Con objeto que el libro resulte útil a la gran mayoría de interesados en cuestiones climáticas y ambientales, se ha encuadrado el texto en una estructura que conjuga, armónicamente, autonomía y cohesión de las distintas partes, facilitando así la consulta de cualquiera de ellas. A esta finalidad obedecen también máxima claridad expositiva, sin mengua de rigor y precisión conceptual, y, para favorecer la comprensión, una insólita riqueza de ilustraciones. Por otra parte,

el Tratado añade buen número de datos y consideraciones novedosas, poco divulgadas, desconocidas en general.

Frente a la emergencia ambiental del planeta es imperativo detener la deforestación y restaurar nuestros bosques, con el fin de contribuir a la mitigación del cambio climático y a la lucha contra el declive de la biodiversidad, esta última una enorme responsabilidad para Colombia que es el segundo país más rico en diversidad de especies de flora y fauna del mundo.

Palms of controversies Alain Rival, Patrice Levang.2014-07-17 The rapid development of oil palm cultivation feeds many social issues such as biodiversity, deforestation, food habits or ethical investments. How can this palm be viewed as a "miracle plant" by both the agro-food industry in the North and farmers in the tropical zone, but a serious ecological threat by non-governmental organizations (NGOs) campaigning for the environment or rights of local indigenous peoples? In the present book the authors - a biologist and an agricultural economist- describe a global and complex tropical sector, for which the interests of the many different stakeholders are often antagonistic. Oil palm has become emblematic of recent changes in North-South relationship in agricultural development. Indeed, palm oil is produced and consumed in the South; its trade is driven by emerging countries, although the major part of its transformations is made in the North that still hosts the largest multinational agro industries. It is also in the North that the sector is challenged on ethical and environmental issues. Public controversy over palm oil is often opinionated and it is fed by definitive and sometimes exaggerated statements. Researchers are conveying a more nuanced speech, which is supported by

scientific data and a shared field experience. Their work helps in building a more balanced view, moving attention to the South, the region of exclusive production and major consumption of palm oil.

Perdidos. La extinción de las especies (y las lecciones que nos dejan) Fernando Gabriel Sica.2020-12-30 “Perdidos” aborda el problema de la Extinción de las Especies desde un enfoque singular. Se toman ejemplos seleccionados de animales extintos, maravillosos en muchos aspectos, que hemos perdido para siempre, y se analizan exhaustivamente los factores que condujeron a esa pérdida. En cada caso, se releva y actualiza toda la información disponible de las especies analizadas, incluso aquellas que surgieron de investigaciones posteriores a su desaparición, reconstruyendo los hechos para tratar de comprender la cadena de sucesos, poniendo en manos del lector los datos que nos permiten averiguar qué pasó, cuáles fueron los elementos decisivos que condujeron a la tragedia del final.

Porque de eso se trata, de una tragedia natural, que se acelera de

manera fulminante abarcando a todos los seres que habitan nuestro planeta. Cerca de un millón de especies están amenazadas hoy, de manera directa o indirecta, por el avance humano sobre los ambientes naturales, y en el transcurso de lo que lleva leer este libro, algunas de ellas se habrán ido definitivamente, incluso sin que lo advirtamos, dejando al planeta más pobre y frágil. Los expertos aún no pueden definir con precisión el conjunto de efectos que tiene cada partida, pero es frecuente que cada especie arrastre a otras a la desaparición, en la medida en que toda la naturaleza está interconectada en extraordinarias y complejas relaciones, que en muchos casos apenas entendemos. Este libro es un llamado a la reflexión, pero también un grito desesperado de alerta. Algo hay que hacer. La humanidad en conjunto ha acorralado, con sus premisas egocéntricas de explotación y dominio, a animales que hasta hace poco tiempo atrás prosperaban pacíficamente. Los hemos dejado sin hogar, sin alimento, les hemos extraído las pieles, los colmillos, la carne, les hemos arrebatado las crías, los hemos encerrado y enfermado. Los hemos tratado sin piedad y sin respeto. En muchos casos, nos ha guiado en esta irracional conducta una gran indiferencia, pero también una profunda ignorancia, que no nos permitió actuar a tiempo. Por estas páginas pasarán dodos nada tontos, inquietos delfines rosados, guacamayos azules deslumbrantes, poderosos rinocerontes y elefantes, insignificantes caracoles, brillantes sapos dorados, lobos misteriosos, y muchas otras formas de vida increíblemente adaptadas a ambientes que invadimos y saqueamos. Por eso es que estas historias tienen que conocerse, para que muchas personas sepan que el conocimiento es poder, y que solo entendiendo lo que pasa en el mundo natural podemos contribuir con su protección y conservación. Hay muchas iniciativas de personas que dan su tiempo por el cuidado de estas vidas animales, las que frecuentemente languidecen por falta de recursos y apoyos. Para ayudar, hay que entender qué es lo que

está pasando. Las historias aquí presentadas han sido elegidas por los mensajes que pueden darnos, sobre las diversas condiciones que pueden llevar a la extinción a una especie, así como por su capacidad para explicar de manera más amplia lo que le ocurre a otras especies relacionadas con la extinta. También, por las posibilidades de aportar ideas para la salvación y recuperación de otros animales amenazados. Están dirigidas a todos los que aman la naturaleza, y muy especialmente a los educadores que tienen la tarea esencial de formar una nueva conciencia colectiva en las generaciones venideras sobre el cuidado medioambiental. El futuro llega muy rápido. Para algunas especies en peligro crítico, es un futuro incierto, escrito con la sangre de víctimas inocentes. Están en nuestras manos.

Defensa de la Tierra Luis Oyarzún.2020-11-18 «Pertenece a la estirpe de estos contempladores de mirada libre y liberadora, con una conciencia exaltada de lo real, que no puede sino significar una exaltada conciencia del propio ser, una pasión... La pasión de ver fue para él una pasión de ser», nos advierte en el prólogo de este pionero libro de reflexión ecológica, el filósofo Jorge Millas. Luis Oyarzún (1920-1972), fue un apasionado de la Tierra, un poeta y pensador «al aire libre». Quienes lo conocieron y leyeron, dan fe de su sentimiento fraternal con el cosmos, de vivir como una criatura entre criaturas, siempre prójimo y nunca amo absoluto de la realidad y sus seres. Publicado póstumamente en 1973, *Defensa de la Tierra* es fruto de esa pasión de ver y de ser «con el mundo» y se constituyó, desde su aparición, en un lúcido alegato y adelantado manifiesto contra el antropocentrismo y su acción depredadora. En el centenario del nacimiento de su autor, Ediciones Universidad Austral de Chile ha querido rendir tributo a una voz y a una obra cuya vigencia —y urgencia— es

permanente. A las piezas ensayísticas, prólogo e ilustraciones originales, esta edición conmemorativa se acompaña con nuevas imágenes y un dossier crítico y biográfico que sitúa a este libro, de Luis Oyarzún, en un sitio ineludible del pensamiento ecológico en nuestro país.

Energía y Calentamiento Global Dieter H.

Otterbach.2014-10-21 El mayor reto que enfrentamos en la actualidad es cómo lograr la supervivencia de la raza humana más allá del siglo XXI. Hay gran cantidad de funestas amenazas para el futuro provocadas por los cambios climáticos, e ignorar el problema no hará que desaparezca. Hay que actuar. Energía y calentamiento global pretende señalar los esfuerzos políticos, técnicos, prácticos y de investigación requeridos para aumentar las posibilidades de supervivencia para nosotros y las futuras generaciones. Energía y calentamiento global plantea de manera sucinta y práctica el problema y sus causas, y además, muestra soluciones no solo futuras, sino a corto plazo, las cuales pueden ponerse en marcha desde hoy.

Hacia un Derecho Administrativo, Fiscal y Medioambiental

Romano III . Como es bien sabido, el derecho es un producto histórico; pero no sólo el derecho privado, también el derecho público. Así lo han demostrado recientes investigaciones —dirigidas en España por el Catedrático de derecho romano de la UAM, D. Antonio Fernández de Buján— en ámbitos tan relevantes, en materia medio ambiental, como el régimen de las aguas, los tributos, las concesiones, la protección de los bienes de dominio público, la responsabilidad de los funcionarios, etc. Conforme a ellas, puede afirmarse ya sin que quepa duda alguna, que los orígenes de nuestro derecho administrativo no se remontan a la Revolución Francesa o la Ilustración, sino que

hunden sus raíces en el derecho romano. La importancia del papel de la Administración y de los poderes públicos en la tutela del medioambiente —algunos hablan incluso de un derecho administrativo medio ambiental— exige por todo ello volver los ojos a nuestro derecho histórico. De ese modo podrá demostrarse esa continuidad e interdependencia mencionada pero sobre todo y a través de una adecuada investigación y reflexión histórica, iluminar al moderno legislador a través del precedente que nuestro derecho histórico constituye.
