*Nanostructured Materials* Gan-Moog Chow, Nina Ivanovna Noskova. 2012-12-06 A critical, up to date, tutorial review and discussion of the science and technology of nanostructured metallic and ceramic materials. The focus is on the synthesis and processing of nanoparticles, the assembly and stability of nanostructures, characterization and properties, and applications. There is a growing interest in the processing of nanoparticles into consolidated bulk materials and coatings. The metastability of nanoparticles may lead to undesirable grain growth during thermally assisted consolidation or other processing routes, and the retention of nanostructures in a processed part or component continues to attract a great deal of attention. Current activity is concentrating on the deposition of nanostructured coatings using established thermal spray technology and wet chemistry methods. Naturally existing or artificially synthesized templates with unique structures and morphologies have been used to fabricate nanostructured materials with the same structural and morphological characteristics as the templates. Recent advances in characterization techniques have provided information on the structure, the surface and bulk chemistry of nanoparticles, and the structures and chemistry of exposed and buried surfaces of coatings. Contributors are drawn from Canada, France, UK, USA, Belarus, Russia and Ukraine.

**This Is Not a Program** Tiqqun.2011-05-06 An urgent critique of the biopolitical subject and omnipresent Empire. Historical conflict no longer opposes two massive molar heaps, two classes—the exploited and the exploiters, the dominant and dominated, managers and workers—between which, in each individual case, it would be possible to differentiate. The front line no longer cuts through the middle of society; it now runs through each one of us... “—from *This Is Not a Program* Traditional lines of revolutionary struggle no longer hold. Rather, it is ubiquitous cybernetics, surveillance, and terror that create the illusion of difference within hegemony. Configurations of dissent and the rhetoric of revolution are merely the other face of capital, conforming identities to empty predicates, ensuring that even “thieves,” “saboteurs,” and “terrorists” no longer exceed the totalizing space of Empire. *This Is Not a Program* offers two texts, both originally published in French by Tiqqun with Introduction to Civil War in 2001. In *This Is Not a Program*, Tiqqun outlines a new path for resistance and struggle in the age of Empire, one that eschews the worn-out example of France's May '68 in favor of what they consider to be the still fruitful and contemporary insurrectionary movements in Italy of the 1970s. “As a Science of Apparatuses” examines the way Empire has enforced on the subject a veritable metaphysics of isolation and pacification, “apparatuses” that include chairs, desks, computers; surveillance (security guards, cameras); disease (depression); crutch (cell phone, lover, sedative); and authority. Tiqqun's critique of the biopolitical subject and omnipresent Empire is all the more urgent as we become inured to the permanent state of exception that is the War on Terror and to other, no less intimate forms of pacification. But all is not lost. In its unrelenting production of the Same, Empire itself creates the conditions necessary for the insurrection to come.

**A Brief History of Neoliberalism** David Harvey.2007-01-04 Neoliberalism - the doctrine that market exchange is an ethic in itself, capable of acting as a guide for all human action - has become dominant in both thought and practice throughout much of the world since 1970 or so. Its spread has depended upon a reconstitution of state powers such that privatization, finance, and market processes are emphasized. State interventions in the economy are minimized, while the obligations of the state to provide for the welfare of its citizens are diminished. David Harvey, author of 'The New Imperialism' and 'The Condition of Postmodernity', here tells the political-economic story of where neoliberalization came from and how it proliferated on the world stage. While Thatcher and Reagan are often cited as primary authors of this neoliberal turn, Harvey shows how a complex of forces, from Chile to China and from New York City to Mexico City, have also played their part. In addition he explores the continuities and contrasts between neoliberalism of the Clinton sort and the recent turn towards neoconservative imperialism of George W. Bush. Finally, through critical engagement with this history, Harvey constructs a framework not only for analyzing the political and economic dangers that now surround us, but also for assessing the prospects for the more socially just alternatives being advocated by many oppositional movements.

Environment and Society Paul Robbins, John G. Hintz, Sarah A. Moore. 2022-03-17 A comprehensive yet accessible introduction to the conceptual tools used to explore real-world environmental problems. *Environment and Society: A Critical Introduction, Third Edition* demonstrates how theoretical approaches such as environmental ethics, political economy, and social construction work as conceptual tools to identify and clarify contemporary environmental issues. Assuming no background knowledge in the subject, this reader-friendly textbook uses clear language and engaging examples to first describe nine key conceptual tools, and then apply them to a variety of familiar objects—from bottled water and French fries to trees, wolves, and carbon dioxide. Throughout the text, highly accessible chapters provide insight into the relationship between the environment and present-day society. Divided into two parts, the text begins by explaining major theoretical approaches for interpreting the environment-society relationship and discussing different perspectives about environmental problems. Part II examines a series of objects, each viewed through a sample of the theoretical tools from Part I, helping readers think critically about critical environmental topics such as deforestation, climate change, the global water supply, and hazardous e-waste. This fully revised third edition stresses a wider range of competing ways of thinking about environmental issues and features additional cases studies, up-to-date conceptual understandings, and new chapters in Part I on racialized environments and feminist approaches.

*Environment and Society: A Critical Introduction, Third Edition*: Covers theoretical lenses such as commodities, environmental ethics, and risks and hazards, and applies them to touchstone environment-society objects like wolves, tuna, trees, and carbon dioxide. Features substantial revisions and updates, including new chapters on feminism and race, and improved maps and illustrations. Includes a wealth of in-book and online resources, including exercises and boxed discussions, chapter summaries, review questions, references, suggested readings, an online test bank, and internet links. Provides additional instructor support such as suggested teaching models, full-color PowerPoint slides, and supplementary teaching material. Retaining the innovative approach of its predecessors, *Environment and Society: A Critical Introduction, Third Edition* remains the ideal textbook for courses in environmental issues, environmental science, and nature and society theory.

John Calvin's Doctrine of the Christian Life John H. Leith. 2010-03-01 In this thorough investigation of Calvinist doctrine, John Leith defines the Reformer's teaching on Christian life in the context of his theology. He begins with a discussion of what it means to say that the purpose of Christian life is the glory of God. He then discusses Christian life in relation to four aspects of Calvinist thought: justification by faith alone; providence and predestination; history and the transhistorical; church and society. Leith's concluding statement summarizes the importance of this book. Calvin's doctrine of the Christian life represents a magnificent effort to give expression to what it means to have to do with the living God every moment of one's life. No interpretation of the sola gloria Dei [only God's glory] has been more vivid and dynamic than Calvin's. For this reason he speaks to the needs of this generation, which, at least until recently, has been more frequently concerned about the glory of humankind than that of God and which has fallen victim to many false gods and vicious ideologies. Yet if Calvinism is to render its full service to our day, it must be interpreted in the context of the shared faith of the total Christian community. On the basis of Calvin's own principles, no human statement of Christian faith can ever

be final and must be continually reformed by the Christian community's apprehension of the word of God as revealed in Jesus Christ.
