Dialogues of Love Leone Ebreo.2009-05-09 First published in Rome in 1535, Leone Ebreo's Dialogues of Love is one of the most important texts of the European Renaissance. Well known in the Italian academies of the sixteenth century, its popularity quickly spread throughout Europe, with numerous reprintings and translations into French, Latin Spanish, and Hebrew. It attracted a diverse audience that included noblemen, courtesans, artists, poets, intellectuals, and philosophers. More than just a bestseller, the work exerted a deep influence over the centuries on figures as diverse as Giordano Bruno, John Donne, Miguelde Cervantes, and Baruch Spinoza. Leone's Dialogues consists of three conversations - 'On Love and Desire,' 'On the Universality of Love,' and 'Onthe Origin of Love' - that take place over a period of three subsequent days.They are organized in a dialogic format, much like a theatrical representation, of a conversation between a man, Philo, who plays the role of the lover andteacher, and a woman, Sophia, the beloved and pupil. The discussion covers a wide range of topics that have as their common denominator the idea of Love. Through the dialogue, the author explores many different points of view and complex philosophical ideas. Grounded in a distinctly Jewish tradition, and drawing on Neoplatonic philosophical structures and Arabic sources, the work offers a useful compendium of classical and contemporary thought, yet was not incompatible with Christian doctrine. Despite the unfinished state and somewhat controversial, enigmatic nature of Ebreo's famous text, it remains one of the most significant and influential works in the history of Western thought. This new, expertly translated and annotated English edition takes into account the latest scholarship and provides aninvaluable resource for today's readers.

**Agricultural and Pastoral Landscapes in Pre-Industrial Society** Fèlix Retamero,Inge Schjellerup,Althea Davies.2014-12-01 Through a series of case studies, this third volume in the Earth series deals with the technological constraints and innovations that enabled societies to survive and thrive across a range of environmental conditions. The contributions are structured into three sections to draw out particular commonalities and contrasts in the choices made by pre-industrial communities in the construction of varied landscapes and cultural heritage: Landnam, from the Old Norse for 'taking of land', deals with colonisation, including the drivers and processes through which colonisers developed an understanding of the productive potential and limitations of their new lands. Fields and field systems: Field-walls are a distinctive and apparently timeless characteristic of many pre-industrial farming landscapes but they present many the challenges to their study, such as the effects of ploughing, abandonment and land-use change and of urban development in fertile lowland zones which may eradicate, reduce or conceal past systems of land-use and division. The importance of indirect and proxy evidence is illustrated and the value of interdisciplinary and modelling approaches emphasised. Agro-pastoralism: focuses on the complex 'time-space adaptations' devised for managing cultivation and livestock production, particularly the need to prevent stock incursions into arable fields during the growing season whilst making effective use of seasonal grazing resources. The contributions focus on mountainous areas, where temporary migrations, in the form of transhumance, provided access to a diversity of resources based around seasonal constraints on their availability and productivity.

*Anadenanthera* Constantino M Torres,David B Repke.2014-06-11 A multidisciplinary study of pre-Columbian South America—centering on the psychoactive plant genus Anadenanthera As cultures formed and evolved in pre-Columbian South America, Anadenanthera became one of the most widely used shamanic inebriants. Anadenanthera: Visionary Plant of Ancient South America is more than a comprehensive reference on shamanic visionary substances; it is a useful tool for archeologists and pre-Columbian art historians. This thorough book examines the ritual and cultural use of Anadenanthera from prehistory to the present, along with its botany, chemistry, pharmacology, anthropology, and archeology. The earliest evidence for the use of psychoactive plants in South America is provided by remains of seeds and pods recovered from archeological sites four millennia old. Various preparations were derived from it with the intent of being a shamanic inebriant. Inhaled through the nose, smoked in pipes or as cigars, and prepared in fermented drinks, Anadenanthera served a central role in the cultural development of indigenous societies in South America. Anadenanthera: Visionary Plant of Ancient South America explores the full spectrum of information gleaned from research, covering numerous archeological sites in the Andean region, as well as discussing Amazonian shamanic rituals and lore. Analyses of the artistic expressions within the decorations of associated ceremonial paraphernalia such as ritual snuffing tubes and snuff trays are included. The text is richly illustrated with photographs and images of decorated ritual implements, and provides a comprehensive bibliography. Anadenanthera: Visionary Plant of Ancient South America explores: botanical aspects, taxonomy, and geographical distribution of Anadenanthera ethnographical, historical, and traditional aspects of Anadenanthera use chemical and pharmacological investigations of the genus and the various visionary preparations derived from it—with emphasis on the biologically active constituents theories of the mechanisms of action of the active tryptamines and carboline alkaloids comparisons of wood anatomy, morphology, and percentage of alkaloid content evaluation of stylistic and iconographic traits Anadenanthera: Visionary Plant of Ancient South America is a thorough, useful resource for archeologists, anthropologists, chemists, researchers, pre-Columbian art historians, and any layperson interested in pre-Columbian art, archeology, or visionary plants.

**A Comparative History of Literatures in the Iberian Peninsula** Fernando Cabo Aseguinolaza,Anxo Abuín Gonzalez,César Domínguez.2010-05-26 A Comparative History of Literatures in the Iberian Peninsula is the second comparative history of a new subseries with a regional focus, published by the Coordinating Committee of the International Comparative Literature Association. As its predecessor for East-Central Europe, this

two-volume history distances itself from traditional histories built around periods and movements, and explores, from a comparative viewpoint, a space considered to be a powerful symbol of inter-literary relations. Both the geographical pertinence and its symbolic condition are obviously discussed, when not even contested. Written by an international team of researchers who are specialists in the field, this history is the first attempt at applying a comparative approach to the plurilingual and multicultural literatures in the Iberian Peninsula. The aim of comprehensiveness is abandoned in favor of a diverse and extensive array of key issues for a comparative agenda. A Comparative History of Literatures in the Iberian Peninsula undermines the primacy claimed for national and linguistic boundaries, and provides a geo-cultural account of literary inter-systems which cannot otherwise be explained.

*The Mollusks* Charles F. Sturm, Timothy A. Pearce, Ángel Valdés. 2006 Mollusks have been important to humans since our earliest days. Initially, when humans were primarily interested in what they could eat or use, mollusks were important as food, ornaments, and materials for tools. Over the centuries, as human knowledge branched out and individuals started to study the world around them, mollusks were important subjects for learning how things worked. In this volume, the editors and contributors have brought together a broad range of topics within the field of malacology. It is our expectation that these topics will be of interest and use to amateur and professional malacologists.

**Under Three Flags** Benedict Richard O'Gorman Anderson. 2005 In this sparkling new work, Benedict Anderson provides a radical recasting of themes from *Imagined Communities*, his classic book on nationalism, through an exploration of fin-de-siècle politics and culture that spans the Caribbean, Imperial Europe and the South China Sea. A jewelled pomegranate packed with nitroglycerine is primed to blow away Manila's 19th-century colonial elite at the climax of *El Filibusterismo*, whose author, the great political novelist Jose Rizal, was executed in 1896 by the Spanish authorities in the Philippines at the age of 35. Anderson explores the impact of avant-garde European literature and politics on Rizal and his contemporary, the pioneering folklorist Isabelo de los Reyes, who was imprisoned in Manila after the violent uprisings of 1896 and later incarcerated, together with Catalan anarchists, in the prison fortress of Montjuich in Barcelona. On his return to the Philippines, by now under American occupation, Isabelo formed the first militant trade unions under the influence of Malatesta and Bakunin. Anderson considers the complex intellectual interactions of these young Filipinos with the new science of anthropology in Germany and Austro-Hungary, and with post-Communard experimentalists in Paris, against a background of militant anarchism in Spain, France, Italy and the Americas, Jose Marti's armed uprising in Cuba and anti-imperialist protests in China and Japan. In doing so, he depicts the dense intertwining of anarchist internationalism and radical anti-colonialism. *Under Three Flags* is a brilliantly original work on the explosive history of national independence and global politics.

*The Sciences in the European Periphery During the Enlightenment* K. Gavroglu. 2013-03-07 The articles in this volume of ARCHIMEDES examine particular cases of 'reception' in ways that emphasize pressing historiographical and methodological issues. Such issues arise in any consideration of the transmission and appropriation of scientific concepts and practices that originated in the several 'centers' of European learning, subsequently to appear (often in considerably altered guise) in regions at the European periphery. They discuss the transfer of new scientific ideas, the mechanisms of their introduction, and the processes of their appropriation at the periphery. The themes that frame the discussions of the complex relationship between the origination of ideas and their reception include the ways in which the ideas of the Scientific Revolution

were introduced, the particularities of their expression in each place, the specific forms of resistance encountered by these new ideas, the extent to which such expression and resistance displays national characteristics, the procedures through which new ways of dealing with nature were made legitimate, and the commonalities and differences between the methods developed by scholars for handling scientific issues.

**82 objetos que cuentan un país** Manuel Lucena.2015-11-05 Un recorrido excepcional por la historia de España a través de sus objetos. Frente a lo que hacen otras historias de España, este libro propone un camino de estudio distinto, pues rastrea la existencia milenaria del país en su cultura material y emocional. Alejada de cualquier esencialismo, no narra lo que los objetos «son», sino lo que han representado para los españoles a través de los tiempos. Es esta una relación identitaria, pero, por encima de todo, pasional y utilitaria. Los españoles han proyectado en los 82 objetos que componen la obra múltiples contenidos simbólicos. En los textos dedicados a cada uno de ellos hay elementos descriptivos -qué es cada uno-, analíticos -de qué manera se configuró su contexto- y relacionales -de qué forma fueron considerados únicos en cada momento histórico, cómo adquirieron una pátina o configuración determinada-. Pero, sobre todo, portan significado por el aura que contienen, el amor con que fueron fabricados y la evocación que provocan en nosotros. Prehistoria, España romana, Edad Media, los Austrias, Ilustración, siglo XIX, siglo XX y el tiempo presente son las partes en que está dividido 82 objetos que cuentan un país. Sigue, por tanto, una cronología clásica, aunque puesta al día. El número y selección de los objetos se ha basado en un intento de acumulación densa y en caracterizaciones canónicas procedentes de diversos ámbitos y disciplinas. No asumen distinciones arcaicas entre «alta cultura» y «cultura popular»; tampoco son siempre materialidades concretas, sino en ocasiones difusas y flexibles, pues el ingenio de los españoles se ha plasmado a lo largo de los siglos en los más variados campos del arte y la cultura, la moda, la política, la cartografía, la numismática, la ciencia o la ingeniería. Reseña: «La historia de España por una original vía paralela a los hechos, a través de los objetos que la jalonan.» Miguel Lorenci, Colpisa «Imágenes y textos de calidad que, a modo de rompecabezas bien encajado, nos reflejan como pueblo y promueven una introspección colectiva que sobrecoge, emociona y estimula a partes iguales.» Ignacio Andrade/Carlos Rubio, Entrevistado
