**To Educate the Human Potential** Maria Montessori .2015-10-12 This book is intended to follow Education for a New World and to help teachers to envisage the child's needs after the age of six. We claim that the average boy or girl of twelve years who has been educated till then at one of our schools knows at least as much as the finished High School product of several years' seniority, and the achievement has been at no cost of pain or distortion to body or mind. Rather are our pupils equipped in their whole being for the adventure of life, accustomed to the free exercise of will and judgment, illuminated by imagination and enthusiasm. Only such pupils can exercise rightly the duties of citizens in a civilised commonwealth. The first four chapters are mainly psychological, showing the changed personality with which the teacher has to deal at six years of age, and the need for a corresponding change of approach. The secret of success is found to lie in the right use of imagination in awakening interest, and the stimulation of seeds of interest already sown by attractive literary and pictorial material, but all correlated to a central idea, of greatly ennobling inspiration—the

Cosmic Plan, in which all, consciously or unconsciously, serve the great Purpose of Life. It is shown how the conception of evolution has been modified of late through geological and biological discoveries, so that self-perfection now has to yield precedence to service among the primary natural urges. The next eight chapters show how the Cosmic Plan can be presented to the child, as a thrilling tale of the earth we live in, its many changes through slow ages when water was Nature's chief toiler for accomplishment of her purposes, how land and sea fought for supremacy, and how equilibrium of elements was achieved, that Life might appear on the stage to play its part in the great drama. Illustrated as it must be by fascinating, charts and diagrams, the creation of earth as we now know it unfolds before the child's imagination, and always with emphasis on the function each agent has to perform in Nature's household, whether consciously or unconsciously, failure in this alone leading to extinction. So the tale proceeds till Palaeolithic Man appears, most significantly traced by the tools he used on his environment rather than by physical remains of so slight a creature. The new element of mind is brought to creation by man, and from that time the children are helped to see the great acceleration that has taken place in evolution. They learn to reverence the earliest pioneers, who toiled for purposes unknown to them but now to be recognised. Nomadic men and settlers alike contributed to build up early communities, and by interchanges of war and peace to share and spread social amenities. From chapter thirteen brief descriptions are given of some of the earliest civilizations, particularly with a view to their impacts on each other, showing human society as slowly organising itself towards unity, just as, in the individual human being, organs are built around separate centres of interest, to be later connected by the blood-circulatory system and the nerves, into an integrated human organism. So the child is led, by review of some of the most thrilling epochs of world-history, to see that so far humanity has been in an embryonic stage, and that it is just now emerging into true birth, able to consciously realise its true unity and function. The last chapters go back to the psychological point of view, urging on educators the supreme importance, to the nation and to the world, of the tasks imposed on them. Not in the service of any political or social creed should the teacher work, but in the service of the complete human being, able to exercise in freedom a self-disciplined will and judgment, unperverted by prejudice and undistorted by fear.

**Ruimte en leren** Herman Hertzberger.2008 In het omvangrijke oeuvre van Herman Hertzberger is de bouw van scholen een van de belangrijkste opgaven. Hij bouwde tot op heden ruim dertig scholen. Volgens Hertzberger is scholenbouw vandaag de dag een van de weinige deelgebieden binnen de architectuur waarbij de ontwerper nog de menselijke condities kan bepalen en beïnvloeden. Hij stelt dat er evenwicht moet zijn tussen gebruik, functionaliteit en de architectuur van schoolgebouwen, waarbij de architectuur geïnspireerd wordt door het onderwijs. Juist met de huidige ontwikkelingen in het onderwijs, van klassikaal naar meer individueel gericht onderwijs, dienen de gebouwen steeds opnieuw bedacht te worden. De wisselwerking tussen onderwijs, onderwijssystemen en architectuur is evident. In *Ruimte en Leren* legt Hertzberger zijn ruime ervaring, kennis en opvattingen vast in een theoretische beschouwing over de ruimtelijke condities van leren.

*Spontaneous Activity in Education* Maria Montessori.2014-07-02 The Montessori Method represents an explicit idealism and turn away from war and violence toward peace and reconstruction. It is built on coherent visions of how to improve human society by helping children realize their full potential as intelligent, creative, whole persons. In the Montessori Method, children are viewed as active authors of their own development, strongly influenced by natural, dynamic, self-righting forces within themselves, opening the way toward growth and learning. Teachers depend for their work with children on carefully prepared, aesthetically pleasing environments that serve as a pedagogical tool and provide strong messages about the curriculum and about respect for children. Partnering with parents is highly valued in the Montessori Method, and children are evaluated by means other than traditional tests and grades.

Children Emotions Chiara Piroddi.2021-04-06 Emotions, for children, are a very important and essential way of communication - from day one, years before they can even speak: for the parents, it is crucial to understand the deeper meaning beyond a cry or a laughter. Cope with those emotions is a task that can be accomplished together. Understand the children's emotions will lead to a more satisfying relationship for both the parent and the little one. > The book starts from the adults giving some useful indications for recognizing the parent's own emotional states in interactions with the child, and also a series of exercises to test the parent's development of self-awareness. > In the second part, the focus shifts towards the child, suggesting a series of practical activities, in order to make sense of their experience, to identify their own and others' emotions, to contain the most powerful emotions, and to overcome minor crises.

Maria Montessori Rita Kramer.2017-05-21 The definitive biography of a physician, feminist, social reformer, educator, and one of the most influential, and controversial women of the 20th century. Maria Montessori effected a worldwide revolution in the classroom. She developed a new method of educating the young and inspired a movement that carried it into every corner of the world. This is the story of the woman behind the public figure—her accomplishments, her ideas, and her passions. Montessori broke the mold imposed on women in the nineteenth century and forged a new one, first for herself and eventually for those who came after her. Against formidable odds she became the first woman to graduate from the medical school of the University of Rome and then devoted herself to the condition of children considered uneducable at the time. She developed a teaching method that enabled them to do as well as normal children, a method which then led her to found a new kind of school—the Casa dei Bambini, or House of Children—which gained her worldwide fame and still pervades classrooms wherever young children learn. This biography is not only the story of a groundbreaking feminist but a vital chapter in the history of education. “Highly recommended for educators, parents, and moderate feminists who seek inspiration from one of the most accomplished women of this or any other age.”—Publishers Weekly
