Expanding Addiction: Critical Essays Robert Granfield,Craig Reinerman.2014-12-09 The study of addiction is dominated by a narrow disease ideology that leads to biological reductionism. In this short volume, editors Granfield and Reinerman make clear the importance of a more balanced contextual approach to addiction by bringing to light critical perspectives that expose the historical and cultural interstices in which the disease concept of addiction is constructed and deployed. The readings selected for this anthology include both classic foundational pieces and cutting-edge contemporary works that constitute critical addiction studies. This book is a welcome addition to drugs or addiction courses in sociology, criminal justice, mental health, clinical psychology, social work, and counseling.

The SAGE Encyclopedia of Communication Research Methods Mike Allen.2017-04-11 Communication research is evolving and changing in a world of online journals, open-access, and new ways of obtaining data and conducting experiments via the Internet. Although there are generic encyclopedias describing basic social science research methodologies in general, until now there has been no comprehensive A-to-Z reference work exploring methods specific to communication and media studies. Our entries, authored by key figures in the field, focus on special considerations when applied specifically to communication research, accompanied by engaging examples from the literature of communication, journalism, and media studies. Entries cover every step of the research process, from the creative development of research topics and questions to literature reviews, selection of best methods (whether quantitative, qualitative, or mixed) for analyzing research results and publishing research findings, whether in traditional media or via new media outlets. In addition to expected entries covering the basics of theories and methods traditionally used in communication research, other entries discuss important trends influencing the future of that research, including contemporary practical issues students will face in communication professions, the influences of globalization on research, use of new recording technologies in fieldwork, and the challenges and opportunities related to studying online multi-media environments. Email, texting, cellphone video, and blogging are shown not only as topics of research but also as means of collecting and analyzing data. Still other entries delve into considerations of accountability, copyright, confidentiality, data ownership and security, privacy, and other aspects of conducting an ethical research program. Features: 652 signed entries are contained in an authoritative work spanning four volumes available in choice of electronic or print formats. Although organized A-to-Z, front matter includes a Reader's Guide grouping entries thematically to help students interested in a specific aspect of communication research to more easily locate directly related entries. Back matter includes a Chronology of the development of the field of communication research; a Resource Guide to classic books, journals, and associations; a Glossary introducing the terminology of the field; and a detailed Index. Entries conclude with References/Further Readings and Cross-References to related entries to guide students further in their research journeys. The Index, Reader's Guide themes, and Cross-References combine to provide robust search-and-browse in the e-version.

The Age of Sustainable Development Jeffrey D. Sachs.2015-03-03 Jeffrey D. Sachs is one of the world's most perceptive and original analysts of global development. In this major new work he presents a compelling and practical framework for how global citizens can use a holistic way forward to address the seemingly intractable worldwide problems of persistent extreme poverty, environmental degradation, and political-economic injustice: sustainable development. Sachs offers readers, students, activists, environmentalists, and policy makers the tools, metrics, and practical pathways they need to achieve Sustainable Development Goals. Far more than a rhetorical exercise, this book is designed to inform, inspire, and spur action. Based on Sachs's twelve years as director of the Earth Institute at Columbia University, his thirteen years advising the United Nations secretary-general on the Millennium Development Goals, and his recent presentation of these ideas in a popular online course, *The Age of Sustainable Development* is a landmark publication and clarion call for all who care about our planet and global justice.

Mass Communication Theory Denis McQuail.1983 The major textbook in communication theory. Denis McQuail provides a brisk, elegantly organized, and comprehensive overview of the ways in which mass communication has been viewed by social scientists and by practitioners. The wealth of thinking in the field; the enormous range of issues studied and questions raised; the proliferation of schools, approaches and tendencies: McQuail marshalls this welter of material into a clear, easy to follow textbook for students at all levels of communication studies. He reviews: ways in which the the mass media have been defined theories of their function and purpose views of the organizational structures and processes of mass media content analysis and the other techniques for interpreting the meaning of media content theories of what an audience is

and what it does Cultivation theory, traditional sociology, classical marxism, the Frankfurt school, 'hegemony' theory, Soviet media theory, the uses and gratifications approach, development media theory, free press theory, organizational theory -- all these and much more -- are described and placed in their historical and scholarly context. McQuail's extensive references will guide anyone interested in mass communication to the key work in the field. Diagrams, a Media Theory Map, summaries, indexes and other features will further help new students to keep a hold on all the separate strands in the field. About the author: Denis McQuail is currently Professor of Mass Communication, University of Amsterdam, the Netherlands. After graduating from Corpus Christi College, Oxford with a BA in Modern History and a Diploma in Public and Social Administration, he received a PhD in social studies from the University of Leeds. He has since been affiliated to the Television Research Unit, University of Leeds; the University of Southampton; and the Annenberg School of Communication, University of Pennsylvania. His major publications include: *Television and the Political Image* (with J Trenaman) 1961; *Television in Politics: Its Use and Influence* (with J G Blumler), 1968; *Towards a Sociology of Mass Communications*, 1968; *Sociology of Mass Communication* (editor) 1972; *Communication*, 1975; *Review of Sociological Writing on the Press*, 1976; *Analysis of Newspaper Content*, 1977; *Communication Models for the Study of Mass Communication* (with Sven Windahl), 1982. Why this textbook? Why choose this textbook for use in your courses over others that are available? McQuail has drawn on his own extensive teaching experience to make sure his book offers the following qualities and features: The frameworks: for ease of organization, McQuail arranges the theories of media effect processes, or mass media and social change in new, clarifying frameworks. He aims to present all the principal theories within a single integrative framework. Its range: McQuail's extraordinary feat of organization encompasses theories from all the principal approaches to communication from all over the world. His book will be useful in a variety of cultural and national settings. Its thoroughness: McQuail provides over 300 references to guide your students to the primary sources. Not only is each theory described, and its sources and histories plotted, but its implications and intellectual context are explored. Consensus theories are given equal weight with themore contentious, critical understandings. Controversy is faced, fairness maintained. Its currency: The most recent research is expressed in the form of theoretical propositions. New approaches are discussed that are not reviewed in other textbooks: a revision of the functional theory, the notion of emerging 'public definitions', and a revision of the 'four theories of the press'. Other unique features: A thorough review of theories of the audience. Questions of media power and normative theories of media are given a central place at various points. Professor Denis McQuail provides a thorough review of the history, structure, and processes of the mass media, and the views taken of them. The first chapter defines the terms and issues of mass media studies. It also traces the development of mass media since the first newspapers in the 17th century. McQuail notes the origins, typical forms, and applications of mass media at different times. He then provides a framework for understanding the different approaches to the study of mass media. Mass society theory, Marxist approaches of different types, message-centred theory, and theory of audience and effect are the perspectives reviewed. Chapter Three explores the ideological, political, and cultural contexts in which the mass media operates, and which define the media's functions. The institutional forms of mass communication are characterized in Chapter Four. In Chapter Five, the meaning of the information provided by the media is analyzed. Different kinds of content, such as news or fiction, are examined from different theoretical perspectives. Chapter Six describes alternative approaches to the study ofthe audience, the different aspects of audiences which they study, and the conclusions they have reached. Chapter Seven focusses on the study of the impact and effect of media. Different scientific approaches to this study are described, and the results of this research given. The final chapter looks at the lessons of mass communication study for issues of current concern such as international communication and new technological developments.

An Historian in Peace and War T.G. Otte. 2016-04-15 The First World War and subsequent peace settlement shaped the course of the twentieth century, and the profound significance of these events were not lost on Harold Temperley, whose diaries are presented here. An established scholar, and later one of Britain's foremost modern and diplomatic historians, Temperley enlisted in the army at the outbreak of the war in August 1914. Invalided home from the Dardanelles campaign in 1915, he spent the remainder of the war and its aftermath as a general staff officer in military intelligence. Here he played a significant role in preparing British strategy for the eventual peace conference and in finalising several post-war boundaries in Eastern Europe. Later, in the 1920s and 1930s, Temperley was to co-edit the British diplomatic documents on the origins of the war; and the vicissitudes of modern Great Power politics were to be his principal preoccupation. Beginning in June 1916, the diary presents a more or less daily record of Temperley's activities and observations throughout the war and subsequent peace negotiations. As a professional historian he appreciated the significance of eyewitness accounts, and if Temperley was not at the very heart of Allied decision-making during those years, he certainly had a ringside seat. Trained to observe accurately, he recorded the concerns and confusions of wartime, conscious always of the historical significance of what he observed. As a result there are few sources that match Temperley's diary, which presents a fascinating and unique perspective upon the politics and diplomacy of the First World War and its aftermath.

unprecedented economic, social, and spatial structural change. Today, we find ourselves at the juncture between entering a post-urban and a post-political world, both presenting new challenges to our metropolitan regions, municipalities, and cities. Many megacities, declining regions and towns are experiencing an increase in the number of complex problems regarding internal relationships, governance, and external connections. In particular, a growing disparity exists between citizens that are socially excluded within declining physical and economic realms and those situated in thriving geographic areas. This book conveys how forces of structural change shape the urban landscape. In *The Post-Urban World* is divided into three main sections: Spatial Transformations and the New Geography of Cities and Regions; Urbanization, Knowledge Economies, and Social Structuration; and New Cultures in a Post-Political and Post-Resilient World. One important subject covered in this book, in addition to the spatial and economic forces that shape our regions, cities, and neighbourhoods, is the social, cultural, ecological, and psychological aspects which are also critically involved. Additionally, the urban transformation occurring throughout cities is thoroughly discussed. Written by today's leading experts in urban studies, this book discusses subjects from different theoretical standpoints, as well as various methodological approaches and perspectives; this is alongside the challenges and new solutions for cities and regions in an interconnected world of global economies. RFID for Libraries M. Paul Pandian. 2010-11-18 Many modern technologies give the impression that they somehow work by magic, particularly when they operate automatically and their mechanisms are invisible. A technology called RFID (Radio Frequency Identification), which is relatively new, has exactly this characteristic. Librarians everywhere are closely watching RFID technology. Advances over using bar codes on library materials, RFID tags are being touted as a way to radically redesign how library materials are handled. But it is expensive. The tags are vulnerable to wear and tear and the technology is not fully developed. It's unclear what sort of return on investment (ROI) it provides. While it is common for libraries to now have information technology expertise within their organizations, RFID may appear unfamiliar. *RFID for Libraries: A practical guide* examines what RFID technology is and how it works. The book reviews the development of computer technology and its effects on library operations over the last couple of decades. Further examination features the applications of RFID technology in libraries. An assessment of current implementations in libraries and the lessons learnt provides suggestions to overcome the issues faced. Concluding chapters look into the future to see what developments might be possible with RFID in libraries. Benefiting from the rich experience the author has gained during recent implementation of RFID based system for his library and the important title aids the library and information community in understanding RFID technology from a library perspective. Written by a librarian who has recently implemented the RFID system for his library Comprehensive review of available RFID systems for libraries Step by step guidelines for successful implementation of RFID systems in the library

Statistika Untuk Penelitian Pendidikan dan Ilmu-Ilmu Sosial Dr. H. Fajri Ismail, M.Pd. 2018-09-01 Penulis merasakan mahasiswa belum mampu memahami teks-teks buku statistik secara utuh. Sering pula terlihat mahasiswa masih kesulitan dalam memilih rumus statistik dalam analisis data kuantitatif. Ini disebabkan karena mereka belum mampu membedakan desain penelitian korelasional serta komparatif, jenis data dan variabel penelitian. Implikasinya adalah kualitas tulisan karya ilmiah mahasiswa dalam bentuk makalah dan skripsi masih jauh dari kaidah-kaidah metodologi penelitian dan penggunaan rumus-rumus statistik. Untuk itu, penulis berusaha untuk membahas secara komprehensif mengenai penggunaan rumus statistik. Pada bagian uji statistik satu sampel selain dibahas uji t dan uji z sebagai statistik parametrik, juga dibahas rumus uji bertanda Wilcoxon, Binomial, Uji Kecocokan Kai Kuadrat, dan sebagainya. Pada bagian uji perbandingan atau komparatif, selain uji t, juga dibahas Mann Whitney, Kolmogorov-Smirnov sebagai bagian dari statistik non-parametrik. Pada analisis varian juga dibahas uji Kruskal-Wallis, Uji Siegel Tukey dan uji lainnya. Pada desain korelasional, selain membahas rumus uji Product Moment sebagai statistik Parametrik, juga dibahas uji bertingkat Spearman, Kendall Tau, Uji Koefisien Kontingensi dan Point Biserial sebagai bagian statistik parametrik. Tidak lupa untuk memperkaya khazanah penelitian, sengaja di awal pembahasan penulis menyajikan tentang ilmu yang berkaitan dengan metodologi penelitian dengan harapan pembaca mendapatkan pengetahuan metodologi penelitian yang menurut penulis sangat erat kaitannya dengan statistik Di akhir buku ini juga disajikan pembahasan tentang analisis regresi dan analisis jalur yang insya Allah memberikan pengetahuan kepada pembaca dalam mengolah data multivariat. ----- Buku referensi tentang statistik / statistika persembahkan penerbit Kencana (PrenadiamediaGroup)

Realising REDD+ Arild Angelsen.2009-01-01 REDD+ must be transformational. REDD+ requires broad institutional and governance reforms, such as tenure, decentralisation, and corruption control. These reforms will enable departures from business as usual, and involve communities and forest users in making and implementing policies that affect them. Policies must go beyond forestry. REDD+ strategies must include policies outside the forestry sector narrowly defined, such as agriculture and energy, and better coordinate across sectors to deal with non-forest drivers of deforestation and degradation. Performance-based payments are key, yet limited. Payments based on performance directly incentivise and compensate forest owners and users. But schemes such as payments for environmental services (PES) depend on conditions, such as secure tenure, solid carbon data and transparent governance, that are often lacking and take time to change. This constraint reinforces the need for broad institutional and policy reforms. We must learn from the past. Many approaches to REDD+ now being considered are similar to previous efforts to conserve and better manage forests, often with limited success. Taking on board lessons learned from past experience will improve the prospects of REDD+ effectiveness. National circumstances and uncertainty must be factored in. Different country contexts will create a variety of REDD+ models with different institutional and policy mixes.

Uncertainties about the shape of the future global REDD+ system, national readiness and political consensus require flexibility and a phased approach to REDD+ implementation.
