

The Rulership Book

Rulership and Rebellion in the Anglo-Norman World, c.1066-c.1216 Paul Dalton, David Luscombe. 2016-03-09 The importance of the themes of rulership and rebellion in the history of the Anglo-Norman world between 1066 and the early thirteenth century is incontrovertible. The power, government, and influence of kings, queens and other lords pervaded and dominated society and was frequently challenged and resisted. But while biographies of rulers, studies of the institutions and operation of central, local and seigniorial government, and works on particular political struggles abound, many major aspects of rulership and rebellion remain to be explored or further elucidated. This volume, written by leading scholars in the field and dedicated to the pioneering work of Professor Edmund King, will make an original, important and timely contribution to our knowledge and understanding of Anglo-Norman history.

Saturn Liz Greene.2021-12-01 This classic astrology text, revered by beginners and professional astrologers alike, is now available in a Weiser Classics edition. “The most important single contribution of twentieth-century astrology is that astrology is not a map of one’s fixed destiny but is a potential map of the unfolding of the authentic, higher self.” —Robert Hand, from the foreword Saturn’s darker persona is recognized universally in myth and fairytale. In this classic astrology text, renowned astrologer and Jungian analyst Liz Greene offers a fresh perspective on how to handle the influence of this much-maligned astrological symbol. In *Saturn*, Greene shows us how the frustrating

experiences connected to this planet can be turned into opportunities for greater insight and meaning in our lives. Saturn, she says, symbolizes a psychic process—one that allows us to utilize the experience of pain for self-discovery and a more fulfilling and complete life. Greene retraces Saturn's character through sign, house, aspect, and synastry in a brilliant analysis that reveals his other face: that of the initiator who, for the price of our honesty with ourselves, offers us greater consciousness, self-understanding, and, eventually, freedom.

astrology, and arguing for a connection between the cosmos and the mysteries of human personality

Fixed Stars and Judicial Astrology George Noonan.1990 Perhaps the least understood and most misused elements in astrology today are the fixed stars. Current practice is to consider the stars as no more than mini-manifestations of the planets whose nature they are presumed to hold. The locations of the stars projected onto the ecliptic are then considered valid points for aspectual relationships. No special significance is attributed to the non-zodiacal constellations; nor is a star's location within a constellation given any weight whatsoever. Finally, modern astrology places no distinction on the use of the stars and constellations in genethliacal astrology and the other branches of the ancient art. In this book the natures of the fixed stars and constellations as known by the classicists are discussed in detail. Methods of delineating the fixed stars are indicated, with special emphasis on the applications to judicial astrology. Included are chapters on the nature of the fixed stars; the northern, southern and zodiacal constellations; genethliacal applications of the fixed stars; judicial astrology; and three appendices with information on mathematics and rulership and a complete listing of the fixed stars.

Faku Timothy J. Stapleton.2006-01-01 From roughly 1818 to 1867, Faku was ruler of the Mpondo Kingdom located in what is now the north-east section of the Eastern Cape, South Africa. Because of Faku's legacy, the Mpondo Kingdom became the last African state in Southern Africa to fall under colonial rule. When his father died, Faku inherited his power. In a period of intense raiding, migration and state formation, he transformed the Mpondo polity from a loosely organized constellation of tributary groups to a centralized and populous state with effective military capabilities and a prosperous agricultural foundation. In 1830, Faku allowed Wesleyan missionaries

to establish a station within his kingdom and they became his main channel of communication with the Cape Colony, and later Natal. Ironically, he never showed any serious inclination to convert to Christianity. From the 1840s to early 1850s, this Mpondo king played a central, yet often understated, role in the British colonization of South Africa. While over the years his territory and power declined, Faku remained quite astute in diplomatic negotiations with colonial officials and used his missionary connections to optimum advantage. Timothy J. Stapleton's narrative and use of oral history paint a clear and remarkable portrait of Faku and how he was able to manipulate missionaries, neighbours, colonists and circumstances to achieve his objectives. As a result, Faku: Rulership and Colonialism in the Mpondo Kingdom (c.1780-1867) helps illuminate the history of the entire Cape region.

Planets in Synastry E. W. Neville.1990 At its simplest level, synastry is the examination of the interaction of two astrological charts. Since questions about the relationship are perhaps the ones most often asked of the astrologer, the art of synastry is a basic skill to practice astrology at any but the most casual level. *Planets in Synastry* takes the reader through the steps of this complex process. Individual phases of a relationship are set out and a method for analysis of each phase is described. It focuses not only on the analysis of synastry, but on the translation of the insights into real life applications.

Ritual and Power in Stone Julia Guernsey. 2010-01-01 The ancient Mesoamerican city of Izapa in Chiapas, Mexico, is renowned for its extensive collection of elaborate stone stelae and altars, which were carved during the Late Preclassic period (300 BC-AD 250). Many of these monuments depict kings garbed in the costume and persona of a bird, a well-known avian deity who had great significance for the Maya and other cultures in adjacent regions. This Izapan style of carving and kingly representation appears at numerous sites across the Pacific slope and piedmont of Mexico and Guatemala, making it possible to trace political and economic corridors of communication during the Late Preclassic period. In this book, Julia Guernsey offers a masterful art historical analysis of the Izapan style monuments and their integral role in developing and communicating the institution of divine kingship. She looks specifically at how rulers expressed political authority by erecting monuments that recorded their performance of rituals in which they communicated with the supernatural realm in the persona of the avian deity. She also considers how rulers used the monuments to structure their built environment and create spaces for ritual and politically charged performances. Setting her discussion in a broader context, Guernsey also considers how the Izapan style monuments helped to motivate and structure some of the dramatic, pan-regional developments of the Late Preclassic period, including the forging of a codified language of divine kingship. This pioneering investigation, which links monumental art to the matrices of political, economic, and supernatural exchange, offers an important new understanding of a region, time period, and group of monuments that played a key role in the history of Mesoamerica and continue to intrigue scholars within the field of Mesoamerican studies.

Myth, Rulership, Church and Charters Julia Barrow,Andrew Wareham.2008 This volume brings together a number of essays written by leading scholars in the field of early medieval English history. Focusing on three specific themes - myths, charters and warfare - each contribution presents a balance of both sources and interpretations. Furthermore, they link the subjects: warfare

was the predominant theme in Anglo-Saxon myth; charters are an important source for military organisation and can also shed light on belief and cult. Several of the contributions take a wider perspective, looking at later interpretations of the Anglo-Saxon past, both in the Anglo-Norman and more modern periods. In all, the volume makes a significant addition to the study of Anglo-Saxon England, showing how seemingly unrelated topics can be used to illuminate other areas.

Mundane Astrology: The Astrology of Nations and States H. S. Green, Charles E. O. Carter, Raphael. 2005-03 Will there be peace? Will there be war? Find out with *Mundane Astrology*. Here, in one volume, are three classic books on the astrology of nations and states, by H.S. Green, Raphael, and C.E.O. Carter: H.S. Green organizes his book planet-by-planet. He tells what each planet will do in the 12 houses. Raphael organizes the topic by house. He tells how mundane houses work when planets are in them. In addition, both authors deal with solar and lunar eclipses, and earthquakes. Green shows the effects of eclipses in the houses, while Raphael describes them by decanate (100 sections of the zodiac). Both mention the effects of comets, although little about these mysterious bodies is known astrologically. Charles Carter, writing after WWII, discusses why astrologers failed to predict the war and what that means for mundane astrology. His plea for better data has largely been met, but the need for more study remains. All three authors give astrological rulerships for countries and cities. These are centuries old and are weighted to England and Europe.

Carter's rulers are the most up-to-date. These are the essential texts for serious study of mundane astrology. About the Authors H.S. Green was an astrologer associated with Alan Leo's astrological revival back in the first decade of the 20th century. His various books are highly regarded (all but this one out of print, sadly), but biographical details are sketchy. Raphael was the pen-name of one Robert Cross, 1850-1923. He was the sixth in a series of astrological writers who used the name Raphael & remains the best known of them all. He wrote books on virtually all astrological topics. His book on mundane astrology dates from 1910. Charles E.O. Carter, 1887-1968, was one of the outstanding British astrologers of the 20th century. He succeeded Alan Leo as head of the Astrological Lodge of the Theosophical Society, a post he held from 1920 to 1952. He was editor of *Astrology, The Astrologer's Quarterly*, from 1926 to 1959. Carter's persistent genius reestablished astrology as a serious discipline in England, after two centuries of decline. He wrote his book on *Mundane Astrology* in reaction to the failure of astrologers to forecast WWII. In 1939, astrologers in London knew there was a full-scale war on in China, they knew the situation with Germany was tense, but they had studied the charts for the year, they knew the fuss would blow over. And they were wrong. Carter set out to discover why, his book was the result.

Timing and Rulership in Master Lü's Spring and Autumn Annals (Lüshi chunqiu) James D. Sellmann. 2012-02-01 Written by Lu Buwei, Master Lu's Spring and Autumn Annals influenced the king who became China's first emperor. In this text, Sellmann (philosophy and East Asian studies, U. of Guam) examines the life and times of Lu Buwei, and various aspects of the Annals including its structure, the concept of perfect timing, the role of human nature, the justification of the state, and the importance of cosmic, historical and personal timing. He also suggests possible implications for modern concepts of time, human nature, political order, and social and environmental ethics.

The Legacy of Rulership in Fernando de Alva Ixtlilxochitl's *Historia de la Nación*

Chichimeca Leisa A. Kauffmann.2019 In this book Leisa A. Kauffmann takes an interdisciplinary approach to understanding the writings of one of Mexico's early chroniclers, Fernando de Alva Ixtlilxochitl, a bilingual seventeenth-century historian from Central Mexico. His writing, especially his portrayal of the great pre-Hispanic poet-king Nezahualcoyotl, influenced other canonical histories of Mexico and is still influential today. Many scholars who discuss Alva Ixtlilxochitl's writing focus on his personal and literary investment in the European classical tradition, but Kauffmann argues that his work needs to be read through the lens of Nahua cultural concepts and literary-historical precepts. She suggests that he is best understood in light of his ancestral ties to Tetzaco's rulers and as a historian who worked within both Native and European traditions. By paying attention to his representation of rulership, Kauffmann demonstrates how the literary and symbolic worlds of the Nahua exist in allegorical but still discernible subtexts within the larger Spanish context of his writing.

Rulership in 1st to 14th century Scandinavia Dagfinn Skre.2019-12-16 This book seeks to revitalise the somewhat stagnant scholarly debate on Germanic rulership in the first millennium AD. A series of comprehensive chapters combines literary evidence on Scandinavia's polities, kings, and other rulers with archaeological, documentary, toponymical, and linguistic evidence. The picture that emerges is one of surprisingly stable rulership institutions, sites, and myths, while control of them was contested between individuals, dynasties, and polities. While in the early centuries, Scandinavia was integrated in Germanic Europe, profound societal and cultural changes in 6th-century Scandinavia and the Christianisation of Continental and English kingdoms set northern kingship on a different path. The pagan heroic warrior ethos, essential to kingship, was developed and refined; only to recur overseas embodied in 9th-10th-century Vikings. Three chapters on a hitherto unknown masonry royal manor at Avaldsnes in western Norway, excavated 2017, concludes this volume with discussions of the late-medieval peak of Norwegian kingship and its eventual downfall in the late 14th century. This book's discussions and results are relevant to all scholars and students of 1st-millennium Germanic kingship, polities, and societies.
