Ethics in intercultural and international Communication

Fred L. Casmir.2013-10-18 There has been an increased interest in both intercultural and international communication, as well as ethical aspects of such interactions. In spite of this, there are no books which address this specific subject matter beyond limited surveys of different types or forms of ethics, or attempted comparisons between various ethical or value systems. This book intends to engage readers rather than trying to teach them about ethics or how to be ethical. It is questionable that ethics can be taught as academic subject matter, or that such instructions will result in meaningful applications in the daily lives of students. By considering specific challenges affecting ethical behavior in various intercultural and international interactions, and by suggesting interactive, dialogic behavioral models as well as examples, the authors seek to create an atmosphere of involvement and discussion which will lead researchers to consider the ethics undergirding their own lives, as well as any resulting ethical or unethical practices.

EBOOK: Evidence-based Health Communication Brian Brown,Paul Crawford,Ronald Carter.2006-10-16 What is evidence-based health communication and how does it benefit patients? How has communication been taught to health professionals and how might it be improved? How can health care professionals make the most of short encounters in order to maximise their therapeutic effectiveness for clients? This book provides a comprehensive and critical review of the field of health communication and the kinds of evidence that have been collected concerning effective communication. It also critically evaluates the kinds of training health professionals receive in communication skills and examines its relatively limited role in the curriculum. In addition it sets out what has been discovered about the micro-structure of interaction in health care encounters. The book offers vital new agendas for research training and practice in health care, based upon lessons learned from linguistics, using a wide variety of gathered evidence to identify patterns that will lead to improved health care practices. Moreover, the book focuses upon brief, ordinary and effective communicative activity in addition to the formal consultations that have been studied by researchers in the past. Evidence-based Health Communication is key reading for trainee health professionals as well as undergraduate and postgraduate students in the fields of health studies, medical sociology and health psychology. It also provides stimulating reading for health care professionals, policy makers and researchers with an interest in improving health communication.

Professional Journalism M V Kamath. 2009-11-01 There are not many books in India that can serve as a useful textbook to the students and guides to the practising journalist. It is this lacuna that M.V. Kamath, one of the most prominent Indian Journalists, has tried to fill. This is a book on Indian journalism for Indian journalists, citing examples of Indian writers, Kamath quotes profusely from the writings of Indian editors to illustrate his ideas which considerably adds to the relevance of his work.

Marking Time Paul Rabinow.2009-02-09 In *Marking Time*, Paul Rabinow presents his most recent reflections on the anthropology of the contemporary. Drawing richly on the work of Michel Foucault, John Dewey, Niklas Luhmann, and, most interestingly, German painter Gerhard Richter, Rabinow offers a set of conceptual tools for scholars examining cutting-edge practices in the life sciences, security, new media and art practices, and other emergent phenomena. Taking up topics that include bioethics, anger and competition among molecular biologists, the lessons of the *Drosophila* genome, the nature of ethnographic observation in radically new settings, and the moral landscape shared by scientists and anthropologists, Rabinow shows how anthropology remains relevant to contemporary debates. By turning abstract philosophical problems into real-world explorations and offering original insights, *Marking Time* is a landmark contribution to the continuing re-invention of anthropology and the human sciences.

Critical Sites of Inclusion in India's Higher Education Papia Sengupta.2022-03-01 This book acquaints the reader to the often invisible-ized practices and policies under the rhetoric of 'inclusion', through theoretical and empirical analysis. It emphasizes on the complexities of education policies in a multicultural state by identifying the challenges to the idea of 'inclusion' illuminated through judicial interventions, policy-frameworks and everyday experiences of individuals. Higher education is imperative to empowerment in socially stratified societies marred with deep inequalities like India and many other

multicultural countries. Disputes over inclusion remains a critical feature in Indian higher education sector, as it is viewed as facilitating access to economic opportunities and providing vertical mobility for individuals belonging to marginalized communities. Higher education empowers, and expands individual horizons of thought and ideas of freedom, dignity, equality, enabling individuals to participate actively in the political-sociological discourses in democratic polity. Therefore, policy makers, political theorists and educationists have been examining the question of inclusion and education as public-good. Contemporary India has witnessed an unprecedented attack on academic freedom, free exchange of ideas and expressions, challenging the very idea of inclusion and inclusiveness.

The Future of Anthropological Knowledge Henrietta

Moore.2003-12-16 The Future of Anthropological Knowledge the chapters explore the question of the nature of social knowledge from a variety of perspectives and locations such as China, Africa, the USA and elsewhere. By examining the changing nature of anthropological knowledge and of the production of that knowledge, this book challenges the notion that only western societies have produced social theories of modernity and of global scope. Knowledge of society can no longer be restricted to a knowledge of face-to-face social relations but must encompass the effect of technology, global consumption patterns and changing geo-political configurations. The Future of Anthropological Knowledge will be of interest to anthropologists and students of culture and society.

Media and Violence Karen Boyle.2005-01-01

Media and Violence pays equal attention to the production, content and reception involved in any representation of violence. This book offers a framework for understanding how violence is represented and consumed. It examines the relationship of media, gender, and real-world violence; representations of violence in screen entertainment; the effects of violent media on consumers; the

ethics and gender politics of the production processes of screen violence; and the discussions are illustrated with topical and well-known examples, enabling the reader to critically engage with the debates.

Theory in Social and Cultural Anthropology R. Jon

McGee, Richard L. Warms. 2013-08-28 Social and cultural anthropology and archaeology are rich subjects with deep connections in the social and physical sciences. Over the past 150 years, the subject matter and different theoretical perspectives have expanded so greatly that no single individual can command all of it. Consequently, both advanced students and professionals may be confronted with theoretical positions and names of theorists with whom they are only partially familiar, if they have heard of them at all. Students, in particular, are likely to turn to the web to find quick background information on theorists and theories. However, most web-based information is inaccurate and/or lacks depth. Students and professionals need a source to provide a quick overview of a particular theory and theorist with just the basics—the who, what, where, how, and why, if you will. In response, SAGE Reference plans to publish the two-volume *Theory in Social and Cultural Anthropology: An Encyclopedia*. Features & Benefits: Two volumes containing approximately 335 signed entries provide users with the most authoritative and thorough reference resource available on anthropology theory,

both in terms of breadth and depth of coverage. To ease navigation between and among related entries, a Reader's Guide groups entries thematically and each entry is followed by Cross-References. In the electronic version, the Reader's Guide combines with the Cross-References and a detailed Index to provide robust search-and-browse capabilities. An appendix with a Chronology of Anthropology Theory allows students to easily chart directions and trends in thought and theory from early times to the present. Suggestions for Further Reading at the end of each entry and a Master Bibliography at the end guide readers to sources for more detailed research and discussion.

Feminism and Cultural Studies Morag Shiach.1999 Oxford
Readings in Feminism provide accessible, one-volume guides to the very best in contemporary feminist thinking, assessing its impact and importance in key areas of study. Collected together by scholars of outstanding reputation in their field, the articles chosen represent the most important work on feminist issues, and concise, lively introductions to each volume crystallize the main lines of debate in the field. This collection, edited by Morag Shiach, brings together exciting work in feminism and cultural studies from different countries and different historical moments. It combines 'classic' articles with more recent work to offer an insight into the challenges and innovations of work within cultural studies. The collection is organised thematically in ways which illuminate the development of theoretical and political debates within feminism and cultural studies. Different traditions within cultural studies are brought into relation with each other to explore areas such as commodification, women and labour, mass culture, fantasy and ideas of home.

Throughout the world, the media is used in various ways to promote social awareness and initiate social development. Of all the available means of communication, radio is still the one with the maximum reach in most developing countries. This book, the first in a three-book series titled *Communication for Behavior Change*, offers extremely practical guidance on how to design, write, and produce radio dramas aimed at motivating social change. Written by a leading teacher and practitioner of Entertainment-Education, it is the only available book which provides complete and hands-on instructions for creating successful radio serial dramas for behavior change. The text is interspersed with examples which show how entertainment and education have been woven together to create awareness programs that are both popular and effective. Extracts from several successful scripts from many countries are also provided to demonstrate what has previously clicked with the audience.

Black Feminist Anthropology Irma McClaurin.2001 In the discipline's early days, anthropologists by definition were assumed to be white and male. Women and black scholars were relegated to the field's periphery. From this marginal place, white feminist anthropologists have successfully carved out an acknowledged intellectual space, identified as feminist anthropology. Unfortunately, the works of black and non-western feminist anthropologists are rarely cited, and they have yet to be respected as significant shapers of the direction and transformation of feminist anthropology. In this volume, Irma McClaurin has collected-for the first time-essays that explore the role and contributions of black feminist anthropologists. She has asked her contributors to disclose how their experiences as black

women have influenced their anthropological practice in Africa, the Caribbean, and the United States, and how anthropology has influenced their development as black feminists. Every chapter is a unique journey that enables the reader to see how scholars are made. The writers present material from their own fieldwork to demonstrate how these experiences were shaped by their identities. Finally, each essay suggests how the author's field experiences have influenced the theoretical and methodological choices she has made throughout her career. Not since Diane Wolf's *Feminist Dilemmas in the Field* or Hortense Powdermaker's *Stranger and Friend* have we had such a breadth of women anthropologists discussing the critical (and personal) issues that emerge when doing ethnographic research.

Science Communication Sarah R. Davies, Maja

Horst. 2016-10-20 This book describes current practices in science communication, from citizen science to Twitter storms, and celebrates this diversity through case studies and examples. However, the authors also reflect on how scholars and practitioners can gain better insight into science communication through new analytical methods and perspectives. From science PR to the role of embodiment and materiality, some aspects of science communication have been under-studied. How can we better notice these? *Science Communication* provides a new synthesis for Science Communication Studies. It uses the historical literature of the field, new empirical data, and interdisciplinary thought to argue that the frames which are typically used to think about science communication often omit important features of how it is imagined and practised. It is essential reading for students, scholars, and practitioners of science education, science and technology studies, museum studies, and media and communication studies.

mass media and the impact it has on society as a whole. The text also explores how the relationship individuals have with media is created, therefore helping them alleviate its harmful effects and enhance the positive ones. The range of media effects addressed herein includes news diffusion, learning from the mass media, socialization of children and adolescents, influences on public opinion and voting, and violent and sexually explicit media content. The text examines relevant research done in these areas and discusses it in a thorough and accessible manner. It also presents a variety of theoretical approaches to understanding media effects, including psychological and content-based theories. In addition, it demonstrates how theories can guide future research into the effects of newer mass communication technologies. The second edition includes a new chapter on effects of entertainment, as well as text boxes with examples for each chapter, discussion of new technology effects integrated throughout the chapters, expanded pedagogy, and updates to the theory and research in the text. These features enhance the already in-depth analysis Media Effects and Society provides.

Gender Communication Theories and Analyses Charlotte

Krolokke, Anne Scott Sorensen. 2006 *Contemporary Gender*

Communication Theories and Analyses surveys the field of gender and communication with a particular focus on gender and communication theories and methods. How have theories about gender and communication evolved and been influenced by first-, second-, and third-wave feminisms? And similarly, how have feminist communication scholars been inspired by existing methods and aspired to generate their own? The goal of this text is to help readers develop analytic focus and knowledge about their underlying assumptions that gender communication scholars use in their work. The features and benefits are: it applies theoretical and methodological lenses to contemporary cases, allowing readers to see gender and communication theory work in action; it presents a comprehensive introduction to particular feminist theories and methodologies; it provides effective end-of-chapter cases and sample analyses that help readers see the kinds of questions and analyses that a particular theory and method bring into play; and also discusses contemporary research in gender and communication and expands on future directions for research.

News Coverage of Violence against Women Marian

Meyers.1996-09-18 Marian Meyers explores evidence that shows that news coverage in North American cities routinely depicts criminal violence against females differently from the way it depicts violence against males. She argues that this serves to perpetuate traditional, inegalitarian gender stereotyping. Using original research and qualitative textual analysis, the author discloses the underlying ideology, myths and assumptions within news coverage, and points out the ways in which news broadcasting affects how we view the world and our lives. Meyers advocates a re-examination of crime news from a feminist perspective and a broadening of traditional understandings of the social construction of news to include issues of gender, race and class

Cultural Communication and Intercultural Contact Donal

Carbaugh.2013-11-05 How is cultural identity accomplished interactively? What happens when different cultural identities contact one another? This book presents a series of papers, from classic essays to original expositions, which respond to these questions. The view of communication offered here -- rather than ignoring culture, or making it a variable in an equation -- is based on cultural patterns and situated communication practices, unveiling the multiplicity of factors involved in particular times and places. The contributors to this unusual volume represent a wide range of fields. Their equally diverse offerings will serve to clarify cultural distinctiveness in some communication phenomena, and lay groundwork for the identification of cross-cultural generalities in others.

community with some strict rules. Unlike Project Gutenberg, which gives all books equal billing, books on Amazon Cheap Reads are organized by rating to help the cream rise to the surface. However, five stars aren't necessarily a guarantee of quality; many books only have one or two reviews, and some authors are known to rope in friends and family to leave positive feedback. The legality of Library Genesis has been in question since 2015 because it allegedly grants access to pirated copies of books and paywalled articles, but the site remains standing and open to the public.
