The People Vs. Democracy Yascha Mounk.2018-03-05

Uiteenzetting over de opkomst van het populisme en het gevaar daarvan voor de democratie.

The Politics of Education Marjorie Lamberti.2004 Lamberti (history, Middlebury College) examines the culture wars that took place in 1920s and 1930s Germany over issues in education. She describes how innovative educators attempted to reform the stratified educational system to foster democracy and social justice. She also shows the relationship between the traditionalists' opposition to school reform and the attraction of certain sections of the teaching profession to the Nazi movement. Democracy and Crisis Wolfgang Merkel,Sascha

Kneip.2018-03-08 In light of the public and scholarly debates on the challenges and problems of established democracies, such as a lack of participation, declining confidence in political elites, and the deteriorating capabilities of democratic institutions, this volume discusses the question whether democracy as such is in crisis. On the basis of the shared concept of embedded democracy, it develops a range of conceptual approaches to empirically analyzing the challenges of democracy and their potential transformation into crisis phenomena. The book is divided into three parts, the first of which highlights various aspects of political participation, such as political inequality in voting. In turn, Part II focuses on problems of political representation, while Part III assesses whether processes such as globalization, deregulation, and the withdrawal of the state from important policy areas have limited the political control and

legitimacy of democratically elected governments.

New Directions in Assessing Historical Thinking Kadriye

Ercikan, Peter Seixas.2015-02-20 New technologies have radically transformed our relationship to information in general and to little bits of information in particular. The assessment of history learning, which for a century has valued those little bits as the centerpiece of its practice, now faces not only an unprecedented glut but a disconnect with what is valued in history education.

More complex processes—historical thinking, historical consciousness or historical sense making—demand more complex assessments. At the same time, advances in scholarship on assessment open up new possibilities. For this volume, Kadriye Ercikan and Peter Seixas have assembled an international array of experts who have, collectively, moved the fields of history education and assessment forward. Their various approaches negotiate the sometimes-conflicting demands of theoretical sophistication, empirically demonstrated validity and practical efficiency. Key issues include articulating the cognitive goals of history education, the relationship between content and procedural knowledge, the impact of students' language literacy on history assessments, and methods of validation in both large scale and classroom assessments. *New Directions in Assessing Historical Thinking* is a critical, research-oriented resource that will advance the conceptualization, design and validation of the next generation of history assessments.

The International status of education about the Holocaust Carrier, Peter, Fuchs, Eckhardt, Messinger, Torben, Georg Eckert Institute for International Textbook Research (Germany).2015-01-14 How do schools worldwide treat the Holocaust as a subject? In which

countries does the Holocaust form part of classroom teaching? Are representations of the Holocaust always accurate, balanced and unprejudiced in curricula and textbooks? This study, carried out by UNESCO and the Georg Eckert Institute for International Textbook Research, compares for the first time representations of the Holocaust in school textbooks and national curricula. Drawing on data which includes countries in which there exists no or little information about representations of the Holocaust, the study shows where the Holocaust is established in official guidelines, and contains a close textbook study, focusing on the comprehensiveness and accuracy of representations and historical narratives. The book highlights evolving practices worldwide and thus provides education stakeholders with comprehensive documentation about current trends in curricula directives and textbook representations of the Holocaust. It further formulates recommendations that will help policy-makers provide the educational means by which pupils may develop Holocaust literacy.

The Concept of Education according to Wolfgang Klafki. From educational theory to critical-constructive didactics .2021-10-12
Seminar paper from the year 2015 in the subject Didactics -

Common Didactics, Educational Objectives, Methods, grade: 1,3, University of Trier, language: English, abstract: Within the framework of this term paper, it will be explained, according to Wolfgang Klafki, what education-theoretical didactics is and what forms of education exist. The question of the meaning of categorical education and the function of didactic analysis will also be explored. Before theories and models of didactics can be explained and contexts understood, a basic understanding of what didactics is in the first place and which factors play a role here must first be established. The question of the meaning of didactics is not easy to answer. The word has its origins in the Greek *didáskein*, which translates as to teach and to instruct or to learn and to be taught. Already here it becomes clear that two elementary processes are interrelated and complement each other, which has not changed until today. Thus didactics is the theory and practice of learning and teaching. The focus is on the interaction between teachers and learners. Didactics should therefore be a support for mutual interaction between teachers and learners. It is a science of action that is intended to provide teachers with a practice-oriented way of acting. During the 20th century, educationalists such as Erich Weniger, Paul Heimann and especially Wolfgang Klafki (born 1927), who is considered the father of didactics, tried to narrow down and define the term in order to finally develop educational theoretical foundations and didactic theories and models.

Digital Media Strategies of the Far Right in Europe and the United States

Patricia Anne Simpson, Helga Druhes. 2015-05-06

With the leverage of digital reproducibility, historical messages of hate are finding new recipients with breathtaking speed and scope. The rapid growth in popularity of right-wing extremist groups in response to transnational economic crises underscores the importance of examining in detail the language and political mobilization strategies of the New Right. In Europe, for example, populist right-wing activists organized around an anti-immigration agenda are becoming more vocal, providing pushback against the increase in migration flows from North Africa and Eastern Europe and countering support for integration with a categorical rejection of multiculturalism. In the United States, anti-immigration sentiment provides a rallying point for political and personal agendas that connect the rhetoric of borders with national, racial, and security issues. *Digital Media Strategies of the Far Right in Europe and the United States* is an effort to examine and understand these issues, informed by the conviction that an interdisciplinary and transnational approach can allow productive comparison of far-right propaganda strategies in Europe and the United States. With a special emphasis on performing ideology in the far-right music scene, on violent anti-immigrant stances, and on the far right's skillful creation and manipulation of virtual communities, the contributions foreground the cultural shibboleths that are exchanged among far-right supporters on the Internet, which serve to generate a sense of group belonging and the illusion of power far greater than the known numbers of neo-Nazis in any one country might suggest. Moreover, with attention to transatlantic right-wing movements and their use of particularly digital media, the essays in this volume put pressure on the

similarities among the various national agents, while accommodating differences in the virtual and sometimes violent identities created and nurtured online.

Trust and Violence Jan Philipp Reemtsma. 2012-04-22 A philosophical investigation into the connections between trust and violence The limiting of violence through state powers is one of the central projects of the modern age. Why then have recent centuries been so bloody? In *Trust and Violence*, acclaimed German intellectual and public figure Jan Philipp Reemtsma demonstrates that the aim of decreasing and deterring violence has gone hand in hand with the misleading idea that violence is abnormal and beyond comprehension. We would be far better off, Reemtsma argues, if we acknowledged the disturbing fact that violence is normal. At the same time, Reemtsma contends that violence cannot be fully understood without delving into the concept of trust. Not in violence, but in trust, rests the foundation of true power. Reemtsma makes his case with a wide-ranging history of ideas about violence, from ancient philosophy through Shakespeare and Schiller to Michel Foucault, and by considering specific cases of extreme violence from medieval torture to the Holocaust and beyond. In the midst of this gloomy account of human tendencies, Reemtsma shrewdly observes that even dictators have to sleep at night and cannot rely on violence alone to ensure their safety. These authoritarian leaders must trust others while, by means other than violence, they must convince others to trust them. The history of violence is therefore a history of the peculiar relationship between violence and trust, and a recognition of trust's crucial place in humanity. A broad and insightful book that touches on philosophy, sociology, and political theory, *Trust and Violence* sheds new, and at times disquieting, light on two integral aspects of our society.

Constitutional Democracy in Crisis? Mark A. Graber, Sanford Levinson, Mark Tushnet.2018-08-23 Is the world facing a serious threat to the protection of constitutional democracy? There is a genuine debate about the meaning of the various political events that have, for many scholars and observers, generated a feeling of deep foreboding about our collective futures all over the world. Do these events represent simply the normal ebb and flow of political possibilities, or do they instead portend a more permanent move away from constitutional democracy that had been thought triumphant after the demise of the Soviet Union in 1989? *Constitutional Democracy in Crisis?* addresses these questions head-on: Are the forces weakening constitutional democracy around the world general or nation-specific? Why have some major democracies seemingly not experienced these problems? How can we as scholars and citizens think clearly about the ideas of constitutional crisis or constitutional degeneration? What are the impacts of forces such as globalization, immigration, income inequality, populism, nationalism, religious sectarianism? Bringing together leading scholars to engage critically with the crises facing constitutional democracies in the 21st century, these essays diagnose the

causes of the present afflictions in regimes, regions, and across the globe, believing at this stage that diagnosis is of central importance - as Abraham Lincoln said in his House Divided speech, If we could first know where we are, and whither we are tending, we could then better judge what to do, and how to do it. *Topographies of Class* Sabine Hake.2008-08-04 In *Topographies of Class*, Sabine Hake explores why Weimar Berlin has had such a powerful hold on the urban imagination. Approaching Weimar architectural culture from the perspective of mass discourse and class analysis, Hake examines the way in which architectural projects; debates; and representations in literature, photography, and film played a key role in establishing the terms under which contemporaries made sense of the rise of white-collar society. Focusing on the so-called stabilization period, *Topographies of Class* maps out complex relationships between modern architecture and mass society, from Martin Wagner's planning initiatives and Erich Mendelsohn's functionalist buildings, to the most famous Berlin texts of the period, Alfred Döblin's city novel *Berlin Alexanderplatz* (1929) and Walter Ruttmann's city film *Berlin, Symphony of the Big City* (1927). Hake draws on critical, philosophical, literary, photographic, and filmic texts to reconstruct the urban imagination at a key point in the history of German modernity, making this the first study--in English or German--to take an interdisciplinary approach to the rich architectural culture of Weimar Berlin. Sabine Hake is Professor and Texas Chair of German Literature and Culture at the University of Texas at Austin. She is the author of numerous books, including *German National Cinema and Popular Cinema of the Third Reich*. Berlin Wall Hans-Hermann Hertle.2007 Over 200 previously unpublished photographs document the building and development of the many check points, barbed wire barriers, and alarmed fences which formed the concrete wall around Berlin. This book tells dramatic tales of spectacular escapes and terrible deaths, and explains the history making events surrounding the building and fall of the Wall. Contemporary photographs are contrasted with photographs from the eighties to offer surprising insights into how the former death strip has changed since 1990. Relics of the wall in the current cityscape are prominently illustrated, including remnants of the Wall itself, expanded metal lattice fences, observation towers, barbed wire and concrete posts. Also included are statistics showing the numbers of refugees and victims of the Wall, a guide to the museums and memorials and a summary of the literature and cinema treatment of the Wall, along with a brief chronicle of its history.
