Symposium on Chinese Historical Geography Renzhi Hou.2014-11-21 This book represents the most important academic achievements won by Dr. Renzhi Hou, one of the founding fathers of and pioneering researchers in the modern historical geography of China. His collected papers and speeches, spanning from the 1940s to the 1990s, serve as a window into Hou's academic experience as well as the development of the historical geography of China during the second half of the 20th century. Dr. Hou has made his greatest contributions mainly in two areas, namely, urban historical geography and desert historical geography. Roughly a quarter of this book is devoted to the former, and above all to the study of Beijing's historical geography and its influence on urban planning. It is worth noting that "From Beijing to Washington—A Contemplation on the Concept of Municipal Planning," presented here, is the only historical geography-based comparative study of a Chinese city and a Western one by a Chinese scholar. Dr. Hou's studies on desert historical geography have garnered him a prominent reputation in the natural sciences academia. "Ancient City Ruins in the Deserts of the Inner Mongolia Autonomous Region of China," also included here, can be considered a masterwork. Moreover, many of his original thoughts on some interesting topics can also be found in this book, such as the communication between China and Africa in ancient times, and the rediscovery of the value of geographical classics in the modern context.

In this new edition he takes aim at the outrageous FIFA scandal, Boston's bid for the 2024 summer Olympics, and the criticism surrounding the 2015 Women's World Cup. *Circus Maximus* focuses on major cities, like London and Barcelona, that have previously hosted these sporting events, to provide context for cities like Tokyo and Rio de Janeiro, which are currently bearing the weight of exploding expenses, corruption, and protests. The Price of Nuclear Power Stephanie A. Malin.2015-05-21 Rising fossil fuel prices and concerns about greenhouse gas emissions are fostering a nuclear power renaissance and a revitalized uranium mining industry across the American West. In *The Price of Nuclear Power*, environmental sociologist Stephanie Malin offers an on-the-ground portrait of several uranium communities caught between the harmful legacy of previous mining booms and the potential promise of new economic development. Using this context, she examines how shifting notions of environmental justice

inspire divergent views about nuclear power's sustainability and equally divisive forms of social activism. Drawing on extensive fieldwork conducted in rural isolated towns such as Monticello, Utah, and Nucla and Naturita, Colorado, as well as in upscale communities like Telluride, Colorado, and incorporating interviews with community leaders, environmental activists, radiation regulators, and mining executives, Malin uncovers a fundamental paradox of the nuclear renaissance: the communities most hurt by uranium's legacy—such as high rates of cancers, respiratory ailments, and reproductive disorders—were actually quick to support industry renewal. She shows that many impoverished communities support mining not only because of the employment opportunities, but also out of a personal identification with uranium, a sense of patriotism, and new notions of environmentalism. But other communities, such as Telluride, have become sites of resistance, skeptical of industry and government promises of safe mining, fearing that regulatory enforcement won't be strong enough. Indeed, Malin shows that the nuclear renaissance has exacerbated social divisions across the Colorado Plateau, threatening social cohesion. Malin further illustrates ways in which renewed uranium production is not a socially sustainable form of energy development for rural communities, as it is utterly dependent on unstable global markets. *The Price of Nuclear Power* is an insightful portrait of the local impact of the nuclear renaissance and the social and environmental tensions inherent in the rebirth of uranium mining.

EU Law Enforcement Stefano Montaldo, Francesco Costamagna, Alberto Miglio. 2021-02-22 The existence of a structured enforcement system is an inherent feature of national legal orders and one of the core elements of State sovereignty. The very limited power to issue sanctions has often been deemed a gap in the EC legal order. Over the years, the situation has progressively changed. The Union's institutional setting is growing in complexity and a variety of agencies has been or is expected to be endowed with law enforcement responsibilities. In addition, the so-called competence creep has led the EU to play an increasingly prominent role in several areas of EU law enforcement, including the issuing of sanctions. This book examines these developments, focusing on both the general features of the EU legal order and the analysis of key-substantive areas, such as banking and monetary union, environmental law, and data protection. The work thus presents a general framework for understanding EU sanctioning based on structural features and general legal principles. Part I develops an analytical framework, tracking the most significant evolutive patterns of EU sanctioning powers. Part II adopts a more practical approach focusing on specific issues and policy areas. The book bridges a gap in existing literature and sheds new light on the relationship between the exercise of *jus puniendi* and the evolution of EU integration.

The Rise of the Creative Class--Revisited Richard Florida. 2014-01-07 Initially published in 2002, *The Rise of the Creative Class* quickly achieved classic status for its identification of forces then only beginning to reshape our economy, geography, and workplace. Weaving story-telling with original research, Richard Florida identified a fundamental shift linking a host of seemingly unrelated changes in American society: the growing importance of creativity in people's work lives and the emergence of a class of people unified by their engagement in creative work. Millions of us were beginning to work and live much as creative types like artists and scientists always had, Florida observed, and this Creative Class was determining how the workplace was organized, what companies would prosper or go bankrupt, and even which cities would thrive. In *The Rise of the*

Creative Class Revisited, Florida further refines his occupational, demographic, psychological, and economic profile of the Creative Class, incorporates a decade of research, and adds five new chapters covering the global effects of the Creative Class and exploring the factors that shape “quality of place” in our changing cities and suburbs.

Transformation of Resource Towns and Peripheries Greg Halseth.2016-07-01 Most developed economies, including single-industry and resource dependent rural or small town regions, are transforming rapidly as a result of social, political, and economic change. Collectively, they face a number of challenges as well as new opportunities. This international collaboration describes a critical political economy framework that will be useful for understanding these transitions. Transformation of Resource Towns and Peripheries describes the multi-faceted process of transition and change in resource dependent rural and small town regions since the end of the Second World War. The book incorporates international case studies from Australia, Canada, Finland and New Zealand, with the express purpose of highlighting similarities and differences in patterns and practices in each country. Chapters explore three main themes: how corporate ties and trade linkages are changing and impacting rural communities and regions; how resource industry employment is changing in these small communities; and how local community capacity and leadership are working to mitigate challenges and take advantage of new opportunities. This book will be of interest to students of regional studies, geography, and rural and industrial sociology. It will also have a strong appeal to policy-makers and local regional development practitioners.

Bombs Away David G. Havlick.2018-04-11 When viewed from space, the Korean Peninsula is crossed by a thin green ribbon. On the ground, its mix of dense vegetation and cleared borderlands serves as home to dozens of species that are extinct or endangered elsewhere on the peninsula. This is Korea’s demilitarized zone—one of the most dangerous places on earth for humans, and paradoxically one of the safest for wildlife. Although this zone was not intentionally created for conservation, across the globe hundreds of millions of acres of former military zones and bases are being converted to restoration areas, refuges, and conservation lands. David G. Havlick has traveled the world visiting these spaces of military-to-wildlife transition, and in Bombs Away he explores both the challenges—physical, historical, and cultural—and fascinating ecological possibilities of military site conversions. Looking at particular international sites of transition—from Indiana’s Big Oaks National Wildlife Refuge to Cold War remnants along the former Iron Curtain—Havlick argues that these new frontiers of conservation must accomplish seemingly antithetical aims: rebuilding and

protecting ecosystems, or restoring life, while also commemorating the historical and cultural legacies of warfare and militarization. Developing these ideas further, he shows that despite the ecological devastation often wrought by military testing and training, these activities need not be inconsistent with environmental goals, and in some cases can even complement them—a concept he calls ecological militarization. A profound, clear explication of landscapes both fraught and fecund, marked by death but also reservoirs of life, *Bombs Away* shows us how “military activities, conservation goals, and ecological restoration efforts are made to work together to create new kinds of places and new conceptions of place.”

The Poverty of Television Jonathan Corpus Ong. 2015-05-15 Based on an extensive ethnographic study of television and audiences in class-divided Philippines, this is the first book to take a bottom-up approach in considering how people respond to images and narratives of suffering and poverty on television. Arguing for an anthropological ethics of media, this book challenges existing work in media studies and sociology that focuses solely on textual analysis and philosophical approaches to the question of representing vulnerable others. Current questions in media ethics, such as whether to portray sufferers as humane and empowered individuals or show them ‘at their worst’ have so far used textual and visual analyses to convey the researcher’s own moral position on the matter. In contrast, this book, inspired by the anthropology of moralities, accounts for the different interpretations and moral positions of audiences, who are positioned in various degrees of social and moral proximity to those they see and hear on television. Winner of the 2016 Philippine Social Science Council Excellence in Research Award.

China-EU Relations in a New Era of Global Transformation Li Xing. 2021-06-14 This book draws together leading experts to examine the key issues in China-EU relations. The book highlights the struggles of both China and the EU to look for a dynamic and durable mode of engagement in an attempt to achieve the balance between opportunities and challenges, and between partnership and rivalry. International contributors explore how to conceptualise China-EU relations and identify their differences and commonalities such as the EU’s role in China’s foreign policy process and how the EU works with China as a strategic partner. Finally, it analyses China’s and the EU’s perceptions of their own present and future roles. Shedding light on the perspectives

The New Urban Crisis Richard Florida. 2017-04-11 Richard Florida, one of the world's leading urbanists and author of *The Rise of the Creative Class*, confronts the dark side of the back-to-the-city movement. In recent years, the young, educated, and affluent have surged back into cities, reversing decades of suburban flight and urban decline. and yet all is not well. In *The New Urban Crisis*, Richard Florida, one of the first scholars to anticipate this back-to-the-city movement, demonstrates how the forces that drive urban growth also generate cities' vexing challenges, such as gentrification, segregation, and inequality. Meanwhile, many more cities still stagnate, and middle-class neighborhoods everywhere are disappearing. We must rebuild cities and suburbs by empowering them to address their challenges. *The New Urban Crisis* is a bracingly original work of research and analysis that offers a compelling diagnosis of our economic ills and a bold prescription for more inclusive cities capable of ensuring prosperity for all.

Rules of Engagement Paolo Beconcini. 2016-12-15 China now leads the world in number of registered trademarks. In recent years, however, higher volumes of enforcement have not brought about the end of trademark theft and counterfeiting. Consequently, most Westerners doing business in China (or preparing to do so) have negative views of the country's system of intellectual property rights. This powerful book, by the world's most

experienced authority on how law and business interact in China's trademark context, provides deeply informed and positive guidance for foreign brand owners seeking strategies that realistically engage with the Chinese legal and business landscape, thus showing how to reduce risk and benefit from the actually existing system. The author sets forth rules of engagement - strategic rules of conduct that provide guidance as to how to learn, understand, and approach trademark challenges in China in an objective manner. Issues and topics covered include the following: • acquisition of trademark rights in China; • infringement of trademark rights and claim basis; • preparatory investigation and case build-up; • available enforcement tools and procedures; • remedial strategies responding to trademark theft; • evidentiary burdens in proving infringement; • geographic location and specific characteristics of counterfeiting hubs; • privileged relations between investigative companies and enforcing authorities; and • increasing presence of online professional trademark thieves. Detailed discussion of a number of cases (in fields including automotive, clothing, wine, pharmaceuticals, electronic devices, and sports apparel) isolate certain common patterns and prove that, aside from certain malfunctions of the trademark system, a substantial amount of responsibility for failure can be laid with the brands and not with China's enforcement authorities. With its comprehensive strategic approaches to dealing with trademark protection and enforcement in China, and its challenges to common legal thinking in the field, this book proposes and delivers new creative strategic solutions to unresolved problems related to trademarks in China. Interested lawyers and business persons can use the revelations about how anti-counterfeiting really works in China to help China bring about a change in the way state bodies enforce trademark rights. With the use of this book, lawyers counseling and advising clients on their China trademark portfolios and trademark protection strategies will bring great advantage to the brands they serve.
