**What's Changing: Population Size Or Land-use Patterns?** Val Attenbrow.2007-02-01 The Upper Mangrove Creek catchment was an ideal locality in which to undertake field investigation into Aboriginal use of the coastal hinterland. The area, 101 square kilometres in size, is rich in sites that provided significant archaeological evidence of Aboriginal use of the coastal hinterland. The catchment became the focus of major archaeological salvage work in the late 1970s, prior to the construction of the Mangrove Creek Dam. Further research, undertaken by Val Attenbrow, on the total catchment expanded upon the results of earlier work. This monograph describes the later research project and summarises the salvage program results. This evidence is used by the author to explore current research issues relating to the interpretation of the mid- to late-Holocene archaeological record in Australia, particularly quantitative changes relating to population numbers and aspects of human behaviour, such as risk management, subsistence, mobility and land-use patterns.

the subject Business economics - Marketing, Corporate Communication, CRM, Market Research, Social Media, grade: 4.5, Kenyatta University, language: English, abstract: The purpose of this report is to examine the service concept of McDonald's, the world's leading chain of hamburger fast food restaurant and the prominent global food service retailer. The report also discusses how the operations of the organisation contribute to the functioning of the service concept. After presenting the assessment of how service concept is implemented through operations, the recommendations are discussed at the end of the report. Besides, appendices have been included to illustrate a series of tables and figures that support the report. The service concept is the insight and expectations of the service itself in the thoughts of the employers, investors, stakeholders, employer and customers. The concept involves an open transformation process of transforming inputs to anticipated outputs through the suitable application resources. More precisely, services are cost-effective activities that lead to the place, time, psychological or form utility. A meal in a fast food restaurant not only saves time but also it offers a psychological help. Developing the service concept can be considered as the ultimate step for a corporation in generating an all-inclusive service model.

**Team-Based Shared Formulation for Psychosis** Alan Meaden, Andrew Fox, Henna Hussain. 2022-07-29 Adding to the growing literature on shared formulation, the authors provide over two decades of practice-based evidence for the use of a Shared Assessment, Formulation and Education (SAFE) approach to working with those with complex mental health and behavioural needs. The SAFE approach offers an evidence-informed framework for multidisciplinary teams to address the needs of those with complex and enduring psychosis for whom current evidence-based interventions are ineffective in promoting their recovery. Drawing from richly detailed case studies, the authors provide a range of useful tools and formulation templates for use by clinicians and professionals alike. They put forward a shared language to promote a multidisciplinary understanding of service users' complex needs and a means of organising treatment into a focused, realistic and targeted approach aimed at reducing barriers to recovery and allowing individuals to lead personally meaningful lives. The book focuses predominantly on the treatment of those with psychosis who require bespoke, multi-theory informed care. This work will be an invaluable resource to professionals working with this client group, including clinical and counselling psychologists, psychiatrists and other allied health professionals.
