Broken Stars Ken Liu.2019-02-19 Broken Stars, edited by multi award-winning writer Ken Liu--translator of the bestselling and Hugo Award-winning novel The Three Body Problem by acclaimed Chinese author Cixin Liu-- is his second thought-provoking anthology of Chinese short speculative fiction. Some of the included authors are already familiar to readers in the West (Liu Cixin and Hao Jingfang, both Hugo winners); some are publishing in English for the first time. Because of the growing interest in newer SFF from China, virtually every story here was first published in Chinese in the 2010s. The stories span the range from short-shorts to novellas, and evoke every hue on the emotional spectrum. Besides stories firmly entrenched in subgenres familiar to Western SFF readers such as hard SF, cyberpunk, science fantasy, and space opera, the anthology also includes stories that showcase deeper ties to Chinese culture: alternate Chinese history, chuanyue time travel, satire with historical and contemporary allusions that are likely unknown to the average Western reader. While the anthology makes no claim or attempt to be representative or "comprehensive, it demonstrates the vibrancy and diversity of science fiction being written in China at this moment. In addition, three essays at the end of the book explore the history of Chinese science fiction

publishing, the state of contemporary Chinese fandom, and how the growing interest in science fiction in China has impacted writers who had long labored in obscurity. Stories include: "Goodnight, Melancholy" by Xia Jia "The Snow of Jinyang" by Zhang Ran "Broken Stars" by Tang Fei "Submarines" by Han Song "Salinger and the Koreans" by Han Song "Under a Dangling Sky" by Cheng Jingbo "What Has Passed Shall in Kinder Light Appear" by Baoshu "The New Year Train" by Hao Jingfang "The Robot Who Liked to Tell Tall Tales" by Fei Dao "Moonlight" by Liu Cixin "The Restaurant at the End of the Universe: Laba Porridge" by Anna Wu "The First Emperor's Games" by Ma Boyong "Reflection" by Gu Shi "The Brain Box" by Regina Kanyu Wang "Coming of the Light" by Chen Qiufan "A History of Future Illnesses" by Chen Qiufan Essays: "A Brief Introduction to Chinese Science Fiction and Fandom," by Regina Kanyu Wang, "A New Continent for China Scholars: Chinese Science Fiction Studies" by Mingwei Song "Science Fiction: Embarrassing No More" by Fei Dao For more Chinese SF in translation, check out Invisible Planets. Here's Looking at Euclid Alex Bellos.2011-04-19 Too often math gets a bad rap, characterized as dry and difficult. But, Alex Bellos says, math can be inspiring and brilliantly creative. Mathematical thought is one of the great achievements of the human race, and arguably the foundation of all human progress. The world of mathematics is a remarkable place. Bellos has traveled all around the globe and has plunged into history to uncover fascinating stories of mathematical achievement, from the breakthroughs of Euclid, the greatest mathematician of all time, to the creations of the Zen master of origami, one of the hottest areas of mathematical work today. Taking us into the wilds of the Amazon, he tells the story of a tribe there who can count only to five and reports on the latest findings about the math instinct—including the revelation that ants can actually count how many steps they've taken. Journeying to the Bay of Bengal, he interviews a Hindu sage about the brilliant mathematical insights of the Buddha, while in Japan he visits the godfather of Sudoku and introduces the brainteasing delights of mathematical games. Exploring the mysteries of randomness, he explains why it is impossible for our iPods to truly randomly select songs. In probing the many intrigues of that most beloved of numbers, pi, he visits with two brothers so obsessed with the elusive number that they built a supercomputer in their Manhattan apartment to study it. Throughout, the journey is enhanced with a wealth of intriguing illustrations, such as of the clever puzzles known as tangrams and the crochet creation of an

American math professor who suddenly realized one day that she could knit a representation of higher dimensional space that no one had been able to visualize. Whether writing about how algebra solved Swedish traffic problems, visiting the Mental Calculation World Cup to disclose the secrets of lightning calculation, or exploring the links between pineapples and beautiful teeth, Bellos is a wonderfully engaging guide who never fails to delight even as he edifies. Here's Looking at Euclid is a rare gem that brings the beauty of math to life.

The Strange Case of Origami Yoda (Origami Yoda #1) Tom Angleberger.2012-08-07 In this funny, uncannily wise portrait of the dynamics of a sixth-grade class and of the greatness that sometimes comes in unlikely packages, Dwight, a loser, talks to his classmates via an origami finger puppet of Yoda. If that weren't strange enough, the puppet is uncannily wise and prescient. Origami Yoda predicts the date of a pop quiz, guesses who stole the classroom Shakespeare bust, and saves a classmate from popularity-crushing embarrassment with some well-timed advice. Dwight's classmate Tommy wonders how Yoda can be so smart when Dwight himself is so clueless. With contributions from his puzzled classmates, Tommy assembles this first case file in the blockbuster bestselling Origami Yoda series, written by Tom Angleberger, author of Star Wars: Return of the Jedi: Beware the Power of the Dark Side, and hailed by School Library Journal as "honest, funny, and immensely entertaining." Blindsight Peter Watts.2006-10-03 Hugo and Shirley Jackson award-winning Peter Watts stands on the cutting edge of hard SF with his acclaimed novel, *Blindsight* Two months since the stars fell... Two months of silence, while a world held its breath. Now some half-derelict space probe, sparking fitfully past Neptune's orbit, hears a whisper from the edge of the solar system: a faint signal sweeping the cosmos like a lighthouse beam. Whatever's out there isn't talking to us. It's talking to some distant star, perhaps. Or perhaps to something closer, something en route. So who do you send to force introductions with unknown and

unknowable alien intellect that doesn't wish to be met? You send a linguist with multiple personalities, her brain surgically partitioned into separate, sentient processing cores. You send a biologist so radically interfaced with machinery that he sees x-rays and tastes ultrasound. You send a pacifist warrior in the faint hope she won't be needed. You send a monster to command them all, an extinct hominid predator once called vampire, recalled from the grave with the voodoo of recombinant genetics and the blood of sociopaths. And you send a synthesist—an informational topologist with half his mind gone—as an interface between here and there. Pray they can be trusted with the fate of a world. They may be more alien than the thing they've been sent to find. At the Publisher's request, this title is being sold without Digital Rights Management Software (DRM) applied.
