Instigations Ezra Pound, Ernest Fenollosa. 2014-12-04 Ezra Pound (1885 - 1972) was an American poet and harsh critic following World War I. Pound was also a key contributor to the Modernist movement. One of Pound's most famous works is *Instigations* which is a series of essays critiquing a variety of writers and books.

Cookery and Dining in Imperial Rome Apicius. 2019-11-20 *Cookery and Dining in Imperial Rome* by Apicius is the oldest known cookbook in existence. There are recipes for cooking fish and seafood, game, chicken, pork, veal, and other domesticated animals and birds, for vegetable dishes, grains, beverages, and sauces; virtually the full range of cookery is covered. There are also methods for preserving food and revitalizing them in ways that are surprisingly still relevant.

The Cohesion of Oppression Catharine Newbury. 1988 Focusing on Kenya and Tanzania, this important study suggests that the solution to third world hunger lies in the interaction of political development and the mobilization of technical resources. The book clarifies as never before the role of political institutions in successful new technology diffusion; shows the similarities between capitalist and socialist states' approaches to technology; and traces the development of assistance projects.

Testimonios: Stories of Latinx and Hispanic

Mathematicians Pamela E. Harris. 2021-08-16 *Testimonios* brings together first-person narratives from the vibrant, diverse, and complex Latinx and Hispanic mathematical community.

Starting with childhood and family, the authors recount their own individual stories, highlighting their upbringing, education, and career paths. Their particular stories, told in their own voices, from their own perspectives, give visibility to some of the experiences of Latinx/Hispanic mathematicians. Testimonios seeks to inspire the next generation of Latinx and Hispanic mathematicians by featuring the stories of people like them, holding a mirror up to our own community. It also aims to provide a window for mathematicians (and aspiring mathematicians) from all ethnicities, with the hope of inspiring a better understanding of the diversity of the mathematical community.

Black Skin, White Masks Frantz Fanon. 2017 Black Skin, White Masks is a classic, devastating account of the dehumanising effects of colonisation experienced by black subjects living in a white world. First published in English in 1967, this book provides an unsurpassed study of the psychology of racism using scientific analysis and poetic grace. Franz Fanon identifies a devastating pathology at the heart of Western culture, a denial of difference, that persists to this day. A major influence on civil rights, anti-colonial, and black consciousness movements around the world, his writings speak to all who continue the struggle for political and cultural liberation. With an introduction by Paul Gilroy, author of *There Ain't No Black in the Union Jack*.

The Invention of Africa V. Y. Mudimbe. 1988-05-22 What is the meaning of Africa and being an African? What is and what is not African philosophy? Is philosophy part of Africanism? These are the kinds of fundamental questions that this book addresses. V. Y. Mudimbe argues that the various discourses themselves establish the worlds of thought in which people conceive their identity. Western anthropology and missionaries have introduced distortions not only for outsiders but also for Africans trying to understand themselves. Mudimbe goes beyond the classic issues of African anthropology or history. He says that the book attempts an archeology of African gnosis as a system of knowledge in

which major philosophical questions recently have arisen: first, concerning the form, the content, and the style of Africanizing knowledge; second, concerning the status of traditional systems of thought. He is directly concerned with the processes of transformation of different types of knowledge. -- P. 4 of cover.

Intangible Heritage Laurajane Smith, Natsuko

Akagawa.2008-12-03 This volume examines the implications and consequences of the idea of 'intangible heritage' to current international academic and policy debates about the meaning and nature of cultural heritage and the management processes developed to protect it. It provides an accessible account of the different ways in which intangible cultural heritage has been defined and managed in both national and international contexts, and aims to facilitate international debate about the meaning, nature and value of not only intangible cultural heritage, but heritage more generally. Intangible Heritage fills a significant gap in the heritage literature available and represents a significant cross section of ideas and practices associated with intangible cultural heritage. The authors brought together for this volume represent some of the key academics and practitioners working in the area, and discuss research and practices from a range of countries, including: Zimbabwe, Morocco, South Africa, Japan, Australia, United Kingdom, the Netherlands, USA, Brazil and Indonesia, and bring together a range of areas of expertise which include anthropology, law, heritage studies, archaeology, museum studies, folklore, architecture, Indigenous studies and history.

6th International Conference on the Conservation of Earthen Architecture The Getty Conservation Institute.1991-02-28 On October 14-19, 1990, the 6th International Conference on the Conservation of Earthen Architecture was held in Las Cruces, New Mexico. Sponsored by the GCI, the Museum of New Mexico State Monuments, ICCROM, CRATerre-EAG, and the National Park Service, under the aegis of US/ICOMOS, the event was

organized to promote the exchange of ideas, techniques, and research findings on the conservation of earthen architecture. Presentations at the conference covered a diversity of subjects, including the historic traditions of earthen architecture, conservation and restoration, site preservation, studies in consolidation and seismic mitigation, and examinations of moisture problems, clay chemistry, and microstructures. In discussions that focused on the future, the application of modern technologies and materials to site conservation was urged, as was using scientific knowledge of existing structures in the creation of new, low-cost, earthen architecture housing.

Antecedents to Modern Rwanda Jan Vansina.2005-03-09 To understand the genocide and other dramatic events of Rwanda's recent past, one must understand the history of the earlier realm. Jan Vansina provides a critique of the history recorded by early missionaries and court historians and provides a bottom-up view, drawing on hundreds of grassroots narratives. He describes the genesis of the Hutu and Tutsi identities, their growing social and political differences, their bitter feuds, revolts, and massacres, and the relevance of this dramatic history to the post-genocide Rwanda of today. 2001 French edition, Katharla Publishers

Heritage Regimes and the State Bendix, Regina,Eggert, Aditya,Peselmann, Arnika.2013-07-02 What happens when UNESCO heritage conventions are ratified by a state? How do UNESCO's global efforts interact with preexisting local, regional and state efforts to conserve or promote culture? What new institutions emerge to address the mandate? The contributors to this volume focus on the work of translation and interpretation that ensues once heritage conventions are ratified and implemented. With seventeen case studies from Europe, Africa, the Caribbean and China, the volume provides comparative evidence for the divergent heritage regimes generated in states that differ in history and political organization. The cases

illustrate how UNESCO's aspiration to honor and celebrate cultural diversity diversifies itself. The very effort to adopt a global heritage regime forces myriad adaptations to particular state and interstate modalities of building and managing heritage.

The Chinese Written Character as a Medium for Poetry Ernest Fenollosa, Ezra Pound, Jonathan Stalling, Lucas Klein. 2009-08-25

First published in 1919 by Ezra Pound, Ernest Fenollosa's essay on the Chinese written language has become one of the most often quoted statements in the history of American poetics. As edited by Pound, it presents a powerful conception of language that continues to shape our poetic and stylistic preferences: the idea that poems consist primarily of images; the idea that the sentence form with active verb mirrors relations of natural force. But previous editions of the essay represent Pound's understanding—it is fair to say, his appropriation—of the text. Fenollosa's manuscripts, in the Beinecke Library of Yale University, allow us to see this essay in a different light, as a document of early, sustained cultural interchange between North America and East Asia. Pound's editing of the essay obscured two important features, here restored to view: Fenollosa's encounter with Tendai Buddhism and Buddhist ontology, and his concern with the dimension of sound in Chinese poetry. This book is the definitive critical edition of Fenollosa's important work. After a substantial Introduction, the text as edited by Pound is presented, together with his notes and plates. At the heart of the edition is the first full publication of the essay as Fenollosa wrote it, accompanied by the many diagrams, characters, and notes Fenollosa (and Pound) scrawled on the verso pages. Pound's deletions, insertions, and alterations to Fenollosa's sometimes ornate prose are meticulously captured, enabling readers to follow the quasi-dialogue between Fenollosa and his posthumous editor. Earlier drafts and related talks reveal the development of Fenollosa's ideas about culture, poetry, and translation. Copious multilingual annotation is an important feature of the edition.

This masterfully edited book will be an essential resource for scholars and poets and a starting point for a renewed discussion of the multiple sources of American modernist poetry.

Safeguarding Traditional Cultures Peter Seitel. 2001 Proceedings from a conference A global assessment of the 1989 recommendation on the safeguarding of traditional culture and folklore held at the Smithsonian Institution June 27-30 1999. The purpose of the conference was to assess the implementation of the Recommendation (an international normative instrument adopted by UNESCO in 1989), to bring together points of view and perspectives on the Recommendation from around the world, and suggest ways in which the Recommendation might develop in the future so that its purpose, the safeguarding of traditional culture and folklore, might be achieved.

Eliza Calvert Hall Lynn E. Niedermeier. 2007-01-01 In 1907, author, poet, essayist, and folk art historian Eliza Calvert Hall (1856–1935) published *Aunt Jane of Kentucky*, a collection of stories about rural life infused with the spirit and gentle good humor of its elderly narrator, Aunt Jane. The book and several sequels achieved wide popularity, reaching an estimated one million readers in her lifetime, and placed Hall in the front ranks of “local color” fiction writers of her time. Eliza Calvert Hall’s life and work unfolded during a time of restlessness and change for American women. Born Eliza “Lida” Calvert in Bowling Green, Kentucky, Hall experienced the upheaval of both the Civil War and family scandal. Forced to help support her mother and four siblings by teaching school, she became a published poet, adopting her grandmother’s name, Hall, as her pseudonym. At twenty-nine, she married William A. Obenchain, and in the space of eight years gave birth to four children. As Hall struggled to balance her writing career with the duties of a nineteenth-century wife and mother, suffragist Laura Clay was lobbying for every woman’s right to vote. Hall joined the battle, writing fearlessly in support of suffrage and equality. While her passionate essays

served as a direct appeal for this cause, her creative writing also carried a feminist spirit, celebrating the strength, humor, love, and art of the common woman. In *Eliza Calvert Hall: Kentucky Author and Suffragist*, Lynn E. Niedermeier tells the story of this remarkable Kentuckian for the first time. Hall's challenge was to balance the artist's creative ambitions with the crusader's passion for achieving the goal of political equality for American women. Her successes did not stem from privilege or leisure; although she was an acclaimed writer, Hall was an ordinary woman, a wife and mother of moderate economic means. Through the power of her words, she challenged others to match her courage, independence, intellectual energy, and loyalty to her sex.

Lost Libraries J. Raven.2004-01-31 This pioneering volume of essays explores the destruction of great libraries since ancient times and examines the intellectual, political and cultural consequences of loss. Fourteen original contributions, introduced by a major re-evaluative history of lost libraries, offer the first ever comparative discussion of the greatest catastrophes in book history from Mesopotamia and Alexandria to the dispersal of monastic and monarchical book collections, the Nazi destruction of Jewish libraries, and the recent horrifying pillage and burning of books in Tibet, Bosnia and Iraq.

The Economic Ethics of World Religions and Their Laws Andreas E. Buss.2015 Based on analyses of the essays written by Max Weber on China, India, ancient Judaism and also on the dispersed material about Islam, Eastern Christianity and Occidental Christianity, this book examines the economic ethics of Asian and Christian traditions and their corresponding legal systems.

Drawing also on Weber's methodology (particularly the concept of adequate causation), the author reveals that the nature of Asian religions as well as the nature of customary and other not formally rational laws in Asian cultures could not lead to modern capitalism out of their own sources, although capitalism could be adopted from the outside. The culture of the Occident, upon which capitalism is based, is revealed to consist of a double rationalisation: the formal rationality of the exterior circumstances of life (administrative and legal) and the innerworldly practical rationality of the inner motivations of the Protestants, supported by a goal-oriented rational technology.

Nanotechnologies, Ethics and Politics H. ten Have.2007

Research in technologies at the atomic and molecular levels is rapidly growing worldwide. Their promising applications in medicine, manufacturing and communication range from the development of new drugs and diagnostic tools to pollutant removal and prevention, as well as to the production of stronger and lighter materials and revolutionary ways of storing, retrieving and disseminating information. Public opinion about nanotechnologies is already divided between hopes nourished by their potential benefits and the fear of their possible harmful effects on the environment and humankind. In the face of this divide, *Nanotechnologies, Ethics and Politics* engages in a rare kind of prospective ethical revolution: What health and environmental issues arise with the use of new materials produced by nanoscale technologies? How might nanoscale devices be controlled, and what concerns attend military and biomedical applications of nanotechnologies? What opportunities might these bring for international cooperation addressing the most pressing needs of developing countries? This volume brings together 14 experts from around the globe - advisors to the World Commission on the Ethics of Scientific Knowledge and Technology (COMEST) - who discuss the state of the art of nanotechnology, examine the controversy surrounding its

definition and explore related ethical and political issues. The aim is stimulate a fruitful interdisciplinary dialogue about nanoscale technologies among scientists, ethicists, policymakers, special interest groups and the general public.

Célébrons Nos Réussites Féministes Karen Blackford, Marie-Luce Garceau, Sandra Kirby. 1999 Abuses by international corporations, withdrawal of social services and implementation of regressive legislation continue to impoverish women and reduce the quality of their everyday lives: women have reason to be demoralized. Recognizing this challenging and difficult situation, this volume reviews women's successes at feminizing Canadian institutions. It is intended to hearten the women's movement and show the potential for feminist change and suggest ways to realize this potential. Bilingual edition.

Safety Assessment of Transgenic Organisms .2006 These OECD Biosafety Consensus Documents identify elements of scientific information used in the environmental safety and risk assessment of transgenic organisms which are common to OECD member countries. This is intended to encourage information sharing and prevent duplication of effort among countries. This book offers ready access to those consensus documents which have been published thus far. As such, it should be of value to applicants for commercial uses of transgenic crops, regulators in national authorities as well as the wider scientific community. More information on.

Design First David Walters, Linda Brown. 2012-08-06 Well-grounded in the history and theory of Anglo-American urbanism, this illustrated textbook sets out objectives, policies and design principles for planning new communities and redeveloping existing urban neighborhoods. Drawing from their extensive experience, the authors explain how better plans (and consequently better places) can be created by applying the three-

dimensional principles of urban design and physical place-making to planning problems. Design First uses case studies from the authors' own professional projects to demonstrate how theory can be turned into effective practice, using concepts of traditional urban form to resolve contemporary planning and design issues in American communities. The book is aimed at architects, planners, developers, planning commissioners, elected officials and citizens -- and, importantly, students of architecture and planning -- with the objective of reintegrating three-dimensional design firmly back into planning practice.

Design Theory Pascal Le Masson, Benoit Weil, Armand Hatchuel. 2017-04-06 This textbook presents the core of recent advances in design theory and its implications for design methods and design organization. Providing a unified perspective on different design methods and approaches, from the most classic (systematic design) to the most advanced (C-K theory), it offers a unique and integrated presentation of traditional and contemporary theories in the field. Examining the principles of each theory, this guide utilizes numerous real life industrial applications, with clear links to engineering design, industrial design, management, economics, psychology and creativity. Containing a section of exams with detailed answers, it is useful for courses in design theory, engineering design and advanced innovation management. Students and professors, practitioners and researchers in diverse disciplines, interested in design, will find in this book a rich and vital source for studying fundamental design methods and tools as well as the most advanced design theories that work in practice. Professor Yoram Reich, Tel Aviv University, Editor-in-Chief, Research In Engineering Design. Twenty years of research in design theory and engineering have shown that training in creative design is indeed possible and offers remarkably operational methods - this book is indispensable for all leaders and practitioners who wish to strengthen the innovation capacity of their company. Children on the Move Mike Dottridge.2013 Millions of children are on the move, both within and between countries, with or without their parents. The conditions under which movement takes place are often treacherous, putting migrant children, especially unaccompanied and separated children, at an increased risk of economic or sexual exploitation, abuse, neglect and violence. Policy responses to protect and support these migrant children are often fragmented and inconsistent and while children on the move have become a recognised part of today's global and mixed migration flows they are still largely invisible in debates on both child protection and migration.

The Modernist Papers Fredric Jameson.2016-03-08 Cultural critic Fredric Jameson, renowned for his incisive studies of the passage of modernism to postmodernism, returns to the movement that dramatically broke with all tradition in search of progress for the first time since his acclaimed *A Singular Modernity*. *The Modernist Papers* is a tour de force of analysis and criticism, in which Jameson brings his dynamic and acute thought to bear on the modernist literature of the nineteenth and twentieth centuries. Jameson discusses modernist poetics, including intensive discussions of the work of Baudelaire, Rimbaud, Mallarmé, Wallace Stevens, Joyce, Proust, and Thomas Mann. He explores the peculiarities of the American literary field, taking in William Carlos Williams and the American epic, and examines the language theories of Gertrude Stein. Refusing to see modernism as simply a Western phenomenon he also pays close attention to its Japanese expression; while the complexities of a late modernist representation of twentieth-century politics are articulated in a concluding section on Peter Weiss's novel *The Aesthetics of Resistance*. Challenging our previous understanding of the literature of this period, this monumental work will come

to be regarded as the classic study of modernism.

The Cultural Worlds of the Jesuits in Colonial Latin America Linda Newson. 2020-06-30 2017 marked the 250-year anniversary of the expulsion of the Jesuits from Spanish territories. The Jesuits made major contributions to the cultural and intellectual life of Latin America. When they were expelled in 1767 the Jesuits were administering over 250,000 Indians in over 200 missions. The Jesuits pioneered interest in indigenous languages and cultures, compiling dictionaries and writing some of the earliest ethnographies of the region. They also explored the region's natural history and made significant contributions to the development of science and medicine. On their estates and in the missions they introduced new plants, livestock, and agricultural techniques, such as irrigation. In addition, they left a lasting legacy on the region's architecture, art, and music. The volume demonstrates the diversity of Jesuit contributions to Latin American culture. Published works often focus on one theme or region that is approached from a particular disciplinary perspective. This volume is therefore unusual in considering not only the range of Jesuit activities but also the diversity of perspectives from which they may be approached. It includes papers from scholars of history, linguistics, religion, art, architecture, cartography, music, medicine and science.

Beta maritima enrico biancardi, Leonard W. Panella, Robert T. Lewellen. 2011-12-07 Along the undisturbed shores, especially of the Mediterranean Sea and the European North Atlantic Ocean, is a quite widespread plant called *Beta maritima* by botanists, or more commonly sea beet. Nothing, for the inexperienced observer's eye, distinguishes it from surrounding wild vegetation. Despite its inconspicuous and nearly invisible flowers, the plant has had and will have invaluable economic and scientific importance. Indeed, according to Linnè, it is considered the progenitor of the beet crops possibly born from *Beta maritima* in some foreign country. Recent molecular research confirmed this

lineage. Selection applied after domestication has created many cultivated types with different destinations. The wild plant always has been harvested and used both for food and as a medicinal herb. Sea beet crosses easily with the cultivated types. This facilitates the transmission of genetic traits lost during domestication, which selection processes aimed only at features immediately useful to farmers and consumers may have depleted. Indeed, as with several crop wild relatives, *Beta maritima* has been successfully used to improve cultivated beet's genetic resistances against many diseases and pests. In fact, sugar beet cultivation currently would be impossible in many countries without the recovery of traits preserved in the wild germplasm. Dr. Enrico Biancardi graduated from Bologna University. From 1977 until 2009, he was involved in sugar beet breeding activity by the Istituto Sperimentale per le Colture Industriali (ISCI) formerly Stazione Sperimentale di Bieticoltura (Rovigo, Italy), where he released rhizomania and cercospora resistant germplasm and collected seeds of Mediterranean sea beet populations as a genetic resource for breeding and ex situ conservation. Retired since 2009, he still collaborates with several working breeders, in particular, at the USDA Agricultural Research Stations, at the Chinese Academy of Agricultural Science (CAAS), and at the Athens University (AUA). He has edited books, books chapters and authored more than 150 papers. Dr. Lee Panella is a plant breeder and geneticist with the USDA-ARS at Fort Collins, Colorado. He earned his B.S. in Crop and Soil Science from Michigan State University, an M.S. in Plant Breeding from Texas A&M University, and a Ph.D. in genetics from the University of California at Davis. His research focus is developing disease resistant germplasm using sugar beet wild relatives. He is chairman of the USDA-ARS Sugar Beet Crop Germplasm Committee and has collected and worked extensively with sea beet. Dr. Robert T. Lewellen was raised on a ranch in Eastern Oregon and obtained a B.S. in Crop Science from Oregon

State University followed by a Ph.D. from Montana State University in Genetics. From 1966 to 2008 he was a research geneticist for the USDA-ARS at Salinas, California, where he studied the genetics of sugar beet and as a plant breeder, often used sea beet as a genetic source to produce many pest and disease resistant sugar beet germplasm and parental lines, while authoring more than 100 publications.

The Intellectual Foundation of Information Organization

Elaine Svenonius. 2009-01-30 Integrating the disparate disciplines of descriptive cataloging, subject cataloging, indexing, and classification, the book adopts a conceptual framework that views the process of organizing information as the use of a special language of description called a bibliographic language. Instant electronic access to digital information is the single most distinguishing attribute of the information age. The elaborate retrieval mechanisms that support such access are a product of technology. But technology is not enough. The effectiveness of a system for accessing information is a direct function of the intelligence put into organizing it. Just as the practical field of engineering has theoretical physics as its underlying base, the design of systems for organizing information rests on an intellectual foundation. The subject of this book is the systematized body of knowledge that constitutes this foundation. Integrating the disparate disciplines of descriptive cataloging, subject cataloging, indexing, and classification, the book adopts a conceptual framework that views the process of organizing information as the use of a special language of description called a bibliographic language. The book is divided into two parts. The first part is an analytic discussion of the intellectual foundation of information organization. The second part moves from generalities to particulars, presenting an overview of three bibliographic languages: work languages, document languages, and subject languages. It looks at these languages in terms of their vocabulary, semantics, and syntax. The book is written in an

exceptionally clear style, at a level that makes it understandable to those outside the discipline of library and information science. *African Gnosis* V. Y. Mudimbe.1984

Dialogues of Love Leone Ebreo.2009-05-09 First published in Rome in 1535,Leone Ebreo's Dialogues of Love is one of the most important texts of the European Renaissance. Well known in the Italian academies of the sixteenth century, its popularity quickly spread throughout Europe, with numerous reprintings and translations into French, Latin Spanish, and Hebrew. It attracted a diverse audience that included noblemen, courtesans, artists, poets, intellectuals, and philosophers. More than just a bestseller, the work exerted a deep influence over the centuries on figures as diverse as Giordano Bruno, John Donne, Miguelde Cervantes, and Baruch Spinoza. Leone's Dialogues consists of three conversations - 'On Love and Desire,' 'On the Universality of Love,' and 'Onthe Origin of Love' - that take place over a period of three subsequent days.They are organized in a dialogic format, much like a theatrical representation, of a conversation between a man, Philo, who plays the role of the lover andteacher, and a woman, Sophia, the beloved and pupil. The discussion covers a wide range of topics that have as their common denominator the idea of Love. Through the dialogue, the author explores many different points of view and complex philosophical ideas. Grounded in a distinctly Jewish tradition, and drawing on

Neoplatonic philosophical structures and Arabic sources, the work offers a useful compendium of classical and contemporary thought, yet was not incompatible with Christian doctrine. Despite the unfinished state and somewhat controversial, enigmatic nature of Ebreo's famous text, it remains one of the most significant and influential works in the history of Western thought. This new, expertly translated and annotated English edition takes into account the latest scholarship and provides an invaluable resource for today's readers.

immunity in the United Kingdom, France and the Netherlands.

Bourdieu and Literature John R. W. Speller. 2011 Bourdieu and Literature is a wide-ranging, rigorous and accessible introduction to the relationship between Pierre Bourdieu's work and literary studies. It provides a comprehensive overview and critical assessment of his contributions to literary theory and his thinking about authors and literary works. One of the foremost French intellectuals of the post-war era, Bourdieu has become a standard point of reference in the fields of anthropology, linguistics, art history, cultural studies, politics, and sociology, but his longstanding interest in literature has often been overlooked. This study explores the impact of literature on Bourdieu's intellectual itinerary, and how his literary understanding intersected with his sociological theory and thinking about cultural policy. This is the first full-length study of Bourdieu's work on literature in English, and it provides an invaluable resource for students and scholars of literary studies, cultural theory and sociology.
