Scuba James A. Lapenta.2016-11-10 Building on his first book, SCUBA: A Practical Guide for the New Diver, James Lapenta addresses what is most often the next step in diver training. Advanced Level or Advanced Open Water training is often taken by divers to gain additional skills and knowledge. It is also taken to allow them to gain access to more challenging dives and dive sites. These also pose a greater degree of risk to the individual. Unfortunately some advanced classes are no more than a taste or tour of advanced level dives. The divers do not get the new knowledge and skills required to safely embark on these dives. In order to safely pursue these dives James has outlined the steps to take to reduce the risk of injury and worse. From describing the dives to offering advice on the content one should expect, as well as selecting an instructor, he offers new and not so new divers guidance. Additional sections on equipment options, air supply management, dive planning, and dive selection for maximum learning potential are looked at. Also included is a section on a subject often overlooked in recreational SCUBA diving - the after-effects of a diving accident and rescue/recovery on the rescuer and witnesses to the event. Post Traumatic Stress in Recreational Dive Rescues is a real possibility and one that must be looked at when executing dives with greater risk. Safety in training and after training is the heart of this work and the driving force behind its publication. James has experienced the best in training and that which left something to be desired. He gives examples of both throughout the work. If you do not have his first book, it is highly recommended that you also acquire it as a companion to this one. While they do contain some sections of the same information, there are sections in the first book that are not included in this that are highly beneficial.

Scuba James A. Lapenta.2014-02-06 SCUBA is a fun, relaxing, educational, interesting, and -- if approached properly -- safe activity, it is nonetheless a sport that has risks. SCUBA diving is in fact an extreme sport that can injure or even kill very quickly, and in some very nasty ways. What we are doing is entering an alien environment that is normally hostile to human life. We cannot breathe in water without some kind of mechanical assistance. These are facts and the details should be covered in every Open Water (OW) class. All too often in today's society, however, people do not want to take the time to properly prepare and get the education to safely take on new tasks. Some agencies appear to have responded to this by developing training programs that turn out high numbers of certified divers in shorter time frames, necessitating the reduction of time spent on what I consider to be some necessary basic skills. While this has resulted in great numbers of new divers entering the water, it has not resulted in many of those divers staying in the water. New divers are often given just enough training to enable them to dive in the most benign conditions under close supervision. Even then, there are still those who find out their initial training was just not adequate. It is at this point that they either make the decision to get more training or they leave the sport. The latter happens all too often. The former, when it does happen, does not always occur for the right reasons. Students should return to training to expand their diving and learn new skills; they should not have to return for new training just to be able to enjoy the sport safely. To require students to come back for basic information is something I find very troubling, and in some cases, has actually cost divers their lives. A lack of rescue instruction has resulted in a number of diver deaths when buddies did not know how to drop weights, support a diver at the surface, or even stay in contact with their buddy. This is another area frequently talked about, but all too often not actually put into practice. The concept of always diving with a buddy and just what that means in the real world is often given too little attention. Unfortunately, it is impossible to foresee every conceivable situation that can arise, but there are many basic issues that can be covered. The following chapters will hopefully address much of what is being overlooked or delayed in many programs as they exist today. It is my hope that this information also finds its way into the hands of those who have not yet begun the training process. I have included a chapter on how to select an instructor based on the quality of instruction and the content of the course. In some cases, these classes may cost more than the less comprehensive courses also available, but usually they do not. In fact, when you consider the additional skills and education gained from a more comprehensive course, you will find that you have received much more value for each dollar spent. In addition, you gain priceless benefits in the form of greater confidence, enjoyment, skills, and -- most importantly -- safety. Enjoy and dive safe

Disappearing Destinations Andrew L. Jones,Michael R. Phillips,M. Phillips.2011 Current climatic and environmental trends mean that a large number of important coastal destinations across the globe are under threat of change or gradual disappearance. Many of these locations are also significant tourist destinations, such as the Great Barrier Reef, the Everglades National Park or large swathes of the Mediterranean basin. Tourism activity both exacerbates the problem and highlights the importance of protecting these often fragile environments. This book discusses threats to, and consequences of, tourism growth and the impacts of climate change on such coastal zones. It examines policy initiatives, local and national options for managing the potential crisis and recommends steps and management options towards ameliorating projected impacts on coastal tourism infrastructure. This is an important book for researchers and students of leisure and tourism, land-use planning, environmental and coastal management and all those interested in and working with the environment, conservation and sustainability.

The Last Blue Mountain Ralph Barker.2020-03-05 'When an accident occurs, something may emerge of lasting value, for the human spirit may rise to its greatest heights. This happened on Haramosh.' The Last Blue Mountain is the heart-rending true story of the 1957 expedition to Mount Haramosh in the Karakoram range in Pakistan. With the summit beyond reach, four young climbers are about to return to camp. Their brief pause to enjoy the view and take photographs is interrupted by an avalanche which sweeps Bernard Jillott and John Emery hundreds of feet down the mountain into a snow basin. Miraculously, they both survive the fall. Rae Culbert and Tony Streather risk their own lives to rescue their friends, only to become stranded alongside them. The group's efforts to return to safety are increasingly desperate, hampered by injury, exhaustion and the loss of vital climbing gear. Against the odds, Jillott and Emery manage to climb out of the snow basin and head for camp, hoping to reach food, water and assistance in time to save themselves and their companions from an icy grave. But another cruel twist of fate awaits them. An acclaimed mountaineering classic in the same genre as Joe Simpson's Touching the Void , Ralph Barker's The Last Blue Mountain is an epic tale of friendship and fortitude in the face of tragedy.

40 Dives, 40 Dishes Al and Freda Wright.2018-08-28 It is unusual that a scuba diving liveaboard should be known for anything other than the quality of the diving service it offers. The MV *Salutay* is that rare exception. Not only does she offer a top and innovative diving service and access to some of the best diving around the United Kingdom and Northern France, she also has divers returning every year because of the wonders that her galley produces. Chef Freda Wright has been getting requests for recipes for many years and generations of divers have begged her to produce a cookbook, so that they can continue to enjoy her mouth-watering meals and snacks when they go home. This is the cookbook that they wanted: a selection of soups, main courses, desserts and snacks that divers aboard the MV *Salutay* have been enjoying for decades and that now you can cook at home for family and friends. As well as the easy-to-follow recipes, this book also includes diving tales from the three decades that Freda and her husband, captain and technical diving pioneer Al Wright, have been exploring British, Irish and French waters. From the story of how Al discovered three major shipwrecks off Malin Head, Ireland at the dawn of the technical diving revolution to diving with seals in St. Kilda and descriptions of exploring the D-Day wrecks in the Baie de Seine, these anecdotes are clips of British diving history: essential reading for new divers and veterans alike.
