In this beautifully written and deeply researched study, Hannah Frank provides an original way to understand American animated cartoons from the Golden Age of animation (1920–1960). In the pre-digital age of the twentieth century, the making of cartoons was mechanized and standardized: thousands of drawings were inked and painted onto individual transparent celluloid sheets (called “cels”) and then photographed in succession, a labor-intensive process that was divided across scores of artists and technicians. In order to see the art, labor, and technology of cel animation, Frank slows cartoons down to look frame by frame, finding hitherto unseen aspects of the animated image. What emerges is both a methodology and a highly original account of an art formed on the assembly line.

### **The Paths of Heaven The Evolution of Airpower Theory**

.1997 Airpower is not widely understood. Even though it has come to play an increasingly important role in both peace and war, the basic concepts that define and govern airpower remain obscure to many people, even to professional military officers. This fact is largely due to fundamental differences of opinion as to whether or not the aircraft has altered the strategies of war or merely its tactics. If the former, then one can see airpower as a revolutionary leap along the continuum of war; but if the latter,

then airpower is simply another weapon that joins the arsenal along with the rifle, machine gun, tank, submarine, and radio. This book implicitly assumes that airpower has brought about a revolution in war. It has altered virtually all aspects of war: how it is fought, by whom, against whom, and with what weapons. Flowing from those factors have been changes in training, organization, administration, command and control, and doctrine. War has been fundamentally transformed by the advent of the airplane.

**Retroaktive Avantgarde** Anna Seidel. 2022-01-17 Etwa 100 Jahre nach dem ersten futuristischen Manifest, das den Auftakt für eine ganze Reihe avantgardistischer Programmschriften bedeutete, bedienen sich deutschsprachige Pop-Gruppen wie Tocotronic, Locas In Love und Ja, Panik erneut der Textsorte. Titel wie »Kapitulation« und »The Angst and the Money« lassen schon erahnen, dass es sich hierbei kaum um selbstbewusste Kampfansagen handelt, wie es »Musik ist eine Waffe!« von Ton Steine Scherben noch war. Die Diskurspopgruppen verorten sich mit ihren Manifesten zwischen Kampf und Verweigerung, Innovation und Retromanie, Pop und Politik, Ästhetik und Verkrampfung, Kapitalismuskritik und Business. In kulturpoetischen Analysen wird ein breites Archiv an Pop-Manifesten mitsamt ihren Kontexten in dieser Fülle zum ersten Mal überhaupt erschlossen. The Manifesto of Futurism was first published more than a century ago. Since then, a whole range of avant-garde programmes have followed. There is even a belief that the present is a 'post-manifesto-era'. Yet German-speaking pop groups, such as Tocotronic, Locas In Love, and Ja, Panik still publish them. With titles like Kapitulation and The Angst and the Money the bands' manifestos are distinct for their lack of a call to action. Instead, their publications connect old ideas about imagined futures with a current reality that fails to live up expectations or promise emancipation. This text examines these manifestos, analyzes their contexts and lines of tradition informed

by New Historicism and the poetics of culture as well as pop theories. Im Rahmen des SFB »Transformationen des Populären« wurde ein Podcast-Gespräch mit der Autorin zu ihrem Buch veröffentlicht. Das Gespräch der Autorin mit Jochen Venus ist zu hören unter:

The language could be compared to the building blocks of music (time signatures, chord progressions, verse) - no matter the instruments, style or time period - these building blocks come into play. Feel and sensation are similar building blocks when

**The Language Instinct** Steven Pinker.2010-12-14 A brilliant, witty, and altogether satisfying book. — New York Times Book Review The classic work on the development of human language by the world's leading expert on language and the mind In *The Language Instinct*, the world's expert on language and mind lucidly explains everything you always wanted to know about language: how it works, how children learn it, how it changes, how the brain computes it, and how it evolved. With deft use of examples of humor and wordplay, Steven Pinker weaves our vast knowledge of language into a compelling story: language is a human instinct, wired into our brains by evolution. *The Language Instinct* received the William James Book Prize from the American Psychological Association and the Public Interest Award from the Linguistics Society of America. Acoustic Properties Tom McEnaney. 2017-06-15 *Acoustic Properties: Radio, Narrative, and the New Neighborhood of the Americas* discovers the prehistory of wireless culture. It examines both the coevolution of radio and the novel in Argentina, Cuba, and the United States from the early 1930s to the late 1960s, and the various populist political climates in which the emerging medium of radio became the chosen means to produce the voice of the people. Based on original archival research in Buenos Aires, Havana, Paris, and the United States, the book develops a literary media theory that understands sound as a transmedial phenomenon and radio as a transnational medium. Analyzing the construction of new social and political relations in the wake of the United States' 1930s Good Neighbor Policy, *Acoustic Properties* challenges standard narratives of hemispheric influence through new readings of Richard Wright's cinematic work in Argentina, Severo Sarduy's radio plays in France, and novels by John Dos Passos, Manuel Puig, Raymond Chandler, and Carson McCullers. Alongside these writers, the book also explores Che Guevara and Fidel Castro's *Radio Rebelde*, FDR's fireside chats, Félix Caignet's invention of the radionovela in Cuba, Evita Perón's populist melodramas in Argentina, Orson Welles's experimental New Deal radio, Cuban and U.S. "radio wars," and the 1960s African American activist Robert F. Williams's proto-black power *Radio Free Dixie*. From the doldrums of the Great Depression to the tumult of the Cuban Revolution, *Acoustic Properties* illuminates how novelists in the radio age converted writing into a practice of listening, transforming realism as they struggled to channel and shape popular power.

**Emerging Viral Diseases** Institute of Medicine, Board on Global Health, Forum on Microbial Threats. 2015-03-19 In the past half century, deadly disease outbreaks caused by novel viruses of animal origin - Nipah virus in Malaysia, Hendra virus in Australia, Hantavirus in the United States, Ebola virus in Africa, along with HIV (human immunodeficiency virus), several influenza subtypes, and the SARS (sudden acute respiratory syndrome) and MERS (Middle East respiratory syndrome) coronaviruses - have underscored the urgency of understanding factors influencing viral disease emergence and spread. *Emerging Viral Diseases* is the summary of a public workshop hosted in March 2014 to examine factors driving the appearance, establishment, and spread of emerging, re-emerging and novel viral diseases; the global health and economic impacts of recently emerging and novel viral diseases in humans; and the scientific and policy approaches to improving domestic and international capacity to detect and respond to global outbreaks of infectious disease. This report is a record of the presentations and discussion of the event.

current populist backlash against globalization. Raghuram Rajan, distinguished University of Chicago professor, former IMF chief economist, head of India's central bank, and author of the 2010 FT-Goldman-Sachs Book of the Year *Fault Lines*, has an unparalleled vantage point onto the social and economic consequences of globalization and their ultimate effect on our politics. In *The Third Pillar* he offers up a magnificent big-picture framework for understanding how these three forces--the state, markets, and our communities--interact, why things begin to break down, and how we can find our way back to a more secure and stable plane. The third pillar of the title is the community we live in. Economists all too often understand their field as the relationship between markets and the state, and they leave squishy social issues for other people. That's not just myopic, Rajan argues; it's dangerous. All economics is actually socioeconomics - all markets are embedded in a web of human relations, values and norms. As he shows, throughout history, technological phase shifts have ripped the market out of those old webs and led to violent backlashes, and to what we now call populism. Eventually, a new equilibrium is reached, but it can be ugly and messy, especially if done wrong. Right now, we're doing it wrong. As markets scale up, the state scales up with it, concentrating economic and political power in flourishing central hubs and leaving the periphery to decompose, figuratively and even literally. Instead, Rajan offers a way to rethink the relationship between the market and civil society and argues for a return to strengthening and empowering local communities as an antidote to growing despair and unrest. Rajan is not a doctrinaire conservative, so his ultimate argument that decision-making has to be devolved to the grass roots or our democracy will continue to wither, is sure to be provocative. But even setting aside its solutions, *The Third Pillar* is a masterpiece of explication, a book that will be a classic of its kind for its offering of a wise, authoritative and humane explanation of the forces that have

wrought such a sea change in our lives.

**Trouble Boys** Bob Mehr.2016-03-01 Trouble Boys is the first definitive, no-holds-barred biography of one of the last great bands of the twentieth century: The Replacements. With full participation from reclusive singer and chief songwriter Paul Westerberg, bassist Tommy Stinson, guitarist Slim Dunlap, and the family of late band co-founder Bob Stinson, author Bob Mehr is able to tell the real story of this highly influential group, capturing their chaotic, tragic journey from the basements of Minneapolis to rock legend. Drawing on years of research and access to the band's archives at Twin/Tone Records and Warner Bros. Mehr also discovers previously unrevealed details from those in the group's inner circle, including family, managers, musical friends and collaborators.

along a story of discovery and invention unfolding in speeches and images, letters and poetry, unprecedented feats of scholarship and imagination. In these myriad, multiform, endlessly changing expressions of the American experience, the authors and editors of this volume find a new American history. In more than two hundred original essays, *A New Literary History of America* brings together the nation's many voices. From the first conception of a New World in the sixteenth century to the latest re-envisioning of that world in cartoons, television, science fiction, and hip hop, the book gives us a new, kaleidoscopic view of what "Made in America" means. Literature, music, film, art, history, science, philosophy, political rhetoric—cultural creations of every kind appear in relation to each other, and to the time and place that give them shape. The meeting of minds is extraordinary as T. J. Clark writes on Jackson Pollock, Paul Muldoon on Carl Sandburg, Camille Paglia on Tennessee Williams, Sarah Vowell on Grant Wood's *American Gothic*, Walter Mosley on hard-boiled detective fiction, Jonathan Lethem on Thomas Edison, Gerald Early on Tarzan, Bharati Mukherjee on *The Scarlet Letter*, Gish Jen on *Catcher in the Rye*, and Ishmael Reed on *Huckleberry Finn*. From Anne Bradstreet and John Winthrop to Philip Roth and Toni Morrison, from Alexander Graham Bell and Stephen Foster to Alcoholics Anonymous, Life, Chuck Berry, Alfred Hitchcock, and Ronald Reagan, this is America singing, celebrating itself, and becoming something altogether different, plural, singular, new. **No Medium** Craig Dworkin. 2013-02-15 Close readings of ostensibly “blank” works—from unprinted pages to silent music—that point to a new understanding of media. In *No Medium*, Craig Dworkin looks at works that are blank, erased, clear, or silent, writing critically and substantively about works for which there would seem to be not only nothing to see but nothing to say. Examined closely, these ostensibly contentless works of art, literature, and music point to a new understanding of media and the limits of the artistic object. Dworkin considers works predicated on blank sheets of paper, from a fictional collection of poems in Jean Cocteau's *Orphée* to the actual publication of a ream of typing paper as a book of poetry; he compares Robert Rauschenberg's *Erased De Kooning Drawing* to the artist Nick Thurston's erased copy of Maurice Blanchot's *The Space of Literature* (in which only Thurston's marginalia were visible); and he scrutinizes the sexual politics of photographic representation and the implications of obscured or obliterated

subjects of photographs. Reexamining the famous case of John Cage's 4'33", Dworkin links Cage's composition to Rauschenberg's White Paintings, Ken Friedman's Zen for Record (and Nam June Paik's Zen for Film), and other works, offering also a "guide to further listening" that surveys more than 100 scores and recordings of "silent" music. Dworkin argues that we should understand media not as blank, base things but as social events, and that there is no medium, understood in isolation, but only and always a plurality of media: interpretive activities taking place in socially inscribed space.

*The Future of Making* Tom Wujec.2017 Prepare yourself: How things are made is changing. The digital and physical are uniting, from innovative methods to sense and understand our world to machines that learn and design in ways no human ever could; from 3D printing to materials with properties that literally stretch possibility; from objects that evolve to systems that police themselves. The results will radically change our world--and ourselves. The Future of Making illustrates these transformations, showcasing stories and images of people and ideas at the forefront of this radical wave of innovation. Designers, architects, builders, thought leaders--creators of all kinds--have contributed to this look at the materials, connections, and inventions that will define tomorrow. But this book doesn't just catalog the future; it lays down guidelines to follow, new rules for how things are created, that make it the ultimate handbook for anyone who wants to embrace the true future of making.

**Rules of Play** Katie Salen Tekinbas, Eric Zimmerman.2003-09-25  
An impassioned look at games and game design that offers the

most ambitious framework for understanding them to date. As pop culture, games are as important as film or television—but game design has yet to develop a theoretical framework or critical vocabulary. In *Rules of Play* Katie Salen and Eric Zimmerman present a much-needed primer for this emerging field. They offer a unified model for looking at all kinds of games, from board games and sports to computer and video games. As active participants in game culture, the authors have written *Rules of Play* as a catalyst for innovation, filled with new concepts, strategies, and methodologies for creating and understanding games. Building an aesthetics of interactive systems, Salen and Zimmerman define core concepts like play, design, and interactivity. They look at games through a series of eighteen game design schemas, or conceptual frameworks, including games as systems of emergence and information, as contexts for social play, as a storytelling medium, and as sites of cultural resistance. Written for game scholars, game developers, and interactive designers, *Rules of Play* is a textbook, reference book, and theoretical guide. It is the first comprehensive attempt to establish a solid theoretical framework for the emerging discipline of game design.

during World War II The Tango War by Mary Jo McConahay fills an important gap in WWII history. Beginning in the thirties, both sides were well aware of the need to control not just the hearts and minds but also the resources of Latin America. The fight was often dirty: residents were captured to exchange for U.S. prisoners of war and rival spy networks shadowed each other across the continent. At all times it was a Tango War, in which each side closely shadowed the other's steps. Though the Allies triumphed, at the war's inception it looked like the Axis would win. A flow of raw materials in the Southern Hemisphere, at a high cost in lives, was key to ensuring Allied victory, as were military bases supporting the North African campaign, the Battle of the Atlantic and the invasion of Sicily, and fending off attacks on the Panama Canal. Allies secured loyalty through espionage and diplomacy—including help from Hollywood and Mickey Mouse—while Jews and innocents among ethnic groups—Japanese, Germans—paid an unconscionable price. Mexican pilots flew in the Philippines and twenty-five thousand Brazilians breached the Gothic Line in Italy. The Tango War also describes the machinations behind the greatest mass flight of criminals of the century, fascists with blood on their hands who escaped to the Americas. A true, shocking account that reads like a thriller, The Tango War shows in a new way how WWII was truly a global war. *Library of Congress Catalogs* Library of Congress.1976

as an introduction to clinical research, or for those planning specific studies within therapeutic or disease areas. BRITISH JOURNAL OF SURGERY, Vol. 92, No. 2, February 2005 The book's main concept is to describe the impact of clinical trials on the practice of medicine. It separates the information by therapeutic area because the impact of clinical trials, the problems encountered, and the numbers of trials in existence vary tremendously from specialty to specialty. The sections provide a background to the disease area and general clinical trial methodology before concentrating on particular problems experienced in that area. Specific examples are used throughout to address these issues. The Textbook of Clinical Trials, Second Edition: Highlights the various ways clinical trials have influenced the practice of medicine in many therapeutic areas Describes the challenges posed by those conducting clinical trials over a range of medical specialities and allied fields Additional therapeutic areas are included in this Second Edition to fill gaps in the First Edition as the number and complexity of trials increases in this rapidly developing area Newly covered or updated in the Second Edition: general surgery, plastic surgery, aesthetic surgery, palliative care, primary care, anaesthesia and pain, transfusion, wound healing, maternal and perinatal health, early termination, organ transplants, ophthalmology, epilepsy, infectious disease, neuro-oncology, adrenal, thyroid and urological cancers, as well as a chapter on the Cochrane network An invaluable resource for pharmaceutical companies, the Textbook of Clinical Trials, Second Edition appeals to those working in contract research organizations, medical departments and in the area of public health and health science alike.

thinking and presents fine-grained ethnographies of the practices of everyday life in London. In doing so, it charts a unique perspective on the city that integrates ethnographies of daily life with an analysis of material culture. The first part of the volume considers the residential sphere of urban life, discussing in detailed case studies ordinary residential streets, housing estates, suburbia and London's mobile 'linear village' of houseboats. The second part analyses the public sphere, including ethnographies of markets, a park, the social rhythms of a taxi rank, and graffiti and street art. London's Urban Landscape returns us to the everyday lives of people and the manner in which they understand their lives. The deeply sensuous character of the embodied experience of the city is invoked in the thick descriptions of entangled relationships between people and places, and the paths of movement between them. What stories do door bells and house facades tell us about contemporary life in a Victorian terrace? How do antiques acquire value and significance in a market? How does living in a concrete megastructure relate to the lives of the people who dwell there? These and a host of other questions are addressed in this fascinating book that will appeal widely to all readers interested in London or contemporary urban life.
