Military Psychology for Africa Gideon AJ van Dyk.2016-03-17 Military Psychology for Africa is the first textbook of its kind from Africa. Selected authors with competent military psychology knowledge, skills, expertise and experience each contributed a chapter to this unique book. The book empowers academics, students and military fellows to apply this knowledge at academic institutions and military units, during operations, and in presenting short courses. The book will also

equip soldiers with new knowledge for advancing peace on the continent and abroad.

Military Engagement Dennis C. Blair.2013-03-25 The response of an autocratic nation's armed forces is crucial to the outcome of democratization movements throughout the world. But how can military officers and defense officials in democratic nations persuade their counterparts in autocratic regimes to favor democratic transitions? Here, Admiral Dennis Blair confronts this hard-edged challenge with a primer on the factors that affect military behavior during democratic transitions. *Military Engagement* makes the strong case for why the armed forces of any country should favor democracy and why, contrary to conventional wisdom, many military leaders have supported democratic transitions in different regions of the world. Further, it explains why military support, active or tacit, is essential to the success of any democratic transition. Blair provides incisive commentary on civil-military relations and outlines the foundational elements of armed forces in a democratic country. He presents sound advice to defense officials and military leaders in established democracies that can be put into practice when interacting with colleagues in both autocratic regimes and those that have made the break with dictatorship. This succinct handbook analyzes democratic transitions in five major regions and surveys the internal power dynamics in countries such as Iran and North Korea, dictatorships that are hostile toward and fearful of democratic influences. Blair juxtaposes the roles, values, and objectives of military leaders in autocratic nations with those in democracies. In turn, *Military Engagement* highlights how crossnetworking with international military delegations can put external pressure on autocratic countries and persuade them that democracies are best not only for the country itself, but also for the armed forces. Volume one of this two-volume project provides the educational foundation necessary so that military

officers from established democracies can raise their game in achieving effective dialogue on democratic development.

South Africans versus Rommel David Brock Katz.2017-11-15 After bitter debate, South Africa, a dominion of the British Empire at the time, declared war on Germany five days after the invasion of Poland in September 1939. Thrust by the British into the campaign against Erwin Rommel's German Afrika Korps in North Africa, the South Africans fought a see-saw war of defeats followed by successes, culminating in the Battle of El Alamein, where South African soldiers made a significant contribution to halting the Desert Fox's advance into Egypt. This is the story of an army committed somewhat reluctantly to a war it didn't fully support, ill-prepared for the battles it was tasked with fighting, and sent into action on the orders of its senior alliance partner. At its heart, however, this is the story of men at war.

Contesting Caprivi Bennett Kangumu.2011 The authour traces the politics of the people in Caprivi since 19 century. Neglected by Germany and South African colonial administrations, its inhabitants were often pushed towards neighbouring territories though not being an integral part of them.

From Defence to Development Penny Mckenzie.2014-05-28 Remember the global peace dividend - the budget surpluses that were supposed to result from the raising of the Iron Curtain and the end of the arms race? As war-torn societies in the Middle East, Latin America, and parts of Africa found peace and began building democratic societies, governments were supposed to use the money they once spent on the military to better meet basic human needs. But has it happened?

Historical Review of Developments Relating to Aggression United Nations.2003 This report was prepared for the Working Group on the Crime of Aggression at the 8th session of Preparatory Commission, held in September-October 2001. The paper consists of four parts relating to: the Nuremberg tribunal; tribunals establish pursuant to Control Council Law number 10; the Tokyo tribunal; and the United Nations. Annexes contain tables regarding aggression by a State and individual responsibility for crimes against peace. The paper seeks to provide an objective, analytical overview of the history and major developments relating to aggression, both before and after the adoption of the UN Charter.

Re-Viewing Resistance in Namibian History Silvester, Jeremy.2015-07-13 Re-Viewing Resistance in Namibian History brings together the work of experienced academics and a new wave of young Namibian historians - architects of the past - who are working on a range of public history and heritage projects, from late nineteenth century resistance to the use of songs, from the role of gender in SWAPO's camps to memorialisation, and from international solidarity to aspects of the history of Kavango and Caprivi. In a culturally and politically diverse democracy such as Namibia, there are bound to be different perspectives on the past, and history will be as plural as the history-tellers. The chapters in this book reflect this diversity, and combine to create a remarkable collection of divergent voices, providing alternative perspectives on the past. Re-Viewing Resistance in Namibian History writes 'forgotten' people into history; provides a reading of the past that

reflects the tensions and competing identities that pervaded 'the struggle'; and deals with 'heritage that hurts'.

The 71F Advantage National Defense University Press.2010-09-01 Includes a foreword by Major General David A. Rubenstein. From the editor: 71F, or 71 Foxtrot, is the AOC (area of concentration) code assigned by the U.S. Army to the specialty of Research Psychology. Qualifying as an Army research psychologist requires, first of all, a Ph.D. from a research (not clinical) intensive graduate psychology program. Due to their advanced education, research psychologists receive a direct commission as Army officers in the Medical Service Corps at the rank of captain. In terms of numbers, the 71F AOC is a small one, with only 25 to 30 officers serving in any given year. However, the 71F impact is much bigger than this small cadre suggests. Army research psychologists apply their extensive training and expertise in the science of psychology and social behavior toward understanding, preserving, and enhancing the health, well being, morale, and performance of Soldiers and military families. As is clear throughout the pages of this book, they do this in many ways and in many areas, but always with a scientific approach. This is the 71F advantage: applying the science of psychology to understand the human dimension, and developing programs, policies, and products to benefit the person in military operations. This book grew out of the April 2008 biennial conference of U.S. Army Research Psychologists, held in Bethesda, Maryland. This meeting was to be my last as Consultant to the Surgeon General for Research Psychology, and I thought it would be a good idea to publish proceedings, which had not been done before. As Consultant, I'd often wished for such a document to help explain to people what it is that Army Research Psychologists do for a living. In addition to our core group of 71Fs, at the Bethesda 2008 meeting we had several brand-new members, and a number of distinguished retirees, the grey-beards of the 71F

clan. Together with longtime 71F colleagues Ross Pastel and Mark Vaitkus, I also saw an unusual opportunity to capture some of the history of the Army Research Psychology specialty while providing a representative sample of current 71F research and activities. It seemed to us especially important to do this at a time when the operational demands on the Army and the total force were reaching unprecedented levels, with no sign of easing, and with the Army in turn relying more heavily on research psychology to inform its programs for protecting the health, well being, and performance of Soldiers and their families.

Contemporary Issues in South African Military Psychology Nicole Dodd, Petrus C. Bester, Justin van der Merwe. 2020-05-13 Contemporary Issues in South African Military Psychology, is a well-timed, extremely thought-provoking, imperative, particular to the African context, and deals with a highly contemporary issue within the people management and the management studies fields specifically in the military field and context. This is specifically of importance as military psychology is a behavioural science that combines theory and practical application. - Prof Karel Stanz, University of Pretoria

Budgeting for the Military Sector in Africa Wuyi Omitoogun, Eboe Hutchful. 2006 In this comprehensive study, 15 African experts describe and analyse the military budgetary processes and degree of parliamentary oversight and control in nine countries of Africa, spanning across all the continent's sub-regions. Each case study addresses a wide range of questions, such as the roles of

the ministries of finance, budget offices, audit departments and external actors in the military budgetary processes, the extent of compliance with standard public expenditure management procedures, and how well official military expenditure figures reflect the true economic resources devoted to military activities in these countries.

In Different Times Ian van der Waag, Albert Grundlingh. 2019-11-15 This is the first attempt to bring together diverse scholars, using different lenses, to study South Africa's Border War. As a book, it is critical in approach, provides deeper reflection, and focuses specifically on the SADF experience of the war. The result is a more complex picture of the war's dynamics and its legacies. Although South Africa is a vastly different country today, the study of the Border War opens a range of questions, also relevant to contemporary deployments such as in Lesotho (1998) and the Central African Republic (2013). It includes the debate on participation in foreign conflicts; on the deployment, design and preparation of appropriate, modern armed forces and their use as foreign policy instruments in far-off theatres; on military planning; and, as the historical controversies regarding the battles at Cuito Cuanavale and Bangui illustrate, on the interface between foreign campaigning and domestic politics.

Reflections on War Thean Potgieter,Ian Liebenberg.2012-10-01 Reflections on War is a comprehensive and objective investigation into the problems of war. The book explores the crucial link between theory, strategy and objectives in war, taking all the evidence and theory into account, and should be of interest to military practitioners, specialists in defence studies, and others interested in military history. Also notable about the work is its ability to draw insights together from international legal theory, management sciences, history, sociology and the political economy of war ? showing due respect for the moral complexities involved in waging war.

Soldiers In A Storm Philip Frankel.2018-05-04 Soldiers in a Storm: The Armed Forces in South Africa's Democratic Transition is a study of the role of the military in the creation and development of South Africa's new post-apartheid system. Philip Frankel asserts that the armed forces played a far greater role in the end of apartheid than is currently acknowledged in the literature, and that the relatively peaceful negotiations that ended apartheid would not have been possible without the participation of the South African National Defense Force and two major liberation armies.Frankel also examines the topics of military disengagement, civilianization, post-authoritarian political behavior on the part of militaries, and the process of democratic consolidation. He also discusses how many of these themes have been explored in the context of Latin America, and he points out that this is the only book that places these themes within the context of South Africa. This is an important case study with universal implications.

Reader's Guide to Military History Charles Messenger.2013-10-31 This book contains some 600 entries on a range of topics from ancient Chinese warfare to late 20th-century intervention operations. Designed for a wide variety of users, it encompasses general reviews of aspects of military organization and science, as well as specific wars and conflicts. The book examines naval and air warfare, as well as significant individuals, including commanders, theorists, and war leaders. Each entry includes a listing of additional publications on the topic, accompanied by an article discussing these publications with reference to their particular emphases, strengths, and limitations.

Sights, Sounds, Memories Ian van der Waag.2020-12-15 The Second World War involved most of the countries of the world and left so many millions dead and maimed, disorganised and devastated through personal and communal loss. This book recovers some of South Africa's soldiers' experiences from the physical and mental debris of the war. Individuals are important; their lives – used as lenses – give us colour and texture, and their voices tell the stories of ordinary soldiers. Using their memoirs and diaries, the vitality of their endeavours is reasserted, their successes and failures, victories and indecencies are re-examined, and their magnanimity and the general triumph of the human spirit are celebrated.

South Africa's Post-Apartheid Military Lindy Heinecken.2020-01-01 This timely book examines how the South African National Defence Force has adapted to the country's new security, political and

social environment since 1994. In South Africa's changed political state, how has civilian control of the military been implemented and what does this mean for 'defence in a democracy'? This book presents an overview of the security environment, how the mission focus of the military has changed and the implications for force procurement, force preparation, force employment and force sustainability. The author addresses other issues, such as: · the effect of integrating former revolutionary soldiers into a professional armed force · the effect of affirmative action on meritocracy, recruitment and retention · military veterans, looking at the difficulties they face in reintegrating back into society and finding gainful employment · gender equality and mainstreaming · the rise of military unions and why a confrontational, instead of a more corporatist approach to labour relations has emerged · HIV/AIDS and the consequences this holds for the military in terms of its operational effectiveness. In closing, the author highlights key events that have caused the SANDF to become 'lost in transition and transformation', spelling out some lessons learned. The conclusions she draws are pertinent for the future of defence, security and civil-military relations of countries around the world.

Desert Warfare: German Experiences In World War II [Illustrated Edition] Major General Alfred Toppe. 2014-08-15 Includes 112 photos/illustrations and 21 maps. The German Afrika Korps blazed a trail across the deserts of North Africa under their dashing leader Erwin Rommel, the Desert Fox, although finally defeated by far superior Allied Forces they set the gold standard for desert operations. This book is of great historical value and even in the present day it is still considered of great value by the American military who still seek for improvements in their ways of desert doctrine... "Analysts continue to assess the data from Operations Desert Shield and Desert Storm as a means of improving the military's ability to function efficiently in desert terrain...The information

gleaned from this effort will enhance the already considerable body of knowledge on the subject derived from the historical record...When contributions in the latter category are located or rediscovered, they should be given the dissemination they merit... "Such is the purpose of publishing *Desert Warfare: German Experiences in World War II*...Organized by Major General Alfred Toppe and written with the assistance of nine German commanders who served in North Africa, the manuscript...represents a collaborative attempt to determine "as many factors as possible which exerted a determining influence on desert warfare," Issues addressed include planning, intelligence, logistics, and operations. Described and analyzed are the German order of battle, the major military engagements in North Africa, and the particular problems of terrain and climate in desert operations. Not unlike many of the U.S. units engaged in the war with Iraq, the Germans in North Africa learned about combat operations in the desert only after they arrived on the scene and confronted the desert on its own terms. For this reason alone, as well as for the insights it offers, *Desert Warfare* requires the serious consideration of those responsible for preparing the U.S. military for any future conflict in desert terrain."

Military Education and the British Empire, 1815-1949 Douglas E. Delaney, Robert C. Engen, Meghan Fitzpatrick. 2018-09-15 Military education was the lifeblood of the armies, navies, and air forces of the British Empire and an essential ingredient for success in both war and peace. *Military Education and the British Empire* is the first major scholarly work to address the role of military education in maintaining the empire throughout the nineteenth and twentieth centuries. Bringing together the world's top scholars on the subject, this book places distinct national narratives - Canadian, Australian, South African, British, and Indian - within a comparative context. Ultimately, this book allows readers to consider the connections between education and empire from a transnational

perspective.

Defence Diplomacy and National Security Strategy Ian Liebenberg, Dirk Kruijt, Shrikant Paranjpe. 2020-04-20 The post-cold war era presented security challenges that at one level are a continuation of the cold war era; at another level, these phenomena manifested in new forms. Whether the issues of economics and trade, transfer of technologies, challenges of intervention, or humanitarian crisis, the countries of the South (previously pejoratively labelled “Third World” or “developing” countries) have continued to address these challenges within the framework of their capabilities and concerns. The volume explores defence diplomacies, national security challenges and strategies, dynamics of diplomatic manoeuvres and strategic resource management of Latin American, southern African and Asian countries.
