

Cities For A Small Continent Case Studies On Pove

Wanderlust Elisabeth Eaves.2011 This book documents the impulses that drive Elisabeth Eaves' insatiable hunger for the rush of the unfamiliar. She is both restless vagabond and astute observer as she crisscrosses five continents, chasing the exotic in both culture and romance. She loses herself in the jungles of Papua New Guinea, rekindles old love and new passion in Cairo, and finds an itinerant brotherhood of raucous men in the land Down Under. Like the random possessions she leaves in her wake, from Australia to Yemen, she also leaves behind a string of lovers. But this is about more than just sensual conquest; it is also a journey of self-discovery, in which her pursuit ultimately guides her home - back cover.

Neoconservative Images of Europe Philipp Scherzer.2022-10-24 While in the last twenty years perceptions of Europe have been subjected to detailed historical scrutiny, American images of the Old World have been almost wantonly neglected. As a response to this scholarly desideratum, this pioneering study analyzes neoconservative images of Europe since the 1970s on the basis of an extensive collection of sources. With fresh insight into the evolution of American images of Europe as well as into the history of U.S. neoconservatism, the book appeals to readers familiar and new to the subject matters alike. The study explores how, beginning in the early 1970s, ideas of the United States as an anti-Europe have permeated neoconservative writing and shaped their self-images and political agitation. The choice of periodization and investigated personnel enables the author to refute popular claims that widespread Euro-critical sentiment in the United States during the early 21st century - considerably ignited by neoconservatives - was a distinct post-Cold War phenomenon. Instead, the analysis reveals that the fiery rhetoric in the context of the Iraq War debates was merely the climax of a decade-old development.

Earth's Fury Alexander Gates.2022-08-01 EARTH'S FURY Natural disasters are any catastrophic loss of life and/or property caused by a natural event or situation. This definition could include biologic issues such as contagion, injurious bacterial colonization, invasion of dangerous plants and infestations of insects and other vermin. However, the popular understanding of what constitutes a natural disaster still focuses on disasters involving the physical properties of the earth and its atmosphere: earthquakes, volcanoes, tsunamis, avalanches, tropical storms, tornadoes, floods and wildfires. *Earth's Fury: The Science of Natural Disasters* attempts to combine the best features of a scientific textbook and an encyclopedia. It retains the organization of a textbook and adopts the highly illustrative graphics of some of the newer and more effective textbooks. The book's unique approach is evident in its plethora of case studies: short, self-contained and well-illustrated stories of specific natural disasters that are highly engaging for both science and non-science majors. The stories incorporate the science into the event so students appreciate and remember it as part of the story. By relating the event to the impact on society and human lives, the science is placed in the context of the student's real life. Boasting a number of striking and highly detailed double-page illustrations of disaster-producing features, including volcanoes, earthquakes, tsunamis and hurricanes, this book is as much a visual resource as a textbook. For students who are probably most familiar with natural disasters through Hollywood movies, this book's own "widescreen presentation" is coupled with exciting stories which will enhance their interest as well as their

understanding. Whether they are science or non-science majors, *Earth's Fury: The Science of Natural Disasters* will appeal to all students, with its fresh approach and engaging style.

Case Studies in Retrofitting Suburbia June Williamson, Ellen Dunham-Jones. 2021-01-15 A brand-new collection of 32 case studies that further demonstrate the retrofitting of suburbia. This amply-illustrated book, second in a series, documents how defunct shopping malls, parking lots, and the past century's other obsolete suburban development patterns are being retrofitted to address current urgent challenges they weren't designed for: improving public health, increasing resilience in the face of climate change, leveraging social capital for equity, supporting an aging society, competing for jobs, and disrupting automobile dependence. *Case Studies in Retrofitting Suburbia: Urban Design Strategies for Urgent Challenges* provides summaries, data, and references on how these challenges manifest in suburbia and discussion of successful urban design strategies to address them in Part I. Part II documents how innovative design strategies are implemented in a range of northern American contexts and market conditions. From modest interventions with big ripple effects to ambitious do-overs, examples of redevelopment, reinhabitation, and regreening of changing suburban places from coast to coast are described in depth in 32 brand new case studies. Written by the authors of the highly influential *Retrofitting Suburbia: Urban Design Solutions for Redesigning Suburbs* demonstrates changes that can and already have been realized in suburbia by focusing on case studies of retrofitted suburban places. Illustrated in full-color with photos, maps, plans, and diagrams. Full of replicable lessons and creative responses to ongoing problems and potentials with conventional suburban form, *Case Studies in Retrofitting Suburbia: Urban Design Strategies for Urgent Challenges* is an important book for students and professionals involved in urban design, architecture, landscape architecture, urban planning, development, civil engineering, public health, public policy, and governance. Most of all, it is intended as a useful guide for anyone who seeks to inspire revitalization, justice, and shared prosperity in places they know and care about.

Statistical Studies of Historical Social Structure Kenneth W. Wachter, Eugene A. Hammel, Peter Laslett. 2013-10-22 *Statistical Studies of Historical Social Structure* articulates and applies concepts from statistics into historical investigations of pre-industrial English households. The book provides statistical reports on household composition and demographic influences and uses simulation in the study of problems in historical structure. Chapters are devoted to computer simulation experiments; presentation and analysis of English household composition data; correlation of English patriline extinction with social mobility; and how age distribution affects English social structure. Statisticians, historians, demographers, researchers, and students will find the book interesting.

Berlin: Life and Death in the City at the Center of the World Sinclair McKay. 2022-08-23

Sinclair McKay's portrait of Berlin from 1919 forward explores the city's broad human history, from the end of the Great War to the Blockade, rise of the Wall, and beyond. Sinclair McKay's *Berlin* begins by taking readers back to 1919 when the city emerged from the shadows of the Great War to become an extraordinary by-word for modernity—in art, cinema, architecture, industry, science, and politics. He traces the city's history through the rise of Hitler and the Battle for Berlin which ended in the final conquest of the city in 1945. It was a key moment in modern world history, but beyond the global repercussions lay thousands of individual stories of agony. From the countless women who endured nightmare ordeals at the hands of the Soviet soldiers to the teenage boys fitted with steel helmets too big for their heads and guns too big for their hands, McKay thrusts readers into the human cataclysm that tore down the modernity of the streets and reduced what was once the most sophisticated city on earth to ruins. Amid the destruction, a collective instinct was also at work—a determination to restore not just the rhythms of urban life, but also its fierce creativity. In

Berlin today, there is a growing and urgent recognition that the testimonies of the ordinary citizens from 1919 forward should be given more prominence. That the housewives, office clerks, factory workers, and exuberant teenagers who witnessed these years of terrifying—and for some, initially exhilarating—transformation should be heard. Today, the exciting, youthful Berlin we see is patterned with echoes that lean back into that terrible vortex. In this new history of Berlin, Sinclair McKay erases the lines between the generations of Berliners, making their voices heard again to create a compelling, living portrait of life in this city that lay at the center of the world.

Sounds and the City B. Lashua, K. Spracklen, S. Wagg.2014-05-27 This book explores the ways in which Western-derived music connects with globalization, hybridity, consumerism and the flow of cultures. Both as local terrain and as global crossroads, cities remain fascinating spaces of cultural contestation and meaning-making via the composing, playing, recording and consumption of popular music.

A Little Matter of Genocide Ward Churchill.1997 Ward Churchill has achieved an unparalleled reputation as a scholar-activist and analyst of indigenous issues in North America. Here, he explores the history of holocaust and denial in this hemisphere, beginning with the arrival of Columbus and continuing on into the present. He frames the matter by examining both revisionist denial of the nazi-perpetrated Holocaust and the opposing claim of its exclusive uniqueness, using the full scope of what happened in Europe as a backdrop against which to demonstrate that genocide is precisely what has been-and still is-carried out against the American Indians. Churchill lays bare the means by which many of these realities have remained hidden, how public understanding of this most monstrous of crimes has been subverted not only by its perpetrators and their beneficiaries but by the institutions and individuals who perceive advantages in the confusion. In particular, he outlines the reasons underlying the United States's 40-year refusal to ratify the Genocide Convention, as well as the implications of the attempt to exempt itself from compliance when it finally offered its endorsement. In conclusion, Churchill proposes a more adequate and coherent definition of the crime as a basis for identifying, punishing, and preventing genocidal practices, wherever and whenever they occur. Ward Churchill (enrolled Keetoowah Cherokee) is Professor of American Indian Studies with the Department of Ethnic Studies at the University of Colorado-Boulder. A member of the American Indian Movement since 1972, he has been a leader of the Colorado chapter for the past fifteen years. Among his previous books have been *Fantasies of a Master Race*, *Struggle for the Land*, *Since Predator Came*, and *From a Native Son*.

African Luxury Branding Mehita Iqani.2022-12-23 Bringing together critical race, queer and decolonial analytical approaches, visual analysis, and multimodal discourse analysis, this book explores the discursive strategies deployed by African luxury brands in an age of cross-platform, intertextual branding. Building on literature examining the aesthetics and politics of African luxury, this book demonstrates how leading African luxury brands create visual material speaking to

complex sensibilities of culture, nature, and future. Iqani shows how powerful brand narratives and strategies reveal ethical and ideological messages that function to re-position Africa in an increasingly congested global marketplace of ideas. In acknowledging that there is a strong political validity to recognizing the importance of African brands staking their claim in luxury, this book also problematizes the role these brands play in the promotion of luxury discourses, advancing the project of capitalism and their contribution to broader patterns of inequality. Shedding new light not only on luxury branding strategies but also on the idea of a luxurious global “Africanicity” and on the complex cultural politics of South Africa, *African Luxury Branding* will be of interest to advanced students and researchers in disciplines, including Critical Advertising Studies, African Studies, Media and Communications.

Understanding British Values in Primary Schools Joy Carroll, Colin Howard, Bridget Knight. 2018-05-08 This text provides trainees, teachers and schools with practice-based advice, informed by current practitioners, relating to the delivery of British Values. It covers many topical themes and supports educational professionals to understand their duties around the PREVENT agenda and goes further to explore why this is important.

Africa's Political Wastelands: The Bastardization of Cameroon Emmanuel Fru Doh. 2008 *Africa's Political Wastelands* explores and confirms the fact that because of irresponsible, corrupt, selfish, and unpatriotic kleptocrats parading as leaders, the ultimate breakdown of order has become the norm in African nations, especially those south of the Sahara. The result is the virtual annihilation of once thriving and proud nations along with the citizenry who are transformed into wretches, vagrants, and in the extreme, refugees. Doh uses Cameroon as an exemplary microcosm to make this point while still holding imperialist ambitions largely responsible for the status quo in Africa. Ultimately, in the hope of jumpstarting the process, he makes pertinent suggestions on turning the tide on the continent.

The Critic Jeannette Leonard Gilder, Joseph Benson Gilder. 1889

Collapse Jared Diamond. 2011-01-04 In Jared Diamond's follow-up to the Pulitzer-Prize winning *Guns, Germs and Steel*, the author explores how climate change, the population explosion and political discord create the conditions for the collapse of civilization. Diamond is also the author of *Upheaval: Turning Points for Nations in Crisis* Environmental damage, climate change, globalization, rapid population growth, and unwise political choices were all factors in the demise of societies around the world, but some found solutions and persisted. As in *Guns, Germs, and Steel*, Diamond traces the fundamental pattern of catastrophe, and weaves an all-encompassing global thesis through a series of fascinating historical-cultural narratives. *Collapse* moves from the Polynesian cultures on Easter Island to the flourishing American civilizations of the Anasazi and the Maya and finally to the doomed Viking colony on Greenland. Similar problems face us today and have already brought disaster to Rwanda and Haiti, even as China and Australia are trying to cope in innovative ways. Despite our own society's apparently inexhaustible wealth and unrivaled political power, ominous warning signs have begun to emerge even in ecologically robust areas like Montana. Brilliant, illuminating, and immensely absorbing, *Collapse* is destined to take its place as one of the essential books of our time, raising the urgent question: How can our world best avoid committing ecological suicide?

Powerful Primary Geography Anne M. Dolan.2020-04-16 Powerful Primary Geography: A Toolkit for 21st-Century Learning explores the need for children to understand the modern world and their place in it. Dedicated to helping teachers inspire children's love of place, nature and geographical adventures through facilitating children's voice and developing their agency, this book explores the way playful opportunities can be created for children to learn how to think geographically, to solve real-life problems and to apply their learning in meaningful ways to the world around them. Based on the very latest research, Powerful Primary Geography helps children understand change, conflict and contemporary issues influencing their current and future lives and covers topics such as: • Weather and climate change • Sustainability • Engaging in their local and global community • Graphicacy, map work and visual literacy • Understanding geography through the arts. Including several case studies from primary schools in Ireland, this book will help aid teachers, student teachers and education enthusiasts in preparing children for dealing with the complex nature of our contemporary world through artistic and thoughtful geography. Facilitating children's engagement as local, national and global citizens ensures geography can be taught in a powerful and meaningful manner.
