Lincoln David Herbert Donald.2011-12-20 A masterful work by Pulitzer Prize-winning author David Herbert Donald, Lincoln is a stunning portrait of Abraham Lincoln's life and presidency. Donald brilliantly depicts Lincoln's gradual ascent from humble beginnings in rural Kentucky to the ever-expanding political circles in Illinois, and finally to the presidency of a country divided by civil war. Donald goes beyond biography, illuminating the gradual development of Lincoln's character, chronicling his tremendous capacity for evolution and growth, thus illustrating what made it possible for a man so inexperienced and so unprepared for the presidency to become a great moral leader. In the most troubled of times, here was a man who led the country out of slavery and preserved a shattered Union—in short, one of the greatest presidents this country has ever seen.

The Selected Letters of Ezra Pound, 1907-1941 Ezra Pound.1971 Originally published in 1950 under title: The letters of Ezra Pound, 1907-1941.

The Rejection of Consequentialism Samuel Scheffler.1994-08-11 In contemporary philosophy, substantive moral theories are typically classified as either consequentialist or deontological. Standard consequentialist theories insist, roughly, that agents must always act so as to produce the best available outcomes overall. Standard deontological theories, by contrast, maintain that there are some circumstances where one is permitted but not required to produce the best overall results, and still other circumstances in which one is positively forbidden to do so. Classical utilitarianism is the most familiar consequentialist view, but it is widely regarded as an inadequate account of morality. Although Professor Scheffler agrees with this assessment, he also believes that consequentialism seems initially plausible, and that there is a persistent air of paradox surrounding typical deontological views. In this book, therefore, he undertakes to reconsider the rejection of consequentialism. He argues that it is possible to provide a rationale for the view that agents need not always produce the best possible overall outcomes, and this motivates one departure from consequentialism; but he shows that it is surprisingly difficult to provide a satisfactory rationale for the view that there are times when agents must not produce the best possible overall outcomes. He goes on to argue for a hitherto neglected type of moral conception, according to which agents are always permitted, but not always required, to produce the best outcomes.

The Biology of Mosquitoes, Volume 3 Transmission of Viruses and Interactions with Bacteria Alan N. Clements.2012 The great importance of mosquitoes lies in their role as transmitters of pathogens and parasites, and in their use as experimental animals well suited to laboratory investigations into aspects of biochemistry, physiology and behaviour. The largest part of this latest volume of The Biology of Mosquitoes concerns interactions between mosquitoes and viruses and the transmission of arboviruses to their vertebrate hosts, while the remainder concerns symbiotic interactions between mosquitoes and bacteria. The introduction provides a timely review of the first major development in mosquito taxonomy for several decades. Further chapters describe the interactions between mosquitoes and the viruses that infect them, the transmission and epidemiology of seven very important arboviruses, and the biology of bacteria that are important control agents or of great biological interest. Like the earlier volumes, Volume 3 combines recent information with earlier important findings from field and laboratory to provide the broadest coverage available on the subject.

Before the Melting Pot Joyce D. Goodfriend.2021-01-12 From its earliest days under English rule, New York City had an unusually diverse ethnic makeup, with substantial numbers of Dutch, English, Scottish, Irish, French, German, and Jewish immigrants, as well as a large African-American population. Joyce Goodfriend paints a vivid portrait of this society, exploring the meaning of

ethnicity in early America and showing how colonial settlers of varying backgrounds worked out a basis for coexistence. She argues that, contrary to the prevalent notion of rapid Anglicization, ethnicity proved an enduring force in this small urban society well into the eighteenth century.

Catch up! Angèle Cohen, Marie-Thérèse Thiéry, Daniele Ollivier. 1994 Dans ce livre destiné aux élèves de BEP -Seconde professionnelle, leurs auteurs se sont attachés à poursuivre deux objectifs principaux : - un entraînement intensif à la lecture autonome et à la compréhension auditive ; - une révision des points essentiels de la langue anglaise pour communiquer oralement et par écrit. Installation Theory Saadi Lahlou. 2018-02-08 Installation Theory: The Societal Construction and Regulation of Behaviour provides researchers and practitioners with a simple and powerful framework to analyse and change behaviour. Informed by a wide range of empirical evidence, it includes an accessible synthesis of former theories (ecological psychology, activity theory, situated action, distributed cognition, social constructionism, actor-network theory and social representations). 'Installations' are the familiar, socially constructed, apparatuses which elicit, enable, scaffold and control - and make predictable most of our 'normal' behaviour; from shower-cabins or airport check-ins to family dinners, classes or hospitals. The book describes their threefold structure with a new model enabling systematic and practical analysis of their components. It details the mechanisms of their construction, resilience and evolution, illustrated with dozens of examples, from restaurants to nuclear plant operation. The book also provides a detailed analysis of the processes of creation and selection of innovations, proposing a model for the maintenance and evolution of social systems.

The Science of Successful Living Raymond Charles Barker. 2018-12-01 "FEW PEOPLE think of life as a creative experiment. Most of us are so busy with routines that we take life for granted. We expect an endless routine of work, a hectic social life each weekend and two weeks' vacation each year. I trust that the readers of this book will derive from it a new interest in life, a zest for doing what needs to be done, and a technique to live with joyous enthusiasm. "Looking at life from an inspired viewpoint you can see those things which are on the side of greatness and cease resisting the petty and the unimportant. Life is a process of intelligence. It always acts intelligently. Problems are the result of living life unintelligently. "The universe is actually a mental system. Its primary nature is the process of ideas becoming form. Every fact in your world is also an idea in your mind. To get new things in your world you must have new ideas in your consciousness. Few people do enough abstract thinking to create new ideas in their minds. They continually think about what they already know and have known for years. This explains the monotony of their lives. "Select the idea of

some new experience you want and then think it without ceasing. Mind will deliver to you everything you need in order to accomplish your demonstration. This is far from being impossible. The great, the wise, and the true have proven this to be so. You have done it and so have your friends. You may not have thought of the process as being either spiritual or psychological. You intuitively knew a new idea. Your thinking in terms of this idea caused something to happen in your experience. "This book has been written for that large section of today's population which is spiritually liberal and psychologically aware. Those bound by traditional beliefs will cast it aside. It is my desire that thousands will be helped and healed by reading these pages."—Raymond Charles Barker

The People Behind School Shootings and Public Massacres John A. Torres.2016-07-15 Sandy Hook Elementary School...Columbine High School...San Bernardino Social Services Center...Aurora Movie Theater. There are more school shootings and public massacres than anyone wants to believe. What motivates the people behind these horrific crimes? This book addresses the needs of high school psychology students, detailing the accounts of the shooting sprees. This timely text follows with details of the individuals responsible for the acts and describes how mental health professionals seek to break the physical and psychological motivations of the mass murderers.

French Emigration to Great Britain in Response to the French Revolution Juliette Reboul.2017-08-25 This book examines diverse encounters between the British community and the thousands of French individuals who sought haven in the British Isles as they left revolutionary and Imperial France. This painstaking research into the emigrant archival and memorial presence in Britain uncovers a wealth of underused and alternative sources on this controversial population displacement. These include open letters and classified advertisements published in British newspapers, insurance contracts, as well as lists of addresses and passports drawn up by local authorities. These sources question the construction by British loyalists and French émigré elites of a stereotyped emigrant figure and their use of the trauma of forced displacement to advance ideological agendas. In fact, public and private discourses on governmental systems, foreigners, political and religious dissent, and the economic survival of French emigrants, demonstrate the heterogeneity of the responses to emigration in Britain. Ultimately, this book narrates a story in which the emigrant community and its host have been often unnoticeably yet fundamentally transformed by their encounter, in both practical and ideological domains.

Au Contraire! Gilles Asselin,Ruth Mastron.2010-12-15 I find Au Contraire! delightfully validating - a great piece of work. - Nancy Bragard, Franco-American interculturalist, trainer and coach The French are famously enigmatic: fiercely independent yet deeply romantic,conservative yet avant-garde, rational yet emotional. What is it, exactly, that makes the French so . . . French? Written for anyone interacting with the French-tourists, businesspeople, international students, Francophiles-Au Contraire! offers a perceptive understanding of French cultural beliefs, assumptions and attitudes, along with practical advice on building strong personal and professional relationships with the French. Addressing issues like friendship, politics, work, education and romance, bilingual and bi cultural authors Asselin and Mastron draw upon their own experiences as consultants and trainers, as well as those of students and professionals, giving readers a complete-and compelling-look at French culture. This revised edition of Au Contraire! includes updated information about France's changing social and political climate, advice for succeeding as an expat, information about the French educational system, overviews of France's diverse regions-and more.

Bar Balto Faza GUENE.2012 Joel, aka 'The Rink' (because his bald patch is shiny enough to skate on), the unpopular owner of the only bar in town has been murdered. There are so many suspects, it's not so much a question of who did kill him as who didn't. There's Magalie, the temperamental teenager obsessed with Paris Hilton; her troublemaker boyfriend, Tani; Tani's mother, Madame Levi; her unemployed, daytime-TV addicted husband; Yeznig, their younger son, who has learning difficulties but perfect memory recall; and newcomers Ali and Nadia, the Muslim twins struggling to fit in. As the tension mounts and we're still none the wiser, the ending is as tragic as it is unexpected.

Amongst Mathematicians Elena Nardi.2008 This book offers a unique perspective on ways in which mathematicians: perceive their students' learning; teach; reflect on their teaching practice. Elena Nardi achieves this by employing two fictional, yet entirely data-grounded, characters to create a conversation on these important issues. The construction of these characters is based on large bodies of data including intense focused group interviews with mathematicians and extensive analyses of students' written work, collected and analyzed over a substantial period.

Variations stylistiques Diane M. Dansereau.2016-01-01 This advanced level course book teaches stylistic variations of modern French grammar using examples from films and interviews as well as other authentic texts. Written entirely in French, it focuses on the most difficult grammar points and their usage, rather than on their formation. Variations stylistiques includes an abundance of oral and written exercises that are practical, relevant, creative, and fun, encouraging students to use the grammar in meaningful contexts. By highlighting the many linguistic variants employed by native speakers, Dansereau provides an engaging alternative to traditional French grammar textbooks. An ancillary Web site features quizzes and other valuable resources for instructors.

The Structure of Appearance Nelson Goodman. 2012-12-06 With this third edition of Nelson Goodman's *The Structure of Appearance*, we are pleased to make available once more one of the most influential and important works in the philosophy of our times. Professor Geoffrey Hellman's introduction gives a sustained analysis and appreciation of the major themes and the thrust of the book, as well as an account of the ways in which many of Goodman's problems and projects have been picked up and developed by others. Hellman also suggests how *The Structure of Appearance* introduces issues which Goodman later continues in his essays and in the *Languages of Art*. There remains the task of understanding Goodman's project as a whole; to see the deep continuities of his thought, as it ranges from logic to epistemology, to science and art; to see it therefore as a complex yet coherent theory of human cognition and practice. What we can only hope to suggest, in this note, is the broader significance of Goodman's apparently technical work for philosophers, scientists and humanists. One may say of Nelson Goodman that his bite is worse than his bark. Behind what appears as a cool and methodical analysis of the conditions of the construction of systems, there lurks a radical and disturbing thesis: that the world is, in itself, no more one way than another, nor are we. It depends on the ways in which we take it, and on what we do.
