Certain Trumpets Garry Wills.2013-05-28 This “beautifully written and reasoned” (Booklist) narrative by Pulitzer Prize-winning author Garry Wills examines what constitutes meaningful leadership, and why it is so essential to society. What makes a leader? How do we identify effective leadership, and how should—and shouldn’t—that power be used? In *Certain Trumpets*, Garry Wills presents portraits of eminent leaders including FDR to Ross Perot, King David, Martha Graham, and many others, offering an illuminating lens for studying society and ourselves. Dividing these portraits into sixteen leadership categories ranging from military to charismatic, intellectual, rhetorical, and elected, Wills highlights what makes each of his subjects unique, crafting along the way a distinct and incisive definition of leadership as a reciprocal engagement between two contrasting wills that serves to mobilize us toward a common good, and explaining why leadership is so often a contentious and emotionally charged subject. “A stunningly literate and thoughtful examination of what makes a leader...[and] a welcome antidote to some of the more egregious ‘management style’ drivel,” (Kirkus Reviews), *Certain Trumpets* is an inspiring and edifying tour through the history of an indispensable social art.

The Leader in Me Stephen R. Covey.2012-12-11 Children in today's world are inundated with information about who to be, what to do and how to live. But what if there was a way to teach children how to manage priorities, focus on goals and be a positive influence on the world around them? *The Leader in Me* is that programme. It's based on a hugely successful initiative carried out at the A.B. Combs Elementary School in North Carolina. To hear the parents of A. B Combs talk about the school is to be amazed. In 1999, the school debuted a programme that taught *The 7 Habits of Highly Effective People* to a pilot group of students. The parents reported an incredible change in their children, who blossomed under the programme. By the end of the following year the average end-of-grade scores had leapt from 84 to 94. This book will launch the message onto a much larger platform. Stephen R. Covey takes the 7 Habits, that have already changed the lives of millions of people, and shows how children can use them as they develop. Those habits -- be proactive, begin with the end in mind, put first things first, think win-win, seek to understand and then to be understood, synergize, and sharpen the saw -- are critical skills to learn at a young age and bring incredible results, proving that it's never too early to teach someone how to live well.

Educating with Love and Without Compromise Ed. D. Gallon Iii.2010-08 Educating with Love and Without Compromise is the stirring, heart-wrenching tale of educating children in one of the most impoverished and crime-ridden communities in the nation. It is one educator's story of returning home to provide hope, education, and leadership to a school, a community, and children who far too many people and even the system itself had given up on. Faced with challenges ranging from children forgotten by society and neglected at home, to teachers and bureaucrats who question the investment of time and resources in certain schools and communities, Educating with Love and Without Compromise is the story of one man's struggle to prove that children can succeed in struggling schools and rise from troubled communities. This easy-to-read, enjoyable tale is sure to both inspire and empower everyone that cares about and loves children. Among immense poverty, incompetent and uncaring teachers, an apathetic system, and an ever expanding, deadly drug turf war, Darryl Gilliam has come back home to lead the education of over 1,000 elementary school students. Faced with these challenges, he is armed with two core beliefs about the education of children. First, they must always have expressions and examples of love in and around their lives. Second, that under no circumstances should educators and adults ever compromise high expectations when it comes to the learning and lives of their students. Armed with these two core beliefs, boundless energy, and a focused plan for educational change, Gilliam works to inspire the same sense of passion and commitment around those around him as he embarks on a personal and professional journey that will take him beyond the walls of the school. Educating with Love and Without Compromise is a heart-wrenching, uplifting tale that will bring its readers into the real, often unglamorous work of educating children who often sit on the margins of classrooms, schools, and society. Dr. Steve Gallon III is a native of Miami, Florida. A graduate of Florida A & M University, he holds a degree in English Education, as well as a Masters Degree in Educational Leadership and a Doctoral Degree in Educational Administration and Supervision from Florida International University. Dr. Gallon has risen through the administrative ranks as a public school educator serving as a teacher, assistant principal, elementary and senior high school principal, and central office administrator in Miami-Dade County Public Schools, the nation's 4th largest school district. He has also served as a Superintendent of Schools. At every level of his service as an educator, Dr. Gallon has improved student performance, accountability, and overall educational quality. In addition to his work in public education, he has also serves as an adjunct professor in the area of Educational Leadership at Florida International University and Florida Atlantic University.

Achieving Success for New and Aspiring Superintendents Mary Frances Callan, William Levinson. 2010-11-10 The authors of this book wrote it for those aspiring to be superintendents, those new to the position and those completing their second or third year and who are looking to the future. What makes their approach unique is the belief that talented people who aspire to be superintendents are far more likely to accomplish that goal and achieve success on the job if they understand the totality of the position. School districts are complex organizations. Providing effective leadership to these organizations requires mastery of a wide array of leadership and organizational skills. Aspiring superintendents with vision and motivation who understand the inherent challenges of the position have a great advantage over those who do not. The book's goal is to provide readers with this advantage. This is why the book covers the full cycle of the first superintendent position: preparation, application and transition, the challenges of the first few years, and the decision to stay or move to another position. Aspiring and new superintendents who read the book will learn about the full range of skills and knowledge needed to succeed. They will be better prepared to be effective superintendents.

A Charter School Principal Story Barbara J. Smith.2024-03-21 What happens when a Canadian principal, guided by the teachings of Fullan and Hargreaves, takes on the role of school leader in an inner-city charter school in the United States? This inside story of a principal in the DC charter school system, reveals much about the desire for educators and students to experience more than a life of multiple-choice testing that tends to be so commonplace in these schools. While such a case adds to the mound of research that supports the 'change takes time' findings, it nevertheless demonstrates the reality, on a day-to-day basis, of what's worth fighting for in schools. Student and teacher engagement and empowerment matter, and to get to such ends, a school must fiercely focus on targets well beyond test scores.

Preventing Reading Difficulties in Young Children National Research Council, Division of Behavioral and Social Sciences and Education, Board on Behavioral, Cognitive, and Sensory Sciences, Committee on the Prevention of Reading Difficulties in Young Children.1998-07-22 While most children learn to read fairly well, there remain many young Americans whose futures are imperiled because they do not read well enough to meet the demands of our competitive, technology-driven society. This book explores the problem within the context of social, historical, cultural, and biological factors. Recommendations address the identification of groups of children at risk, effective instruction for the preschool and early grades, effective approaches to dialects and bilingualism, the importance of these findings for the professional development of teachers, and gaps that remain in our understanding of how children learn to read. Implications for parents, teachers, schools,

communities, the media, and government at all levels are discussed. The book examines the epidemiology of reading problems and introduces the concepts used by experts in the field. In a clear and readable narrative, word identification, comprehension, and other processes in normal reading development are discussed. Against the background of normal progress, Preventing Reading Difficulties in Young Children examines factors that put children at risk of poor reading. It explores in detail how literacy can be fostered from birth through kindergarten and the primary grades, including evaluation of philosophies, systems, and materials commonly used to teach reading.

You Can Do Anything George Anders.2017-08-08 In a tech-dominated world, the most needed degrees are the most surprising: the liberal arts Did you take the right classes in college? Will your major help you get the right job offers? For more than a decade, the national spotlight has focused on science and engineering as the only reliable choice for finding a successful post-grad career. Our destinies have been reduced to a caricature: learn to write computer code or end up behind a counter, pouring coffee. Quietly, though, a different path to success has been taking shape. In YOU CAN DO ANYTHING, George Anders explains the remarkable power of a liberal arts education - and the ways it can open the door to thousands of cutting-edge jobs every week. The key insight: curiosity, creativity, and empathy aren't unruly traits that must be reined in. You can be yourself, as an English major, and thrive in sales. You can segue from anthropology into the booming new field of user research; from classics into management consulting, and from philosophy into high-stakes investing. At any stage of your career, you can bring a humanist's grace to our rapidly evolving high-tech future. And if you know how to attack the job market, your opportunities will be vast. In this book, you will learn why resume-writing is fading in importance and why telling your story is taking its place. You will learn how to create jobs that don't exist yet, and to translate your campus achievements into a new style of expression that will make employers' eyes light up. You will discover why people who start in eccentric first jobs - and then make their own luck - so often race ahead of peers whose post-college hunt focuses only on security and starting pay. You will be ready for anything.

On the High Wire George Theoharis, Sharon Dotger.2015-02-01 The purpose of the work/life balance series is to highlight particular challenges that higher education faculty face as they participate in the demands of the academy and try to prevent those demands from invading their personal lives. On The High Wire looks at a specific subset of university faculty, education faculty with school-aged children, and the specific professional/personal balance these faculty need to find. The title On the High Wire suggests the precarious nature of the “walk” for education faculty who are parents of school-aged children. We know that our identities are central to how we experience the world and how the world reacts to us. This reality is clearly visible in this book. These multiple identities and roles come into conflict at multiple points and in different ways. This book explores these identities and roles through autoethnographic accounts written by varied education faculty in order to make these tensions visible for the field to address.
