**Oliver Hart and the Rise of Baptist America** Eric C. Smith.2020-08-01 Baptists in America began the eighteenth century a small, scattered, often harassed sect in a vast sea of religious options. By the early nineteenth century, they were a unified, powerful, and rapidly-growing denomination, poised to send missionaries to the other side of the world. One of the most influential yet neglected leaders in that transformation was Oliver Hart, longtime pastor of the Charleston Baptist Church. Oliver Hart and the Rise of Baptist America is the first modern biography of Hart, arguably the most important evangelical leader in the pre-Revolutionary South. During his thirty years in Charleston, Hart emerged as the region's most important Baptist denominational architect. His outspoken patriotism forced him to flee Charleston when the British army invaded Charleston in 1780, but he left behind a southern Baptist people forever changed by his energetic ministry. Hart's accommodating stance toward slavery enabled him and the white Baptists who followed him to reach the center of southern society, but also eventually doomed the national Baptist denomination of Hart's dreams. More than a biography, Oliver Hart and the Rise of Baptist America seamlessly intertwines Hart's story with that of eighteenth-century American Baptists, providing one of the most thorough accounts to date of this important and understudied religious group's development. This book makes a significant contribution to the study of Baptist life and evangelicalism in the pre-Revolutionary South and beyond.

**Lobbying for Higher Education** Constance Ewing Cook.1998 Historically, many faculty and administrators in higher education have regarded themselves as above the fray--part of the national interest, not a special interest--and considered lobbying a dirty business unworthy of their lofty enterprise. Now that academia no longer enjoys all the respect and good will that federal policy makers once afforded it, that attitude has changed. The Republican sweep of the 1994 Congressional elections served as a wake-up call for the higher education community. In response, it made a spirited effort to gain attention for its own policy preferences. Lobbying for Higher Education is about how the major higher education associations and the constituent American colleges and universities try to influence federal policy, especially congressional policy. In clear prose Cook explains how the higher education community organizes itself in Washington, how it lobbies, and how its major interest groups are perceived both by their own members and by public officials. The book focuses on the crucial development in 1995-1996 of a new lobbying paradigm, which included the greater use of campus-based resources and ad hoc coalitions. The most engrossing part of its story is higher education's creative response to the policy turmoil and disruption of the status quo that resulted from the shift in congressional party control. The author, Constance Cook, uses sources unique to this project: over 1,500 survey responses from college and university presidents (a 62% return rate) and nearly 150 interviews with institutional and association leaders. Fortuitously, the 1994 electoral upheaval provided her with an opportunity to capture, analyze, and interpret the responses of her subjects in a period of unusually sweeping change. Lobbying for Higher Education is a timely book with an interesting and important story at its core.
