Hoy, Michael DiPaola.2009-04-01 Studies in School Improvement is the eighth volume in a series on research and theory in school administration dedicated to advancing our understanding of schools through empirical study and theoretical analysis. This selection of readings highlights a number of important factors in the stimulation and implementation of school improvement, including transformational leadership; change perspectives of teachers, principals, and the community; strategies for instructional change; learning environments and school culture; dropout prevention; professionalism; trust relations between the teachers and the board as well as trust between students and teachers; and admission decisions for educational leadership programs.
