Gordon Matta-Clark Stephen Walker.2011-05-10 Known for - and even overshadowed by - his brutal and spectacular building cuts, Gordon Matta-Clark's oeuvre is unique in the history of American art. He worked in the 1970s on the borders between art and architecture and his diverse practice is often understood as an outright rejection of the tenets of high modernism. Stephen Walker argues instead for the artist's ambivalent relationship with the architectural heritage he is often claimed to disavow, thus making this the first book to extrapolate Matta-Clark's thinking beyond its immediate context. Walker considers the broad range of Matta-Clark's ephemeral practice, from montage to actual interventions and from performance art and installation to drawing, film and video. Bringing to the fore the consistent themes and issues explored through this broad range of media, and in particular the complex notion of the 'discreet violation', he reveals the continued relevance of Matta-Clark's artistic and theoretical oeuvre to the reception of artistic and architectural work today.

Making Dystopia James Stevens Curl.2018-08-23 In *Making Dystopia*, distinguished architectural historian James Stevens Curl tells the story of the advent of architectural Modernism in the aftermath of the First World War, its protagonists, and its astonishing, almost global acceptance after 1945. He argues forcefully that the triumph of architectural Modernism in the second half of the twentieth century led to massive destruction, the creation of alien urban landscapes, and a huge waste of resources. Moreover, the coming of Modernism was not an inevitable, seamless evolution, as many have insisted, but a massive, unparalleled disruption that demanded a clean slate and the elimination of all ornament, decoration, and choice. Tracing the effects of the Modernist revolution in architecture to the present, Stevens Curl argues that, with each passing year, so-called 'iconic' architecture by supposed 'star' architects has become more and more bizarre, unsettling, and expensive, ignoring established contexts and proving to be stratospherically remote from the aspirations and needs of humanity. In the elite world of contemporary architecture, form increasingly follows finance, and in a society in which the 'haves' have more and more, and the 'have-nots' are ever more marginalized, he warns that contemporary architecture continues to stack up huge potential problems for the future, as housing costs spiral out of control, resources are squandered on architectural bling, and society fractures. This courageous, passionate, deeply researched, and profoundly argued book should be read by everyone concerned with what is around us. Its combative critique of the entire Modernist architectural project and its apologists will be highly controversial to many. But it contains salutary warnings that we ignore at our peril. And it asks awkward questions to which answers are long overdue.

Slicing Spaces: Performance of Architecture in Cinema Gul Kacmaz Erk,Rebecca-Jane McConnell.2023-05-26 As suggested in the title, *Slicing Spaces: Performance of Architecture in Cinema*, this project slices through the multifaceted layers of film space. The text investigates how architecture performs as an altruist, proving that envired space is not merely a backdrop in film scenes, but an active performing character. The performance of architecture varies depending on what the filmmakers wish the viewer to feel, whether it is fear, compassion or joy. Considerations take an interdisciplinary approach, not solely observing film and architecture but also studying the likes of urbanism, politics, philosophy, history, psychology, art and design. The substantial spectrum of opinions from contributing authors allows the reader to absorb the diverse relationships of architecture in cinema, inviting the reader to form their own opinions on the topic and inspiring a new way of thinking. *Slicing Spaces* explores the interconnected relationship between architecture and film via distinct approaches to spaces of the city, confinement, actuality, the psyche and the imagination. Diverse views on cinematic architecture are probed, such as the psychological ramifications of film architecture, the portrayals of the city as a character and the potentials of exploring fantastic places in film. Overall, the book focuses on the authoritative contribution of architecture to the realm of filmmaking. It uncovers a path to look at lived spaces of architectural design from an alternative perspective, be it interiors, buildings or cities. Utilising the architectural ingenuity of drawings and graphics, the collection takes the reader on a visual journey as well as one through narratives.

Modernism and the Crisis of Sovereignty Andrew John Miller.2020-09-19 This book describes how three of the most significant Anglophone writers of the first half of the twentieth century - Yeats, Eliot, and Woolf - wrestled with a geopolitical situation in which national boundaries had come to seem increasingly permeable at the same time as war among (and within) individual nation-states had come to seem virtually inescapable. Drawing on Jean-François Lyotard's analysis of the elements of performativity in J.L. Austin's speech act theory, and making critical use of Carl Schmitt's writings on sovereignty and world order, Miller situates the writings of Yeats, Eliot, and Woolf in the context of what Lyotard describes as a civil war of language. By virtue of its dissolution of any clear boundary between interiority and exteriority, as well as by virtue of its resistance to any decisive form of resolution or regulation, this civil war of language takes on dimensions that are ultimately global in scope. Miller examines the emergence of modernism as bound up with a crisis of personal, political, and aesthetic sovereignty that undermined traditional distinctions between the public and private. In the process, he directly engages with the theoretical discourse surrounding the geopolitical impact of globalization and biopolitics: a discourse that is central to the influential and widely-debated work of such varied figures as Carl Schmitt, Hardt and Negri, Giorgio Agamben, and Jean-Luc Nancy. This book will be of interest to anyone concerned not only with twentieth-century literature but also with questions of nationalism and globalization.

Architectural Research Addressing Societal Challenges Manuel Jorge Rodrigues Couceiro da Costa,Filipa Roseta,Joana Pestana Lages,Susana Couceiro da Costa.2019-08-08 The escalating interdependency of nations drives global geopolitics to shift ever more quickly. Societies seem unable to control any change that affects their cities, whether positively or negatively. Challenges are global, but solutions need to be implemented locally. How can architectural research contribute to the future of our changing society? How has it contributed in the past? The theme of the 10th EAAE/ARCC International Conference, "Architectural Research Addressing Societal Challenges", was set to address these questions. This book, *Architectural Research Addressing Societal Challenges*, includes reviewed papers presented in June 2016, at the 10th EAAE/ARCC International Conference, which was held at the facilities of the Faculty of Architecture of the University of Lisbon. The papers have been further divided into the following five sub-themes: a Changing Society; In Transit - Global Migration; Renaturalization of the City; Emerging Fields of Architectural Practice; and Research on Architectural Education. The EAAE/ARCC International Conference, held under the aegis of the EAAE and of the ARCC, is a conference organized every other year, in collaboration with one of the member schools/ universities of those associations, alternatively in North America or in Europe.

Across Space and Time Patrick Haughey.2017-07-12 Modernity tends to be considered a mostly Western, chronologically recent concept. Looking at locations in Brazil, Java, India, Georgia, and Yugoslavia, among others, *Across Space and Time* provides architectural and cultural evidence that modernity has had an impact across the globe and for much longer than previously conceived. This volume moves through space and time to illustrate the way global modernity has been negotiated through architecture, urban planning, design pedagogies, preservation, and art history in diverse locations around the world. Bringing together emerging and established architecture and art history scholars, each chapter focuses on a particular site where modernity was defined, challenged, or reinterpreted. The contributors examine how architectures, landscapes, and design thinking influence and are influenced by conflicts between cultural, economic, technological, and political forces. By invoking well-researched histories to ground their work in a post-colonial critique, they closely examine many prevailing myths of modernity. Notable topics include emerging architectural history in the Indian subcontinent and the connection between climate change and architecture. Ultimately, *Across Space and Time* contributes to the ongoing critique of architecture and its history, both as a discipline and within the academy. The authors insist that architecture is

more than a style. It is a powerful expression of representational power that reveals how a society negotiates its progress.

The Routledge Companion to Women in Architecture Anna Sokolina.2021-06-28 The Routledge Companion to Women in Architecture illuminates the names of pioneering women who over time continue to foster, shape, and build cultural, spiritual, and physical environments in diverse regions around the globe. It uncovers the remarkable evolution of women's leadership, professional perspectives, craftsmanship, and scholarship in architecture from the preindustrial age to the present. The book is organized chronologically in five parts, outlining the stages of women's expanding engagement, leadership, and contributions to architecture through the centuries. It contains twenty-nine chapters written by thirty-three recognized scholars committed to probing broader topographies across time and place and presenting portraits of practicing architects, leaders, teachers, writers, critics, and other kinds of professionals in the built environment. The intertwined research sets out debates, questions, and projects around women in architecture, stimulates broader studies and discussions in emerging areas, and becomes a catalyst for academic programs and future publications on the subject. The novelty of this volume is in presenting not only a collection of case studies but in broadening the discipline by advancing an incisive overview of the topic as a whole. It is an invaluable resource for architectural historians, academics, students, and professionals.

Space, Time and Architecture Sigfried Giedion.2009-02-28 A milestone in modern thought, *Space, Time and Architecture* has been reissued many times since its first publication in 1941 and translated into half a dozen languages. In this revised edition of Sigfried Giedion's classic work, major sections have been added and there are 81 new illustrations. The chapters on leading contemporary architects have been greatly expanded. There is new material on the later development of Frank Lloyd Wright and the more recent buildings of Walter Gropius, particularly his American Embassy in Athens. In his discussion of Le Corbusier, Mr. Giedion provides detailed analyses of the Carpenter Center at Harvard University, Le Corbusier's only building in the United States, and his Priory of La Tourette near Lyons. There is a section on his relations with his clients and an assessment of his influence on contemporary architecture, including a description of the Le Corbusier Center in Zurich (designed just before his death), which houses his works of art. The chapters on Mies van der Rohe and Alvar Aalto have been brought up to date with examples of their buildings in the sixties. There is an entirely new chapter on the Danish architect Jørn Utzon, whose work, as exemplified in his design for the Sydney Opera House, Mr. Giedion considers representative of post-World War II architectural concepts. A new essay, "Changing Notions of the City," traces the evolution of the structure of the city throughout history and examines current attempts to deal with urban growth, as shown in the work of such architects as José Luis Sert, Kenzo Tange, and Fumihiko Maki. Mr. Sert's Peabody Terrace is discussed as an example of the interlocking of the collective and individual spheres. Finally, the conclusion has been enlarged to include a survey of the limits of the organic in architecture.

Cities of Affluence and Anger Peter J. Hefner.2015-10-29 Providing a compact literary history of the twentieth century in England, *Cities of Affluence and Anger* studies the problematic terms of national identity during England's transition from an imperial power to its integration in the global cultural marketplace. While the countryside had been the dominant symbol of Englishness throughout the previous century, modern literature began to turn more and more to the city to redraw the boundaries of a contemporary cultural polity. The urban class system, paradoxically, still functioned as a marker of wealth, status, and hierarchy throughout this long period of self-examination, but it also became a way to project a common culture and mitigate other forms of difference. Local class politics were transformed in such a way that enabled the English to reframe a highly provisional national unity in the context of imperial disintegration, postcolonial immigration, and, later, globalization. Kalliney plots the decline of the country-house novel through an analysis of Forster's *Howards End* and Waugh's *Brideshead Revisited*, each ruthless in its sabotage of the trope of bucolic harmony. The traditionally pastoral focus of English fiction gives way to a high-modernist urban narrative, exemplified by Woolf's *Mrs. Dalloway*, and, later, to realists such as Osborne and Sillitoe, through whose work Kalliney explores postwar urban expansion and the cultural politics of the welfare state. Offering fresh new readings of Lessing's *The Golden Notebook* and Rushdie's *The Satanic Verses*, the author considers the postwar appropriation of domesticity, the emergence of postcolonial literature, and the renovation of travel narratives in the context of globalization. Kalliney suggests that it is largely one city--London--through which national identity has been reframed. How and why this transition came about is a process that *Cities of Affluence and Anger* depicts with exceptional insight and originality.

Frank Lloyd Wright and Le Corbusier Richard A. Etlin.1994 Architectural historian Etlin defines the main principles of progressive 19th-century architectural thought: the architectural system, the picturesque, philosophical eclecticism, and the spirit of the times. These principles are explored in detail in relation to 19th- and 20th-century architecture, and also to demonstrate their importance to the work of Wright and Le Corbusier.

Rebuilding Britain's Blitzed Cities Catherine Flinn.2018-12-27 Many British cities were devastated by bombing during the Second World War and faced stark economic dilemmas concerning reconstruction planning and implementation after 1945. How did politicians, civil servants and local authorities manage to produce the cities we live in today? Rebuilding Britain's Blitzed Cities examines the underlying processes and pressures, especially financial and bureaucratic, which shaped postwar urbanism in Britain. Catherine Flinn integrates architectural planning with in-depth economic and political analyses of Britain's blitzed cities for the first time. She examines early reconstruction arrangements, the postwar economic apparatus and the challenges of postwar physical planning across the country, while providing insightful case studies from the cities of Hull, Exeter and Liverpool. By addressing the ideology versus the reality of reconstruction in postwar Britain, Rebuilding Britain's Blitzed Cities highlights the importance of economic and political factors for understanding the British postwar built environment.

Numerous New Yorker cartoons and black-and-white photographs accompany the text, depicting the strength and foibles of legal aesthetics.
