The Street Smart MBA James Mangraviti,Steven Babitsky.2014-03-01 Business schools have long enticed students into their MBA programs with the promise that, after a short stint spent studying the ins and outs of the business world, they will be able to step right into the upper echelons of management or launch a business that soon has them flitting about the world in a private jet. Sounds great, you say. Sign me up! Not so fast. Sure, business school might prove a necessary prerequisite for those aiming to gain employment at a large financial institution, land a job with a consultancy, or accelerate their journey to managerial superstardom at a Fortune 500 company. But for aspiring entrepreneurs and established business owners alike, the truth of the matter is this: The ability to get a business off the ground and running successfully is not the byproduct of toiling away in a classroom, learning esoteric subjects like the economics of competition. Rather, all it takes to start and run a truly successful business are a few sensible, time-proven techniques that have been needlessly forgotten in business innovators' haste to reinvent the wheel. That's why, in *The Street Smart MBA*, Steve Babitsky and James J. Mangraviti, Jr., encourage you to ditch class—or, better yet, ditch b-school altogether—and go back to the business basics with a series of ten simple steps that will do more for your company than the letters M, B, and A ever will. There are no forays into game theory in *The Street Smart MBA*, no parables, and no intellectualizing. Instead what you will find is a practical, easy-to-understand, step-by-step business strategy guide that encourages you to revive a handful of basic yet essential practices that many business owners have lost sight of, such as: Building a brand that is so synonymous with quality that you'll be able to maximize your company's profits in no time; Turning your company's products and services into profits by finding your company a niche, working with deadlines, and honoring your company's image above all else; Dealing with customer complaints head-on so that you can turn gripes into opportunities; Doing favors, mentoring, and sending gifts, in order to grow your business network; And much more. With its emphasis on ten simple yet time-honored principles that lead to business success, *The Street Smart MBA* is all the business education that entrepreneurs with great ideas and business owners with the drive to succeed will ever need.

Elite MBA Programs at Public Universities Mimi Wolverton,Larry Penley.2004-11-30 Business education programs should practice what they preach: applying the principles of strategic analysis to play to their strengths and develop distinctive offerings that attract the most profitable customers—in this case, students, faculty, local communities, and the institutions that support them financially. With the costs of private MBA programs skyrocketing, public universities, which generally operate out of the spotlight of the Harvards and Whartons, have a tremendous opportunity to distinguish themselves as centers of innovative, high-quality education. Mimi Wolverton and Larry Penley conducted extensive research to identify the qualities of those public institutions across the country—from the University of Washington to Georgia Tech—that have successfully established competitive advantages, generally through a combination of cost leadership, differentiation, and focus. *Elite MBA Programs at Public Universities* features 12 in-depth case studies by senior representatives of the respective institutions, detailing the process by which they developed and launched programs to raise their profiles and ultimately compete aggressively for talent and support. From developing strategic alliances with local businesses and complementary academic departments to establishing online and overseas courses to investing in state-of-the-art facilities, these schools are setting new standards for business education—and measuring the positive results, for example, in terms of increased funding, higher faculty research productivity, higher rankings, and greater student diversity. Wolverton and Penley frame the case studies by applying the concepts of strategy theory, drawing lessons that can be applied in other educational institutions, as well as for students of strategy and general readers interested in emerging trends in business education. The result is a fascinating peek behind the scenes at the most innovative MBA programs, as well as a rich canvas for observing the principles of strategic management in action.

The Future of the MBA Mihnea C. Moldoveanu,Roger L. Martin.2008-04-25 The MBA is probably the hottest ticket among the current university graduate degree offerings—every year, more than 120,000 students enroll in MBA programs in the United States, and the estimates in Europe do not lag far behind. In addition, job prospects have never looked better for business school graduates; corporations are hiring more business school graduates every year, and compensating them more handsomely. *The Future of the MBA* provides a sorely needed detailed and systematic review of the major contemporary debates on management education. At the same time, it makes a striking new proposal that will certainly have an impact in business schools: that managers need to develop a series of qualitative tacit skills which could be appropriately developed by integrative curricula brought from different disciplines, including sociology, philosophy, and other social sciences. Moldoveanu and Martin, both involved in the greatly respected integrative business education program at the Rothman School of Management, provide a guide on how to design a reliable integrated program for management students. One of the main assets of the book is that it relies not just on speculative thinking, but on real life experience, and that it also includes case studies that will appeal to practicing managers. As an authoritative reference on MBA education, it will appeal to faculty and staff of business schools, as well as students in related fields like education and public policy.

An Entire MBA in 1 Course Chris Haroun.2016-02-09 ** ACCORDING TO BUSINESS INSIDER: Getting your MBA has never been easier. Haroun is one of the highest rated professors on Udemy, so you can expect to be in good hands through the course of your education. ** This is the book version of the popular Udemy.com course called *An Entire MBA in 1 Course*. From the Author of *101 Crucial Lessons They Don't Teach You in Business School*, which Forbes magazine calls 1 of 6 books that all entrepreneurs need to read right now. This book will teach you everything you need to know about business....from starting a company to taking it public. Most business books are significantly outdated. This book leverages many online resources and makes the general business, accounting and finance process very easy to understand (and enjoyable too)! There are many incredibly engaging and entertaining video links in the book to YouTube and other sources; 'edutainment' works! Although this book is close to 400 pages, I tried to visualize the content of this book as much as possible as this is a more impactful and enjoyable way to learn (think Pinterest versus the tiny words in the Economist)! The contents of this book are all based on my work experience at several firms, including Goldman Sachs, the consulting industry at Accenture, a few companies I have started, the hedge fund industry where I worked at Citadel and most recently, based on my experience at a prominent San Francisco based venture capital firm. I also included many helpful practical business concepts I learned while I did an MBA at Columbia University and a Bachelor of Commerce degree at McGill University. Think of this book as a greatest hits business summary from my MBA, undergraduate business degree, work experience in consulting, equities, hedge funds, venture capital and starting my own companies. As the title of this book suggests, this is an entire MBA in one book; it's also a practical manual to help you accomplish your business career goals. I have minimized boring theoretical concepts in this book in order to keep it as close to reality as possible. I hope you enjoy it! In addition to teaching at 4 universities in the San Francisco Bay Area, you can find other courses that I teach online at www.udemy.com/user/chris-haroun/.
