Economy of the Unlost Anne Carson.2009-04-11 The ancient Greek lyric poet Simonides of Keos was the first poet in the Western tradition to take money for poetic composition. From this starting point, Anne Carson launches an exploration, poetic in its own right, of the idea of poetic economy. She offers a reading of certain of Simonides' texts and aligns these with writings of the modern Romanian poet Paul Celan, a Jew and survivor of the Holocaust, whose economies of language are notorious. Asking such questions as, What is lost when words are wasted? and Who profits when words are saved? Carson reveals the two poets' striking commonalities. In Carson's view Simonides and Celan share a similar mentality or disposition toward the world, language and the work of the poet. *Economy of the Unlost* begins by showing how each of the two poets stands in a state of alienation between two worlds. In Simonides' case, the gift economy of fifth-century b.c. Greece was giving way to one based on money and commodities, while Celan's life spanned pre- and post-Holocaust worlds, and he himself, writing in German, became estranged from his native language. Carson goes on to consider various aspects of the two poets' techniques for coming to grips with the invisible through the visible world. A focus on the genre of the epitaph grants insights into the kinds of exchange the poets envision between the living and the dead. Assessing the impact on Simonidean composition of the material fact of inscription on stone, Carson suggests that a need for brevity influenced the exactitude and clarity of Simonides' style, and proposes a comparison with Celan's interest in the negative design of printmaking: both poets, though in different ways, employ a kind of negative image making, cutting away all that is superfluous. This book's juxtaposition of the two poets illuminates their differences--Simonides' fundamental faith in the power of the word, Celan's ultimate despair--as well as their similarities; it provides fertile ground for the virtuosic interplay of Carson's scholarship and her poetic sensibility.

Sadhana Anthony De Mello.1984-09-01 *Christian Exercises in Eastern Form* Truly a one-of-a-kind, how-to-do-it book, this small volume responds to a very real hunger for self-awareness and holistic living. It consists of a series of spiritual exercises for entering the contemplative state -- blending psychology, spiritual therapy, and practices from both Eastern and Western traditions. Anthony de Mello offers here an unparalleled approach to inner peace that brings the whole person to prayer -- body and soul, heart and mind, memory and imagination. In forty-seven exercises that teach

things such as awareness of physical sensations, stillness, healing of hurtful memories, and consciousness of self and world, de Mello succeeds in helping all who have ever experienced prayer as difficult, dull, or frustrating. The essential key, he notes, is to journey beyond mere thought-forms and discover satisfying new depths in prayer from the heart. This allows for a greater sense of awareness amid silence, and disposes the one who prays to untold riches, spiritual fulfillment, and ultimately, a mystical experience of God-centeredness. Drawing on Scripture, as well as insights from Eastern and Western spiritual masters, the author has a unique appeal that transcends time, culture, and religious background. For many years a bestseller in the English language, *Sadhana* has now been translated into more than two dozen foreign languages. Readers the world over have eagerly received this sincere spiritual leader, who has led many toward the wealth of insight and spirit that dwells within them.

[Aesthetics of the Virtual](#) Roberto Diodato.2012-11-15 Reconfigures classic aesthetic concepts in relation to the novelty introduced by virtual bodies. Arguing that the virtual body is something new—namely, an entity that from an ontological perspective has only recently entered the world—Roberto Diodato considers the implications of this kind of body for aesthetics. Virtual bodies insert themselves into the space opened up by the famous distinction in Aristotle's *Physics* between natural and artificial beings—they are both. They are beings that are simultaneously events; they are images that are at once internal and external; they are ontological hybrids that exist only in the interaction between logical-computational text and human bodies endowed with technological prostheses. Pursuing this line of thought, Diodato reconfigures classic aesthetic concepts such as mimesis, representation, the relation between illusion and reality, the nature of images and imagination, and the theory of sensory knowledge. Roberto Diodato is Associate Professor of Aesthetics at the Catholic University of the Sacred Heart in Milan, Italy. Justin L. Harmon is a teaching assistant in the Philosophy Department at the University of Kentucky. Silvia Benso is Professor of Philosophy at the Rochester Institute of Technology.

The Pope's Daughter Dario Fo.2015-08-04 Lucrezia Borgia is one of the most vilified women in modern history. The daughter of a notorious pope, she was twice betrothed before the age of eleven and thrice married—one husband was forced to declare himself impotent and thereby unfit and

another was murdered by Lucrezia's own brother, Cesar Borgia. She is cast in the role of murderess, temptress, incestuous lover, loose woman, femme fatale par excellence. But there are two sides to every story. Lucrezia Borgia is the only woman in history to have served as the head of the Catholic Church. She successfully administered several of Renaissance Italy's most thriving cities, founded one of the world's first credit unions, and was a generous patron of the arts. She was mother to a prince and to a cardinal. She was a devoted wife to the Prince of Ferrara, and the lover of the poet Pietro Bembo. She was a child of the renaissance and, in many ways, the world's first modern woman. In this richly imagined novel, Nobel laureate Dario Fo reveals Lucrezia's humanity, her passion for life, her compassion for others, and her skill at navigating around her family's evildoings. The Borgias are unrivalled for the range and magnitude of their political machinations and opportunism. Fo's brilliance rests in his rendering their story as a shocking mirror image of the uses and abuses of power in our own time. Lucrezia herself becomes a model for how to survive and rise above those abuses. Part Wolf Hall, part House of Cards, The Pope's Daughter will appeal to readers of historical fiction and of contemporary fiction alike and will delight anyone fascinated by Renaissance Italy.

The Lumiere Galaxy Francesco Casetti.2015-03-03 Francesco Casetti believes new media technologies are producing an exciting new era in cinema aesthetics. Whether we experience film in the theater, on our hand-held devices, in galleries and museums, onboard and in flight, or up in the clouds in the bits we download, cinema continues to alter our habits and excite our imaginations. Casetti travels from the remote corners of film history and theory to the most surprising sites on the internet and in our cities to prove the ongoing relevance of cinema. He does away with traditional notions of canon, repetition, apparatus, and spectatorship in favor of new keywords, including expansion, relocation, assemblage, and performance. The result is an innovative understanding of cinema's place in our lives and culture, along with a critical sea-change in the study of the art. The more the nature of cinema transforms, the more it discovers its own identity, and Casetti helps readers realize the galaxy of possibilities embedded in the medium.

The Translator as Writer Susan Bassnett,Peter Bush.2007-11-15 Over the last two decades, interest in translation around the world has increased beyond any predictions. International bestseller lists now contain large numbers of translated works, and writers from Latin America, Africa, India and China have joined the lists of eminent, bestselling European writers and those from the global English-speaking world. Despite this, translators tend to be invisible, as are the processes they follow and the strategies they employ when translating. The Translator as Writer bridges the divide between those who study translation and those who produce translations, through essays written by well-known translators talking about their own work as distinctive creative literary practice. The book emphasises this creativity, arguing that translators are effectively writers, or rewriters who produce works that can be read and enjoyed by an entirely new audience. The aim of the book is to give a proper prominence to the role of translators and in so doing to move attention back to the act of translating, away from more abstract speculation about what translation might involve.

Eye of the Century Francesco Casetti. 2008-05-14 Is it true that film in the twentieth century experimented with vision more than any other art form? And what visions did it privilege? In this brilliant book, acclaimed film scholar Francesco Casetti situates the cinematic experience within discourses of twentieth-century modernity. He suggests that film defined a unique gaze, not only because it recorded many of the century's most important events, but also because it determined the manner in which they were received. Casetti begins by examining film's nature as a medium in an age obsessed with immediacy, nearness, and accessibility. He considers the myths and rituals cinema constructed on the screen and in the theater and how they provided new images and behaviors that responded to emerging concerns, ideas, and social orders. Film also succeeded in negotiating the different needs of modernity, comparing and uniting conflicting stimuli, providing answers in a world torn apart by conflict, and satisfying a desire for everydayness, as well as lightness, in people's lives. The ability to communicate, the power to inform, and the capacity to negotiate—these are the three factors that defined film's function and outlook and made the medium a relevant and vital art form of its time. So what kind of gaze did film create? Film cultivated a personal gaze, intimately tied to the emergence of point of view, but also able to restore the immediacy of the real; a complex gaze, in which reality and imagination were combined; a piercing gaze, achieved by machine, and yet deeply anthropomorphic; an excited gaze, rich in perceptive stimuli, but also attentive to the spectator's orientation; and an immersive gaze, which gave the impression of being inside the seen world while also maintaining a sense of distance. Each of these gazes combined two different qualities and balanced them. The result was an ever inventive synthesis that strived to bring about true compromises without ever sacrificing the complexity of contradiction. As Casetti demonstrates, film proposed a vision that, in making opposites permeable, modeled itself on an oxymoronic principle. In this sense, film is the key to reading and understanding the modern experience.

The New Amateur Astronomer Martin Mobberley. 2012-12-06 Amateur astronomy has changed beyond recognition in less than two decades. The reason is, of course, technology. Affordable high-quality telescopes, computer-controlled 'go to' mountings, autoguiders, CCD cameras, video, and (as always) computers and the Internet, are just a few of the advances that have revolutionized astronomy for the twenty-first century. Martin Mobberley first looks at the basics before going into an in-depth study of what's available commercially. He then moves on to the revolutionary possibilities that are open to amateurs, from imaging, through spectroscopy and photometry, to patrolling for near-earth objects - the search for comets and asteroids that may come close to, or even hit, the earth. The New Amateur Astronomer is a road map of the new astronomy, equally suitable for newcomers who want an introduction, or old hands who need to keep abreast of innovations. From the reviews: This is one of several dozen books in Patrick Moore's Practical Astronomy series. Amid this large family, Mobberley finds his niche: the beginning high-tech amateur. The book's first half discusses equipment: computer-driven telescopes, CCD cameras, imaging processing software, etc. This market is changing every bit as rapidly as the computer world, so these details will be current for only a year or two. The rest of the book offers an overview of scientific projects that serious amateurs are carrying out these days. Throughout, basic formulas and technical terms are provided as needed, without formal derivations. An appendix with useful references and Web sites is also included. Readers will need more than this book if they are considering a plunge into high-tech amateur astronomy, but it certainly will whet their appetites. Mobberley's most valuable advice will save the book's owner many times its cover price:

buy a quality telescope from a reputable dealer and install it in a simple shelter so it can be used with as little set-up time as possible. A poor purchase choice and the hassle of setting up are why most fancy telescopes gather dust in their owners' dens. Summing Up: Highly recommended. General readers; lower- and upper-division undergraduates. (T. D. Oswalt, CHOICE, March 2005)

From Good Goddess to Vestal Virgins Ariadne Staples.2013-02-01 The role of women in Roman culture and society was a paradoxical one. On the one hand they enjoyed social, material and financial independence and on the other hand they were denied basic constitutional rights. Roman history is not short of powerful female figures, such as Agrippina and Livia, yet their power stemmed from their associations with great men and was not officially recognised. Ariadne Staples' book examines how women in Rome were perceived both by themselves and by men through women's participation in Roman religion, as Roman religious ritual provided the single public arena where women played a significant formal role. From Good Goddess to Vestal Virgins argues that the ritual roles played out by women were vital in defining them sexually and that these sexually defined categories spilled over into other aspects of Roman culture, including political activity. Ariadne Staples provides an arresting and original analysis of the role of women in Roman society, which challenges traditionally held views and provokes further questions.

Tales from Outer Suburbia Shaun Tan. 2019-02-05 Breathtakingly illustrated and hauntingly written, *Tales from Outer Suburbia* is by turns hilarious and poignant, perceptive and goofy. Through a series of captivating and sophisticated illustrated stories, Tan explores the precious strangeness of our existence. He gives us a portrait of modern suburban existence filtered through a wickedly Monty Pythonesque lens. Whether it's discovering that the world really does stop at the end of the city's map book, or a family's lesson in tolerance through an alien cultural exchange student, Tan's deft, sweet social satire brings us face-to-face with the humor and absurdity of modern life.

Homosexuality and Italian Cinema Mauro Giori. 2017-11-18 This book is the first to establish the relevance of same-sex desires, pleasures and anxieties in the cinema of post-war Italy. It explores cinematic representations of homosexuality and their significance in a wider cultural struggle in Italy involving society, cinema, and sexuality between the 1940s and 1970s. Besides tracing the evolution of representations through both art and popular films, this book also analyses connections with consumer culture, film criticism and politics. Giori uncovers how complicated negotiations between challenges to and valorization of dominant forms of knowledge of homosexuality shaped representations and argues that they were not always the outcome of hatred but also sought to convey unmentionable pleasures and complicities. Through archival research and a survey of more than 600 films, the author enriches our understanding of thirty years of Italian film and cultural history.

At the Crossroads of the Earth and the Sky Gary Urton. 2013-12-18 Above Misminay, the sky also is so divided by the alternation of the two axes of the Milky Way passing through the zenith. This mirror-image quadri-partition of terrestrial and celestial spheres is such that a point within one of the quarters of the earth is related to a point within the corresponding celestial quarter. The transition between the earth and the sky occurs at the horizon, where sacred mountains are related to topographic and celestial features. Based on fieldwork in Misminay, Peru, Gary Urton details a cosmology in which the Milky Way is central. This is the first study that provides a description and analysis of the astronomical and cosmological system in a contemporary community in the Americas. Separate chapters take up the sun, the moon, meteorological phenomena, the stars, and the planets. Star-to-star constellations, the animal dark-cloud constellations that cut through the Milky Way, and certain twilight- and midnight-zenith stars are analyzed in terms of their spatial and temporal integration within an indigenous cosmological framework. Urton breaks new ground by demonstrating the indigenous merging of such forms of precise knowledge as astronomy, meteorology, agriculture, and the correlation of astronomical and biological cycles within a single calendar system. More than sixty diagrams clarify this Quechua system of astronomy and relate it to more familiar principles of Western astronomy and cosmology.
