The Plan of Chicago Carl Smith.2009-08-01 Arguably the most influential document in the history of urban planning, Daniel Burnham's 1909 Plan of Chicago, coauthored by Edward Bennett and produced in collaboration with the Commercial Club of Chicago, proposed many of the city's most distinctive features, including its lakefront parks and roadways, the Magnificent Mile, and Navy Pier. Carl Smith's fascinating history reveals the Plan's central role in shaping the ways people envision the cityscape and urban life itself. Smith's concise and accessible narrative begins with a survey of

Chicago's stunning rise from a tiny frontier settlement to the nation's second-largest city. He then offers an illuminating exploration of the Plan's creation and reveals how it embodies the renowned architect's belief that cities can and must be remade for the better. The Plan defined the City Beautiful movement and was the first comprehensive attempt to reimagine a major American city. Smith points out the ways the Plan continues to influence debates, even a century after its publication, about how to create a vibrant and habitable urban environment. Richly illustrated and incisively written, his insightful book will be indispensable to our understanding of Chicago, Daniel Burnham, and the emergence of the modern city.

Pocket Guide to Chicago Architecture (Norton Pocket Guides) Judith Paine McBrien. 2011-12-19 “A handy guidebook that profiles a building per page, with a drawing and vital statistics on most of Chicago’s major historic and modern buildings.”—Chicago Tribune Updated and expanded to chart the changing urban landscape of Chicago--as well as to incorporate a section on Chicago’s campus architecture, including works by Rem Koolhaas at the Illinois Institute of Technology and Frank Lloyd Wright at the University of Chicago--the second edition of this popular handbook is a perfect companion for walking tours and an excellent source of background information for exploring the internationally acclaimed architecture of Chicago. Over 100 highlights of downtown Chicago are covered, from Michigan Avenue to the riverfront to the Loop, with accompanying maps, a glossary of architectural terms, and an index of architects and buildings.

The Architects and the City Robert Brueggemann. 1997-08-18 This book connects architectural history with urban history by looking at the work of a major architectural firm, Holabird & Roche. No firm in any large American city had a greater impact. With projects that ranged from tombstones to skyscrapers, boiler rooms to entire industrial complexes, Holabird & Roche left an indelible stamp on the city of Chicago and, indeed, far beyond. In this volume, the first of two on Holabird & Roche and its successor, Holabird & Root, Robert Brueggemann traces the firm's history from its founding in 1880 to the end of the First World War.

Chicago Architecture and Design (3rd edition) Jay Pridmore, George A. Larson. 2018-09-18 The birthplace of the skyscraper, Chicago is famous for an architectural tradition that has influenced building around the globe. It is the cradle of modern architecture. It gave rise to the urban office

building and to the flowing, open floor plans of today's homes. Chicago Architecture and Design chronicles the city's architecture from the 19th through the early 21st century: from the structural simplicity of Chicago School commercial building to the low-slung Prairie School house, from the streamlined Art Deco skyscraper to the minimalist Miesian tower of glass and steel, and all the way through to the strikingly original, diverse designs of the present day's second modern period. It examines the evolution of modern architecture in the context of broader historical, social, technological, and artistic currents and explores innovations that pushed buildings ever higher. This third edition adds 10 new buildings from the last decade, including Renzo Piano's Modern Wing of the Art Institute, John Ronan's Poetry Foundation, and Helmut Jahn's Mansueto Library at the University of Chicago.

Chicago Architecture The Chicago Architecture Foundation, Edward Keegan. 2008-05-27 Universally recognized as an architectural center, Chicago contains some of the world's finest buildings by the most renowned architects of the nineteenth and twentieth centuries. Frank Lloyd Wright, Louis Sullivan, Mies van der Rohe, and many more left their stamp on the city's skyline and, as a result, influenced the practice of architecture across the globe. This book, published in association with the Chicago Architecture Foundation, features an in-depth analysis of forty-two seminal works of Chicago architecture. This accessible and engaging volume is the latest addition to the successful Universe Architecture Series. Both a guide for those visiting the city and a valuable reference for architecture enthusiasts, Chicago Architecture includes residential icons such as Mies van der Rohe's 860-880 Lake Shore Drive, skyscraper prototypes such as Sullivan's Schlesinger and Mayer Store (Carson Pirie Scott & Co.), and engineering masterpieces such as Skidmore, Owings & Merrill's Sears Tower.

Fit Robert Geddes. 2013 Why architecture matters—and how to make it matter more Fit is a book about architecture and society that seeks to fundamentally change how architects and the public think about the task of design. Distinguished architect and urbanist Robert Geddes argues that buildings, landscapes, and cities should be designed to fit: fit the purpose, fit the place, fit future possibilities. Fit replaces old paradigms, such as form follows function, and less is more, by recognizing that the relationship between architecture and society is a true dialogue—dynamic, complex, and, if carried out with knowledge and skill, richly rewarding. With a tip of the hat to John Dewey, Fit explores architecture as we experience it. Geddes starts with questions: Why do we design where we live and work? Why do we not just live in nature, or in chaos? Why does society care about architecture? Why does it really matter? Fit answers these questions through a fresh examination of the basic purposes and elements of architecture—beginning in nature, combining function and expression, and leaving a legacy of form. Lively, charming, and gently persuasive, the book shows brilliant examples of fit: from Thomas Jefferson's University of Virginia and Louis Kahn's Exeter Library to contemporary triumphs such as the Apple Store on New York's Fifth Avenue, Chicago's Millennium Park, and Seattle's Pike Place. Fit is a book for everyone, because we all live in constructions—buildings, landscapes, and, increasingly, cities. It provokes architects and planners, humanists and scientists, civic leaders and citizens to reconsider what is at stake in architecture—and why it delights us.

The Architecture of Chicago's Loop Frances H. Steiner. 1998 An ideal guide for architects, builders,

and all those who are passionate about architecture, this book takes the reader through the architecture of buildings in the heart of Chicago while providing a lesson in art history. Most of the inventions of modern architecture were born and tested in Chicago, from the balloon frame to the earliest skyscrapers providing a foundation for the newest generation of buildings that seemed to touch the sky. While many architectural books focus on exterior beauty, this book examines each building's unique inner structure. Maps and photos guide the reader through this outdoor architectural museum.

The Chicago School of Architecture Rolf Achilles. 2013-06-10 The birth of the skyscraper in Chicago in the mid-1880s introduced a new direction for city architecture: upwards. But how-and why- was it that Chicago set the standard for high-rise buildings, not only across the USA but all over the world? Rolf Achilles here introduces the style of the First Chicago School from 1880 to 1910, explaining the innovative use of iron frames for strength, height and openness, and the ubiquity of gridded window arrangements. With reference to such famous architects as William Le Baron Jenny and Frank Lloyd Wright, and colorful pictures of, among many others, the Reliance, Brooks and Marquette buildings,

this book is a fascinating exploration of the structures that helped to give Chicago its identity, and the world a new way of building.

Building Ideas Jay Pridmore.2013-07-22 Many books have been written about the University of Chicago over its 120-year history, but most of them focus on the intellectual environment, favoring its great thinkers and their many breakthroughs. Yet for the students and scholars who live and work here, the physical university—its stately buildings and beautiful grounds—forms an important part of its character. *Building Ideas: An Architectural Guide to the University of Chicago* explores the environment that has supported more than a century of exceptional thinkers. This photographic guide traces the evolution of campus architecture from the university's founding in 1890 to its plans for the twenty-first century. When William Rainey Harper, the university's first president, and the trustees decided to build a set of Gothic quadrangles, they created a visual link to European precursors and made a bold statement about the future of higher education in the United States. Since then the university has regularly commissioned forward-thinking architects to design buildings that expand—or explode—traditional ideals while redefining the contemporary campus. Full of panoramic photographs and exquisite details, *Building Ideas* features the work of architects such as Frank Lloyd Wright, Henry Ives Cobb, Holabird & Roche, Eero Saarinen, Ludwig Mies van der Rohe, Walter Netsch, Ricardo Legorreta, Rafael Viñoly, César Pelli, Helmut Jahn, and Tod Williams Billie Tsien Architects. The guide also includes guest commentaries by prominent architects and other notable public figures. It is the perfect collection for Chicago alumni and students, Hyde Park residents and visitors, and anyone inspired by the institutional ideas and aspirations of architecture.

Burnham of Chicago Thomas S. Hines.2009 Daniel Burnham was the man who is largely responsible for the appearance of Chicago today, particularly the lake front parks. With his partner, John W. Root, he designed and built the first skyscrapers and the World's Columbian Exposition.--Publisher description.

The Chicago School of Architecture Carl W. Condit.1964 This thoroughly illustrated classic study traces the history of the world-famous Chicago school of architecture from its beginnings with the functional innovations of William Le Baron Jenney and others to their imaginative development by Louis Sullivan and Frank Lloyd Wright. The Chicago School of Architecture places the Chicago school in its historical setting, showing it at once to be the culmination of an iron and concrete construction and the chief pioneer in the evolution of modern architecture. It also assesses the achievements of the school in terms of the economic, social, and cultural growth of Chicago at the turn of the century, and it shows the ultimate meaning of the Chicago work for contemporary architecture. Sears Tower Jay Pridmore.2002 The Nation's Largest Retailer wanted the largest headquarters in the nation, and they got it -- in spades. Designed by Skidmore, Owings & Merrill (SOM), the 110-story, anodized aluminum-clad Sears Tower occupies three acres in the West Loop. The bundled-tube construction allowed for more windows and more corner offices per square foot. The total area within the Tower is 4.4 million square feet; the Sky Deck on the 103rd floor offers tremendous views and welcomes more than 1 million visitors yearly. When SOM realized that their design was only ten stories short of what was supposed to be the record-breaking height of the World Trade Center then under construction (1,368 feet), they broke the record, coming in at 1,454 feet. The move of Sears and Roebuck employees into the Tower was the biggest corporate move in American history. In the late 1980s Sears and Roebuck left the building, but it continues to thrive, a timeless monument to American ingenuity.

The Reliance Building Jay Pridmore.2003 This petite volume provides the history of one of Chicago's early skyscrapers, from its inception, initial success, later disrepair, and meticulous restoration into a hotel in the 1990s. Many historic photos are included. Annotation (c) Book News, Inc., Portland, OR (booknews.com).

Becoming an Architect Lee W. Waldrep.2006-04-10 Publisher description

University of Chicago Jay Pridmore.2006-02-02 The newest title in the Princeton Architectural Press Campus Guide series takes readers on a tour of the University of Chicago, an institution that since its founding in 1890 has exerted a profound impact on American higher education. This elegantly written guide shows the campus as a wonderfully eccentric and vastly underappreciated element of Chicago's revered built environment. Designed in the English Gothic style of its time, the

original campus, planned by Chicago architect Henry Ives Cobb, had a commonality of vision that made it equal in quality to the finest in America. As the traditional reliance on the Gothic gave way to modernist styles, the campus was expanded with buildings by such notable architects as Eero Saarinen, Mies van der Rohe, Frank Lloyd Wright, and Walter Netsch. The university's most recent additions include Cesar Pelli's 2003 Gerald Ratner Athletics Center and Rafael Violy's Graduate School of Business complex. Beautifully photographed in full color, the guide presents an architectural walk of this campus distinguished by landmark buildings.

The Chicago Board of Trade Building Edward Keegan.2005 The Chicago Board of Trade was established in 1848 to create a centralized trading market for grain and other agricultural products. It has been located at the center of the city's financial district since 1885, when it moved to a building designed by architect W. W. Boyington. By 1925, neighboring buildings were more impressive and provided more interior space; in 1927 the firm of Holabird & Roche was selected as the architect of a new building on the same site. Finished three years later by the successor firm of Holabird & Root, the limestone-clad Chicago Board of Trade Building came in at 609 feet tall--forty-five stories--in a dramatic Art Deco style that incorporated a series of setbacks culminating in a pyramidal roof topped with an aluminum statue of Ceres, the Roman goddess of agriculture. For twenty-five years the Chicago Board of Trade Building reigned as Chicago's tallest structure. Now seventy-five years old, it has undergone remodeling and restoration. In this most recent Building Book from the Chicago Architecture Foundation--joining The Reliance Building, The Auditorium Building, The Rookery, Marshall Field's, Sears Tower, and The Merchandise Mart--historical and modern photographs and informative text capture the exuberant spirit and present the fascinating history of this treasured landmark.

The Auditorium Building Jay Pridmore.2003 Commissioned by Ferdinand Peck and produced by architects Louis Sullivan and Dankmar Adler--soon to be leaders of the Chicago School--in 1889, the Auditorium Building was a wondrous complex, housing a hotel, offices, stores, and a theater. Adler's engineering skills overcame the problem of a foundation that had to support an unevenly distributed weight; Sullivan designed the stunning theater, which was spanned by four elliptical arches studded with 3,500 incandescent electric lights and decorated with gold leaf. Adler created a hydraulic stage--with twenty-six lifts--and one of the first air-conditioning systems in a public building. Among the many design features in the interior of the Auditorium were murals, onyx, marble, open loggias,

stained glass, filigreed vents, wainscoting, and bronze-plated posts. Scholars considered the Auditorium Building the most important single structure in Chicago. The Auditorium thrived until its closing in 1940. In 1946 Roosevelt University purchased the building, and the Auditorium Theatre Council restored the theater to its former glory. Today, the Auditorium Building is thriving as a showcase for major theatrical events, Roosevelt University concerts, and other events.

The Space Within Patrick F. Cannon.2016 For the first time, the interiors of some of the Chicago area's greatest buildings, designed by celebrated architects, are brought together and featured in truly stunning original photographs. These Chicago-area homes, religious spaces, and commercial and public structures give visual meaning to Frank Lloyd Wright's belief that the space within becomes the reality of the building. Beginning with the Clarke House of 1836 and continuing to the present, every type and style of building is presented. Famous residences such as Wright's Robie House and Mies van der Rohe's Farnsworth House are here, but so are more modest (and not so modest) homes by Walter Burley Griffin, George Washington Maher, and Paul Schweikher. The ornate warmth of Adler & Sullivan's Auditorium Building provides striking contrast to the modern, towering underground stacks of Helmut Jahn's Mansueto Library. The soaring Bahá'í Temple, by Louis Bourgeois, is elegantly highlighted alongside a humble chapel in St. Procopius Abbey Church, by Edward Dart. And commercial buildings by Daniel Burnham, John Wellborn Root, John Holabird, Martin Roche, and many more reaffirm Chicago's position as a great business center. These architects and their contemporaries have made the Chicago area a mecca for both architects and lovers of architecture from around the world. Text by author Patrick F. Cannon, who has lived and worked in Chicago and its suburbs for more than sixty years, discusses each building's architecture,

architect, and place in history. James Caulfield, a noted architectural photographer, leads a visual tour into both the intimate and grand interiors of the Chicago area's finest buildings. Now the duo's fifth book, *The Space Within* demonstrates that good design comes in many styles. While many of these architectural masterpieces are open to the public, others--particularly the private homes--can only be seen here.

Frank Lloyd Wright's Robie House Donald Hoffmann. 2012-07-12 Painstakingly researched and illuminating account of the making of the Fred C. Robie home. Revealing family documents, excerpts from a 1958 interview with Fred Robie, and 160 black-and-white illustrations.

Randall. 1999 The second edition of *History of the Development of Building Construction in Chicago* is a tribute to Frank Randall's vision and resource to Chicago area architects, engineers, preservation specialists, and other members of the building industry.--BOOK JACKET.

Chicago Susanna Sirefman. 1996 Chicago has been at the forefront of architectural progress for more than a century. This book documents the city's recent architecture, starting with the new O'Hare Airport terminal, Playboy Enterprise's headquarters, giant office towers in the downtown Loop, and more. Exactly 100 buildings, all completed within the last ten years are described and illustrated, with location and access information.
