**Decolonizing the Map** James R. Akerman. 2017-06-16 Almost universally, newly independent states seek to affirm their independence and identity by making the production of new maps and atlases a top priority. For formerly colonized peoples, however, this process neither begins nor ends with independence, and it is rarely straightforward. Mapping their own land is fraught with a fresh set of issues: how to define and administer their territories, develop their national identity, establish their role in the community of nations, and more. The contributors to *Decolonizing the Map* explore this complicated relationship between mapping and decolonization while engaging with recent theoretical debates about the nature of decolonization itself. These essays, originally delivered as the 2010 Kenneth Nebenzahl, Jr., Lectures in the History of Cartography at the Newberry Library, encompass more than two centuries and three continents—Latin America, Africa, and Asia. Ranging from the late eighteenth century through the mid-twentieth, contributors study topics from mapping and national identity in late colonial Mexico to the enduring complications created by the partition of British India and the racialized organization of space in apartheid and post-apartheid South Africa. A vital contribution to studies of both colonization and cartography, *Decolonizing the Map* is the first book to systematically and comprehensively examine the engagement of mapping in the long—and clearly unfinished—parallel processes of decolonization and nation building in the modern world.

*Justice, Indigenous Peoples, and Canada* Kathryn M. Campbell, Stephanie Wellman. 2023-12-19 *Justice, Indigenous Peoples, and Canada: A History of Courage and Resilience* brings together the work of a number of leading researchers to provide a broad overview of criminal justice issues that Indigenous people in Canada have faced historically and continue to face today. Both Indigenous and Canadian scholars situate current issues of justice for Indigenous peoples, broadly defined, within the context of historical realities and ongoing developments. By examining how justice is defined,

both from within Indigenous communities and outside of them, this volume examines the force of Constitutional reform and subsequent case law on Indigenous rights historically and in contemporary contexts. It then expands the discussion to include theoretical considerations, particularly settler colonialism, that help explain how ongoing oppressive and assimilationist agendas continue to affect how so-called justice is administered. From a critical perspective, the book examines the operation of the criminal justice system, through bail, specialized courts, policing, sentencing, incarceration and release. It explores legal frameworks as well as current issues that have significantly affected Indigenous peoples, such as the Truth and Reconciliation Commission, the Inquiry into Missing and Murdered Indigenous Women and Girls, human rights, resurgence and identity. This unique collection of perspectives exposes the disconcerting agenda of historical and modern-day Canadian federal government policy and the continued denial of Indigenous rights to self-determination. It is essential reading for those interested in the struggles of the Indigenous peoples in Canada as well as anyone studying race, crime and justice.

*Drawdown* Paul Hawken. 2017-04-18 • New York Times bestseller • The 100 most substantive solutions to reverse global warming, based on meticulous research by leading scientists and policymakers around the world “At this point in time, the *Drawdown* book is exactly what is needed; a credible, conservative solution-by-solution narrative that we can do it. Reading it is an effective inoculation against the widespread perception of doom that humanity cannot and will not solve the climate crisis. Reported by-effects include increased determination and a sense of grounded hope.” —Per Espen Stoknes, Author, *What We Think About When We Try Not To Think About Global Warming* “There’s been no real way for ordinary people to get an understanding of what they can do and what impact it can have. There remains no single, comprehensive, reliable compendium of carbon-reduction solutions across sectors. At least until now. . . . The public is hungry for this kind of practical wisdom.” —David Roberts, *Vox* “This is the ideal environmental sciences textbook—only it is too interesting and inspiring to be called a textbook.” —Peter Kareiva, Director of the Institute of the Environment and Sustainability, UCLA In the face of widespread fear and apathy, an international coalition of researchers, professionals, and scientists have come together to offer a set of realistic and bold solutions to climate change. One hundred techniques and practices are described here—some are well known; some you may have never heard of. They range from clean energy to educating girls in lower-income countries to land use practices that pull carbon out of the air. The solutions exist, are economically viable, and communities throughout the world are currently enacting them with skill and determination. If deployed collectively on a global scale over the next thirty years, they represent a credible path forward, not just to slow the earth’s warming but to reach drawdown, that point in time when greenhouse gases in the atmosphere peak and begin to decline. These measures promise cascading benefits to human health, security, prosperity, and

well-being—giving us every reason to see this planetary crisis as an opportunity to create a just and livable world.

What would the new world look like to wandering Vikings, who thought they had drifted into a land of mythical creatures, or Samuel de Champlain, who had no idea of the vastness of the landmass just beyond the treeline? Adam Shoalts, one of Canada’s foremost explorers, tells the stories behind these centuries old maps, and how they came to shape what became “Canada.” It’s a story that will surprise readers, and reveal the Canada we never knew was hidden. It brings to life the characters and the bloody disputes that forged our history, by showing us what the world looked like before it entered the history books. Combining storytelling, cartography, geography, archaeology and of course history, this book shows us Canada in a way we’ve never seen it before.

*21 Things You May Not Know about the Indian Act* Bob Joseph.2018-04-10 Based on a viral article, 21 Things You May Not Know About the Indian Act is the essential guide to understanding the legal document and its repercussion on generations of Indigenous Peoples, written by a leading cultural sensitivity trainer.Since its creation in 1876, the Indian Act has shaped, controlled, and constrained the lives and opportunities of Indigenous Peoples, and is at the root of many enduring stereotypes. Bob Joseph's book comes at a key time in the reconciliation process, when awareness from both Indigenous and non-Indigenous communities is at a crescendo. Joseph explains how Indigenous Peoples can step out from under the Indian Act and return to self-government, self-determination, and self-reliance--and why doing so would result in a better country for every Canadian. He dissects the complex issues around truth and reconciliation, and clearly demonstrates why learning about the Indian Act's cruel, enduring legacy is essential for the country to move toward true reconciliation.

**A Bounded Land** Cole Harris.2020-11-01 Canada is a bounded land – a nation situated between rock and cold to the north and a border to the south. Cole Harris traces how society was reorganized – for Indigenous and non-Indigenous people alike – when Europeans resettled this distinctive land. Through a series of vignettes that focus on people’s experiences on the ground, he exposes the underlying architecture of colonialism, from first contacts, to the immigrant experience in early Canada, to the dispossession of First Nations. In the process, he unearths fresh insights on the influence of Indigenous peoples and argues that Canada’s boundedness is ultimately drawing it toward its Indigenous roots.

Chief Kerry's Moose Terry N. Tobias,Union of British Columbia Indian Chiefs,Ecotrust Canada.2000 ... A guidebook to land-use and occupancy mapping, research design and data collection -- into Chinese. Indigenous peoples as far away as Australia are using the reference book. We adopted the approach that is outlined in this guidebook, and built an inventory of quality information about our

historical uses of Tsleil-Waututh territory, says Chief Leonard George. The resulting maps and documentation are benefiting our negotiations for co-management of traditional lands, and helping us build the relationships and understanding required for the protection of our Aboriginal title and rights. Our land use maps are thus aiding in the survival and growing strength of our nation, and will benefit future generation. Written by Terry Tobias, the book was published by Ecotrust Canada and the Union of BC Indian Chiefs in response to a need expressed by Aboriginal leaders and researchers across Canada about the poor quality of land-use and occupancy maps, and the absence of instructional materials in the field. Chief Kerry's Moose is an excellent learning tool for First Nation's environmental and cultural staff who may wish to interview Elders and other experts about Innu life on the land, says Richard Nuna, Manager of Environment, Culture and Conservation for the Innu Nation.--from pub. website.

*The Laws and the Land* Daniel Rück.2021-09-15 As the settler state of Canada expanded into Indigenous lands, two traditions clashed in a bruising series of asymmetrical encounters over land use and ownership. One site of conflict was Kahnawà:ke. *The Laws and the Land* delineates the establishment of a settler colonial relationship from early contact ways of sharing land; land practices under Kahnawà:ke law; and ultimately the Canadian invasion in the guise of the Indian Act, private property, and coercive pressure to assimilate. This meticulously researched book is connected to larger issues of human relations with environments, communal and individual ways of relating to land, legal pluralism, historical racism and inequality, and Indigenous resurgence.

**Clearing the Plains** James William Daschuk.2013 In arresting, but harrowing, prose, James Daschuk examines the roles that Old World diseases, climate, and, most disturbingly, Canadian politics--the politics of ethnocide--played in the deaths and subjugation of thousands of aboriginal people in the realization of Sir John A. Macdonald's National Dream. It was a dream that came at great expense: the present disparity in health and economic well-being between First Nations and non-Native populations, and the lingering racism and misunderstanding that permeates the national consciousness to this day. *Clearing the Plains* is a tour de force that dismantles and destroys the view that Canada has a special claim to humanity in its treatment of indigenous peoples. Daschuk shows how infectious disease and state-supported starvation combined to create a creeping, relentless catastrophe that persists to the present day. The prose is gripping, the analysis is incisive, and the narrative is so chilling that it leaves its reader stunned and disturbed. For days after reading it, I was unable to shake a profound sense of sorrow. This is fearless, evidence-driven history at its finest. -Elizabeth A. Fenn, author of *Pox Americana* Required reading for all Canadians. -Candace Savage, author of *A Geography of Blood* Clearly written, deeply researched, and properly contextualized history...Essential reading for everyone interested in the history of indigenous North

America. -J.R. McNeill, author of *Mosquito Empires*

A Book of Ecological Virtues Heesoon Bai, David Chang, Charles Scott. 2020-10-03 Despite our brief tenure on planet Earth, *Homo sapiens* have reached an epoch--the Anthropocene--that is

characterised by our species' uncanny ability to spoil our own nest. In the face of this somber reality of ecological degradation and massive species extinction, the editors ask the critical question, What does living well look like in the Anthropocene? It is vitally important that we turn towards the cultivation of eco-virtues, a new set of values by which to live, if there is to be hope for us and other species to continue. These essays inspire readers not just to ponder, but to embody and live the ideals of these timeless ecological virtues.

Final Report of the Truth and Reconciliation Commission of Canada, Volume One: Summary Truth and Reconciliation Commission of Canada. 2015-07-22 This is the Final Report of Canada's Truth and Reconciliation Commission and its six-year investigation of the residential school system for Aboriginal youth and the legacy of these schools. This report, the summary volume, includes the history of residential schools, the legacy of that school system, and the full text of the Commission's 94 recommendations for action to address that legacy. This report lays bare a part of Canada's history that until recently was little-known to most non-Aboriginal Canadians. The Commission discusses the logic of the colonization of Canada's territories, and why and how policy and practice developed to end the existence of distinct societies of Aboriginal peoples. Using brief excerpts from the powerful testimony heard from Survivors, this report documents the residential school system which forced children into institutions where they were forbidden to speak their language, required to discard their clothing in favour of institutional wear, given inadequate food, housed in inferior and fire-prone buildings, required to work when they should have been studying, and subjected to

emotional, psychological and often physical abuse. In this setting, cruel punishments were all too common, as was sexual abuse. More than 30,000 Survivors have been compensated financially by the Government of Canada for their experiences in residential schools, but the legacy of this experience is ongoing today. This report explains the links to high rates of Aboriginal children being taken from their families, abuse of drugs and alcohol, and high rates of suicide. The report documents the drastic decline in the presence of Aboriginal languages, even as Survivors and others work to maintain their distinctive cultures, traditions, and governance. The report offers 94 calls to action on the part of governments, churches, public institutions and non-Aboriginal Canadians as a path to meaningful reconciliation of Canada today with Aboriginal citizens. Even though the historical experience of residential schools constituted an act of cultural genocide by Canadian government authorities, the United Nation's declaration of the rights of aboriginal peoples and the specific recommendations of the Commission offer a path to move from apology for these events to true reconciliation that can be embraced by all Canadians.
