**Precision and Purpose** Karl P. Mueller.2015-07-08 Between March and October 2011, a coalition of North Atlantic Treaty Organization (NATO) member states and several partner nations waged a war against Muammar Qaddafi's Libyan regime that stemmed and then reversed the tide of Libya's civil war, preventing Qaddafi from crushing the nascent rebel movement seeking to overthrow his dictatorship and going on to enable opposition forces to prevail. The central element of this intervention was a relatively small multinational force's air campaign operating from NATO bases in several countries, as well as from a handful of aircraft carriers and amphibious ships in the Mediterranean Sea. The study details each country's contribution to that air campaign, examining such issues as the limits of airpower and coordination among nations. It also explores whether the Libyan experience offers a potential model for the future.

*The Radioactive Boy Scout* Ken Silverstein.2005-01-11 Growing up in suburban Detroit, David Hahn was fascinated by science. While he was working on his Atomic Energy badge for the Boy Scouts, David's obsessive attention turned to nuclear energy. Throwing caution to the wind, he plunged into a new project: building a model nuclear reactor in his backyard garden shed. Posing as a physics professor, David solicited information on reactor design from the U.S. government and from industry experts. Following blueprints he found in an outdated physics textbook, David cobbled together a crude device that threw off toxic levels of radiation. His wholly unsupervised project finally sparked an environmental emergency that put his town's forty thousand suburbanites at risk. The EPA ended up burying his lab at a radioactive dumpsite in Utah. This offbeat account of ambition and, ultimately, hubris has the narrative energy of a first-rate thriller.

Search and Rescue Leadership Contributing Authors.2017-12-13 Search and Rescue Leadership This text teaches the crew leader to become an effective and efficient searcher and leader. It covers topics such as leadership styles, characteristics of a good leader, and practices which encourage effective team participation in the management of various resources. Topics include: command structure and integration, safety practices, map reading and navigation, search tactics, and the study of lost person behavior. It explains random traveling choices of a lost person, in addition to behaviors such as route and direction sampling. This text provides an overview of hazardous terrain, search practices, search probability, applicable reports, and the calculation of POD and POS. In addition, practices using specially trained canines and equines, as well as air operations, urban search, SAR rescue practices and stress management is discussed, in addition to a variety of other related topics. Written by active searches with over a thousand missions under their belt, this text is a must-read for team managers and those participating in search and rescue missions.

College Algebra Jay Abramson.2018-01-07 College Algebra provides a comprehensive exploration of algebraic principles and meets scope and sequence requirements for a typical introductory algebra course. The modular approach and richness of content ensure that the book meets the needs of a variety of courses. College Algebra offers a wealth of examples with detailed, conceptual explanations, building a strong foundation in the material before asking students to apply what they've learned. Coverage and Scope In determining the concepts, skills, and topics to cover, we engaged dozens of highly experienced instructors with a range of

student audiences. The resulting scope and sequence proceeds logically while allowing for a significant amount of flexibility in instruction. Chapters 1 and 2 provide both a review and foundation for study of Functions that begins in Chapter 3. The authors recognize that while some institutions may find this material a prerequisite, other institutions have told us that they have a cohort that need the prerequisite skills built into the course. Chapter 1: Prerequisites Chapter 2: Equations and Inequalities Chapters 3-6: The Algebraic Functions Chapter 3: Functions Chapter 4: Linear Functions Chapter 5: Polynomial and Rational Functions Chapter 6: Exponential and Logarithm Functions Chapters 7-9: Further Study in College Algebra Chapter 7: Systems of Equations and Inequalities Chapter 8: Analytic Geometry Chapter 9: Sequences, Probability and Counting Theory

**Catastrophic Incident Search and Rescue Addendum** National Search and Rescue Committee.2012 Mass rescue operations are complex, confusing and extremely challenging for multiagency responders.

Catastrophic Incident Search and Rescue was developed by the National Search and Rescue Committee (NSARC) to provide clear, definitive, standardized direction and information on search and rescue (SAR) during disasters. It covers federal response organization, incident management, critical considerations, specific field considerations organized by disaster type, and the impact of man-made disasters. For federal agencies, it is the guide on how to respond and provide SAR services during a disaster. The up-to-date guidance in this book will save lives. Catastrophic Incident Search and Rescue expands on the US National SAR Plan and the US National SAR Supplement to the International Aeronautical and Maritime SAR (IAMSAR) Manual. Version 3.0 provides additional information and lessons learned.

What's In, What's Out Amanda Glassman,Ursula Giedion,Peter C. Smith.2017-10-10 Vaccinate children against deadly pneumococcal disease, or pay for cardiac patients to undergo lifesaving surgery? Cover the costs of dialysis for kidney patients, or channel the money toward preventing the conditions that lead to renal failure in the first place? Policymakers dealing with the realities of limited health care budgets face tough decisions like these regularly. And for many individuals, their personal health care choices are equally stark: paying for medical treatment could push them into poverty. Many low- and middle-income countries now aspire to universal health coverage, where governments ensure that all people have access to the quality health services they need without risk of impoverishment. But for universal health coverage to become reality, the health services offered must be consistent with the funds available—and this implies tough everyday choices for policymakers that could be the difference between life and death for those affected by any given condition or disease. The situation is particularly acute in low- and middle income countries where public spending on health is on the rise but still extremely low, and where demand for expanded services is growing rapidly. What's In, What's Out: Designing Benefits for Universal Health Coverage argues that the creation of an explicit health benefits plan—a defined list of services that are and are not available—is an essential element in creating a sustainable system of universal health coverage. With contributions from leading health economists and policy experts, the book considers the many dimensions of governance, institutions, methods, political economy, and ethics that are needed to decide what's in and what's out in a way that is fair, evidence-based, and sustainable over time.
