North-South Globalization and Foreign Direct Investment Jakob Schwab.2018-06-20 Jakob Schwab

analyzes central mechanisms in the systematic economic interaction between rich and poor

countries. He focuses on the drivers and effects of investment in developing countries and shows

that predictions of standard economic analysis may turn around when accounting for peculiarities of

North-South globalization. The author shows how endowments with educational skill levels may lead

to complementarity between trade and capital inflows, how inflows of direct investment capital may

hinder income growth in poor countries, and how the distributional effects of the presence of

multinational enterprises are perceived differently in countries of different development structures.

Migrating Words, Migrating Merchants, Migrating Law .2019-11-26 Migrating Words, Migrating

Merchants, Migrating Law examines the connections that existed between merchants' journeys, the

languages they used and the development of commercial law in the context of late medieval and

early modern trade. The book, edited by Stefania Gialdroni, Albrecht Cordes, Serge Dauchy, Dave

De ruysscher and Heikki Pihlajamäki, takes advantage of the expertise of leading scholars in

different fields of study, in particular historians, legal historians and linguists. Thanks to this

transdisciplinary approach, the book offers a fresh point of view on the history of commercial law in

different cultural and geographical contexts, including medieval Cairo, Pisa, Novgorod, Lübeck,

early modern England, Venice, Bruges, nineteenth century Brazil and many other trading centers.

Contributors are Cornelia Aust, Guido Cifoletti, Mark R. Cohen, Albrecht Cordes, Maria Fusaro,

Stefania Gialdroni, Mark Häberlein, Uwe Israel, Bart Lambert, David von Mayenburg, Hanna

Envisioning the World: Mapping and Making the Global Sandra Holtgreve, Karlson Preuß, Mathias Albert. 2021-03-31 The »global« is permanently made and remade by how it is envisioned in political projects, in language, and in literature. Through a range of case studies, this book shows how practices of referring to the world actually constitute the global in its many facets. It aims to provide a sense in readers of how the global is not something »out there«, but that it is embedded in a wide range of the seemingly »everyday«. The contributions appeal to a readership from a background in Sociology, History, Political Science, Literary Studies, and Social Work.

Nation, State, and Economy Ludwig Von Mises. 2006 Essential to Mises's concept of a classical liberal economy is the absence of interference by the state. In World War I, Germany and its allies were overpowered by the Allied Powers in population, economic production, and military might, and its defeat was inevitable. Mises believed that Germany should not seek revenge for the peace of Versailles; rather it should adopt liberal ideas and a free-market economy by expanding the international division of labor, which would help all parties. For us and for humanity, Mises wrote, there is only one salvation: return to rationalistic liberalism. Ludwig von Mises (1881-1973) was the leading spokesman of the Austrian School of economics throughout most of the twentieth century. Bettina Bien Greaves is a former resident scholar and trustee of the Foundation for Economic Education and was a senior staff member at FEE from 1951 to 1999. Die praxisorientierten Unterrichtseinheiten sind nach unterschiedlichen sprachlichen Anforderungen gestaffelt und auf die Kompetenzskalen A2 bis C1 des Gemeinsamen Europäischen Referenzrahmens für Sprachen bezogen. Sie sind für den bilingualen Zweig in Mittelschulen und Gymnasien geeignet, aber auch für einzelne Jahrgangsstufen verwendbar. Sie können für die eigene Unterrichtspraxis adaptiert werden, mit dem Ziel durch eigene Recherchen authentische CLIL-Aufgaben weiterzuentwickeln.

*Open Economy Macroeconomics* Rudiger Dornbusch. 1980

*English in Business and Commerce* Tamah Sherman, Jiri Nekvapil. 2018-05-07 This volume fills an important gap in exploring English in the domains of business and commerce through the prism of sociolinguistics and the sociology of language, as opposed to analyzing business genres or taking a linguodidactic approach. It expands the regional coverage of English in Europe, with several studies based in Central Europe, and also considers contexts which interact with Europe even though they are physically outside of it (Asia, Africa). It addresses English as just one of several languages at play in the ecology of the countries. It focuses not only on the position of languages as declared in documents of various organizations, that is, language policy, but also everyday linguistic practices as observed in business contexts, that is, interactions. The studies are divided into three thematic areas: ideologies and discourses on English in the business sphere, the management of English in

business and organizational contexts, and English and other languages on local and international labor markets. It will be of interest to readers concerned with multilingualism in the economic sphere and the workplace and the interplay between macro and micro levels during the management of communication in organizations.

**Globalization. Advantages and Disadvantages** Florian Metz.2013-08-09 Seminar paper from the year 2013 in the subject Economics - International Economic Relations, grade: 2,0, University of applied sciences Frankfurt a. M., course: Advanced Business English, language: English, abstract: Globalization is one of the major topics and challenges of our time. It describes the process of the worldwide increasing interconnection of economy, politics, culture and environment. This compression affects individuals, society and institutions as well as countries. It can help to increase prosperity, social justice and global networking in order to make the world more equal. In the following seminar paper, the prime importance will be the look at the effects of globalization on the world economy in general. Despite the advantages of globalization, the negative side with all the disadvantages should not be neglected. Therefore, it is essential to look at the advantages and disadvantages that are created by globalization. The question is to ask, if globalization really has the force to make the world more equal and who are the winners or the losers of it ? The available seminar paper tries to answer that question with a critical analysis of the topic. Chapter two pays attention to the fact what globalization really is and tries to identify the major characteristics of globalization. Chapter three concentrates on the consequences and effects of globalization on the world economy. The fourth chapter tries to identify the advantages and disadvantages. The seminar paper ends with a short result in chapter five, providing a short summary of the whole theme.

It is essential to look at all the different aspects of affairs all around the world.[...]

**International Trade as a Tool for Socio-Economic Development of Countries** Marcelo Anton.2014-02-25 Research Paper (undergraduate) from the year 2013 in the subject Economics - International Economic Relations, grade: 1,0, Cracow University of Economics, language: English, abstract: In approaching the subject of this paper, a general overview of international trade, its scope, repartition and recent shifts will be presented at the outset. A natural statistic for international trade, i.e. the trading volume compared to GDP, is introduced and its shortcomings are highlighted. In attempting to improve on significance towards socio-economic considerations, more appropriate key ratios and parameters are presented and put into context by means of two examples. Effects of free trade are controversially discussed referring to work of several economists and adjoined to those of trade restrictions and closed markets. Finally, further aspects like dependency, trade and democracy as well as loss of culture are considered.

**Globalization and the City** Philipp Strobl Andreas Exenberger (Günter Bischof, James Mokhiber (dir.)).2016-09-29 The world today is far less a global village than a “global city”, as global network of multidimensional urban spaces of congestion prominently forming – and also formed by – globalization. But the relevance of cities is nothing but new. They were essential for culture and civilization worldwide, they allowed a centralization of power and knowledge and they were crucial for the division of labor and for the organization of mass demand. Further, as places of intense and continuous interactions, cities are the locations par excellence for global history to take place. Thus, there is a need to study the history of cities in connection with the history of globalization from this perspective. This book is dedicated to contribute to the still underdeveloped but growing literature connecting the history of cities worldwide and their relation to global processes. The authors do so from various disciplinary backgrounds and by referring to different times and places. We visit

ancient Alexandria, nineteenth century Zanzibar, and modern-day São Paulo, among others, and we view these cities not only in their globality, but also through their heritage, their economic relevance, their architecture, or financial flows connecting them. Further, the book also contains systematic considerations about "global city", especially the general role of cities in development, cities in global history teaching, and cities' relationships to global commodity chains.
