferrández's book advances two ideas not previously discussed: the relationship between electoral behavior in Venezuela and contemporary Latin American geopolitics, and the way that relationship is projected through the candidates' appeal to narratives that situate Venezuela at the core of a heroic Latin American tradition and of a new regional process of integration. This edited volume first contextualizes and explains the results of the last re-election of Hugo Chávez in terms of its geopolitical conditionings and implications. Contributors tackle Latin American geopolitics by analyzing Venezuelan foreign policy and the country's role in continental projects of supra-national integration. Contributors also examine electoral strategy and tactics in order to show how the two main candidates built their campaign on emotional grounds as much on rational ones. This will be connected to the investigation of new narratives of national identification in contemporary Venezuela and how they may have practical implications in the design of policies addressing issues such as indigenous rights, community media and national security. Compiling state-of-the-art research on Latin

American and Venezuelan politics, this book will appeal to academics and professionals who specialize in Latin American studies, international relations, democracy, and indigenous peoples.

Congress and Civil-Military Relations Colton C. Campbell, David P. Auerswald. 2015-03-03 While the president is the commander in chief, the US Congress plays a critical and underappreciated role in civil-military relations—the relationship between the armed forces and the civilian leadership that commands it. This unique book edited by Colton C. Campbell and David P. Auerswald will help readers better understand the role of Congress in military affairs and national and international security policy.

Contributors include the most experienced scholars in the field as well as practitioners and innovative new voices, all delving into the ways Congress attempts to direct the military. This book explores four tools in particular that play a key role in congressional action: the selection of military officers, delegation of authority to the military, oversight of the military branches, and the establishment of incentives—both positive and negative—to encourage appropriate military behavior. The contributors explore the obstacles and pressures faced by legislators including the necessity of balancing national concerns and local interests, partisan and intraparty differences, budgetary constraints, the military's traditional resistance to change, and an ongoing lack of foreign policy consensus at the national level. Yet, despite the considerable barriers, Congress influences policy on everything from closing bases to drone warfare to acquisitions. A groundbreaking study, Congress and Civil-Military Relations points the way forward in analyzing an overlooked yet fundamental government relationship.

The Iran-Iraq War Pierre Razoux. 2015-11-03 From 1980 to 1988 Iran and Iraq fought the longest conventional war of the century. It included tragic slaughter of child soldiers, use of chemical weapons, striking of civilian shipping, and destruction of cities.

Pierre Razoux offers an unflinching look at a conflict seared into the region's collective memory but little understood in the West. [The Dictator's Army](#) Caitlin Talmadge.2015-09-22 In *The Dictator's Army*, Caitlin Talmadge presents a compelling new argument to help us understand why authoritarian militaries sometimes fight very well—and sometimes very poorly. Talmadge's framework for understanding battlefield effectiveness focuses on four key sets of military organizational practices: promotion patterns, training regimens, command arrangements, and information management. Different regimes face different domestic and international threat environments, leading their militaries to adopt different policies in these key areas of organizational behavior. Authoritarian regimes facing significant coup threats are likely to adopt practices that squander the state's military power, while regimes lacking such threats and possessing ambitious foreign policy goals are likely to adopt the effective practices often associated with democracies. Talmadge shows the importance of threat conditions and military organizational practices for battlefield performance in two paired comparisons of states at war: North and South Vietnam (1963–1975) and Iran and Iraq (1980–1988). Drawing on extensive documentary sources, her analysis demonstrates that threats and practices can vary not only between authoritarian regimes but also within them, either over time or across different military units. The result is a persuasive explanation of otherwise puzzling behavior by authoritarian militaries. *The Dictator's Army* offers a vital practical tool for those seeking to assess the likely course, costs, and outcomes of future conflicts involving nondemocratic adversaries, allies, or coalition partners.

*Transnational Islamic Actors and Indonesia's Foreign Policy*  
Delphine Alles.2015-12-14 The past fifteen years have seen Indonesia move away from authoritarianism to a thriving yet imperfect democracy. During this time, the archipelago attracted international attention as the most-populated Muslim-majority

country in the world. As religious issues and actors have been increasingly taken into account in the analysis and conduct of international relations, particularly since the 9/11 events, Indonesia's leaders have adapted to this new context. Taking a socio-historical perspective, this book examines the growing role of transnational Islamic Non-State Actors (NSAs) in post-authoritarian Indonesia and how it has affected the making of Indonesia's foreign policy since the country embarked on the democratization process in 1998. It returns to the origins of the relationship between Islamic organisations and the Indonesian institutions in order to explain the current interactions between transnational Islamic actors and the country's official foreign policies. The book considers for the first time the interactions between the parallel diplomacy undertaken by Indonesia's Islamic NSAs and the country's official foreign policy narrative and actions. It explains the adaptation of the state's responses, and investigates the outcomes of those responses on the country's international identity. Combining field-collected data and a theoretical reflexion, it offers a distanced analysis which deepens theoretical approaches on transnational religious actors. Providing original research in Asian Studies, while filling an empirical gap in international relations theory, this book will be of interest to scholars of Indonesian Studies, Islamic Studies, International Relations and Asian Politics.

**US Defense Politics** Harvey M. Sapolsky, Eugene Gholz, Caitlin Talmadge. 2008-08-06 This new textbook seeks to explain how US defense and national security policy is formulated and conducted. The focus is on the role of the President, Congress, political partisans, defense industries, lobbies, science, the media, and interest groups, including the military itself, in shaping policies. It examines the following key themes: US grand strategy; who joins America's military; how and why weapons are bought; the management of defense; public attitudes toward the military and casualties; the roles of the President and the Congress in

controlling the military; the effects of 9/11 on security policy, homeland security, government reorganizations, and intra- and inter-service relations. The book shows how political and organizational interests determine US defense policy, and warns against the introduction of centralising reforms. In emphasizing the process of defense policy-making, rather than just the outcomes of that process, this book signals a departure from the style of many existing textbooks.

**Power and Restraint** Jeffrey W. Meiser. 2015-03-02 At the end of the nineteenth century, the United States emerged as an economic colossus in command of a new empire. Yet for the next forty years the United States eschewed the kind of aggressive grand strategy that had marked other rising imperial powers in favor of a policy of moderation. In *Power and Restraint*, Jeffrey W. Meiser explores why the United States—counter to widely accepted wisdom in international relations theory—chose the course it did. Using thirty-four carefully researched historical cases, Meiser asserts that domestic political institutions and culture played a decisive role in preventing the mobilization of resources necessary to implement an expansionist grand strategy. These factors included traditional congressional opposition to executive branch ambitions, voter resistance to European-style imperialism, and the personal antipathy to expansionism felt by presidents like Woodrow Wilson and Franklin Roosevelt. The web of resilient and redundant political restraints halted or limited expansionist ambitions and shaped the United States into an historical anomaly, a rising great power characterized by prudence and limited international ambitions.

**Arab-Iranian Rivalry in the Persian Gulf** Farzad Sharifi-Yazdi.2015-06-29 Iranian ambitions in the Persian Gulf and rivalries with Arab neighbours are subject to intense - and heated - speculation, controversy and debate. Here, Farzad Cyrus Sharifi scrutinises the rival Arab-Iranian claims to Bahrain, the Shatt al-Arab waterway, and the Abu Musa and Tunbs islands in the years after World War II and before the Iranian revolution. Through investigation of previously unexamined primary materials and interviews with leading players, this book sheds new light on the evolution and dynamics of hegemonic and nationalistic Arab-Iranian rivalries and how these rivalries began to find symbolic expression through territorial disputes. Sharifi illustrates that these ongoing disputes - and the deep-seated tensions still prevalent in Arab-Iranian relations - are largely rooted in how they were constructed in the post-World War II period, making this book vital reading for researchers of the politics, history, international relations and diplomacy of the Middle East.
