Lee Miller Carolyn Burke.2010-10-06 A trenchant yet sympathetic portrait of Lee Miller, one of the iconic faces and careers of the twentieth century. Carolyn Burke reveals Miller as a multifaceted woman: both model and photographer, muse and reporter, sexual adventurer and mother, and, in later years, gourmet cook—the last of the many dramatic transformations she underwent during her lifetime. A sleek blond bombshell, Miller was part of a glamorous circle in New York and Paris in the 1920s and 1930s as a leading Vogue model, close to Edward Steichen, Charlie Chaplin, Jean Cocteau, and Pablo Picasso. Then, during World War II, she became a war correspondent—one of the first women to do so—shooting harrowing images of a devastated Europe, entering Dachau with the Allied troops, posing in Hitler's bathtub. Burke examines Miller's troubled personal life, from the unsettling photo sessions during which Miller, both as a child and as a young woman, posed nude for her father, to her crucial affair with artist-photographer Man Ray, to her unconventional marriages. And through Miller's body of work, Burke explores the photographer's journey from object to subject; her eye for form, pattern, and light; and the powerful emotion behind each of her images. A lushly illustrated story of art and beauty, sex and power, Modernism and Surrealism, independence and collaboration, Lee Miller: A Life is an astute study of a fascinating, yet enigmatic, cultural figure.

Behavioral Finance: The Second Generation Meir Statman.2019-12-02 Behavioral finance presented in this book is the second-generation of behavioral finance. The first generation, starting in the early 1980s, largely accepted standard finance's notion of people's wants as "rational" wants—restricted to the utilitarian benefits of high returns and low risk. That first generation commonly described people as "irrational"—succumbing to cognitive and emotional errors and misled on their way to their rational wants. The second generation describes people as normal. It begins by acknowledging the full range of people's normal wants and their benefits—utilitarian, expressive, and emotional—distinguishes normal wants from errors, and offers guidance on using shortcuts and avoiding errors on the way to satisfying normal wants. People's normal wants include financial security, nurturing children and families, gaining high social status, and staying true to values. People's normal wants, even more than their cognitive and emotional shortcuts and errors, underlie answers to important questions of finance, including saving and spending, portfolio construction, asset pricing, and market efficiency.
