International Succession Louis Garb, John Wood. 2010 Increasing numbers of people have connections with one country, but live and work in another, frequently owning property or investments in several countries. As such, international aspects arise in an increasing number of estates. Different countries may have separate arrangements for ownership, taxation, and succession. *International Succession* equips practitioners with the information necessary to navigate problems involving these different systems. Although lawyers would often advise only on the law of the jurisdictions in which they are based, seeking advice from lawyers in other countries, this book will save the practitioner the time - and expense - of ascertaining the basics concerning the inheritance systems in different countries, offering clear and easy to use information on the laws of inheritance and succession. Each country's report is based on responses to a comprehensive questionnaire that considers the practical issues arising from the jurisdiction's individual laws, making it easy for users to make specific comparisons between

the laws of one country and another. The book covers over fifty countries with entries written by experts from each country, making it an invaluable resource for the busy practitioner. This title is an improved and expanded version of *International Succession*, edited by Louis Garb and published by Kluwer Law International, 2004. This edition, published in hardback form, will also be supplemented annually in between editions to update the individual country entries.

Finally, the Handbook lays the groundwork for future research on fiduciary law and theory by highlighting cross-cutting themes, identifying persistent theoretical and practical challenges, and exploring how the field could be enriched through empirical analysis and interdisciplinary insights from economics, philosophy, and psychology.
