the promise of an equitable education when students of all backgrounds know that who they are and what they think matters. Start the journey to become an identity safe school and see the results for yourself! “Belonging and Inclusion in Identity Safe Schools: A Guide for Educational Leaders is a timely and important book. For several years, the nation’s schools have been asked to focus their energies on raising student achievement. However, too often educators have ignored the need to honor, support and affirm the identities of the students they serve. For educators who serve children of color, particularly Black, Native American and Latinx children who are often subject to overt and covert forms of forced assimilation, this book will be an invaluable resource on how to create learning opportunities that make it possible for such children to thrive.” ~Pedro Noguera, Dean of Rossier School of Education, University of Southern California “Bravo to authors Cohn-Vargas, Gogolewski, Creer Kahn, and Epstein for their ground-breaking book on Identify Safe Schools for Administrators and Teacher and Staff Leaders! They provide much-needed evidence for educators to elevate and even inspire the equity, empowerment, and academic growth needed to wholly support all children to flourish in school and their lives.” ~Debbie Zacarian, Director, Zacarian and Associates

Positive Psychology in the Elementary School Classroom Patty O'Grady.2013-03-11 Use the neuroscience of emotional learning to transform your teaching. How can the latest breakthroughs in the neuroscience of emotional learning transform the classroom? How can teachers use the principles and practices of positive psychology to ensure optimal 21st-century learning experiences for all children? Patty O'Grady answers those questions. Positive Psychology in the Elementary School Classroom presents the basics of positive psychology to educators and provides interactive

resources to enrich teachers' proficiency when using positive psychology in the classroom. O'Grady underlines the importance of teaching the whole child: encouraging social awareness and positive relationships, fostering self-motivation, and emphasizing social and emotional learning. Through the use of positive psychology in the classroom, children can learn to be more emotionally aware of their own and others' feelings, use their strengths to engage academically and socially, pursue meaningful lives, and accomplish their personal goals. The book begins with Martin Seligman's positive psychology principles, and continues into an overview of affective learning, including its philosophical and psychological roots, from finding the "golden mean" of emotional regulation to finding a child's potencies and "golden self." O'Grady connects the core concepts of educational neuroscience to the principles of positive psychology, explaining how feelings permeate the brain, affecting children's thoughts and actions; how insular neurons make us feel empathy and help us learn by observation; and how the frontal cortex is the hall monitor of the brain. The book is full of practical examples and interactive resources that invite every educator to create a positive psychology classroom, where children can flourish and reach their full potential.

Teaching STEM and Common Core with Mentor Texts Anastasia Suen, Shirley L.

Duke.2013-12-02 Librarians can use this book to become leaders in their schools, collaborating with teachers to keep them abreast of resources that will facilitate the inclusion of STEM in the

The volume offers 20 mentor texts, plus in-depth, collaborative lesson plans linked to the Common Core Standards for K-5 librarians. There are additional lessons for classroom teachers, as well as activities that can easily be done in the library or classroom. Each lesson includes mentor text information, an overview of the lesson, step-by-step lesson plans, assessment options, and extension activities. By implementing these lessons in the library, librarians will be able to cover multiple Common Core State Standards and science standards, and at the same time establish the library as a resource for teaching STEM subjects.

The United States and Torture Marjorie Cohn. 2012-04 Torture has been a topic of national discussion ever since it was revealed that “enhanced interrogation techniques” had been authorized as part of the war on terror. The United States and Torture provides us with a larger lens through which to view America's policy of torture, one that dissects America's long relationship with interrogation and torture, which roots back to the 1950s and has been applied, mostly in secret, to “enemies,” ever since. The United States and Torture opens with a compelling preface by Sister Dianna Ortiz, who describes the unimaginable treatment she endured in Guatemala in 1987 at the hands of the the Guatemalan government, which was supported by the United States. Following Ortiz's preface, an interdisciplinary panel of experts offers one of the most comprehensive examinations of torture to date, beginning with the Cold War era and ending with today's debate over accountability for torture.

Global Black Narratives for the Classroom: Africa, the Americas and the Caribbean BLAM

UK.2023-11-30 Rather than reserving the teaching of Black history to Black history month, Black narratives deserve to be seen and integrated into every aspect of the school curriculum. A unique yet practical resource, *Global Black Narratives for the Classroom* addresses this issue by providing primary teachers with a global outline of Black history, culture and life within the framework of the UK's National Curriculum. Each topic explored in this essential book provides teachers and teaching assistants with historical, geographic and cultural context to build confidence when planning and teaching. Full lesson plans and printable worksheets are incorporated into each topic, alongside tips to build future lessons in line with the themes explored. Volume II of this book explores the following parts: Part 1 guides teachers through planning and delivering lessons focused on Africa. Pupils will benefit from developing a diverse and accurate understanding of the changing nature of Africa throughout history, linking the continent's social history with its geographical features. Part 2 'The Caribbean', builds upon the lesson plans of Part 1 to further highlight the interconnectedness of diaspora cultures in influencing the musical, visual and religious practices of the Caribbean and

Central America. Part 3 begins by addressing the incorrect assumption that the history of Black people in the Americas begins and ends with plantation slavery. Instead, this section proposes a range of in-depth lesson plans on the diverse histories, cultures and experiences of Black people within the United States. Created by BLAM UK, this highly informative yet practical resource is an essential read for any teacher, teaching assistant or senior leader who wishes to diversify their curriculum and address issues of Black representation within their school.
