**Faculty Mentoring** Susan L. Phillips, Susan T. Dennison. 2023-07-03 Faculty mentoring programs greatly benefit the institutions that have instituted them, and are effective in attracting and retaining good faculty. Prospective faculty members commonly ask about mentoring at on-campus interviews, and indicate that it is a consideration when choosing a position. Mentoring programs also increase the retention rate of junior faculty, greatly reducing recruitment costs, and particularly help integrate women, minority and international faculty members into the institution, while providing all new hires with an orientation to the culture, mission and identity of the college or university. The book provides step-by-step guidelines for setting up, planning, and facilitating mentoring programs for new faculty members, whether one-on-one, or using a successful group model developed and refined over twenty-five years by the authors. While it offers detailed guidance on instituting such programs at the departmental level, it also makes the case for establishing school or institutional level programs, and delineates the considerable benefits and economies of scale these can achieve. The authors provide guidance for mentors and mentees on developing group mentoring and individual mentor / protégé relationships - the corresponding chapters being available online for separate purchase; as well as detailed outlines and advice to department chairs, administrators and facilitators on how to establish and conduct institution-wide group mentoring programs, and apply or modify the material to meet their specific needs. For training and faculty development purposes, we also offer two chapters as individual e-booklets. Each respectively provides a succinct summary of the roles and expectations of the roles of Mentor and Mentee. Faculty Mentoring / Mentor Guide Faculty Mentoring / Mentee Guide The booklets are affordably priced, and intended for individual purchase by mentors and mentees, and are only available through our Web site.

*Ecocritical Shakespeare* Dr Dan Brayton, Dr Lynne Bruckner. 2013-05-28 Can reading, writing about, and teaching Shakespeare contribute to the health of the planet? To what degree are Shakespeare's plays anthropocentric or ecocentric? What is the connection between the literary and the real when it comes to ecological conduct? This collection, engages with these pressing questions surrounding ecocritical Shakespeare, in order to provide a better understanding of where and how ecocritical readings should be situated. The volume combines multiple critical perspectives, juxtaposing historicism and presentism, as well as considering ecofeminism and pedagogy; and addresses such topics as early modern flora and fauna, and the neglected areas of early modern marine ecology and oceanography. Concluding with an assessment of the challenges and necessities of teaching Shakespeare ecocritically, *Ecocritical Shakespeare* not only broadens the implications of ecocriticism in early modern studies, but represents an important contribution to this growing field.

**Queering Normativity and South Asian Public Culture** J. Daniel Luther.2023-11-01 This book develops a queer methodology to analyse a queer archive for the impact of normativity on subjecthood and the ways in which it shapes and curtails gender and sexuality. Chapters demonstrate how normativity functions to mask its own operation, is internalised by subjects, and is continually reproduced through discourse and in material ways. In seeking to make visible the functioning of normativity, the book performs a task of queering normativity by querying that which appears as natural in South Asian public culture. The book engages with both the consolidation and the unsettling of normativity through artefacts of South Asian public culture including canonical figures such as Rabindranath Tagore, literary and cinematic texts, Bollywood films, advertisements, social media posts, and ubiquitous ephemera in South Asia and beyond. Through these texts, the author unpacks the construct of canon, the nation, woman as a post-colonial subject, the home and the child, marriage, same-sex sexuality and identity. This book will be of interest to scholars and students studying and researching Queer Studies, Gender and Sexuality Studies, South Asian Studies, Cultural Studies, Literary Studies, Film Studies, and Media Studies.

The Future of Higher Education in the Middle East and Africa Habib M. Fardoun, Kevin J. Downing, Mandy Mok.2018-03-26 This book addresses some of the challenges posed by the globalization of higher education. It examines the emergence and resulting challenges of English as Lingua Franca (ELF) and of the decision to use English as the Medium of Instruction (EMI) as part of a strategic policy of internationalization. It looks at survival challenges caused by globalization and expansion, the diversity challenge, the concept of marginality and how marginality can lead to creativity, teaching and encouraging entrepreneurialism, the tools needed for internationalizing higher education in developing countries, innovative approaches, the intelligent use of technology, and finally, the value of non-constraint engagement in driving teaching and course quality improvements. The expansion of higher education and the increasingly international body of students and staff continue to inspire and drive the development of global higher education systems. Whilst these systems began locally, many are now engaging with the challenges of retaining their local flavour whilst embracing the march of globalisation. The challenge is to find local solutions that also meet the requirements of the rapid development of what might be termed the 'massification' of international higher education. This book reflects these contemporary challenges through its variety of topics taken from countries as diverse as Hong Kong, Panama, South Africa, USA and Saudi Arabia. The topics are as diverse as some of the local solutions but each chapter represents a response to a rapidly changing global landscape.

**Concepts of Biology** Samantha Fowler,Rebecca Roush,James Wise.2018-01-07 Concepts of Biology is designed for the single-semester introduction to biology course for non-science majors, which for many students is their only college-level science course. As such, this course represents an important opportunity for students to develop the necessary knowledge, tools, and skills to make informed decisions as they continue with their lives. Rather than being mired down with facts and vocabulary, the typical non-science major student needs information presented in a way that is easy to read and understand. Even more importantly, the content should be meaningful. Students do much better when they understand why biology is relevant to their everyday lives. For these reasons, Concepts of Biology is grounded on an evolutionary basis and includes exciting features that highlight careers in the biological sciences and everyday applications of the concepts at hand.We also strive to show the interconnectedness of topics within this extremely broad discipline. In order to meet the needs of today's instructors and students, we maintain the overall organization and coverage found in most syllabi for this course. A strength of Concepts of Biology is that instructors can customize the book, adapting it to the approach that works best in their classroom. Concepts of Biology also includes an innovative art program that incorporates critical thinking and clicker questions to help students understand--and apply--key concepts.
