Spaces of Tolerance Luiza Bialasiewicz,Valentina Gentile.2019-10-16 This book offers interdisciplinary and cross-national perspectives on the challenges of negotiating the contours of religious tolerance in Europe. In today's Europe, religions and religious individuals are increasingly framed as both an internal and external security threat. This is evident in controls over the activities of foreign preachers but also, more broadly, in EU states' management of migration flows, marked by questions regarding the religious background of migrating non-European Others. This book addresses such shifts directly by examining how understandings of religious freedom touch down in actual contexts, places, and practices across Europe, offering multidisciplinary insights from leading thinkers from political theory, political philosophy, anthropology, and geography. The volume thus aims to ground ideal liberal democratic theory and, at the same time, to bring normative reflection to grounded, ethnographic analyses of religious practices. Such 'grounded' understandings matter, for they speak to how religions and religious difference are encountered in specific places. They especially matter in a European context where religion and religious difference are increasingly not just securitised but made the object of violent attacks. The book will be of interest to students and scholars of politics, philosophy, geography, religious studies, and the sociology and anthropology of religion.

Red Kant: Aesthetics, Marxism and the Third Critique Michael Wayne.2014-09-25 Is Kant really the 'bourgeois' philosopher that his advocates and opponents take him to be? In this bold and original re-thinking of Kant, Michael Wayne argues that with his aesthetic turn in the Third Critique, Kant broke significantly from the problematic philosophical structure of the Critique of Pure Reason. Through his philosophy of the aesthetic Kant begins to circumnavigate the dualities in his thought. In so doing he shows us today how the aesthetic is a powerful means for imagining our way past the apparent universality of contemporary capitalism. Here is an unfamiliar Kant: his concepts of beauty and the sublime are reinterpreted as attempts to socialise the aesthetic while Wayne reconstructs the usually hidden genealogy between Kant and important Marxist concepts such as totality, dialectics, mediation and even production. In materialising Kant's philosophy, this book simultaneously offers a Marxist defence of creativity and imagination grounded in our power to think metaphorically and in Kant's concept of reflective judgment. Wayne also critiques aspects of Marxist cultural theory that have not accorded the aesthetic the relative autonomy and specificity which it is due. Discussing such thinkers as Adorno, Bourdieu, Colletti, Eagleton, Lukács, Rancière and others, Red Kant: Aesthetics, Marxism and the Third Critique presents a new reading of Kant's Third Critique that challenges Marxist and mainstream assessments of Kant alike.

The Teleology of Reason Courtney D. Fugate.2015-02-17 This work argues that teleological motives lie at the heart of Kant's critical philosophy and that a precise analysis of teleological structures can both illuminate the basic strategy of its fundamental arguments and provide a key to understanding its unity. It thus aims, through an examination of each of Kant's major writings, to provide a detailed interpretation of his claim that philosophy in the true sense must consist of a teleologia rationis humanae. The author argues that Kant's critical philosophy forged a new link between traditional teleological concepts and the basic structure of rationality, one that would later inform the dynamic conception of reason at the heart of German Idealism. The process by which this was accomplished began with Kant's development of a uniquely teleological conception of systematic unity already in the precritical period. The individual chapters of this work attempt to show how Kant adapted and refined this conception of systematic unity so that it came to form the structural basis for the critical philosophy.

Objectivity After Kant Gertrudis van de Vijver,Boris Demarest.2013 The constraint is the possibility--this was the idea behind a conference that took place in Gent (Belgium) in 2010, under the title Yes we Kant! Critical reflections on objectivity, and where many of the papers included in this volume were first presented. The questions addressed there all regarded the nature and meaning of objectivity, and how and whether Immanuel Kant's theory of constitution can still prove relevant to such philosophical concerns. This involves, of course, careful exegesis of Kant's works, but as the Prussian sage himself recognized: it is the spirit, and not the letter of a philosopher's oeuvre, that one should seek to grasp. This volume, then, seeks to explore to what extent the idea that the constraint is the possibility captures the spirit of transcendental philosophy. In the Critique of Pure Reason, this idea finds expression in the metaphor of the dove, who regrets that air resistance keeps him from flying ever higher, but forgets that it is this same resistance that keeps him aloft. In much the same way, the limitations and constraints on knowledge may be the very conditions of possibility for objectivity, and not the reasons for its impossibility.

Domain Engineering Iris Reinhartz-Berger,Arnon Sturm,Tony Clark,Sholom Cohen,Jorn Bettin.2013-08-13 Domain engineering is a set of activities intended to develop, maintain, and manage the creation and evolution of an area of knowledge suitable for processing by a range of software systems. It is of considerable practical significance, as it provides methods and techniques that help reduce time-to-market, development costs, and project risks on one hand, and helps improve system quality and performance on a consistent basis on the other. In this book, the editors present a collection of invited chapters from various fields related to domain engineering. The individual chapters present state-of-the-art research and are organized in three parts. The first part focuses on results that deal with domain engineering in software product lines. The second part describes how domain-specific languages are used to support the construction and deployment of domains. Finally, the third part presents contributions dealing with domain engineering within the field of conceptual modeling. All chapters utilize a similar terminology, which will help readers to understand and relate to the chapters content. The book will be especially rewarding for researchers and students of software engineering methodologies in general and of domain engineering and its related fields in particular, as it contains the most comprehensive and up-to-date information on this topic.

Hegel's Critique of Kant Sally Sedgwick.2012-03-29 Sally Sedgwick presents a fresh account of Hegel's critique of Kant's theoretical philosophy. She argues that Hegel offers a compelling critique of and alternative to the conception of cognition that Kant defended in his 'Critical' period. The book examines key features of what Kant identifies as the 'discursive' character of our mode of cognition, and considers Hegel's reasons for arguing that these features condemn Kant's theoretical philosophy to scepticism as well as dualism. Sedgwick goes on to present in a sympathetic light Hegel's claim to derive from certain Kantian doctrines clues to a superior form of idealism, a form of idealism that better captures the nature of our cognitive powers and their relation to objects.

A Story of the Soul's Journey in the Nag Hammadi Library Ulla Tervahauta.2015-08-19 Authentikos Logos (NHC VI,3), also known as Authoritative Teaching,is a little studied story of a soul's descent and ascent in the Nag Hammadi library. With her book Ulla Tervahauta fills a gap in the scholarship and provide the first monograph-length study that has this writingas its primary focus. The aim is to find a place and context for Authentikos Logos within early Christianity, but Tervahauta also adds new insight into the scholarship of the Nag Hammadi Library and study of early Christianity. Contrary to the usual discussion of the Nag Hammadi writings from the viewpoint of Gnostic studies, she argues that Authentikos Logos is best approached from the context of Christian traditions of late ancient Egypt between the third and the fifth centuries.Tervahauta discusses the story of the soul's journey in light of various Christian and Platonic writings. Also, she analyses the relationship of Authentikos Logos with the Valentinian Wisdom myth and suggests that no firm evidence connects the writing closely with Valentinian traditions. And although a Platonic mind-set can be assumed, the writing combines motifs in a unique manner. For example, the four epithets used in the writing - the invisible soul, the pneumatic soul, the material soul, and the rational soul - are not found thus combined elsewhere. Discussion of matter (hyle) is connected with Christian scriptural allusions and the focus is on ethics and the evilness of matter. The body, on the other hand, is the soul's place of contest and progress. The Pauline term pneumatic body (1 Cor 15:44) is used allusively and from a Platonic perspective. With this book Ulla Tervahauta makes an important contribution to the study of early Christianity in late ancient Egypt by discussing a writing thatshows knowledge and creative combination of literary traditions that circulated in late ancient Egypt.
